INSTITUTION’S CRA RATING

INSTITUTION’S CRA RATING: This institution is rated **SATISFACTORY**.

The following table indicates the performance level of Regions Bank with respect to the lending, investment, and service tests.

PERFORMANCE LEVELS	Regions Bank		
	PERFORMANCE TESTS		
	Lending Test*	Investment Test	Service Test
Outstanding		X	
High Satisfactory	X		X
Low Satisfactory			
Needs to Improve			
Substantial Noncompliance			

**Note: The lending test is weighted more heavily than the investment and service tests when arriving at an overall rating.

Major factors contributing to this rating include:

- The overall geographic distribution of HMDA²-reportable lending reflects adequate penetration in low- and moderate-income geographies.
- The overall geographic distribution of small business lending reflects good penetration in low- and moderate-income geographies.
- The overall distribution of HMDA-reportable lending among borrowers of different income levels is adequate.
- The overall distribution of small business lending among businesses of different sizes is good.
- The bank makes a relatively high level of community development loans.
- The bank makes an excellent level of qualified community development investments in response to assessment area community development needs.
- Retail delivery systems are reasonably accessible to the geographies and individuals of different income levels in the bank’s assessment areas.
- The bank provides a relatively high level of community development services.

² Home mortgage loans are reported by institutions on the Home Mortgage Disclosure Act (HMDA) Loan Application Register (LAR). The register includes home purchase, refinance, home improvement, and multifamily loans originated and purchased by the institution.

DESCRIPTION OF INSTITUTION

Regions Bank is a commercial bank headquartered in Birmingham, Alabama, that operates across 15 states, including Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, and Texas. As of December 31, 2020, the bank had approximately 1,368 branches across its footprint. Regions received a “Satisfactory” rating at its previous Community Reinvestment Act (CRA) Performance Evaluation (PE) dated March 4, 2019. No known legal impediments exist that would restrain the bank from meeting the credit needs of its assessment areas (AAs).

For this examination, 149 assessment areas were reviewed. Deposits in these assessment areas totaled \$132.9 billion as of June 30, 2020. Descriptions of the full-scope assessment areas can be found in the applicable state or multistate sections of this report.

Business Structure

Regions Financial Corporation is a top 40 financial holding company headquartered in Birmingham, AL, with consolidated assets of approximately \$162 billion as of December 31, 2021. Regions Bank, the corporation’s bank subsidiary, is a state member bank and operates in 15 states across the South and Midwest with approximately 1,400 banking offices.

Since the previous examination, the Regions Community Development Corporation (CDC) was formed in 2020 to be a catalyst for revitalizing communities and improving the lives of economically disadvantaged families in the Regions footprint. The mission of the Regions CDC is to make life better by providing debt and/or equity financing for projects and entities with a community development purpose.

The objectives of the Regions CDC are:

- To become a leader in supporting Community Development Financial Institutions (CDFIs) in the Region footprint
 - Provide equity and equity equivalent capital
 - Foster collaborations with and among CDFI’s
 - Drive measurable impact and outcomes for communities
- To make responsible strategic impact equity investments
 - Investments in funds that provide communities lacking access to traditional sources of capital
- To provide project financing for new construction and rehabilitation
 - Single and multifamily (non LIHTC) affordable housing for properties with rent restrictions or subsidy agreements
 - Targeting workforce housing projects, neighborhood redevelopment and job creation
- To provide greater flexibility in pricing and structure than traditional bank lending
 - RCDC financing can be independent of or in conjunction with Regions Bank but is intended to always benefit underserved communities within the Regions Bank footprint.

On October 1, 2021, Regions announced it had completed its acquisition of home improvement lender EnerBank USA. EnerBank is one of America's largest point-of-sale lenders serving homeowners and contractors through a series of loan programs and digital solutions that support a wide range of home improvement needs. Lending services are delivered directly to homeowners at the point of sale via contractors who are part of EnerBank's national network. At the time of the acquisition, the EnerBank team included approximately 485 associates. The company has served homeowners and contractors in all 50 states, with particular strength in much of Regions' retail banking footprint across the South, Midwest, and Texas. Over time, the EnerBank USA name will consolidate into the Regions Bank brand. Before its acquisition, EnerBank was regulated by the FDIC and maintains only one branch in the Salt Lake City, Utah assessment area. EnerBank operated under a CRA strategic plan. Regions Bank will continue to operate under the plan for the Salt Lake City area until the plan's expiration on December 31, 2024 as the Federal Reserve Board of Governors reviewed and approved Regions Bank's request to continue to operate under the CRA strategic plan for EnerBank for the Salt Lake City assessment area through the expiration date. Due to the timing of the acquisition, it will not impact the current CRA examination; however, it will be factored into the next CRA evaluation.

Credit Products and Loan Portfolio

Regions Bank offers a wide variety of consumer, residential real estate, commercial, and agricultural loan products to fulfill the credit needs of the residents and businesses in its assessment areas. Consumer loan products include auto loans, personal lines of credit, installment loans, home equity loans, mortgage loans, and student loans. The bank also offers construction and commercial loan products including lines of credit, term loans, bridge loans, business credit cards, and Small Business Administration (SBA) loans.

COVID-19 Response

Regions participated in the Paycheck Protection Program (PPP), which was established as part of the Coronavirus Aid, Relief, and Economic Security Act. PPP loans were designed to help businesses retain workers and staff during the economic crisis caused by the pandemic. PPP loans in amounts less than \$1.0 million were considered retail loans while loans greater than \$1 million were considered as community development loans if they also had a primary purpose of community development as defined under the CRA. Generally, loans to small businesses with gross annual revenues \$1 million or less that create or retain jobs for low- or moderate-income individuals or in low- or moderate-income geographies, or that otherwise meet the economic development "size" and "purpose" tests, qualify as community development loans. PPP loans also qualify as community development if they help to revitalize or stabilize low- or moderate-income geographies or distressed or underserved nonmetropolitan middle-income geographies by helping to retain businesses in these geographies.

Through the year-plus life of Regions' PPP effort, the institution recorded the following achievements, with considerable portions qualifying for CRA credit on the current exam's lending test:

- Originated almost 79,000 loans totaling more than \$6.7 billion and impacting at least 854,808 employees
- Average loan was \$85,372.12, resulting in a per-employee average of \$7,760.92
- 26.1 percent of loans and 31.1 percent of capital went to clients in LMI census tracts
- 81 percent of loans and 23.9 percent of capital went to small businesses with 10 or fewer employees
- 96.8 percent of loans and 53.4 percent of capital went to small businesses with 50 or fewer employees

- 28.6 percent of loans and 32.1 percent of capital went to small businesses located in majority-minority census tracts

Community development lending data submitted for the exam included 3,925 PPP loans for consideration. These represented larger loans that met a community development purpose, but also smaller loans that were removed from CRA Small Business LAR. For example, 2,405 PPP loans of various sizes went to nonprofit organizations. Many of these loans were to long-time Regions community partners, including:

- Paraquad in St. Louis, MO
- Build Up in Birmingham, AL
- Hispanic Interest Coalition of Alabama in Birmingham, AL
- The Foundry Ministries in Birmingham, AL
- Binghamton Development Corporation in Memphis, TN
- Affordable Housing Resources in Nashville, TN
- Pinellas County Urban League in St. Petersburg, FL

Also in response to the pandemic, customer assistance-related financial services included:

- Penalty-free CD withdrawals
- Waiver of standard fees for excessive withdrawals from all savings and money market accounts
- Loan payment deferral and extension with no late fees
- New or incremental short-term liquidity requests
- Payment extension with no late fees for credit cards
- Consumer mortgage payment forbearance and payment deferment for 90 days
- Suspending initiation of new repossessions of automobiles and other vehicles for 30 days
- Waived late charges
- Waived over-limit charges
- Waived overdraft fees
- Increased cash availability at ATMs
- Increased mobile deposit amount

As with forbearance, the bank responded to payment-hardship-creating pandemic conditions by avoiding foreclosure on mortgaged properties. Within days of the initial COVID-19 lockdown, one of the customer-assistance measures Regions implemented included suspending new residential property foreclosures on consumer real estate loans for 30 days.

More detailed discussion of the institution's response to the pandemic can be found in the Full-Scope Review sections of the report.

The following table shows the composition of Regions Bank’s loan portfolio as of December 31, 2018, 2019, and 2020. For all three years, commercial and industrial loans represented the largest volume of loans by dollar, followed closely by one- to four-family dwelling loans. Nonfarm, nonresidential real estate represented at least 14.0 percent of the bank’s loans over the three years, then followed by loans to individuals ranging from 7.9 percent to 11.3 percent. Agricultural loans and farmland lending make up less than 1.0 percent of the loan portfolio.

COMPOSITION OF LOAN PORTFOLIO						
Loan Type	12/31/2020		12/31/2019		12/31/2018	
	\$ (000s)	Percent	\$ (000s)	Percent	\$ (000s)	Percent
Construction and Development	2,768,000	3.8%	2,294,000	3.3%	2,536,216	3.7%
Secured by One- to Four- Family Dwellings	24,798,000	34.1%	22,995,000	33.1%	23,452,879	33.8%
Other Real Estate: Farmland	173,000	0.2%	198,000	0.3%	237,340	0.3%
Multifamily	1,265,000	1.7%	1,084,000	1.6%	902,292	1.3%
Nonfarm nonresidential	10,138,000	14.0%	10,176,000	14.7%	9,752,696	14.1%
Commercial and Industrial	27,535,000	37.9%	24,694,000	35.6%	24,340,809	35.1%
Loans to Individuals	5,751,000	7.9%	7,692,000	11.1%	7,866,012	11.3%
Agricultural Loans	221,000	0.3%	244,000	0.4%	298,735	0.4%
Total	\$72,649,000	100.00%	\$69,377,000	100.00%	\$69,386,979	100.00%

* This table does not include the entire loan portfolio. Specifically, it excludes loans to depository institutions, bankers acceptances, lease financing receivables, obligations of state and political subdivisions, and other loans that do not meet any other category. Contra assets are also not included in this table.

Loan Portfolio Trend

Regions Bank’s loan portfolio includes products that provide flexible repayment and/or underwriting guidelines to help meet the credit needs of low- and moderate-income (LMI) borrowers and small businesses. Regions Bank engages in affordable lending by providing a comprehensive suite of affordable housing products. Most notably, the bank offers the Regions Affordable 97 and Affordable 100 products. These fixed-rate mortgage products include low closing costs, affordable monthly payments, and allow 97.0 percent and 100.0 percent financing without mortgage insurance for low- and moderate-income borrowers. Regions also originates FHA loans for home purchase and refinances and works with many state and local agencies that offer first-time homebuyer mortgages and/or down payment assistance for LMI borrowers. In May 2020, Regions launched the Regions FirstHome Assist grant Down Payment Assistance (DPA) Program. The program assists LMI borrowers by providing down payment funds to purchase their first home. Finally, the institution maintains a team of dedicated CRA lenders throughout its footprint that focus on lending to LMI borrowers and providing financial education in the bank’s critical markets.

For small businesses, Regions Bank offers a business purpose line of credit product up to \$150,000 and an unsecured business credit card with credit limits up to \$50,000. Both products are designed to meet the short-term spending needs of small businesses. In addition, Regions Bank is a preferred SBA lender and offers a suite of SBA loan products to small businesses.

SCOPE OF EXAMINATION

The CRA performance evaluation assesses the bank’s record of meeting the credit needs of its community, including low- and moderate-income neighborhoods, within the context of information such as asset size and financial condition of the institution, competitive factors, as well as the economic and demographic characteristics of its defined assessment area. Regions Bank’s CRA performance evaluation was based on CRA activities within its assessment area using the Large Institution Examination Procedures. “Large institutions” have total assets of at least \$1.384 billion for December 31 of both of the prior two years. Institutions meeting the threshold size are evaluated using three separately rated tests: a lending test; a community investments test, and a community services test in light of the community needs within its assessment areas and the capacity of the bank.

For the purposes of this exam, Regions had a total of 149 CRA assessment areas across 15 states. Regions is an interstate bank; therefore, the scope of this evaluation includes a full-scope review of at least one assessment area in each state where the bank has branches, and a minimum of one assessment area from each multistate metropolitan statistical area/metropolitan division (MSA/MD). Each assessment area was reviewed for lending, investment and service performance using either full-scope or limited-scope examination procedures. There were 24 assessment areas chosen for a full-scope review, including six multistate metropolitan statistical areas (MSAs). Criteria used to select full-scope assessment areas include the volume of HMDA-reportable and CRA small business lending by number of loans and dollar amount, as a percentage of statewide lending activity; deposit market share; number of branches; percentage of statewide deposits; amount of community development activity; and other nonfinancial considerations. Full-scope assessment areas represent the most active markets in each state based on these criteria. Where similar activity was noted, full-scope assessment areas were considered that were not selected at the previous examination.

Assessment areas receiving full-scope reviews are:

- Alabama: Birmingham, Mobile
- Arkansas: Little Rock
- Florida: Orlando, Tampa
- Georgia: Atlanta
- Illinois: Southern IL
- Indiana: Indianapolis
- Iowa: Waterloo
- Kentucky: Southwest Kentucky
- Louisiana: Baton Rouge, New Orleans
- Mississippi: Jackson
- Missouri: Springfield
- North Carolina: Charlotte
- South Carolina: Hilton Head-Bluffton-Beaufort
- Tennessee: Nashville
- Texas: Houston
- Multistate: Augusta, Chattanooga, Columbus, Memphis, St. Louis, Texarkana

The state of Florida had the highest number of branches and largest concentration of lending activity; as a result, performance in this state received the greatest weight in determining the overall rating for each test and the institution overall, followed by state of Alabama. A description of each state, multistate, and full-scope assessment area is included in the applicable section of this report.

Examination Review Period and Products Reviewed

This evaluation included an analysis of HMDA-reportable loans and CRA small business loans originated between January 1, 2018, and December 31, 2020. To determine the final lending test rating, equal weight was given to lending performance in each year. HMDA-reportable home purchase, refinance loans, and home improvement loans and CRA-reportable small business loans were the major lending products reviewed. Small farm, multifamily, and other purpose loans were not considered due to low activity levels. The analysis did not include other types of consumer loans, credit cards or commercial loans. Retail banking services such as the branch distribution and hours of operation were analyzed using data as December 31, 2020 and included in the service test review.

The community development activity review period was January 1, 2019, to December 31, 2021. Community development loans originated within this timeframe were included in the lending test analysis, and community development investments funded during this period were analyzed as part of the investments test. Investments with community development as a primary purpose that were funded during a prior review period but still outstanding as of December 31, 2021, were also considered. Community development services that took place during the review period were included in the service test review. A loan, investment, or service has community development as a primary purpose when it is designed for the express purpose of revitalizing or stabilizing low- or moderate-income areas, designated disaster areas, or underserved or distressed nonmetropolitan middle-income areas; providing affordable housing for, or community services targeted to, low- or moderate-income persons; or promoting economic development by financing small businesses and farms that meet the requirements set forth in 12 CFR 228.12(g).

Examination Analysis

This evaluation of Regions Bank's record of lending in individual assessment areas includes the use of and comparison to demographic characteristics. The bank's lending performance was evaluated using the 2018 and 2020 FFIEC Census Data and 2015 American Community Survey (ACS) 5-year estimates data. Demographic characteristics of a particular assessment area are useful in assessing a financial institution's record of lending since they provide a means of estimating loan demand and identifying lending opportunities. To understand small business demand, self-reported data on revenue size and geographic location from business entities is collected and published by Dun & Bradstreet. The demographic data should not be construed as defining an expected level of lending in a particular area or to a particular group of borrowers. The data, along with information about housing and economic conditions, is used to establish performance context and evaluate the bank accordingly.

Loans are evaluated to determine the lending activity inside and outside the bank's assessment areas. In addition, loans inside the assessment area are evaluated based on the geographic and borrower income distribution for each assessment area. The geographic distribution of HMDA-reportable loans is assessed by comparing the percentage of loans made in each geography type (low-, moderate-, middle-, and upper- income) to the percentage

of owner-occupied units in each geography type. Small business loans are compared to the percentage of businesses within each geographic income category.

The distribution of HMDA-reportable loans by borrower income is assessed by comparing the percentage of loans made to borrowers in each income category (low-, moderate-, middle-, and upper-income) to the percentage of families in each income category. The distribution of small business loans by borrower revenue is evaluated by comparing the percentage of loans made to businesses in each revenue category (less than or equal to \$1 million and greater than \$1 million) to the percentage of total businesses in each revenue category.

Regions Bank's lending performance was also compared to the performance of aggregate lenders in 2018, 2019, and 2020. Aggregate lenders include all lenders required to report HMDA-reportable and CRA small business lending data within the respective assessment areas. Lending market share is also discussed to give a better understanding of where Regions ranks within the respective geographic areas.

For retail services, the bank's branch distribution analysis was conducted using data as of December 31, 2018 and 2020. Changes in the median family income level of branch locations that resulted from changes in census data between 2018 and 2019 were taken into consideration as part of this analysis. A total of 34 MSA changes to the assessment areas occurred within the review period. Separate demographic tables are included in the full-scope assessment area sections or in the limited-scope appendix for MSAs that changed in these years.

Changes that affected the boundaries of full-scope assessment areas include:

Alabama

- Birmingham: Walker Co. removed from MSA in 2019 and moved to Northern AL AA.

Illinois

- Southern IL: Franklin Co. removed from AA in 2020

Indiana

- Indianapolis: Boone added to AA in 2020

Multistate:

- Memphis: Benton, MS removed from MSA in 2019 and moved to Northern MS AA.

Changes to MSAs that contain full-scope assessment areas but did not affect the boundaries of the assessment areas include:

Alabama

- Mobile: Washington Co. added to MSA in 2019

Louisiana

- Baton Rouge: Assumption Co. added to MSA in 2019

Mississippi

- Jackson: Homes Co. added to the MSA in 2019.

North Carolina

- Charlotte: Anson Co. added to MSA in 2019

Tennessee

- Nashville: Hickman Co. removed from MSA in 2019

Multistate

- Columbus, GA-AL: Stewart and Talbot Co. added to MSA in 2019

Community development activities were reviewed to determine that they have community development as a primary purpose and meet the geographic requirements of the regulation. The eligibility of a loan, investment, or service is based on demographic information available to the bank at the time the community development activity was undertaken. Qualified community development activities were analyzed from both the quantitative and qualitative perspectives to better understand the volume of activity impacting a particular assessment area, the innovativeness of those activities, and their responsiveness to local community development and credit needs. When appropriate, peer comparisons were conducted using annualized metrics to gauge the relative performance of the institution in a particular assessment area.

In order to better understand assessment area community development and credit needs, several sources were used, including contacts with community development practitioners, review of publicly accessible data, information submitted by the institution, and plans that describe the community development environment in local markets. For this evaluation, examiners contacted 22 community organizations from across the bank's footprint and utilized 25 other recent community contact interviews within the bank's assessment areas to gain insight regarding local economic conditions and credit needs. Community contact interviewees represented affordable housing, economic development, social service, and governmental organizations operating inside the bank's assessment areas. These individuals have expertise in their respective fields and are familiar with the economic, social, and demographic characteristics and community development opportunities in the assessment area. Information obtained from these interviews helped establish a context for the communities in which the bank operates and to gather information on the bank's performance.

In most of the bank's markets, community contacts noted that affordable housing was the biggest concern, including the availability of rental units and affordable single-family housing for prospective LMI homebuyers. An abundance of opportunity exists for financial institutions to be creative in financing affordable housing projects, supporting low- and moderate-income homeownership programs, and offering lines of credit to nonprofit developers to purchase and rehabilitate workforce and affordable housing. Community contacts also identified the need for financial education and outreach to promote financial capability and access to financial services for unbanked and underbanked low- and moderate-income populations. Another common concern noted by the contacts was the increased demand for highly skilled labor resulting in a need for workforce development. Education, tools, and resources are needed to help low- and moderate-income individual's access new career opportunities. Finally, many of the community contacts cited small business development as an area of major

need. Opportunities exist for banks to participate in lending programs, increase direct lending and access to credit, provide technical assistance through workshops and other small business education, and support CDFIs engaged in small business lending. More detailed information obtained from individual community contacts is included in the Credit and Community Development Needs section for each assessment area.

The evaluation included consideration of three-CRA related complaints submitted during the review period. The bank has taken appropriate action in response to these complaints.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Lending Test

Lending test performance is rated high satisfactory. Performance in Memphis was excellent, while performance in Augusta, Atlanta, Baton Rouge, Birmingham, Chattanooga, Columbus, Hilton Head, Houston, Indianapolis, Jackson, Little Rock, Mobile, Nashville, St. Louis, and Texarkana was good. Performance was adequate in Charlotte, New Orleans, Orlando, Southern Illinois, Southwest Kentucky, Springfield, Tampa, and Waterloo.

Detailed information about HMDA-reportable and CRA small business loans can be found in Appendices G and H for full-scope and limited-scope assessment areas, respectively. In some assessment areas and product discussions, specific numbers are quoted from these tables to support relevant points; otherwise, general references are made about performance, and the reader should refer to the appendices for specific data.

Lending Activity

The following table summarizes the bank's lending activity from 2018 through 2020. Regions Bank originated more HMDA-reportable loans than CRA small business loans by both number and dollar amount. Due to the higher percentage of loans by number, HMDA-reportable lending typically had a greater impact on lending ratings. The ratings for each loan product (home purchase, home refinance, home improvement, and small business) were also weighted by relative volume within each assessment area. Lending levels reflect adequate responsiveness to credit needs in all states and commensurate with deposits in each state; no conspicuous gaps in lending activity by income category were identified. Detailed information about lending activity can be found in each of the state and multistate sections of this report.

Summary of Lending Activity

Loan Type	#	%	\$(000s)	%
Total Consumer related	0	0	\$0	0

Note: Affiliate loans not included

Overall, 94.0 percent of total loan units were located inside the assessment areas during the review period, which includes 92.3 percent of HMDA-reportable loans and 96.8 percent of small business loans. This indicates Regions Bank’s willingness to originate loans that are responsive to the residential and small business credit needs of its assessment areas.

Distribution of Lending by Geography, Borrower Income, and Business Size

The overall geographic distribution of HMDA-reportable and CRA small business lending reflects adequate penetration in low- and moderate-income geographies. Of the 24 full-scope assessment areas, one is considered excellent, seven are considered good, 15 are considered adequate, and one is considered poor for the geographic distribution. The geographic distribution of small business loans across assessment areas is good, and HMDA-reportable lending by geography is adequate. The overall distribution of loans among borrowers of different income levels and businesses of different sizes is good. Of the 24 full-scope assessment areas, five are considered excellent, 17 are considered good, one is considered adequate, and one is considered poor for the borrower distribution. The distribution of small business loans to businesses of different sizes is good, and HMDA-reportable lending by borrower income across the assessment areas is adequate. The analyses of HMDA-reportable and small business lending within each assessment area are discussed in detail later in this report.

Community Development Lending

The following table summarizes total dollar volume and conclusions for community development loans by multistate MSA and state. Individual state totals include loans benefiting assessment areas within each state and, in cases where the bank was responsive to the needs of its assessment areas within the state first, totals also include loans made outside any assessment area of the state.

Multistate MSA/State	Community Development Loans (\$)	Community Development Lending Activity
Augusta Multistate MSA	\$9.7 Million	Adequate Level
Chattanooga Multistate MSA	\$38.3 Million	Relatively High Level
Columbus Multistate MSA	\$22.9 Million	Leader
Memphis Multistate MSA	\$72.8 Million	Leader
St. Louis Multistate MSA	\$50.7 Million	Relatively High Level
Texarkana Multistate MSA	\$4.2 Million	Adequate Level
Alabama	\$469.8 Million	Leader
Arkansas	\$56.7 Million	Low Level
Florida	\$608.2 Million	Relatively High Level
Georgia	\$344.1 Million	Relatively High Level
Illinois	\$10.3 Million	Adequate Level
Indiana	\$66.0 Million	Relatively High Level
Iowa	\$77,000	Low Level
Kentucky	\$1.3 Million	Low Level
Louisiana	\$276.7 Million	Adequate Level
Mississippi	\$178.3 Million	Adequate Level
Missouri	\$6.6 Million	Few, if Any
North Carolina	\$104.8 Million	Relatively High Level
South Carolina	\$65.8 Million	Adequate Level
Tennessee	\$339.6 Million	Leader
Texas	\$644.0 Million	Leader
Broader Regional Areas that Include Multiple States in Bank Footprint	\$39.4 Million	
OVERALL	\$3.4 Billion	Relatively High Level

As the previous table shows, Regions Bank originated or renewed \$3.4 billion in community development lending with impact to one or more of the states in its footprint. This was considered a relatively high level of community development loans when considering performance across the footprint, particularly in Florida and Alabama, which largely influence overall conclusions.

Some of the most impactful community development loans are separately highlighted later in the report within the applicable state or full-scope assessment area directly receiving the benefit. However, as the previous table shows, the bank originated or renewed \$39.4 million to broader regional areas that benefited more than one state within the bank's footprint. Since these loans have impact across multiple states and are considered at the institution level, the most impactful of these loans are separately described here and include:

- Two loans totaling \$10 million to a national nonprofit benefiting all states and multistate assessment areas in the bank's footprint. The loans were originated toward a new initiative aimed at creating pathways to homeownership for LMI individuals and families while improving property values for LMI communities.
- One loan for \$5.0 million to a national CDFI benefiting all states and multistate assessment areas in the bank's footprint. The loan was part of a larger community loan fund designed to offer flexible and innovative loan products to nonprofits seeking to acquire, develop, and preserve affordable housing for LMI individuals.
- One loan and two lines of credit totaling \$3.3 million to CDFIs that raise funds to lend to other CDFIs serving the Appalachian Region and the Deep South; the Appalachian Region and the Deep South include several of the states in the bank's footprint including Tennessee, Georgia, Alabama, North Carolina, South Carolina, Kentucky, Illinois, Texas, Arkansas, Louisiana, and Mississippi. The CDFIs have a focused effort on providing small business loans to economically distressed and underserved communities throughout their service areas.
- Three lines of credit totaling \$2.8 million to a nonprofit housing developer serving LMI families living in the gulf coast regions of Texas, Louisiana, Mississippi, Alabama, and Florida.

Having made a relatively high level of community development lending, Regions Bank was considered to have met the needs of its own assessment areas. Therefore, in addition to the volumes shown in the previous table, the bank also received consideration for 27 loans totaling \$144.4 million impacting states outside its footprint. Most of the community development lending dollars outside the bank's footprint were used toward affordable housing efforts, including eight new originations totaling \$96.3 million for construction and/or improvement to apartments with income restrictions at or below 80 percent of median family income. The loans impacted LMI individuals and families in Connecticut, Ohio, Oklahoma, New Mexico, and Wisconsin.

Investment Test

Regions Bank's overall performance under the investment test is outstanding.

The table below summarizes the ratings as well as the total dollar qualified investments and donations by multistate MSA and state. Individual state totals include investments and donations benefiting assessment areas within each state and, in cases where the bank was responsive to the needs of its assessment areas within the state first, totals also include investments made outside any assessment area of the state.

Multistate MSA/State	Investments (\$000)	Donations / Grants (\$000)	Investment Test Rating
Augusta Multistate MSA	\$14,398	\$356	Low Satisfactory
Chattanooga Multistate MSA	\$44,523	\$394	Outstanding
Columbus Multistate MSA	\$13,323	\$30	Outstanding
Memphis Multistate MSA	\$75,367	\$1,033	Outstanding
St. Louis Multistate MSA	\$32,387	\$1,642	Low Satisfactory
Texarkana Multistate MSA	\$1,331	\$105	Low Satisfactory
Alabama	\$203,794	\$17,879	Outstanding
Arkansas	\$63,300	\$688	Low Satisfactory
Florida	\$577,466	\$2,639	High Satisfactory
Georgia	\$205,286	\$2,771	Outstanding
Illinois	\$14,139	\$253	Low Satisfactory
Indiana	\$59,568	\$1,157	High Satisfactory
Iowa	\$36,007	\$218	Low Satisfactory
Kentucky	\$14,679	\$305	Low Satisfactory
Louisiana	\$191,762	\$2,245	Outstanding
Mississippi	\$67,126	\$2,286	High Satisfactory
Missouri	\$14,258	\$181	High Satisfactory
North Carolina	\$65,749	\$407	Outstanding
South Carolina	\$63,741	\$275	Outstanding
Tennessee	\$244,782	\$6,975	Outstanding
Texas	\$507,864	\$1,773	Outstanding
Bank-wide or Broader Regional Areas that Include Multiple States in Bank Footprint	\$14,126	\$1,762	Outstanding
OVERALL	\$2,549,977	\$45,373	Outstanding

The bank made an excellent level of qualified investments and contributions that demonstrated excellent responsiveness to credit and community development needs. The bank had qualified investments totaling \$2.5 billion that impacted one or more states, of which approximately 68.4 percent were originated during the current review period. Most of the bank’s investments supported affordable housing. The bank is a leader in the financing of Low-Income Housing Tax Credit (LIHTC) projects. The bank often provides both equity investments and provides construction financing for these projects, which provide affordable housing for low- and moderate-income families. The bank had LIHTC investments totaling \$1.2 billion, and during the review period, the bank made LIHTC investments of nearly \$696 million, financing projects in 11 different states within its footprint. The bank also had investments totaling \$1.1 billion in securities backed by government-guaranteed loans for affordable multifamily housing or mortgages to qualified low- and moderate-income borrowers. Additionally,

the bank invested \$26.5 million in real estate equity investments funds focused on financing new and preserving existing affordable housing.

Additional investments included \$92.3 million in Small Business Investment Companies (SBIC) funds and nearly \$19.1 million in SBA 504 investments to help finance equity and debt for small businesses. The bank made \$4.2 million in community development project investments, which were primarily renewals of investments in CDFIs serving one or more of the states within the bank's footprint. The remaining investments included school bonds, stock purchases in CDFIs and minority financial institutions, and a certificate of deposit in a minority financial institution.

As noted in the table above, the bank made investments of \$14.1 million that benefited multiple states within the bank's footprint, or the entire bank footprint. Approximately \$11.2 million of these investments were unfunded commitments in SBICs that had a target area that included several of the states in Regions' footprint. The remaining investments were primarily investments in CDFIs that served multiple states.

With an excellent level of qualified investments, Regions Bank was considered to meet the needs of its own assessment areas. Therefore, in addition to the investments shown in the table above, the bank also received consideration for investments totaling \$91,851 impacting states outside its footprint.

Regions Bank made contributions totaling \$45.4 million during the review period with a purpose of community development. The bank's donations demonstrated excellent responsiveness to a wide range of community development needs. Most notably, the bank was very responsive to needs that arose as a result of the COVID-19 pandemic, providing donations totaling \$9.3 million across the bank's footprint. Specifically, the bank's donations were intended to help sustain small business operations, to support the provision of food supplies, to provide support for schools and students adjusting to remote learning and increased demands for technology, and to provide emergency assistance to LMI individuals and families. The bank engaged in several bank-wide initiatives in response to COVID-19. First, the bank pledged over \$2.0 million in advertising for food banks in all states that the bank serves to help solicit additional food supplies to meet the increase in demand brought on by the pandemic. Additionally, the bank made a \$1.0 million commitment to a national organization focused on economic empowerment to provide assistance to small business owners impacted by COVID-19 in many communities across the Regions footprint.

In addition to the COVID-19 related activities, the bank made several other noteworthy donations that benefited multiple states within the bank's footprint. Regions provided \$250,000 to a national CDFI to support its efforts to develop and preserve affordable housing in several markets that align with Regions' assessment areas. A specific focus of this organization is preserving affordable multifamily housing in areas at higher risk for climate-related disasters. Regions also provided over \$250,000 in donations to support the work of a national consumer advocacy organization.

Additional detail on the bank's investments and donations is provided in the applicable state and full-scope assessment area sections of the report.

Service Test

Regions Bank's service test performance is rated high satisfactory. Performance is considered excellent in the state of Alabama; good in Georgia, Indiana, Iowa, Louisiana, Mississippi, North Carolina, Tennessee, and Texas;

adequate in the states of Arkansas, Florida, Kentucky, and Missouri; and poor in Illinois and South Carolina. In the multistate assessment areas, performance is considered good in Memphis, St. Louis, and Texarkana; adequate in Augusta and Chattanooga; and poor in Columbus.

Retail Banking Services

Retail banking services are considered good in the states of Alabama, Georgia, Iowa, Kentucky, Mississippi, Missouri, and Texas; poor in the states of North Carolina and the Columbus multistate assessment area; very poor in Illinois; and adequate in the remaining states and multistate assessment areas.

Retail banking delivery systems are reasonably accessible to the geographies and individuals of different income levels. Across the bank, the distribution of 1,368 branch offices and 1,453 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment areas. The percentage of branches in low-income tracts was below the percentage of households, but greater than the businesses in the same geography; 7.1 percent of households and 5.7 percent of businesses were located in low-income census tracts compared to 6.2 percent of the bank's branches. The proportion of the bank's branches in moderate-income tracts was greater than the percentages of households and businesses in the same geography; 24.2 percent of total branches were in moderate-income tracts compared to 22.3 percent of households and 20.1 percent of businesses. In addition, banking services and business hours do not vary in a way that inconveniences the bank's assessment areas, particularly low- and moderate-income geographies and individuals. The bank does not offer weekend hours at all branches throughout its footprint, but a proportionate number of branches located in low- and moderate-income geographies have weekend hours compared to branches in middle- and upper-income geographies. Additionally, the bank offers extended hours at all branch offices.

During the three-year period of 2018–2020, Regions Bank opened 94 branch offices: 5 in low-income tracts, 19 in moderate-income tracts, 17 in middle-income tracts, and 53 in upper-income tracts. During this same period, the bank closed 193 branch offices; 14 in low-income tracts, 32 in moderate-income tracts, 91 in middle-income tracts, and 54 in upper-income tracts. Two branches were closed in unknown-income tracts. In most cases, services at closed branches were consolidated with those of existing nearby branches. A specific listing of branch offices opened or closed can be found in the bank's CRA public file. Overall, the bank's record of opening and closing of branch offices has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and low- and moderate-income individuals.

Regions provides an array of alternate delivery mechanisms to help meet the banking and other financial needs of its clients beyond the traditional avenues. Regions Bank continues to offer its Now Banking suite of products, which are appealing for unbanked, under-banked, and nontraditional clients. The program allows anyone, even people without a deposit account at Regions Bank, to use a Regions Now card. The card can be used to cash checks with no hold period and a low fee, reload the prepaid card to use for making purchases, and initiate money transfers and pay bills via Western Union. Regions launched Regions Now Checking in 2021. The Now Checking account, a part of the Regions Now Banking suite, has a flat monthly fee of \$5, and customers will not incur overdraft or non-sufficient funds fees. It also offers traditional features such as check writing and mobile and online banking with bill pay and Zelle. Additionally, Regions continues to offer 24-hour banking

through its ATM network and its internet-based Mobile Banking suite, allowing continuous accessibility to its banking services and information. Also, many of the bank’s new branches are designed with Video Teller Machines (VTMs) that provide customers with real-time access to bankers after regular business hours.

The geographic distribution of branches as of December 31, 2020, is shown below. The table also includes data related to branch office openings and closures since the previous examination, ATMs, and demographics.

Opened and closed branches are for the 2018-2020 review period - based on the 2020 Census Data

DTO - Drive thru only is a subset of total branches

SA = Stand Alone ATM is a subset of total ATMs

Early in the pandemic, Regions Bank established a rapid response plan to address the quick spread and impact the pandemic was having on the bank’s associates and customers. Regions created a COVID Customer Response program that was designed to identify opportunities to better assist customers with products and services as well as balance a healthy and safe environment for the bank’s essential frontline workers. Some of the adjustments made to the bank’s deposit products during the pandemic included assessing no penalty for early withdrawals for CDs, waiving fees for excessive withdrawals for savings and money market deposit accounts, increasing the deposit limits for mobile deposits, and waiving fees for stimulus check cashing for non-customers. The bank also made adjustments to its lending products as well to help alleviate the burden people were facing during the pandemic. Some of these adjustments included mortgage payment forbearance assistance with deferrals up to five months; streamlined underwriting for mortgages and home equity lines; and payment deferrals for unsecured lines of credit, loans, and credit cards for consumers as well as businesses.

Community Development Services

Regions Bank provides a relatively high level of community development services throughout its assessment areas. During the review period, bank officers and staff engaged in 5,706 community development service activities totaling 67,121 hours. These totals include 37 service activities totaling 1,137 service hours that benefited broader regional areas that include multiple states in the bank’s footprint. These activities are considered at the institutional level. Community development services are excellent in the states of Alabama, Indiana, Louisiana, and North Carolina; good in Georgia, Iowa, Mississippi, Tennessee, and Texas; adequate in Arkansas, Florida, Illinois, Kentucky, and Missouri; and poor in South Carolina. In the multistate assessment areas, performance is excellent in St. Louis and Texarkana, good in Memphis, adequate in Augusta and Chattanooga, and poor in Columbus.

The table below summarizes the total service activities and hours of community development services by multistate MSA, state, and institution-wide. Individual state totals include service activities benefiting assessment areas within each state and, in cases where the bank was responsive to the needs of its assessment areas within the state first, totals also include activities made outside any assessment area of the state.

Multistate MSA/State	Services (#)	Services (Hours)
Augusta Multistate MSA	36	483
Chattanooga Multistate MSA	47	442
Columbus Multistate MSA	5	549

Regions Bank employees had extensive involvement with organizations and activities that promote or facilitate affordable housing for low- and moderate-income individuals, community services targeted to low- and moderate-income individuals, economic development, and revitalization/stabilization of low- and moderate-income and distressed or underserved areas. Volunteer community services provided by Regions associates were significantly challenged by the COVID-19 lockdowns and the work-from-home scenarios adopted by the bank, schools, nonprofits partners, government entities, and other businesses. Employees served 31,670 hours on boards and committees with qualified organizations throughout the bank's footprint. Additionally, 22,798 hours were devoted to financial education and homebuyer education outreach. Regions encourages all its staff to volunteer in their communities, and it provides all associates eight hours of paid time off per year to participate in volunteer activities of their choice.

Some of the most impactful community development services are separately highlighted later in the report within the applicable state or full-scope assessment area directly receiving the benefit. However, as the previous table shows, employees provided 1,137 service hours at the institution level. The most impactful of these service activities are separately described below:

- Regions Bank's compliance officer served on the board of directors for a CDFI that provides economic development in underserved communities with innovative financial solutions and hands-on technical assistance to small businesses and nonprofit organizations.
- A Regions senior manager served on the board of directors for a CDFI that provides lending solutions and educational services that support the development, growth, and preservation of underserved small businesses, affordable housing, and sustainable communities.

FAIR LENDING OR OTHER ILLEGAL CREDIT PRACTICES REVIEW

During the review period for this CRA evaluation, the Reserve Bank identified practices that resulted in the CFPB citing violations of the Consumer Financial Protection Act involving unfair and abusive practices, which resulted in the Consent Order In the Matter of: Regions Bank, 2022-CFPB-0008 (9/28/2022). The Consent Order explains the violations and actions required for remediation. Bank management has ceased the practices that resulted in the violations. These violations did not impact the bank's CRA rating.

MULTISTATE METROPOLITAN AREA

CRA RATING FOR AUGUSTA GA-SC MULTISTATE: Satisfactory

The Lending Test is rated: High Satisfactory

The Investment Test is rated: Low Satisfactory

The Service Test is rated: Low Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans by borrower income reflects excellent penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes an adequate level of community development loans in its Augusta multistate assessment area.
- The bank provides an adequate level of qualified community development investments and grants that demonstrate adequate responsiveness to several identified community development needs of the Augusta multistate assessment area.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment area.
- The bank provides an adequate level of community development services throughout the assessment area.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Augusta multistate assessment area are consistent with the overall scope described in the Description of the Institution section of this report. Regions Bank's performance in the Augusta multistate assessment area was evaluated using full-scope examination procedures.

**DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE AUGUSTA GA-SC MSA MULTISTATE
ASSESSMENT AREA**

Overview

The Augusta multistate assessment area consists of Columbia, McDuffie, and Richmond counties in Georgia as well as Aiken and Edgefield counties in South Carolina. These five counties comprise the majority of the Augusta-Richmond County, GA-SC MSA, excluding Lincoln and Burke counties in Georgia. As of December 31, 2020, Regions Bank operated 11 branches in the assessment area. The Augusta assessment area accounts for 0.8 percent of the institution’s total deposits and 0.7 percent of the bank’s total HMDA- reportable and CRA small business loans (by dollar).

Regions Bank ranked 6th in deposit market share amongst the 19 institutions in the Augusta assessment area.³ According to the FDIC Summary of Deposits Report dated June 30, 2020, the bank had 7.0 percent deposit market share and \$671.2 million in deposits.⁴ Wells Fargo held the largest share of deposits in the market at 21.9 percent, followed by South State Bank, Bank of America, and Security Federal Bank.⁵ National and regional banks compete in the market along with several community banks.

HMDA-reportable lending and CRA lending in the area are dominated by a few large volume lenders. Regions Bank originated or purchased 2.2 percent of the HMDA-reportable loans in the Augusta assessment area in 2018, ranking 14th out of 397 reporters. In 2019, the bank originated or purchased 2.0 percent of the HMDA- reportable loans in the assessment area, ranking 12th out of 420 reporters. For 2020, Regions Bank originated or purchased 1.6 percent of the HMDA-reportable loans in the assessment area, ranking 19th out of 477 reporters. In general, the top HMDA lenders in the market were Wells Fargo, Queensborough National Bank, and Quicken Loans.

For CRA small business and small farm lending, Regions Bank ranked 15th out of 83 reporters in 2018, with 1.5 percent of reported loans in the Augusta assessment area. In 2019, the bank ranked 16th out of 89 reporters, with 1.3 percent of reported loans. For 2020, Regions Bank ranked 12th out of 131 reporters, with 2.9 percent of reported loans. In general, CRA lending in the assessment area was dominated by American Express, Wells Fargo, and Bank of America.

Population and Income Characteristics

The Augusta assessment area has experienced modest growth since the last decennial census. According to census data, the population in the assessment area was 578,714, which is an 8.5 percent increase from the 2010 census.⁶ Columbia, Richmond, and Aiken counties posted population increases with Columbia County having the largest

increase in population of 25.8 percent.⁷ The most populous county in the assessment area is Richmond County with 168,808 individuals, which is home to the city of Augusta.⁸

According to 2020 FFIEC census data, the assessment area contains 111 census tracts: 11 tracts are low-income (9.9 percent), 31 are moderate-income (27.9 percent), 42 are middle-income (37.8 percent), 26 are upper-income (23.4 percent), and one has an unknown income level (0.9 percent).⁹

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table sets forth the estimated median family income for 2018 through 2020 for the Augusta-Richmond County MSA and provides a breakdown of the range of estimated annual family income for each income category (low, moderate, middle, and upper).

**Borrower Income Levels
Augusta-Richmond County, GA-SC MSA**

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2018	\$62,300	0 - \$31,149	\$31,150 - \$49,839	\$49,840 - \$74,759	\$74,760 - & above
2019	\$63,100	0 - \$31,549	\$31,550 - \$50,479	\$50,480 - \$75,719	\$75,720 - & above
2020	\$65,600	0 - \$32,799	\$32,800 - \$52,479	\$52,480 - \$78,719	\$78,720 - & above

As shown, the median family income for the Augusta-Richmond County MSA increased from \$62,300 in 2018 to \$65,600 in 2020. Of the five counties in the assessment area, the median family income between the period of 2015 through 2019 was highest in Columbia County, where the estimated median family income was \$92,070.¹⁰ The median family income was lowest in Richmond County at \$50,579.¹¹ According to FFIEC census data, 39.9 percent of families in the assessment area are considered low- to moderate-income.¹²

Financial stability of low- and moderate-income individuals appears tenuous as evidenced by poverty rates. From the period of 2015 through 2019, McDuffie County and Richmond County had the highest percentage of families living in poverty at 16.7 percent and 18.2 percent, respectively.¹³ Additionally, Edgefield County and Aiken County’s percentage of families living in poverty was 12.6 percent and 11.9 percent, respectively.¹⁴ Columbia County had the lowest percentage of families living in poverty at 5.0 percent.¹⁵ Overall, a significant percentage of families living in low- and moderate-income areas in the assessment area are below the poverty level. According to 2020 FFIEC census data, 41.5 percent of families in low-income tracts and 23.5 percent of families

in moderate-income tracts live below the poverty level.¹⁶ The high poverty rates in low- and moderate-income tracts may make lending within these tracts more challenging.

Economic Conditions

The Augusta assessment area is an economically diverse region located approximately 145 miles east of Atlanta. The government and military have a significant economic impact on the region with a total workforce of 57,738 in 2020.¹⁷ After government, the five largest employment sectors are healthcare and social assistance, retail trade, manufacturing, administrative and support, construction, and accommodation and food services.¹⁸ Lastly, the area is best known as the location for the Masters Tournament, an annual professional golf event held at the Augusta National Club with an estimated economic impact of \$117.5 million.¹⁹

The largest employer in Augusta is Fort Gordon, home to the U.S. Army Signal Corps and U.S. Army Cyber Command. Fort Gordon employs over 29,000 military and civilian personnel.²⁰ Ft. Gordon has a major economic impact on the local economy and accounts for nearly \$2.4 billion that goes directly to businesses in the area.²¹ The second largest government employer is Augusta University with 6,775 employees and followed by NSA Augusta with 6,000 employees.²² Outside the government sector, the top five largest employers include Augusta University Hospitals (5,341 employees), University Hospital (3,000 employees), Doctors Hospital (1,837 employees), Automatic Data Processing (1,542 employees), and EZGO Textron (1,350 employees).²³

According to 2020 Dun & Bradstreet information, there were 21,268 businesses within the Augusta assessment area, 93.1 percent had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses.²⁴ Additionally, 21.5 percent of small businesses in the assessment area were in moderate-income tracts, while there were far fewer in low-income tracts at 6.9 percent.²⁵ According to an analysis of CRA reportable loan data for all reporters in the assessment area, the volume of small business loans made to small businesses has both increased and decreased during the review period. Specifically, from 2018 to 2019, loans made to small businesses increased 3.1 percent. From 2019 to 2020, the number of loans made to small businesses decreased 5.5 percent.

The COVID-19 pandemic brought many challenges to the economy, both in the assessment area and nationwide. Many states, including Georgia and South Carolina, implemented stay-at-home orders, which mandated that

²⁵ *Ibid.*

individuals stay at home to limit the spread of the coronavirus. These orders also reduced operations for many businesses. As a result of these mandates, economic activity declined during the pandemic. In response to the decline in economic activity, the United States Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 25, 2020; this legislation established the Paycheck Protection Program, which was implemented by the Small Business Administration (SBA), to provide loans to small businesses for payroll costs and certain other expenses.²⁶ In the assessment area, Richmond County had the largest number of Paycheck Protection Program (PPP) loan approvals (8,352 PPP loans), followed by Aiken County (3,498 PPP loans) and Columbia County (2,603 PPP loans).²⁷ On a local level, the City of Augusta created the CV-19 Small Business Relief Program to provide funds for small businesses impacted by the pandemic.²⁸

During the review period, the assessment area experienced both a decline and a rise in unemployment. From 2018 to 2019, the unemployment rate in the assessment area was 4.1 percent in 2018 and 3.6 percent in 2019, which was greater than the unemployment rates for both Georgia and South Carolina. During this time, McDuffie County and Richmond County had the highest unemployment rates; the unemployment rate in McDuffie County was 5.7 percent in 2018 and 5.3 percent in 2019, and the unemployment rate in Richmond County was 5.3 percent in 2018 and 4.7 percent in 2019. In 2020, unemployment in the assessment area, Georgia, South Carolina, and nationwide increased due to the negative impact the COVID-19 pandemic had on the economy.²⁹ For this year, the unemployment rate for the assessment area, Georgia, and South Carolina was 5.8 percent, 6.5 percent, and 6.2 percent, respectively. In the assessment area, McDuffie County and Richmond County had the highest unemployment rate at 7.8 percent and 7.6 percent, respectively.

Unemployment Rates - Multi Augusta

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

According to 2020 census data, the assessment area contained 232,734 housing units, of which 57.1 percent were owner-occupied, 28.1 percent were rental units, and 14.9 percent were vacant.³⁰ Many of the housing units located in low- and moderate-income census tracts were rental or vacant. More specifically, 69.8 percent of units in low-income tracts and 51.3 percent of units in moderate-income tracts were rental or vacant.³¹ Within the assessment area, Richmond County had the highest percentage of rental and vacant units at 38.7 percent and 17.5 percent, respectively.³² This factor suggests that home purchase lending opportunities in low- and moderate-income tracts may be limited. The median age of the housing stock in the assessment area was 37 years, with housing tending to be newest in Columbia County at 21 years.³³ Housing units in low- and moderate-income census tracts were older compared to the assessment area overall, with a median age of 54 and 46 years, respectively.³⁴

The housing market in the Augusta metropolitan area is growing and home prices increased during the review period. In January 2018, the median listing price for housing inventory in the Augusta-Richmond County, GA-SC CBSA was \$216,900.^{35,36} In January 2019, the median listing price for housing inventory slightly declined to \$214,125; however, the median listing price increased 7.4 percent to \$229,900 by December 2019.³⁷ The median listing price for housing inventory continued to increase, and, by December 2020, the median listing price was

³⁰ FRB Atlanta calculations of 2020 FFIEC census data.

³³ Ibid.

³⁴ Ibid.

³⁵ Core-Based Statistical Area (CBSA) is a term that refers to both Metropolitan and Micropolitan Statistical Areas.

³⁶ "Housing Inventory: Median Listing Price in Augusta-Richmond County, GA-SC (CBSA)." *Federal Reserve Bank of St. Louis*, <https://fred.stlouisfed.org/series/MEDLISPRI12260>. Accessed 3 Mar. 2022.

³⁷ Ibid.

\$249,900.³⁸ Overall, there was a 15.2 percent increase in the median listing price from January 2018 to December 2020.

The increase in home prices shows that home ownership is becoming less affordable, especially for low- and moderate-income families. Using the assumption that a borrower can obtain a loan for approximately three times the borrower's annual income and using 2020 FFIEC median family income figures for the assessment area, affordable homes would be priced at \$176,604 or below.³⁹ As stated previously, the median listing price for housing inventory in the Augusta-Richmond County, GA-SC CBSA was \$249,900 in 2020.

Furthermore, the Envision Augusta 2035 Comprehensive Plan reported that an estimated 15.0 percent of rental units in the MSA are to military households, with most of the apartment rentals being within 10 miles of Fort Gordon (Richmond County).⁴⁰ This factor along with a growing student population may be a contributing factor to the high percentage of renters paying gross rent that is 30 percent or more of their household income in Richmond County.⁴¹ According to the Envision Augusta 2035 Comprehensive Plan, the percentage of cost-burdened renters is 48 percent in Richmond County, as compared to 46 percent for the State of Georgia.⁴²

Demographic Characteristics by Census Tract

The following table presents key demographic and business information used to help develop a performance context for the assessment area. The data reflects the 2020 FFIEC census data and the 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

³⁸ Ibid.

³⁹ According to the 2020 FFIEC census data, the median family income for the assessment area is \$58,868.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development and economic landscapes, an individual familiar with the community and with community development activities was contacted. This individual discussed the various opportunities and challenges in the region and how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

A community contact engaged in economic development was interviewed. The contact stated that the Augusta-Richmond County area is one of the top twenty (20) most diverse economies by MSA in the country and is well protected in industry. The contact discussed that the area continues to see consistent job growth, and the top two industry sectors are manufacturing and healthcare. This was true even during the COVID-19 pandemic where industries bounced back within a few months to above average employment levels, except for the hospitality industry, which was devastated for an extended period. Despite job growth, the contact stated that approximately 70 percent of the labor force for Augusta commutes into the MSA for employment, with 31 percent driving from Columbia County and 13 percent driving from Aiken County. The contact mentioned that there are banking deserts within the rural South Augusta area, which is where the prime manufacturing plants are located; a lot of people commute into that area for work, but there are not any banks in there to serve those individuals, per the contact. While there were banking deserts identified in this area, that contact indicated that downtown Augusta, including impoverished areas like Laney Walker and Gordon Highway, is served well by the number of banks there. This is because downtown Augusta is where most of the industry was located at one point in time. Despite the number of banks, the contact mentioned that the downtown area is a food desert, and he said that there is a lot of poverty in the Augusta area.

Specific to economic development, the contact said that the highest priority needs for the area are job training, access to financing for small businesses, and bringing investment into low-income neighborhoods, such as Harrisburg and Laney Walker. According to the contact, there are roughly 200,000 people who can be in the labor force, including about 9,000 that dropped out of the workforce during the pandemic, but are not due to a lack of job training skills. Additionally, the contact said that many banks are being very diligent when looking at potential credit requests, which has caused some loan requests not to be approved. Many businesses that are denied credit from banks look for credit from angel programs or private funders. The contact stated that the aforementioned as well as providing help for the local landbank and downtown authority with their projects are opportunities for engagement by local financial institutions.

Another community contact engaged in familial community programs was interviewed. The contact stated that despite being economically stable, Augusta has pockets of homelessness, a lack of affordable housing, and low-income areas such as Blythe and Hephzibah which are banking and food deserts. In addition to the food deserts in these areas, the contact explained that there are many convenience stores or mom-and-pop shops offering lower-priced food options, but they are not healthy choices and create unhealthy children and families. This can be problematic for these areas, because according to the contact, there are no healthcare or medical facilities in Blythe, and there is no public transportation in Augusta. The lack of public transportation, as well as adult literacy, is also a barrier that low- and moderate- income families face when it comes to gaining access to financial and credit services. In addition, the contact states that while there are several youth violence programs targeted to the

area, there has been a breakdown in implementing the programs due to the rules of how budgets are regulated, and there needs to be more flexibility in these programs to address the actual needs of the communities. Moreover, the contact indicated that financial institutions can help the community when it comes to educating them on the causes of poverty.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE AUGUSTA GA-SC
MULTISTATE ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending performance in the Augusta multistate assessment area is high satisfactory. The geographic distribution of loans reflects adequate penetration throughout the assessment area. Also, the distribution of loans reflects excellent penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes an adequate level of community development loans.

The analysis included 1,066 HMDA-reportable loans and 533 CRA small business loans reported by the bank in the Augusta assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home purchase loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 1,066 HMDA-reportable loans analyzed, 532 loans (49.9 percent) were home purchase loans. Of the total home purchase loans made, five loans (0.9 percent) were located in low-income tracts, and 92 loans (17.3 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home purchase lending in low-income tracts (0.9 percent) was below the percentage of owner-occupied units (3.9 percent) in these tracts. In 2018, the bank's home purchase lending in low-income tracts (0.5 percent) was significantly below the aggregate lending performance (1.6 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (1.7 percent) was above the aggregate lending performance (1.3 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (0.6 percent) was significantly below the aggregate lending performance (1.7 percent) in these tracts.

Home purchase lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (17.3 percent) was similar to the percentage of owner-occupied units (22.3 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (20.9 percent) was significantly above the aggregate lending performance (11.6 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (16.6 percent) was slightly above the aggregate lending performance (13.3 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (14.2 percent) was similar to the aggregate lending performance (13.4 percent) in these tracts.

Home Refinance Loans

Regions Bank made 399 home refinance loans from 2018 through 2020, which represents 37.4 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, three loans (0.8 percent) were located in low-income tracts, and 59 loans (14.8 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home refinance lending in low-income tracts (0.8 percent) was below the percentage of owner-occupied units (3.9 percent) in these tracts. In 2018, the bank's home refinance lending in low-income tracts (1.1 percent) was below the aggregate lending performance (1.7 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (1.0 percent) was below the aggregate lending performance (1.4 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (0.5 percent) was below the aggregate lending performance (0.9 percent) in these tracts.

Home refinance lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (14.8 percent) was below the percentage of owner-occupied units (22.3 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (18.9 percent) was above the aggregate lending performance (14.1 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (12.4 percent) was similar to the aggregate lending performance (12.3 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (14.0 percent) was significantly above the aggregate lending performance (7.9 percent) in these tracts.

Home Improvement Loans

Regions Bank made 135 home improvement loans from 2018 through 2020, which represents 12.7 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, four loans (3.0 percent) were

located in low-income tracts, and 19 loans (14.1 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home improvement lending in low-income tracts (3.0 percent) was similar to the percentage of owner-occupied units (3.9 percent) in these tracts. In 2018, the bank's home improvement lending in low-income tracts (1.9 percent) was below the aggregate lending performance (3.0 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (5.6 percent) was above the aggregate lending performance (4.3 percent) in these tracts. In 2020, the bank made no home improvement loans in low-income tracts (0.0 percent) and was significantly below the aggregate lending performance (2.6 percent) in these tracts.

Home improvement lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (14.1 percent) was below the percentage of owner-occupied units (22.3 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income tracts (11.1 percent) was below the aggregate lending performance (15.2 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (18.5 percent) was slightly above the aggregate lending performance (15.2 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (11.1 percent) was slightly below the aggregate lending performance (14.6 percent) in these tracts.

Small Business Loans

Regions Bank made 533 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 25 loans (4.7 percent) were located in low-income tracts, and 104 loans (19.5 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's small business lending in low-income tracts (4.7 percent) was below the percentage of businesses (7.2 percent) in these tracts. In 2018, the bank's small business lending in low-income tracts (7.3 percent) was slightly above the aggregate lending performance (6.3 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (0.9 percent) was significantly below the aggregate lending performance (6.7 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (5.0 percent) was slightly below the aggregate lending performance (6.4 percent) in these tracts.

Small business lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (19.5 percent) was similar to the percentage of businesses (21.6 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (17.9 percent) was similar to the aggregate lending performance (17.9 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (18.3 percent) was similar to the aggregate lending performance (17.1 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (20.6 percent) was slightly above the aggregate lending performance (18.3 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is excellent. For this analysis, the

distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is excellent. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (9.0 percent) was below the percentage of low-income families (23.8 percent). In 2018, the bank's home purchase lending to low-income borrowers (12.6 percent) was significantly above the aggregate lending performance (4.4 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (11.0 percent) was significantly above the aggregate lending performance (4.5 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (3.0 percent) was below the aggregate lending performance (4.4 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is excellent. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (23.9 percent) was above the percentage of moderate-income families (16.0 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (24.2 percent) was significantly above the aggregate lending performance (14.9 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (22.1 percent) was above the aggregate lending performance (16.6 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (25.4 percent) was above the aggregate lending performance (17.8 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (10.5 percent) was below the percentage of low-income families (23.8 percent). In 2018, the bank's home refinance lending to low-income borrowers (14.7 percent) was significantly above the aggregate lending performance (7.8 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (12.4 percent) was significantly above the aggregate lending performance (5.3 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (7.7 percent) was significantly above the aggregate lending performance (2.2 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is excellent. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (17.5 percent) was above the percentage of moderate-income families (16.0 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (18.9 percent) was above the aggregate lending performance (12.7 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (15.5 percent) was significantly above the aggregate lending performance (9.0 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (17.9 percent) was significantly above the aggregate lending performance (7.1 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is excellent. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (9.6 percent) was below the percentage of low-income families (23.8 percent). In 2018, the bank's home improvement lending to low-income borrowers (7.4 percent) was above the aggregate lending performance (5.5 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (11.1 percent) was significantly above the aggregate lending performance (4.9 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (11.1 percent) was significantly above the aggregate lending performance (3.4 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (14.8 percent) was similar to the percentage of moderate-income families (16.0 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (13.0 percent) was similar to the aggregate lending performance (12.3 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (20.4 percent) was above the aggregate lending performance (13.8 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (7.4 percent) was slightly below the aggregate lending performance (9.0 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is excellent. From 2018 through 2020, 65.5 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 93.1 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (78.0 percent) was significantly above the aggregate lending performance (45.7 percent) to these businesses. In 2019, the bank's small business lending to small businesses (74.3 percent) was significantly above the aggregate lending performance (44.0 percent) to these businesses. In 2020, the bank's small business lending to small businesses (57.1 percent) was significantly above the aggregate lending performance (34.3 percent) to these businesses. Lastly, 92.0 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes an adequate level of community development loans in the Augusta assessment area. During the review period, the bank originated or renewed five community development loans totaling \$5.2 million and eight community development PPP loans totaling \$4.5 million. Specifically, the bank originated or renewed \$4.4 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; \$2.5 million to support economic development primarily through the SBA 504 program; \$1.5 million towards community services benefiting LMI individuals and families; and \$1.2 million in affordable housing initiatives.

Some of the qualified loans were impactful and responsive to assessment area needs. Additionally, the bank's current lending by number of loans and dollar volume is similar to peer performance in this area. Some of the most impactful loans directly benefiting the assessment area include:

- One loan totaling \$1.2 million for new construction of apartments using LIHTCs. The project was designed to create 48 new units of affordable housing for low-income individuals and/or families throughout the assessment area.
- Approximately 75 percent of the community development PPP loans in this assessment area were originated to nonprofits. This is particularly responsive given the needs of nonprofits and the unique challenges faced by nonprofits during the pandemic.

INVESTMENT TEST

The investment test rating for the Augusta multistate assessment area is low satisfactory. The bank made an adequate level of investments and grants relative to the bank's presence in the assessment area that demonstrated adequate responsiveness to credit and community development needs. Combined investment and contribution activity inside the assessment area totaled \$14.8 million. The bank made one investment during the review period in a LIHTC housing project that provided affordable housing for residents of the assessment area. The bank's prior period investments included two LIHTC investments for \$11.5 million, and the remainder were mortgage-backed securities.

During the review period, the bank made contributions totaling \$356,300. Specifically, Regions donated nearly \$354,000 to organizations that provide community services for LMI individuals and nearly \$2,500 to promote economic development. Notable contributions include \$150,000 to a community-based organization that provides job training and workforce development for LMI individuals. The bank also donated approximately \$80,000 to a national organization to provide financial education to high schools in the assessment area that serve a majority of LMI students. In addition, the bank provided about \$26,000 in advertising to a local food bank to help solicit food donations to meet the increased need during the pandemic.

SERVICE TEST

Regions Bank's service test performance in the Augusta multistate assessment area is low satisfactory.

Retail Services

Retail banking services are adequate in the Augusta multistate assessment area.

The distribution of 11 branch offices and 12 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank had no branches in low-income tracts compared to 7.0 percent of households and 7.2 percent of businesses in the same geography. The proportion of the bank's branches in moderate-income tracts, however, was greater than the percentage of households and businesses in the same geography: 36.4 percent of total branches were in moderate-

income tracts compared to 25.7 percent of households and 21.6 percent of businesses. Overall, the bank’s retail delivery systems are reasonably accessible to Regions Bank’s geographies and individuals of different income levels. The bank’s hours and services do not vary in a way that inconveniences the multi-state Augusta assessment area, particularly low- and moderate-geographies and/or low- and moderate-individuals.

During the review period, Regions Bank did not open or close any branches or full-service ATMs in low- or moderate-income tracts; however, the bank closed one branch in a middle-income tract and one branch in an upper-income tract. Additionally, the bank opened one full-service ATM in a middle-income tract. Overall, the bank’s record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area.

 DTP - Drive thru only is a subset of total branches
 SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

Regions Bank provides an adequate level of community development services in the Augusta multistate assessment area. During the review period, Regions Bank employees provided 36 service activities for a total of 483 service hours in various capacities to qualified organizations. Of the bank’s total service activities, 27 activities (77.1 percent) involved financial education to local schools, nonprofit organizations, and businesses. Bank employees also engaged in 54 board or committee service hours benefiting qualified organizations. The bank employees engaged in affordable housing, community service, and economic development service activities throughout the assessment area. Notably, one bank employee provided 31 hours as a board member for an organization dedicated to enhancing the overall economic value of the Augusta community through small business development. The bank’s performance in the Augusta multistate assessment area is considered adequate given its size and presence in the assessment area and the opportunities that exist for community development service.

CRA RATING FOR CHATTANOOGA TN-GA MULTISTATE: SATISFACTORY

The Lending Test is rated: High Satisfactory

The Investment Test is rated: Outstanding

The Service Test is rated: Low Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a relatively high level of community development loans in its Chattanooga multistate assessment area.
- The bank provides an excellent level of qualified community development investments and grants that are responsive to community development needs of the Chattanooga multistate assessment area.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment area.
- The bank provides an adequate level of community development services throughout the assessment area.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Chattanooga multistate assessment area are consistent with the overall scope described in the Description of the Institution section of this report. Regions Bank's performance in the Chattanooga multistate assessment area was evaluated using full-scope examination procedures.

**DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE CHATTANOOGA TN-GA
MULTISTATE ASSESSMENT AREA**

Overview

The Chattanooga multistate assessment area includes Hamilton County in Tennessee and Catoosa County and Walker County in Georgia. Chattanooga, the principal city, is in Hamilton County, Tennessee. The assessment area is part of the six-county Chattanooga, TN-GA MSA. As of December 31, 2020, Regions Bank operated 18 branch offices in the assessment area. The bank's branch presence in the assessment area represents 1.3 percent of branches and 1.3 percent of deposits for the institution. In addition, the market represents

1.4 percent of the combined HMDA-reportable and CRA small business lending by dollar volume for the institution.

Chattanooga is an active banking market. According to the FDIC Summary of Deposits Report dated June 30, 2020, there are 23 financial institutions operating 124 branch locations in the assessment area with \$11.3 billion in total deposits.⁴³ Regions Bank is ranked 3rd in the market with 13.5 percent of deposits (\$1.5 billion).⁴⁴ First Horizon Bank has the largest deposit market share at 25.0 percent, followed by Truist Bank with 17.8 percent.⁴⁵

HMDA-reportable lending in the assessment is similarly competitive. Regions Bank originated or purchased 4.5 percent in loans during 2018. For that year, the bank ranked 2nd out of 423 reporters. In 2019, Regions Bank originated or purchased 4.2 percent in loans. The bank ranked 4th out of 472 reporters for the year. Lastly, Regions Bank originated or purchased 3.8 percent in loans during 2020. For that year, Regions Bank ranked 4th out of 503 reporters. From 2018 through 2020, HMDA-reportable lending in the assessment area was primarily dominated by Quicken Loans, Inc., SunTrust Banks, Inc., and Movement Mortgage, LLC.

CRA small business lending is also competitive. For CRA small business and small farm lending, Regions Bank ranked 13th out of 94 reporters in 2018, with 2.5 percent of reported loans. In 2019, the bank ranked 16th out of 94 reporters, with 1.8 percent of reported loans. Furthermore, Regions Bank ranked 6th out of 122 reporters, with 5.9 percent of reported loans for 2020. From 2018 through 2020, lending in the assessment area was primarily dominated by American Express, JPMorgan Chase, and Pinnacle Bank.

Population and Income Characteristics

According to 2020 census data, the population of the Chattanooga multistate assessment area was 501,733 people.⁴⁶ Since 2010, two of the three counties in the assessment area have posted population gains. From 2010 to 2020, Hamilton County and Catoosa County experienced an increase in population of 8.8 percent and 6.1 percent, respectively.⁴⁷ From 2010 to 2020, Walker County experienced a decrease in population; specifically, Walker County's population decreased 1.6 percent.⁴⁸ Out of all the counties in the Chattanooga multistate assessment area, Hamilton County had the largest population share at 78.1 percent.⁴⁹

⁴⁸ *Ibid.*

⁴⁹ *Ibid.*

According to 2020 FFIEC census data, the assessment area is made up of 106 census tracts: 10 tracts are low-income (9.4 percent), 20 tracts are moderate-income (18.9 percent), 43 tracts are middle-income (40.6 percent), 31 tracts are upper-income (29.3 percent), and 2 tracts have unknown income (1.9 percent).⁵⁰

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Chattanooga, TN-GA MSA. The table below provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper). As shown, the median family income for the MSA increased from \$61,700 in 2018 to \$72,600 in 2020. Data shows that the median family income in the assessment area was highest in Hamilton County (\$61,887) and lowest in Walker County (\$50,862).⁵¹ The 2020 FFIEC census data indicates that 38.0 percent of families in the assessment area are considered low- to moderate-income.⁵²

**Borrower Income Levels
Chattanooga, TN-GA MSA**

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2018	\$61,700	0 - \$30,849	\$30,850 - \$49,359	\$49,360 - \$74,039	\$74,040 - & above
2019	\$70,100	0 - \$35,049	\$35,050 - \$56,079	\$56,080 - \$84,119	\$84,120 - & above
2020	\$72,600	0 - \$36,299	\$36,300 - \$58,079	\$58,080 - \$87,119	\$87,120 - & above

In terms of poverty in the assessment area, Walker County had the highest rate of families living in poverty at 11.8 percent between 2015 and 2019.⁵³ Hamilton County and Catoosa County had the lowest percentage of families living in poverty at 8.4 percent and 7.2 percent, respectively.⁵⁴ Between the five-year periods of 2010 through 2014 and 2015 through 2019, there has been a decrease in the percentage of families living in poverty for all counties in the assessment area. Specifically, in Walker County, the percentage of families living in poverty during the period of 2010 through 2014 was 13.1 percent, and it decreased to 11.8 percent for the period of 2015 through 2019.⁵⁵ For Hamilton County, the percentage of families in poverty was 11.6 percent during the period of 2010 through 2014, and it decreased to 8.4 percent during the period of 2015 through 2019.⁵⁶ Lastly, the percentage of families in poverty in Catoosa County was 9.9 percent during the period of 2010 through 2014, and this percentage decreased to 7.2 percent during the period of 2015 through 2019.⁵⁷

Economic Conditions

The Chattanooga assessment area is located at the border of southeast Tennessee and northwest Georgia. Since 2008, the Greater Chattanooga Region has attracted more than \$6.0 billion in foreign direct investments.⁵⁸ The region attributes its economic growth to its economic incentives including a Foreign Trade Zone, a large pool of skilled manufacturing workers and low-cost utilities.⁵⁹ Chattanooga has a favorable logistical location because it is at the cross section of three major interstates and within proximity to three other major interstates.⁶⁰ This infrastructure provides cost-effective ways for businesses to access different metropolitan areas in the Southeast, Midwest, and Mid Atlantic.⁶¹ Additionally, businesses can also use the interstate system to access seaports on both the Gulf Coast and the Atlantic Ocean.⁶² Currently, the Greater Chattanooga Region has four main business target sectors that include automotive manufacturing, advanced manufacturing, food and beverage, and back office and corporate headquarters.⁶³

Chattanooga has a variety of businesses that offer employment opportunities. The largest employment sectors include government, educational and health services, manufacturing, professional and business services, retail trade, and leisure and hospitality.⁶⁴ The top five employers by full-time employees in Chattanooga include Hamilton County Schools (4,980 full-time employees), BlueCross BlueShield of Tennessee (4,855 full-time employees), Erlanger Health System (4,852 full-time employees), CHI Memorial (3,549 full-time employees), and Tennessee Valley Authority (3,431 full-time employees).⁶⁵

According to 2020 Dun & Bradstreet information, there were 23,446 businesses within the Chattanooga assessment area, 91.8 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses.⁶⁶ Additionally, 16.7 percent of small businesses in the assessment area were in moderate-income tracts, while there were far fewer in low-income tracts at less than 6.2 percent.⁶⁷ According to CRA reportable data from all reporters in the assessment area, loan originations made to small businesses posted growth from 2018 to 2020. Specifically, there was a 6.4 percent increase in loan originations to small businesses from 2018 to 2019. From 2019 to 2020, there was a 6.9 percent increase in loan originations to small businesses.

⁶⁷ *Ibid.*

The COVID-19 global pandemic was a major event in 2020 that impacted the economy in the assessment area and nationwide. As the pandemic unfolded, many businesses in the assessment area had to reduce or close operations due to stay-at-home orders. During March 2020 and April 2020, the State of Georgia enacted several statewide executive orders that mandated closures of some businesses (such as bars and nightclubs) as well as placed restrictions on non-critical infrastructure businesses to only engage in minimum basic operations.⁶⁸ The State of Tennessee also had a similar approach to protecting the state's population from the virus. In March 2020, Tennessee enacted orders to temporarily close gyms and fitness centers; these orders also restricted restaurants and bars to only offer drive-thru, take-out, or delivery services.⁶⁹ In all, many businesses throughout Georgia and Tennessee were impacted by the executive orders to protect public health. In response to the decline in economic activity, the United States' Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 25, 2020; this legislation established the Paycheck Protection Program, which was implemented by the Small Business Administration (SBA), to provide loans to small businesses for payroll costs and certain other expenses.⁷⁰ This program allowed businesses in the assessment area to access credit to help sustain operations during the pandemic.

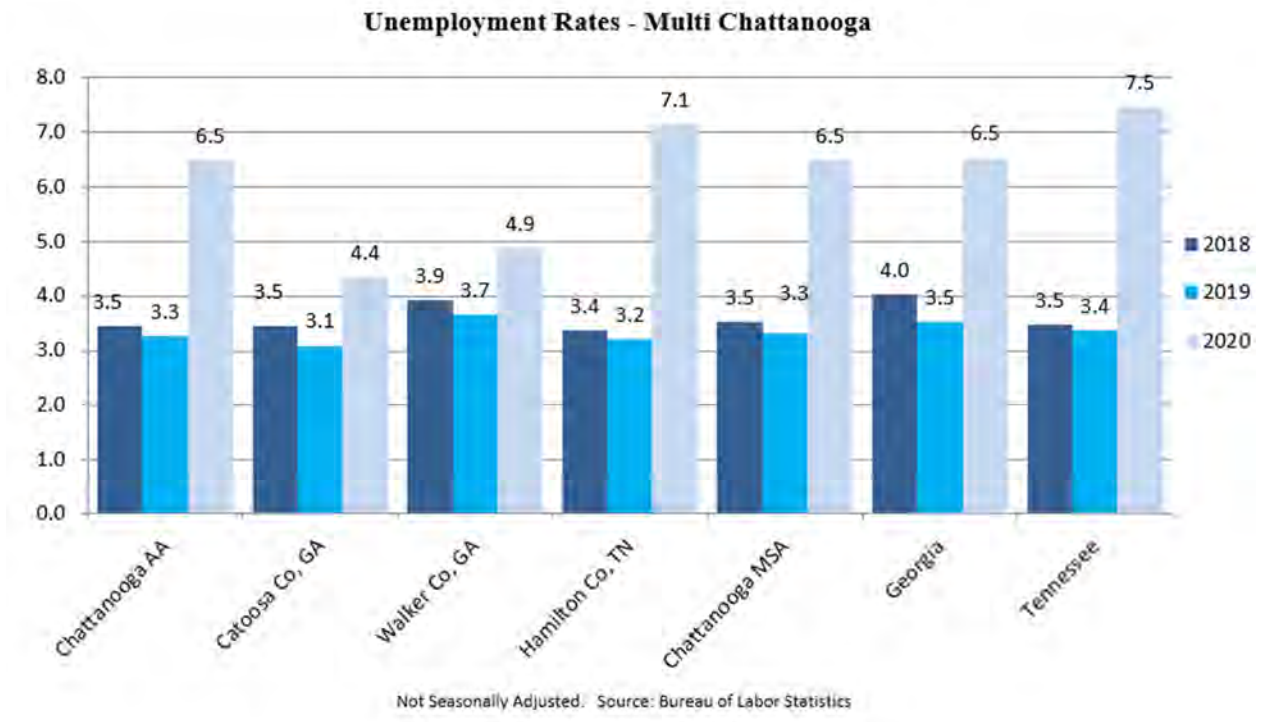

As shown in the following graph, the assessment area experienced both a fall and a rise in unemployment during the review period. The unemployment rate in the assessment area decreased from 3.5 percent in 2018 to 3.3 percent in 2019. At this same time, the assessment area's unemployment rate was comparable to Tennessee's unemployment rate but was less than Georgia's unemployment rate. In 2020, unemployment in the assessment area, Georgia, Tennessee, and the United States collectively increased because of the negative impact the COVID-19 pandemic had on the economy.⁷¹ In 2020, the assessment area's unemployment rate rose to 6.5 percent. Hamilton County had the highest unemployment rate for the year at 7.1 percent, followed by Walker County at 4.9 percent and Catoosa County at 4.4 percent. Overall, the assessment area's unemployment rate in 2020 was the same as Georgia's unemployment rate (6.5 percent) but was less than Tennessee's unemployment rate (7.5 percent).

According to the 2020 FFIEC census data, there were 210,555 housing units located in the assessment area, of which 59.1 percent were owner-occupied, 29.3 percent were rental units, and 11.6 percent were vacant.⁷² While most units were owner-occupied, a disproportionately higher percentage of housing units in low- and moderate-income tracts were rental or vacant. In low-income census tracts, 74.1 percent of all housing units were rentals or vacant versus 50.2 percent in moderate-income tracts.⁷³ The median age of the housing stock in the assessment area was 44 years, though the median age of housing was older, 61 years and 54 years, respectively, in low- and moderate-income census tracts.⁷⁴ These factors suggest that limited HMDA-reportable lending opportunities may be present in the low- and moderate-income tracts.

The assessment area has seen a significant increase in the median price for homes during the review period. In Walker County the median sales price for a home in 2018, 2019, and 2020 was \$133,596, \$148,500, and \$159,000, respectively.⁷⁵ Overall, during this period, the median sales price for a home in Walker County increased 19.0 percent. In Hamilton County, the median sales price for a home in 2018, 2019, and 2020 was \$214,000, \$229,900, and \$259,900, respectively.⁷⁶ During this time, Hamilton County saw a 25.0 percent increase in the median sales price for a home. Overall, Catoosa County experienced the greatest increase in the median sales price for a home during the review period. Specifically, the median sales price for a home in 2018,

⁷⁶ Ibid.

2019, and 2020 was \$165,250, \$185,000, and \$209,542, respectively.⁷⁷ From 2018 to 2020, there was a 26.8 percent increase in the median sales price for a home in Catoosa County.

Furthermore, the rise in home prices in the assessment area indicates that homeownership for low- and moderate-income families is becoming less affordable. Using the assumption that a borrower can obtain a loan for approximately three times the borrower's annual income and using 2020 FFIEC median family income figures for each county in the assessment area, affordable homes would be priced at \$152,586 or below for Walker County, \$178,278 or below for Catoosa County, and \$185,661 for Hamilton County.⁷⁸ As stated previously, the median sales price for a home in 2020 was \$159,000 for Walker County, \$209,542 for Catoosa County, and \$259,900 for Hamilton County.

Demographic Characteristics by Census Tract

The following table presents key demographic and business information used to help develop a performance context for the assessment area. The data reflects the 2020 FFIEC census data and the 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

⁷⁷ Ibid.

⁷⁸ According to 2020 FFIEC census data, the median family income was \$50,862 for Walker County, \$59,426 for Catoosa County, and \$61,887 for Hamilton County.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development and economic landscapes, individuals familiar with the community and with community development activities were contacted. These individuals discussed the various opportunities and challenges in the region and how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

Based on information obtained from a community contact specializing in affordable housing, the lack of funding for housing programs is the primary obstacle in providing affordable housing for low- and moderate-income residents. Per the contact, mismanagement and decreases in funding have led to the shuttering of several housing nonprofits. By her estimates, funding from Housing and Urban Development's Home Program decreased from around \$20.0 million in former years, to around \$2.0 to \$2.5 million in recent years. Another concern facing affordable housing is the lack of contractors available to complete affordable home development and roof replacement projects. Many contractors have either gone out of business or chosen to work primarily on new home construction that is geared towards wealthier residents. With regards to general banking and credit needs, the contact stated that many residents from low- and moderate-income neighborhoods are unbanked and utilize check-cashing facilities and payday lenders. Mortgage products of highest need in the area include small dollar, low-cost mortgage loans for home repairs, home purchase products that also include additional financing for repairs, home purchase loans, and down payment assistance programs. The contact stated that affordable housing stock in the city, especially in low-income areas, is older and many homes need updating and repairs. This further underscores the need for small dollar, affordable home mortgage products.

The following were the opportunities for bank participation brought forward during the discussion:

- As mentioned, there is need for low-interest/low-fee small dollar consumer loans and affordable products that help re-establish credit, which banks should consider offering directly or in partnership with area organizations.
- There is opportunity for banks to offer FHA 203K programs or similar products to assist new homeowners needing additional funds to make repairs to existing housing stock, especially in the low- and moderate-income areas mentioned.
- She indicated due to low wages, there is need for down payment assistance for low- and moderate-income individuals and families transitioning to first homes.
- While the number of affordable housing organizations has decreased in the area, there are still opportunities to partner with CCHDO and the Chattanooga Habitat for Humanity, Chattanooga Urban League, and Chattanooga Neighborhood Enterprise.

Based on information obtained from a contact specializing in local economic development, lack of adequate staff to assist with technical assistance is one of the primary barriers in serving the needs of start-ups and small businesses. Generally, technical assistance ranges from assisting clients in obtaining permits/licenses and providing financial education, to helping entrepreneurs and businesses build strategic plans and set up various accounting tools. The contact emphasized the need for small dollar business loans (under \$50,000) to assist business start-ups and early-stage businesses seeking to grow their operations. Although the contact believes the

Chattanooga area is generally small business friendly, he still believes the following barriers exist for business start-ups:

- Smaller businesses have difficulty raising equity (usually collateral) to access capital for business expansion.
- Small businesses are debt averse and look for angel investors before seeking out credit through banks (this is a barrier because angel investors will not guarantee future loans).
- Entrepreneurs and start-up businesses don't always have a full understanding of how credit—especially commercial credit—works (i.e., importance of financial statements, business strategies, debt servicing ratios, etc.).

With regards to opportunities for participation by local financial institutions, the contact noted that local CDFIs and other nonprofits would benefit from loans and investments from banks. Banks could also help organize and administer a revolving micro loan fund, per the contact. In addition, there are opportunities for banks to lend their staff resources for financial literacy programs and one-on-one small business counseling. The contact also mentioned Tax Increment Financing (TIF) and Payment in Lieu of Tax (PILOT) opportunities.

The contacts discussed the effects the COVID-19 pandemic on the area. Both contacts mentioned that Chattanooga has not been impacted as much economically as other areas due to the high number of jobs in the healthcare industry. The contacts explained that the pandemic had a great impact on the food and the hospitality industries. Per one contact, there were some disruptions in the manufacturing industry, but the effect on those businesses was not permanent. The other contact noted that banks were active in providing Paycheck Protection Program loans during the pandemic.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE CHATTANOOGA TN-GA MULTISTATE ASSESSMENT AREA

LENDING TEST

Regions Bank's lending performance in the Chattanooga assessment area is high satisfactory. The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a relatively high level of community development loans in the Chattanooga assessment area.

The analysis included 2,080 HMDA-reportable loans and 1,001 CRA small business loans reported by the bank in the Chattanooga assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 2,080 HMDA-reportable loans analyzed, 557 loans (26.8 percent) were home purchase loans. Of the total home purchase loans made, 14 loans (2.5 percent) were located in low-income tracts, and 70 loans (12.6 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's home purchase lending in low-income tracts (2.5 percent) was similar to the percentage of owner-occupied units (3.0 percent) in these tracts. In 2018, the bank's home purchase lending in low-income tracts (2.5 percent) was similar to the aggregate lending performance (2.5 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (2.0 percent) was below the aggregate lending performance (3.1 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (3.0 percent) was slightly above the aggregate lending performance (2.4 percent) in these tracts.

Home purchase lending in moderate-income tracts is poor. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (12.6 percent) was similar to the percentage of owner-occupied units (17.0 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (11.9 percent) was slightly below the aggregate lending performance (14.6 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (12.4 percent) was slightly below the aggregate lending performance (14.7 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (13.2 percent) was slightly below the aggregate lending performance (15.4 percent) in these tracts.

Home Refinance Loans

Regions Bank made 915 home refinance loans from 2018 through 2020, which represents 44.0 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, 16 loans (1.7 percent) were located in low-income tracts, and 114 loans (12.5 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's home refinance lending in low-income tracts (1.7 percent) was below the percentage of owner-occupied units (3.0 percent) in these tracts. In 2018, the bank's home refinance lending in low-income tracts (2.3 percent) was similar to the aggregate lending performance (2.3 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (0.9 percent) was below the aggregate lending performance (1.8 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (1.9 percent) was slightly above the aggregate lending performance (1.7 percent) in these tracts.

Home refinance lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (12.5 percent) was similar to the percentage of owner-occupied units (17.0 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (14.9 percent) was slightly above the aggregate lending performance (13.2 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (10.7 percent) was similar to the aggregate lending performance (11.9 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (12.1 percent) was above the aggregate lending performance (9.6 percent) in these tracts.

Home Improvement Loans

Regions Bank made 608 home improvement loans from 2018 through 2020, which represents 29.2 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, 11 loans (1.8 percent) were located in low-income tracts, and 67 loans (11.0 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home improvement lending in low-income tracts (1.8 percent) was below the percentage of owner-occupied units (3.0 percent) in these tracts. In 2018, the bank's home improvement lending in low-income tracts (2.1 percent) was slightly above the aggregate lending performance (1.9 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (1.7 percent) was below the aggregate lending performance (3.1 percent) in these tracts. In 2020, the bank's home improvement lending in low-income tracts (1.6 percent) was below the aggregate lending performance (2.8 percent) in these tracts.

Home improvement lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (11.0 percent) was below the percentage of owner-occupied units (17.0 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income tracts (12.1 percent) was similar to the aggregate lending performance (12.8 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (11.2 percent) was slightly below the aggregate lending performance (12.7 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (9.7 percent) was similar to the aggregate lending performance (9.8 percent) in these tracts.

Small Business Loans

Regions Bank made 1,001 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 80 loans (8.0 percent) were located in low-income tracts, and 194 loans (19.4 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's small business lending in low-income tracts (8.0 percent) was above the percentage of businesses (6.8 percent) in these tracts. In 2018, the bank's small business lending in low-income tracts (8.1 percent) was similar to the aggregate lending performance (7.9 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (10.7 percent) was slightly above the aggregate lending performance (8.7 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (7.3 percent) was slightly below the aggregate lending performance (8.4 percent) in these tracts.

Small business lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (19.4 percent) was above the percentage of businesses (17.0 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (19.1 percent) was slightly above the aggregate lending performance (15.3 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (23.3 percent) was significantly above the aggregate lending performance (14.9 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (18.5 percent) was slightly above the aggregate lending performance (15.1 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (7.4 percent) was below the percentage of low-income families (20.8 percent). In 2018, the bank's home purchase lending to low-income borrowers (6.9 percent) was significantly above the aggregate lending performance (4.4 percent) to these borrowers. In 2019, the Regions Bank's home purchase lending to low-income borrowers (7.0 percent) was similar to the aggregate lending performance (7.7 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (8.1 percent) was similar to the aggregate lending performance (8.0 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (17.6 percent) was above the percentage of moderate-income families (17.2 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (16.4 percent) was similar to the aggregate lending performance (17.5 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (15.4 percent) was slightly below the

aggregate lending performance (20.6 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (20.8 percent) was similar to the aggregate lending performance (22.8 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (10.9 percent) was below the percentage of low-income families (20.8 percent). In 2018, the bank's home refinance lending to low-income borrowers (11.3 percent) was above the aggregate lending performance (7.8 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (13.1 percent) was significantly above the aggregate lending performance (8.5 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (9.8 percent) was significantly above the aggregate lending performance (4.9 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (18.7 percent) was above the percentage of moderate-income families (17.2 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (19.9 percent) was above the aggregate lending performance (15.8 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (18.7 percent) was above the aggregate lending performance (14.7 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (18.1 percent) was above the aggregate lending performance (13.9 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (8.7 percent) was below the percentage of low-income families (20.8 percent). In 2018, the bank's home improvement lending to low-income borrowers (4.7 percent) was below the aggregate lending performance (6.4 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (11.2 percent) was slightly above the aggregate lending performance (9.6 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (9.7 percent) was above the aggregate lending performance (7.6 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (17.1 percent) was similar to the percentage of moderate-income families (17.2 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (12.6 percent) was similar to the aggregate lending performance (12.7 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (17.6 percent) was similar to the aggregate lending performance (17.1 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (21.1 percent) was above the aggregate lending performance (16.7 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. From 2018 through 2020, 59.7 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 91.8 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (66.5 percent) was significantly above the aggregate lending performance (43.1 percent) to these businesses. In 2019, the bank's small business lending to small businesses (61.6 percent) was above the aggregate lending performance (42.7 percent) to these businesses. In 2020, the bank's small business lending to small businesses (57.0 percent) was significantly above the aggregate lending performance (37.8 percent) to these businesses. Lastly, 90.3 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes a relatively high level of community development loans in the Chattanooga assessment area. During the review period, the bank originated or renewed four community development loans totaling \$18.1 million and 72 community development PPP loans totaling \$20.2 million. Specifically, the bank originated or renewed \$16.8 million in affordable housing initiatives; \$15.8 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; and \$5.7 million to support economic development.

Most of the qualified loans were impactful and responsive to assessment area needs. Additionally, the bank's current lending by number of loans and dollar volume exceeds performance by most peers in this market while lagging behind the leader in the market. Additionally, the assessment area also benefits from statewide loans detailed later under the state of Tennessee.

Some of the most impactful loans directly benefiting the assessment area include:

- Three loans totaling \$16.9 million for new construction of apartments using LIHTCs. The loans were originated as construction and bridge financing in various phases of the LIHTC projects. The three projects were designed to create 281 new units of affordable housing for low-income individuals and/or families throughout the assessment area.
- One loan to a statewide CDFI for financing small businesses in rural communities throughout Tennessee. Regions Bank allocated \$1.2 million of the loan directly to small businesses in Chattanooga.
- A \$14,000 loan made through the PPP to a nonprofit homeless shelter.
- Approximately 50 percent of the community development PPP loans in this assessment area were originated to nonprofits. This is particularly responsive given the needs of nonprofits and the unique challenges faced by nonprofits during the pandemic.

INVESTMENT TEST

Regions Bank's investment test rating in the Chattanooga multistate assessment area is outstanding. The bank made an excellent level of investments and contributions totaling \$44.9 million in the assessment area. The bank's investments (excluding contributions) totaled \$44.5 million, of which \$33.2 million (74.5 percent) were new investments acquired during the review period. All of the bank's investments during the review period provided financing for affordable housing. The bank invested \$20.5 million in mortgage-backed securities secured by loans for multifamily rental housing and mortgages to LMI homeowners. Additionally, the bank invested \$12.5 million in two LIHTC projects that provided 265 units of affordable housing. The bank also held investments from prior review periods, including an investment in a LIHTC project in 2018 that provided about 76 units of affordable housing and had a book value at the end of the evaluation period of approximately \$7.0 million. The remaining prior period investments were LIHTC investments and mortgage-backed securities. Regions Bank made \$393,600 in contributions that demonstrated responsiveness to credit and community development needs in the Chattanooga assessment area. Specifically, the bank provided grants totaling \$280,600 to organizations that provide community services targeted to low- and moderate-income individuals, \$96,000 to promote economic development, and \$17,000 for affordable housing. Overall, approximately \$123,200 in donations were responsive to the COVID-19 pandemic, providing support for organizations providing emergency and recovery assistance to LMI individuals, small businesses, and nonprofits. Examples of notable donations include:

- Contributions totaling \$76,000 to a nonprofit organization that provided grants and technical assistance to small businesses during the COVID-19 pandemic;
- \$10,000 to a nonprofit organization to support a new workforce development program to respond to changes in the workplace due to the COVID-19 pandemic;
- \$11,000 in grants to an organization that provides entrepreneurship training and related programs for women, minorities, youth, and residents of low-income communities; and
- \$7,500 to a CDFI to support the Money School, which is a series of workshops focused on topics such as managing credit and homeownership counseling.

SERVICE TEST

Regions Bank's service test performance in the Chattanooga multistate assessment area is low satisfactory.

Retail Services

Retail banking services are adequate in the Chattanooga multistate assessment area.

The distribution of 18 branch offices and 19 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank had one branch in a low-income tract. The percentage of branches in low-income tracts was slightly less than the percentage of households and businesses in the same geography: 6.2 percent of households and 6.8 percent of businesses were located in low-income census tracts compared to 5.6 percent of the bank's branches. The

proportion of the bank’s branches in moderate-income tracts, however, was greater than the percentage of households and businesses in the same geography: 22.2 percent of total branches were in moderate-income tracts compared to 19.6 percent of households and 17.0 percent of businesses. Overall, the bank’s retail delivery systems are reasonably accessible to the bank’s geographies and individuals of different income levels.

The bank’s hours and services do not vary in a way that inconveniences the multi-state Chattanooga assessment area, particularly low- and moderate-geographies and/or low- and moderate-individuals. During the review period, Regions Bank did not open any branches or full-service ATMs. However, the bank closed one branch and one full-service ATM in a moderate-income tract. Overall, the bank’s record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area.

 DTP - Drive thru only is a subset of total branches
 SA = Stand Alone ATM is a subset of total ATMS

Community Development Services

Regions Bank provides an adequate level of community development services in the Chattanooga multistate assessment area. During the review period, Regions Bank employees provided 47 service activities for a total of 442 service hours in various capacities to qualified organizations. Bank employees engaged in providing financial education and board service or committee membership with a variety of organizations that provide community services in low- and moderate-income geographies and for low- and moderate-income individuals. Of the total qualified service hours, 161 hours were committed to adult and youth financial education and homebuyer training through partnerships with various schools and community organizations. Additionally, 263 hours were served as board or committee members for various qualified nonprofit organizations. Bank employees provided technical assistance to two nonprofit organizations during the review period, one to assist with a Federal Home Loan Bank affordable housing application and another to assist with community engagement meetings. Overall, the bank’s activities exhibited adequate responsiveness to community development needs in the assessment area.

CRA RATING FOR COLUMBUS GA-AL MULTISTATE: SATISFACTORY

The Lending Test is rated: **High Satisfactory**

The Investment Test is rated: **Outstanding**

The Service Test is rated: **Needs to Improve**

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank is a leader in making community development loans in its Columbus multistate assessment area.
- The bank provides an excellent level of qualified community development investments and grants that are responsive to community development needs of the Columbus multistate assessment area.
- Retail services may be considered unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels in the assessment area.
- The bank provides a limited level of community development services throughout the assessment area.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Columbus multistate assessment area are consistent with the overall scope described in the Description of the Institution section of this report. Regions Bank's performance in the Columbus multistate assessment area was evaluated using full-scope examination procedures.

**DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE COLUMBUS, GA-AL MSA
MULTISTATE ASSESSMENT AREA**

Overview

The Columbus multistate assessment area consists of Muscogee County in Georgia and Russell County in Alabama, which are two of the seven counties that make up the multistate Columbus, GA-AL MSA. As of June 30, 2020, Regions Bank operated three branches in the assessment area, which accounted for 0.2 percent of the institution's total deposits and 0.1 percent of the bank's total HMDA-reportable and CRA small business loans (by dollar).

Regions operates in a highly competitive environment in the Columbus assessment area. According to the June 30, 2020, FDIC Summary of Deposits Report, Regions Bank ranked 4th out of 12 financial institutions with \$187 million in deposits and 1.5 percent of the market share. Synovus Bank is the market leader, with 73.6 percent of the market share of total deposits, followed by Truist Bank (12.4 percent) and Wells Fargo Bank (6.8 percent).⁷⁹

In 2018, Regions Bank ranked 27th out of 246 HMDA reporters, originating 0.7 percent of total HMDA loans in the assessment area. In 2019 and 2020, Regions Bank ranked 36th (out of 263 reporters) and 30th (out of 290 reporters), originating 0.6 percent of total HMDA loans in the assessment area for both years. Synovus and Wells Fargo Bank held the top spots among the HMDA reporters in the assessment areas for all three years.

For small business lending in the assessment area, Regions Bank ranked 19th out of 80 CRA reporters with 0.8 percent of loans generated in 2018. In 2019, Regions Bank ranked 18th out of 77 CRA reporters, again with 0.8 percent of loans generated. In 2020, Regions Bank ranked 10th out of 91 CRA reporters, with 2.0 percent of the loans generated. Synovus Bank and American Express have been the leaders among all CRA reporters for the three-year review period.

Population and Income Characteristics

The Columbus assessment area experienced 9.5 percent population growth⁸⁰ between 2010 and 2020, in line with the growth of 10.0 percent for the State of Georgia⁸¹ and slightly higher than the national growth rate of 7.4 percent⁸² for this same period. Russell County experienced an 11.0 percent increase in population between 2010 and 2020.⁸³ Phenix City is the most populous city in Russell County, with a population of 38,816 in 2020.⁸⁴ Phenix City saw a population increase of 18.3 percent between 2010 through 2020.⁸⁵ Muscogee County, which is the more populous of the two counties, saw a 9.0 percent increase in population over this same period.⁸⁶ The city of Columbus, located in Muscogee County, has a population of 206,922 in 2020, representing an 8.9 percent increase in population over 2010.⁸⁷

According to the 2020 FFIEC census data, the assessment area contains 66 census tracts: 11 low-income tracts (16.7 percent), 21 moderate-income tracts (31.8 percent), 20 middle-income tracts (30.3 percent), 13 upper-income tracts (19.7 percent) and one unknown-income tracts (1.5 percent). Stewart and Talbot counties in Georgia were added to the MSA in 2019, which affected income statistics and classifications for the MSA.

Consequently, the 2018 FFIEC census data showed a slight difference in tract distribution: 11 low-income tracts (16.7 percent), 22 moderate-income tracts (33.3 percent), 19 middle-income tracts (28.8 percent), 13 upper-income tracts (19.7 percent), and one unknown-income tract (1.5 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table sets forth the estimated median family income for 2018 through 2020 for the Columbus MSA and provides a breakdown of the range of estimated family income for each income category (low, moderate, middle, and upper).

**Borrower Income Levels
Columbus, GA-AL MSA**

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2018	\$56,000	0 - \$27,999	\$28,000 - \$44,799	\$44,800 - \$67,199	\$67,200 - & above
2019	\$57,400	0 - \$28,699	\$28,700 - \$45,919	\$45,920 - \$68,879	\$68,880 - & above
2020	\$59,100	0 - \$29,549	\$29,550 - \$47,279	\$47,280 - \$70,919	\$70,920 - & above

As shown, the median family income for the Columbus MSA increased from \$56,000 in 2018 to \$59,100 in 2020. Of the two counties comprising the assessment area, Russell County had the lowest median family income of \$42,208⁸⁸. For Muscogee County, the median family income was \$47,418.⁸⁹ Additionally, 40.3 percent of the families living in the MSA were considered low- to moderate-income in 2018.⁹⁰ After the addition of Stewart and Talbot counties to the MSA in 2019, the percentage of families considered low- to moderate-income remain unchanged.⁹¹

Regarding poverty, the 2018 FFIEC census data showed that 16.1 percent of families in the assessment area lived in poverty and that statistic remained unchanged from 2019 through 2020. Between 2015 through 2019, 15.8 percent of families in Russell County were below the poverty line, while Muscogee County saw a similar percentage of 16.0 percent of families living in poverty.⁹² The percentage of families living in poverty in the assessment area is higher than the percentage of families living in poverty in the State of Alabama and Georgia at 12.3 percent and 11.3 percent, respectively.⁹³

A significant percentage of families in low- and moderate-income areas in the assessment area live below the poverty level. According to 2018 FFIEC census data, 52.2 percent of families in low-income tracts and 20.8 percent of families in moderate-income tracts live below the poverty line. After Stewart and Talbot counties

⁸⁸ “Quick Facts.” *U.S. Census Bureau*, <https://www.census.gov/quickfacts/fact/table/GA,muscogeecountygeorgia,russellcountyalabama/PST045221>. Accessed 6 Apr. 2022.

⁸⁹ *Ibid.*

⁹⁰ FRB Atlanta calculations of 2018 and 2020 FFIEC Census Data.

⁹¹ *Ibid.*

⁹² “Estimated Percent of All Families that Live in Poverty, between 2015-2019.” *Policy Map*, <https://www.policymap.com>. Based on data from United States Census Bureau. Accessed 6 Apr. 2022.

⁹³ *Ibid.*

were added to the MSA in 2019, the 2020 FFIEC census tract data shows that the percentage of families in low- and moderate-income tracts living below the poverty line remained unchanged. The significant percentage of families living below the poverty level in low- and moderate-income tracts may limit lending opportunities in those geographies.

Economic Conditions

The Columbus GA-AL MSA includes counties located in the states of Alabama and Georgia. Russell County in Alabama is in the eastern south-central section of Alabama. It borders the state of Georgia with the Chattahoochee River running between the two states.⁹⁴ Phenix City is the seat of economic activity in Russell County. Muscogee County in Georgia lies in the central western section of Georgia and borders the state of Alabama. In 1971, the City of Columbus merged with Muscogee County to create Georgia's first consolidated government.⁹⁵

Because of their proximity and geographical location, Phenix City, Alabama, and Columbus, Georgia, share similar economic trends and are interconnected through the major employers in the area. Government, defense, manufacturing, education and health services, and trade and transportation are the major industries in the area.⁹⁶ Fort Benning, TSYS, Aflac, and Pratt and Whitney are a few of the major employers in the area.^{97,98} As of December 2020, Fort Benning is the top employer with around 45,000 employees, followed by TSYS with 4,000 employees, and AFLAC with around 3,000 employees.⁹⁹ In Phenix City, Columbus Regional Healthcare is a big employer with 4,000 employees.¹⁰⁰ In Columbus, Muscogee County School District is a major employer with around 5,500 employees.¹⁰¹ Lastly, Synovus Bank¹⁰² and AFLAC¹⁰³ are headquartered in Columbus.

Furthermore, the high school graduation rate of Phenix City is 86.5 percent and 89.6 percent for Columbus.¹⁰⁴ Both cities have graduation rates that are in line with the national rate of 88.5 percent.¹⁰⁵ With a high percentage of high school graduates and a median population age of around 34 years¹⁰⁶ for both cities, there is a good labor pool for employers to tap into in the assessment area.

The Columbus AL-GA MSA felt the impact of the COVID-19 pandemic like other parts of the country. With changes to the working conditions, Shelter-In-Place,¹⁰⁷ closure of restaurants, online schooling and reduced work hours by employers, unemployment increased during the initial months of 2020 and decreased from the initial increase towards the end of 2020 as businesses started putting more COVID safety protocols in place.

As shown in the chart above, in 2020, the state of Georgia had an unemployment rate of 6.5 percent, and the state of Alabama had an unemployment rate of 5.9 percent. While Russell County experienced an unemployment rate of 5.2 percent, lower than the state of Alabama, this was not the case with Muscogee County. Muscogee County experienced an unemployment rate of 7.8 percent, which was higher than the state of Georgia’s unemployment rate. The COVID-19 pandemic accelerated the increase in unemployment, particularly due the furloughs in the hospitality industry. Valley Hospitality in Columbus is one example of having to furlough a large amount of its workforce after closing all nine of its hotels and two of three of its restaurants, during the initial phase of the pandemic.¹⁰⁸

Since the start of the pandemic, companies have been expanding and adding jobs in the Columbus GA-AL MSA. In December 2020, Path-Tec, a healthcare logistics and supply chain company, announced adding 350 jobs in the area.¹⁰⁹ Hyundai TRANSYS, an affiliate of car manufacturer Hyundai, is expanding its seating manufacturing

operations in West Point, Georgia.¹¹⁰ JinTech, a South Korean automotive parts manufacturer, announced plans to open a facility in West Point.¹¹¹

In the assessment area, small businesses have access to resources they can use to help start up a business or expand an existing organization. For example, the Columbus Chamber of Commerce works with the strategic partners to provide local businesses with information, programs, services, and initiatives.¹¹² Additionally, SCORE is another organization that is staffed by volunteers who provide area businesses with mentorship advise.¹¹³ Like SCORE, StartUp Columbus also provides support to entrepreneurs and start-up companies with mentorship advise, financial and professional resources.¹¹⁴ Furthermore, Columbus State University, through the Turner college of Business, offers education opportunities for business professionals, including a minor in entrepreneurship.¹¹⁵ Lastly, the University of Georgia, through the Small Business Development Center, provides tools, training, and resources to help small business grow and succeed.¹¹⁶

Small businesses play an important role in the Columbus multistate assessment area. In 2018, there were 9,076 total businesses in the assessment area.¹¹⁷ Of these, 90.9 percent of businesses were small businesses, defined as businesses with gross revenue of \$1 million or less.¹¹⁸ These numbers changed slightly in 2020. The number of total businesses in the area increased 1.4 percent to 9,206, and the percentage of small businesses increased to 91.8 percent of the total businesses in the area.¹¹⁹

Furthermore, out of the 9,076 businesses in the assessment area in 2018, 9.7 percent were in low-income tracts and 24.2 percent were in moderate income tracts. Among small businesses with revenues less than or equal to \$1 million, 9.4 percent were in low-income tracts and 24.4 percent were in moderate-income tracts. In 2019, out of the 9,206 total businesses, 9.6 percent were in low-income tracts and 23.3 percent were in moderate-income tracts, which is very similar to the 2018 data. Additionally, out of the total percentage of small businesses in the assessment area for 2020, 9.3 percent were in low-income tracts (a decrease from the 2018 data) and 23.5 percent were in moderate-income tracts (decrease from the 2018 data).

¹¹⁹ 2020 FFIEC Census Data and 2020 Dun & Bradstreet Information.

An analysis of CRA reportable data shows that the percentage of small business loans, defined as loans with a principal amount of \$1 million or less has increased between 2018 through 2020. Of all the CRA reporters in the assessment area, in 2018, 43.4 percent of all loans made to small businesses were small business loans, in 2019 that number dropped to 36.2 percent and in 2020, small business loans were 45.3 percent of all CRA reportable loans. This increase in 2020 most likely stems from the increased loans made through the Paycheck Protection Program during the initial year of the COVID-19 pandemic. Through the Paycheck Protection Program (PPP), 10,132 loans with an initial approval amount of \$411,721,200 were made for businesses in Muscogee County.¹²⁰ Russell County had 2,716 PPP loans approved, with an initial approval amount of \$79,974,173.¹²¹

According to 2018 FFIEC census data, the assessment area had 109,871 housing units, of which 44.9 percent were owner-occupied, 41.6 percent were rental units, and 13.5 percent were vacant. Out of the total housing units in low-income census tracts, 15.2 percent units were owner-occupied, 66.6 percent were rental, and 18.2 percent were vacant. In moderate-income tracts, 41.4 percent of units were owner-occupied, 41.9 percent were rental, and 16.8 percent were vacant. In 2019, the 2020 FFIEC census data showed that there were no changes in percentages of owner-occupied, rental, or vacant units low-income census tracts; however, in moderate-income census tracts 41.2 percent of units were owner-occupied, 42.0 percent were rental, and 16.9 percent were vacant.

Homeownership rates in the two counties comprising the assessment area were lower than the respective statewide averages. According to 2020 FFIEC census data, 57.7 percent of units in Alabama and 54.8 percent of units in Georgia were owner occupied compared to 44.9 percent of units in the assessment area being owner occupied. These percentages suggest that owner occupancy rates are lower in the assessment area as compared to the owner occupancy rates for the states of Alabama and Georgia.

The 2018 and 2020 FFIEC census data reported the median age of homes in low-income census tracts within the assessment area to be 60 years, which is higher than the median age of homes in moderate-income tracts of 49 years and significantly higher than that in the upper-income tracts of 32 years. This same data shows that the median housing value in Russell County was \$111,000, which is lower than the median housing value in Alabama of \$125,500; Muscogee County had a similar trend with a median housing value of \$134,500, which is lower than the median housing value in Georgia of \$148,100.

The trend in median housing prices is opposite of median value. Between 2018 through 2020 median housing sales price has increased every year. In the State of Alabama, median sales prices for single family homes increased from \$176,821 in 2018, to \$188,779 in 2019, and to \$206,610 in 2020, representing 16.8 percent between 2018 through 2020.¹²² Russell County, Alabama showed a similar trend, with median house prices rising

¹²¹ “Who in Alabama Got Paycheck Protection Program Loans During the Pandemic?” *The Augusta Chronicle*, <https://data.augustachronicle.com/paycheck-protection-program-loans/summary/alabama/russell-county/01113/>. Accessed 8 Apr. 2022.

¹²² “Median Sales Prices for Single Family Homes.” *PolicyMap*, <https://www.policymap.com>. Based on data from Moody’s Analytics. Accessed 11 Apr. 2022.

from \$127,421 in 2018, to \$133,382 in 2019, and to \$140,196 in 2020,¹²³ representing a 10.0 percent increase within those three years. Similarly, in Georgia, the median sales price increased 16.7 percent from 2018 to 2020, with median house sales prices being \$195,884 in 2018, \$207,171 in 2019, and \$228,547 in 2020.¹²⁴ Muscogee County, GA had a 11.2 percent increase in median house prices from 2018 to 2020, with prices rising from \$168,985 in 2018, to \$177,383 in 2019, and to \$187,900 in 2020.¹²⁵

The median household income influences housing affordability. The 2018 FFIEC census data reported the median household income for the assessment area was \$51,444, for Russell County it was \$44,886, and for Muscogee County it was \$53,171. The median household income remained unchanged in 2020. Using the assumption that a borrower can service a loan that is approximately three times the borrower's gross annual income and using the 2020 Area Median Income for the assessment area, a borrower can afford a home priced around \$111,147 for Russell County and \$126,108 for Muscogee County. The median sales price for the assessment area is higher than the affordability for the average borrower.

Comparatively, in the same time frame, the same size family is more likely to afford a two-bedroom rental unit in the assessment area. Per FFIEC census data for 2018 and 2020, the median gross rent for a 2-bedroom apartment in the assessment area was \$807.¹²⁶ For Muscogee County, the median gross rent for a 2-bedroom apartment in the assessment area was \$830, which is lower than the average rent of \$879 for Georgia.¹²⁷ In the same time frame, the median gross rent of Russell County was \$732, higher than that of \$717 in Alabama.¹²⁸ These rental rates place a disproportionate burden on renters who spend over 30 percent of their income on rent and are considered cost-burdened with rent expense. In the assessment area, 47.9 percent of the renters are cost-burdened with rent.¹²⁹ Muscogee county has a higher percentage of renters who are cost-burdened at 48.9 percent, compared to Russell County at 44.1 percent.¹³⁰

Demographic Characteristics by Census Tract

The following tables present key demographic and business information used to help develop a performance context for the assessment area for the years 2018 through 2020. The data reflects the 2019 through 2020 FFIEC census data and Dun & Bradstreet data for the same years to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development and economic landscapes, individuals familiar with the community and with community development activities were contacted. These individuals discussed the various opportunities and challenges in the region and how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities. There are numerous opportunities in the Columbus market for banks to partner with nonprofits, developers, and community development financial institutions to engage in a wide range of community development activities, including affordable housing development, workforce development, neighborhood revitalization, small business lending, financial education, or provision of technical assistance to nonprofit organizations and their constituencies.

One community contact involved in affordable housing stated that housing conditions are very challenging for people looking for affordable housing. The situation has not changed in the past 20 years. There are few safe and decent affordable homes for low-and-moderate income families. If families want children to live in nice areas with a decent school district, houses are either not affordable at all or are a cost-burden. The divide between nice neighborhoods and impoverished areas is increasing. Banks have started becoming more engaged in providing access to affordable housing through down payment assistance and other grant/loan products. However, there is an increased need for banks to provide gap loans to reduce the initial burden and provide an incentive low-and-moderate income families to start looking into home ownership.

Another community contact with close ties to the minority population of the city felt that minority business owners have made great strides economically. They are smarter with money and investment opportunities and are looking at ways to grow their businesses and improve their station in life. However, the contact feels that stringent lending criteria and lack of financial education (such as lending and banking) is keeping minority business owners from having the necessary access to credit. Small business owners turn to other sources of capital such as equity in the home, retirement funds, and money from relatives. Banks need to proactively reach out the minority business community, host more business events, and advertise about their products in the local community.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE COLUMBUS GA-AL
MULTISTATE ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending test performance in the Columbus assessment area is rated high satisfactory. The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making community development loans in the Columbus assessment area.

The analysis included 150 CRA small business loans and 110 HMDA-reportable loans reported by the bank in the Columbus assessment area during the review period. Therefore, CRA small business-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Within HMDA-

reportable lending, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA-reportable lending in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Home Purchase Loans

Of the 110 HMDA-reportable loans analyzed, 37 loans (33.6 percent) were home purchase loans. The bank made one home purchase loan (2.7 percent) that was located in a low-income tract and eight home purchase loans (21.6 percent) that were located in moderate income-tracts.

Home purchase lending in low-income tracts was not rated due to a low volume of lending by all lenders in these tracts.

Home purchase lending in moderate-income tracts is good. In 2018, Regions Bank's home purchase lending in moderate-income tracts (21.4 percent) was similar to the percentage of owner-occupied units (28.9 percent) in these tracts. In 2019, Stewart and Talbot counties were added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending in moderate-income tracts (21.7 percent) was similar to the percentage of owner-occupied units (27.9 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in moderate-income tracts (21.4 percent) was above the aggregate lending performance (15.3 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (6.7 percent) was significantly below the aggregate lending performance (15.6 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (50.0 percent) was significantly above the aggregate lending performance (15.0 percent) in these tracts.

Home Refinance Loans

Regions Bank made 51 home refinance loans from 2018 through 2020, which represents 46.4 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, none were located in low-income

tracts; however, 11 home refinance loans (21.6 percent) were located in moderate-income tracts. Home refinance lending in low-income tracts was not rated due to a low volume of lending by all lenders in these tracts.

Home refinance lending in moderate-income tracts is good. In 2018, Regions Bank's home refinance lending in moderate-income tracts (36.4 percent) was above the percentage of owner-occupied units (28.9 percent) in these tracts. In 2019, Stewart and Talbot counties were added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending in moderate-income tracts (17.5 percent) was below the percentage of owner-occupied units (27.9 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in moderate-income tracts (36.4 percent) was significantly above the aggregate lending performance (19.5 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (20.0 percent) was above the aggregate lending performance (14.0 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (16.7 percent) was above the aggregate lending performance (11.6 percent) in these tracts.

Home Improvement Loans

Regions Bank made 22 home improvement loans from 2018 through 2020, which represents 20.0 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, one loan (4.5 percent) was located in a low-income tract, and five loans (22.7 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts was not rated due to a low volume of lending by all lenders in these tracts.

Home improvement lending in moderate-income tracts is adequate. In 2018, Regions Bank's home improvement lending in moderate-income tracts (33.3 percent) was above the percentage of owner-occupied units (28.9 percent) in these tracts. In 2019, Stewart and Talbot counties were added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending in moderate-income tracts (18.8 percent) was below the percentage of owner-occupied units (27.9 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in moderate-income tracts (33.3 percent) was significantly above the aggregate lending performance (16.3 percent) in these tracts. In 2019, Regions Bank made no home improvement loans in moderate-income tracts (0.0 percent) and was significantly below the aggregate lending performance (15.3 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (30.0 percent) was significantly above the aggregate lending performance (17.5 percent) in these tracts.

Small Business Loans

Regions Bank made 150 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 21 loans (14.0 percent) were located in low-income tracts, and 33 loans (22.0 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is excellent. In 2018, Regions Bank's small business lending in low-

income tracts (23.1 percent) was above the percentage of businesses (9.7 percent) in these tracts. In 2019, Stewart and Talbot counties were added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in low-income tracts (12.1 percent) was above the percentage of businesses (9.6 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in low-income tracts (23.1 percent) was significantly above the aggregate lending performance (8.2 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (9.4 percent) was slightly above the aggregate lending performance (7.9 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (13.0 percent) was significantly above the aggregate lending performance (8.4 percent) in these tracts.

Small business lending in moderate-income tracts is adequate. In 2018, Regions Bank's small business lending in moderate-income tracts (19.2 percent) was similar to the percentage of businesses (24.2 percent) in these tracts. In 2019, Stewart and Talbot counties were added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in moderate-income tracts (22.6 percent) was similar to the percentage of businesses (23.3 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate lending performance, in 2018, the bank's small business lending in moderate-income tracts (19.2 percent) was slightly below the aggregate lending performance (22.3 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (37.5 percent) was significantly above the aggregate lending performance (21.1 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (17.4 percent) was slightly below the aggregate lending performance (20.9 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. In 2018, Regions Bank's home purchase lending to low-income borrowers (21.4 percent) was similar to the percentage of low-income families (24.2 percent). In 2019, Stewart and Talbot counties were added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending to low-income borrowers (4.3 percent) was below the percentage of low-income families (23.8 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to low-income borrowers (21.4 percent) was significantly above the aggregate lending performance (4.9 percent) to these borrowers. In 2019, Regions Bank made no home purchase loans to low-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (4.6 percent) to these borrowers. In 2020,

the bank's home purchase lending to low-income borrowers (12.5 percent) was significantly above the aggregate lending performance (4.4 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is good. In 2018, Regions Bank's home purchase lending to moderate-income borrowers (14.3 percent) was similar to the percentage of moderate-income families (18.5 percent). In 2019, Stewart and Talbot counties were added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending to moderate-income borrowers (21.7 percent) was above the percentage of moderate-income families (18.3 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to moderate-income borrowers (14.3 percent) was similar to the aggregate lending performance (15.6 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (20.0 percent) was above the aggregate lending performance (13.9 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (25.0 percent) was significantly above the aggregate lending performance (16.2 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. In 2018, Regions Bank's home refinance lending to low-income borrowers (9.1 percent) was below the percentage of low-income families (24.2 percent). In 2019, Stewart and Talbot counties were added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending to low-income borrowers (7.5 percent) was below the percentage of low-income families (23.8 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to low-income borrowers (9.1 percent) was slightly above the aggregate lending performance (7.6 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (10.0 percent) was significantly above the aggregate lending performance (3.6 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (6.7 percent) was significantly above the aggregate lending performance (1.5 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is excellent. In 2018, Regions Bank's home refinance lending to moderate-income borrowers (36.4 percent) was above the percentage of moderate-income families (18.5 percent). In 2019, Stewart and Talbot counties were added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending to moderate-income borrowers (17.5 percent) was similar to the percentage of moderate-income families (18.3 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to moderate-income borrowers (36.4 percent) was significantly above the aggregate lending performance (11.8 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (10.0 percent) was slightly above the aggregate lending performance (8.1 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (20.0 percent) was significantly above the aggregate lending performance (5.4 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. In 2018, Regions Bank's home improvement lending to low-income borrowers (16.7 percent) was below the percentage of low-income families (24.2 percent). In 2019, Stewart and Talbot counties were added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending to low-income borrowers (12.5 percent) was below the percentage of low-income families (23.8 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to low-income borrowers (16.7 percent) was significantly above the aggregate lending performance (7.7 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (16.7 percent) was significantly above the aggregate lending performance (3.4 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (10.0 percent) was significantly above the aggregate lending performance (5.0 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is adequate. In 2018, Regions Bank's home improvement lending to moderate-income borrowers (33.3 percent) was above the percentage of moderate-income families (18.5 percent). In 2019, Stewart and Talbot counties were added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending to moderate-income borrowers (18.8 percent) was above the percentage of moderate-income families (18.3 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to moderate-income borrowers (33.3 percent) was significantly above the aggregate lending performance (15.4 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (16.7 percent) was slightly above the aggregate lending performance (14.4 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (20.0 percent) was significantly above the aggregate lending performance (12.5 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is excellent. In 2018, 76.9 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 90.9 percent of total businesses in the assessment area were classified as small businesses. In 2019, Stewart and Talbot counties were added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, 72.6 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. During this period, 91.8 percent of businesses were classified as small businesses. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending (76.9 percent) was significantly above the aggregate's small business lending performance (43.7 percent). In 2019, the bank's small business lending to small businesses (75.0 percent) was significantly above the aggregate's small business lending performance (38.2 percent) to these businesses. In 2020, the bank's small business lending to small businesses (71.7 percent) was significantly above the aggregate's lending performance (45.8 percent) to these businesses. Lastly, 92.0 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank is a leader in making community development loans in the Columbus assessment area. During the review period, the bank originated three community development loans totaling \$22.8 million and five community development PPP loans totaling \$194,000. Specifically, the bank originated \$20.3 million in affordable housing initiatives; \$2.5 million towards community services benefiting LMI individuals and families; \$126,000 towards revitalization and stabilization efforts both through the PPP and outside of the PPP; and \$68,000 to support economic development.

Given the bank's limited market share and competitive factors in the area, the bank's current dollar volume of lending exceeds most peer performance in this area. Additionally, the bank's primary activity during the review period addressed affordable housing needs through the funding a LIHTC project in the area. The project provided 132 units of affordable housing for LMI individuals and families.

INVESTMENT TEST

Regions Bank's investment test rating in the Columbus multistate assessment area is outstanding. The bank made an excellent level of investments and grants relative to its presence in the assessment area and demonstrated responsiveness to several credit and community development needs. Combined investment and contribution activity inside the assessment area totaled \$13.4 million, and nearly all investments were originated during the review period. The bank made one investment in a LIHTC project for \$12.9 million that provided 133 units of affordable housing. The bank's remaining current period and prior period investments were primarily mortgage-backed securities.

During the review period, the bank made contributions totaling \$30,200. Regions donated about \$26,000 in advertising to a local food bank to help solicit food donations to meet the increased need during the pandemic. The remaining donations were to organizations providing community services to LMI individuals.

SERVICE TEST

Regions Bank's service test performance in the Columbus multistate assessment area is needs to improve.

Retail Services

Retail banking services are limited in the Columbus multistate assessment area.

The distribution of three branch offices and four full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank had one branch in a low-income tract. The percentage of branches in low-income tracts was greater than the percentage of households and businesses in the same geography: 10.2 percent of households and 9.6 percent of businesses were located in low-income census tracts compared to 33.3 percent of the bank's branches. The bank had no branches in moderate-income tracts compared to 29.2 percent of households and 23.3 percent of businesses in the same geography. Stewart County and Talbot County were added to the MSA in 2019; however, these

additions did not change the bank’s branch office distribution. Overall, the bank’s branch distribution relative to available demographic information may limit accessibility to portions of Regions Bank’s geographies and individuals of different income levels.

The bank did not have weekend hours at its branch located in a low-income tract, however, weekend hours are available at its branches in middle- and upper-income tracts. The bank’s business hours vary in a way that inconveniences the multi-state Columbus assessment area, particularly low- and moderate- geographies and/or low- and moderate-individuals.

During the review period, Regions Bank did not open or close any branches or full-service ATMs in low- or moderate-income tracts. However, the bank did close one branch and one full-service ATM in a middle-income tract that was in proximity to low- and moderate-income tracts. Overall, the bank’s record of opening and closing of branches may have adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area.

Community Development Services

Regions Bank provides a limited level of community development services in the Columbus multistate assessment area. During the review period, Regions Bank employees provided five service activities for a total of 549 service hours in various capacities for community development organizations. The majority of the bank’s service hours (480 hours) were contributed by an employee who provided financial education through Regions Bank’s Next Step program. Considering Regions Bank’s size and presence in the assessment area and the opportunities that exist for community development service, the bank needs to improve its performance.

CRA RATING FOR MEMPHIS TN-MS-AR MULTISTATE: OUTSTANDING

The Lending Test is rated: Outstanding

The Investment Test is rated: Outstanding

The Service Test is rated: High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans by borrower income reflects excellent penetration among customers of different income levels and businesses of different revenue sizes.
- The bank is a leader in making community development loans in the Memphis multistate assessment area.
- The bank provides an excellent level of qualified community development investments and grants that are responsive to community development needs of the Memphis multistate assessment area.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment area.
- The bank provides a relatively high level of community development services throughout the assessment area.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Memphis multistate assessment area are consistent with the overall scope described in the Description of the Institution section of this report. Regions Bank's performance in the Memphis multistate assessment area was evaluated using full-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE MEMPHIS TN-MS-AR MULTISTATE ASSESSMENT AREA

Overview

In 2018, the Memphis multistate assessment area included Crittenden County in Arkansas; Benton, Desoto, Marshall, and Tate counties in Mississippi; and Fayette, Shelby, and Tipton counties in Tennessee. In 2019, Benton County was removed from the MSA and the assessment area. As a result, Benton County became part of the bank's Northern Mississippi assessment area. Due to this change, the Memphis multistate assessment area now consists of Crittenden County in Arkansas; Desoto, Marshall, and Tate counties in Mississippi; and Fayette, Shelby, and Tipton counties in Tennessee. As of December 31, 2020, Regions Bank operated 44 branches in the in the assessment area, which accounts for 4.2 percent of the institution's total deposits and 2.2 percent of the bank's total HDMA and CRA small business loans (by dollar).

According to the June 30, 2020 FDIC Summary of Deposits Report, Regions Bank ranked 2nd out of 53 banks in the assessment area with 12.9 percent of the deposit market share and \$5.1 billion in deposits. In terms of deposit share overall, First Horizon Bank is the dominant financial institution in the assessment area, holding 37.4 percent of all deposits.

Regions Bank originated or purchased 2.6 percent of the HMDA-reportable loans in the Memphis assessment area in 2018, ranking 8th out of 509 reporters. In 2019, the bank originated or purchased 2.7 percent of the HMDA-reportable loans in the assessment area, ranking 8th out of 559 reporters. In 2020, Regions Bank originated or purchased 2.4 percent of the HMDA-reportable loans in the assessment area, ranking 9th out of 624 reporters. In general, the top HMDA lenders in the market were Wells Fargo Bank, Quicken Loans, LLC., and Community Mortgage Corporation.

For CRA small business and small farm lending, Regions Bank ranked 8th out of 125 reporters in 2018, with 3.4 percent of reported loans in the Memphis assessment area. In 2019, the bank ranked 8th out of 136 reporters, with 2.8 percent of reported loans. In 2020, Regions Bank ranked 3rd out of 174 reporters, with 6.0 percent of reported loans. Lending in the assessment area was generally dominated by American Express, Chase Bank, and Capital One Bank.

Population and Income Characteristics

According to 2020 census data, the population of the assessment area was 1.3 million, a 1.0 percent increase from the 2010 census.¹³¹ In the assessment area, Desoto County, Fayette County, and Shelby County posted population gains since the last decennial census of 14.9 percent, 9.3 percent, and 0.2 percent, respectively.¹³² Crittenden County, Marshall County, Tate County, and Tipton County all had decreases in population since the last decennial census of 5.7 percent, 9.1 percent, 2.8 percent, and 0.2 percent, respectively.¹³³ Memphis, the principal city of the area, is located in Shelby County, and is the second largest city in Tennessee with 633,104 residents, as of April 1, 2020.¹³⁴ Overall, nearly 70.0 percent of the population in the assessment area lives in Shelby County.¹³⁵

According to 2018 FFIEC census data, there were 311 census tracts in the assessment area: 71 (22.8 percent) low-income census tracts, 66 (21.2 percent) moderate-income tracts, 77 (24.8 percent) middle-income tracts, 90 (28.9 percent) upper-income tracts, and 7 (2.3 percent) tracts with unknown income levels. When Benton County was removed from the assessment area and MSA in 2019, the census tract data changed for the assessment area. As a result, the 2020 FFIEC census data shows that there are now 309 census tracts in the assessment area: 72 (23.3 percent) low-income census tracts, 64 (20.7 percent) moderate-income tracts, 76 (24.6 percent) middle income-tracts, 90 (29.1 percent) upper-income tracts, and 7 (2.3 percent) unknown-income tracts.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table sets forth the estimated median family income for the Memphis, TN-MS-AR MSA and indicates that the estimated median family did not change significantly from 2018 through 2020. In 2018, the estimated median family income in the MSA was \$63,400, and it increased 3.8 percent to \$65,900 in 2020.

¹³⁴ Ibid.

¹³⁵ Ibid.

According to 2018 FFIEC census data, the median family income was the lowest in Benton County (\$40,924) and highest in Desoto County (\$66,854). After the removal of Benton County from the assessment area and MSA in 2019, the 2020 FFIEC census data shows that the median family income was the lowest in Marshall County (\$44,063) and highest in Desoto County (\$66,854). For 2018 and 2020, 24.5 percent of families are considered low-income, and 15.7 percent of families are considered moderate-income in the assessment area.¹³⁶

Borrower Income Levels
Memphis, TN-MS-AR

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2018	\$63,400	0 - \$31,699	\$31,700 - \$50,719	\$50,720 - \$76,079	\$76,080 - & above
2019	\$63,700	0 - \$31,849	\$31,850 - \$50,959	\$50,960 - \$76,439	\$76,440 - & above
2020	\$65,900	0 - \$32,949	\$32,950 - \$52,719	\$52,720 - \$79,079	\$79,080 - & above

Poverty is a concern in the assessment area. From the period 2015 through 2019, the percentage of families in poverty varied greatly throughout the assessment area. The percentage of families in poverty was highest in Crittenden County at 17.9 percent, while the percentage of families in poverty was the lowest in DeSoto County at 6.8 percent.¹³⁷ Both Marshall and Fayette counties had the same percentage of families being in poverty at 14.6 percent.¹³⁸ According to 2018 FFIEC data, 39.5 percent of families in low-income tracts and 22.8 percent of families in moderate-income census tracts were below the poverty level. After the removal of Benton County in 2019, there was a very minimal change in this statistic with now 39.4 percent of families in low-income census tracts and 22.6 percent of families in moderate-income census tracts being below the poverty level.¹³⁹ The high levels of families below the poverty level in low- and moderate-income tracts may present challenges for lending in those areas.

Economic Conditions

Strategically located on the Mississippi River, Memphis is one of the nation’s most significant distribution and logistics hubs. Memphis has access to extensive rail and highway facilities and one of the nation’s largest inland river ports.¹⁴⁰ Due to the city’s access to railways, highways, and river ports, transportation-related industries are very important to the area’s economy. Memphis is the headquarters of FedEx as well as home to major operations of UPS, DHL, and the United States Postal Service.¹⁴¹ The top five major employers in the area include FedEx (30,00 employees), Tennessee State Government (14,200 employees), United States Government (13,200 employees), Methodist Le Bonheur Health Care Corp. (13,000 employees), and Shelby County Schools

(11,500 employees).¹⁴² Additionally, the top five industry sectors with the largest number of jobs include healthcare and social assistance (83,383 jobs), government (79,660 jobs), transportation and warehousing (73,749 jobs), retail trade (65,815 jobs), and accommodation and food services (60,585 jobs).¹⁴³ The occupations with the highest number of jobs include office and administrative support occupations (96,103 jobs), transportation and material moving occupations (93,207 jobs), sales and related occupations (58,076 jobs), food preparation and serving related (51,784 jobs), and healthcare practitioners and technical occupations (41,018 jobs).¹⁴⁴ The occupations with the highest median annual earnings include management occupations (\$84,196), legal occupations (\$68,328), and architecture and engineering occupations (\$68,238), whereas the occupations with the lowest median annual earnings include food preparation and service-related occupations (\$19,416), personal care and service occupations (\$20,987), and building and grounds cleaning and maintenance occupations (\$22,971).¹⁴⁵

Small businesses also play an important role in Memphis's economy. According to 2018 Dun & Bradstreet information, there were 47,107 businesses in the assessment area, of which 89.6 percent had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. Additionally, the 2018 data indicates that 12.5 percent of small businesses in the assessment area were located in low-income tracts, while 16.0 percent were in moderate-income tracts. After the removal of Benton County from the MSA and assessment area in 2019, the 2020 Dun & Bradstreet data showed that there were 48,427 businesses in the assessment area with 90.5 percent of those businesses being classified as small businesses. For that year, 12.8 percent of small businesses were located in low-income census tracts, while 15.8 percent of small businesses were located in moderate-income census tracts. Lending to small businesses posted growth during the review period. According to an analysis of CRA reportable loan data from all reporters in the assessment area, there was a 2.8 percent increase in small business loans made to small businesses from 2018 to 2019. From 2019 to 2020, there was 2.4 percent increase in small business loans originated to small business.

The COVID-19 pandemic was a significant event that brought many challenges to economy in the assessment area and nationwide. During this time, many states issued statewide orders to help prevent the spread of the novel coronavirus. In Arkansas, Governor Asa Hutchinson issued various orders and directives to combat the spread of the virus, including orders to close in-person operations of all barbers, body art establishments, schools, cosmetology establishments, massage therapy clinics/spas, and medical spas; Governor Hutchison also banned sit-down services at all restaurants and bars.¹⁴⁶ In Mississippi, Governor Tate Reeves issued shelter-in-place orders that mandated for individuals to stay at home, except under certain circumstances and mandated that non-essential businesses cease business activities other than those necessary for minimum operations.¹⁴⁷ In Tennessee, Governor Bill Lee issued a "Safer-At Home" order that closed non-essential businesses and informed Tennessee

residents to stay home; additionally, Executive Order 21 was signed into law, which ordered salons, spas, concert venues, theaters, and other indoor recreational facilities to temporarily close.¹⁴⁸ In the assessment area, Memphis and Shelby County municipalities issued their own “Safer-At-Home” orders to combat the spread of the coronavirus.¹⁴⁹ These orders mandated that all residents stay at home and limit travel to only what is necessary to take care of essential needs.¹⁵⁰ Additionally, the orders allowed only employees at essential businesses, such as police, fire, grocery stores, and gas stations, to travel to work.¹⁵¹ All these orders had a direct impact on businesses and caused some of them to cease or reduce operations, which resulted in a decline in economic activity.

In response to the decline in economic activity nationwide, the United States’ Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 25, 2020; this legislation established the Paycheck Protection Program (PPP), which was implemented by the Small Business Administration (SBA), to provide loans to small businesses for payroll costs and certain other expenses.¹⁵² In the assessment area, there were 69,687 PPP loan approvals with an initial approval amount of \$3.2 billion.^{153,154,155} Out of all counties in the assessment area, Shelby County, where Memphis is located, had the most PPP loan activity with 52,769 PPP loan approvals with an initial approval amount of \$2.6 billion, which represents 75.7 percent of the total PPP loans approved and 82.3 percent of the total initial PPP loan approval amount within the assessment area.¹⁵⁶

The assessment area experienced a rise in unemployment during the review period due to the COVID-19 pandemic. The following table shows the unemployment rates for the assessment area, the counties in the assessment area, and the states that make up the multistate assessment area. Unemployment in the assessment area remained the same in 2018 and 2019 at 4.1 percent for both years. In 2018 and 2019, unemployment was highest in Benton County where the unemployment rate was 5.8 percent in 2018 and 6.3 percent in 2019. For these same two years, unemployment was the lowest in Fayette County where the unemployment rate was 3.7 percent in 2018 and 3.6 percent in 2019. As the COVID-19 global pandemic unfolded in 2020, unemployment across the United States increased significantly due to the impact the virus and government mandated business closures had on the economy. In the assessment area, the unemployment rate increased to 8.8 percent, and it was highest in Shelby County at 9.7 percent. The unemployment rate in that assessment area for 2020 was higher than the unemployment rates for the states of Arkansas, Mississippi, and Tennessee, which were 6.1 percent, 8.1 percent, and 7.5 percent, respectively.

Unemployment Rates - Multi Memphis (1 of 2)

Unemployment Rates - Multi Memphis (2 of 2)

The 2018 FFIEC census data indicated that there were 556,375 housing units in the assessment area, of which 54.1 percent were owner-occupied, 33.6 percent were rental, and 12.3 percent were vacant. In low-income census tracts, 28.8 percent of units were owner-occupied, 48.7 percent of units were rental, and 22.6 percent of units were vacant.¹⁵⁷ For moderate-income census tracts, 45.8 percent of units were owner-occupied, 39.0 percent of units were rental, and 15.3 percent of units were vacant.¹⁵⁸ After the removal of Benton County in 2019, the 2020

¹⁵⁷ FRB Atlanta calculations of 2018 FFIEC census data.

¹⁵⁸ Ibid.

FFIEC census data showed that there were 552,178 housing units in the assessment area, of which 54.1 percent were owner occupied, 33.8 percent were rental, and 12.2 percent were vacant. In low-income census tracts, 28.5 percent of units were owner-occupied, 48.8 percent of units were rental, and 22.7 percent of units were vacant.¹⁵⁹ In moderate-income census tracts, 45.6 percent of units were owner-occupied, 40.0 percent of units were rental, and 14.4 percent of units were vacant.¹⁶⁰

Furthermore, the age of housing stock as well as vacancy and blight rates within the city of Memphis are concerning. According to the Memphis 3.0 Comprehensive Plan, 63 percent of housing stock in the city of Memphis was built before 1969.¹⁶¹ This report indicates that costly maintenance of housing resulted in many deteriorating neighborhoods, which prompted people to move to the newer neighborhoods in the eastern part of the city; it was also noted that home repairs in the North and South corridors of the city have become too costly without having financial assistance for individuals with lower incomes.¹⁶² According to the plan, as newer subdivisions were built on the outer edge of the city, many of the city's older neighborhoods have experienced both vacancy and blight.¹⁶³ This report states that there is a 16 percent vacancy rate for housing units, 10 percent vacancy for other uses (office, industrial, and retail space), and 56 square miles of vacant land.¹⁶⁴ In the fall of 2016, about 13 percent of housing units (48,452 parcels) in the city have an indicator of blight, according to the report.^{165,166}

The housing market in the Memphis multistate assessment area grew during the review period. The counties in the assessment area experienced a 17.2 percent to 24.3 percent increase in the median sales price for single-family homes. The county that experienced the highest percentage increase in the median sales price for a single-family home was Marshall County. In 2018, the median sales price for a single-family home in that county was \$115,981 and increased 24.3 percent to \$144,180 in 2020.¹⁶⁷ Out of all the counties in the assessment area, Fayette County had the smallest percentage increase in the median sales price for a home with prices being \$172,166 in 2018 and increasing 17.2 percent to \$201,781 in 2020.¹⁶⁸ In the assessment area, the median sales price for a home was lowest in Marshall County for each year during the review period with prices for a single family home being \$115,981, \$123,044, and \$144,180 for 2018, 2019, and 2020, respectively.¹⁶⁹ The median sales price for a single family home was highest in DeSoto County with prices being \$198,389, \$209,203, and \$245,780 for 2018, 2019, and 2020, respectively.¹⁷⁰

Due to the rising home prices in the assessment area, home affordability is becoming an issue, especially for low- and moderate-income individuals. Using the assumption that a borrower can obtain a loan for approximately three

¹⁷⁰ Ibid.

times their annual income and using 2020 FFIEC median family income for DeSoto and Marshall counties, affordable homes would be priced at \$200,562 for DeSoto County and \$132,189 for Marshall County.¹⁷¹ As mentioned earlier, the median sales price for a single-family home in 2020 for DeSoto County and Marshall County was \$245,780 and \$144,180, respectively. This information shows that home affordability is problematic throughout the assessment area where the median sales price for a single-family home is the lowest and highest.

Furthermore, rent affordability is a concern in the assessment area, especially for renters located in low- and moderate-income census tracts. According to 2020 FFIEC census data, 50.4 percent of renters were considered cost-burdened for rent in the assessment area, which means that the renter paid more than 30 percent of his or her income towards rent. Additionally, 33.9 percent of renters in low-income census tracts and 26.4 percent of renters in moderate-income census tracts were considered cost burdened with rent.¹⁷² In the assessment area, rent was highest in DeSoto County (\$958) and lowest in Fayette County (\$613).¹⁷³ Based on this information, there is an opportunity for more affordable housing in the assessment area, especially in low- and moderate-income census tracts.

Demographic Characteristics by Census Tract

The following tables present key demographic and business information used to develop a performance context for the assessment area for the years 2018 through 2020. The data reflects the 2018 and 2020 FFIEC census and Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the tables are discussed in this evaluation as they apply to specific parts of the analysis.

¹⁷¹ According to 2020 FFIEC census data, the median family income for DeSoto County is \$66,854 and for Marshall County is \$44,063.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development and economic landscapes, individuals familiar with the community and with community development activities were contacted. These individuals discussed the various opportunities and challenges in the region and how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

A contact engaged in small business development was interviewed. This person stated that the Memphis MSA has a slow economy, and it is indicative of the economic status of the population. In particular, the contact mentioned that the Memphis MSA has experienced population losses in the last five years, the eastern portion of Memphis is thriving, and the southern portion of the city of Memphis (zip codes such as 38106 and 38126) are declining. Additionally, it was mentioned that most people are living in poverty, and entrepreneurs and residents in low- and moderate-income neighborhoods are struggling economically due to the COVID-19 pandemic. The contact stated that the Memphis 3.0 Comprehensive Plan, which focuses on “building up and not out,” is attracting people into the city’s downtown neighborhoods to work, play, and live.

Concerning general banking and credit needs, the contact described the access to banking and other financial institution products and services within the Memphis MSA. It was mentioned that there are banking deserts in core neighborhoods, there is no equitable deployment of credit in Memphis, and there is a lack of access to banking services allowing predatory practices to exist, per the contact. The contact feels that there is no equitable deployment of credit in Memphis because the risk management models used for loan approvals have not been updated to include character-based lending that looks beyond credit scores or collateral. It was explained that banks have been receptive to working with customers facing hardships brought on by the COVID-19 pandemic; however, the contact felt that the first round of PPP loans should have been deployed in a more equitable manner, but there were some improvements during the second round of funding. The contact mentioned that financial literacy is needed, and banks should intentionally work to improve access to banking products and services.

For small business development, the contact noted that business activity is spread throughout the MSA, but business growth is not equally dispersed in all areas. It was mentioned that there is a lack of access to capital, which is causing a loss to small business growth as well as businesses not doing well during the pandemic. The contact stated that there have been resources poured into affluent areas in East Memphis and Germantown, which has caused businesses in those areas to thrive; however, South Memphis has experienced disinvestment. The contact further noted that the financial barriers facing small businesses include a lack of access to capital, contracts, and capacity to expand or relocate in the Memphis MSA. Also, it was stated that many small businesses and start-ups lack credit worthiness or readiness (having financials in order) to meet the minimum credit requirements.

Lastly, the contact discussed some opportunities available for participation by local financial institutions. The contact mentioned that there is an opportunity to get involved with the River City Capital Recovery Loan Program through River City Capital Investment; improving the flow of credit to potential and existing small businesses by re-imagining the way to assess risk and using character-based lending (using utilities, cell phone, or rent payments) to underwrite loans; continuing to fund resources for organizations assisting small businesses and providing programs to assist small business; and collaborating with CDFIs, CDCs, EDGE, the Office of

Diversity and Compliance, neighborhood place-based organization, and the Memphis Downtown Commission to provide community development loans, investments, and services.

Another contact engaged in affordable housing and community development discussed the needs of the area. Concerning banking and credit needs, the contact indicated that there is a lack of branches and accessibility for financial services in low- and moderate-income communities. Additionally, there is a proliferation of check cashing and payday lenders that fill the accessibility void, per the contact. It was explained that low- to moderate-income individuals are utilizing alternative lenders due to traditional bank fees, credit checks, and high interest rates. The individual did note that banks are becoming more agile and are considering digital innovations, like banking kiosks, to improve access and to better serve low- and moderate-income communities.

The contact talked about the conditions of existing affordable housing stock. It was mentioned that the condition of housing available is of poor quality, and there is a lack of affordable housing, both rental and single-family units, for families living below 50 percent of the area's median family income. The contact said that there is not enough single-family housing stock to meet the demand because of needed repairs or renovations. Also, without subsidies, like the housing choice vouchers or investments from developers, it is difficult to find quality housing stock where the rent is \$300 or \$400 per month with the subsidy, per the contact. The individual mentioned that there is a lack of housing development funds to attract investors to bring the poor-quality housing up to standards, and most of the affordable housing stock is concentrated in neighborhoods such as Oakhaven, Parkway Village, Whitehaven, Westwood, and Raleigh.

The contact discussed the barriers facing low- and moderate-income homeowners and those who are looking to transition to homeownership. The contact stated that the largest financial/credit-barriers include poor credit histories, which makes it difficult for renters to transition to homeownership; a lack of ability to save for a down payment; an inability to acquire traditional lending for home improvements or renovations due to poor credit; and a lack of awareness, program capacity, and ability of repayment for those participating in repair programs that provide low-interest loans to homeowners through local CDCs (such as United Housing, Inc. and The Works, Inc.). The contact explained that there is a need for home purchase mortgage products with down payment assistance and small dollar mortgage loans for home renovations, repairs, and improvements. The contact spoke about how the COVID-19 pandemic has impacted low- and moderate-income renters. It was mentioned that low- and moderate-income renters were impacted in their ability to make potential rental payments, and the pandemic slowed the conversations around addressing improvements needed for housing stock in the community.

The contact provided information on the opportunities for participation by local financial institutions. These opportunities included:

- Banks collaborating with organizations that offer down payment assistance programs;
- Working with local CDCs to develop products like the Opportunity Home Loan Fund to provide a small mortgage loan product to low- and moderate-income individuals;
- Developing or adopting home repair products with lower income thresholds for low- and moderate-income individuals to qualify;
- Developing or adopting small dollar mortgage products that would benefit neighborhoods where housing prices are under \$50,000;

- Continuing to have conversations with community organizations about the housing needs/barriers and ways to address them; and
- Lowering interest rates for homeowners who show the ability to make timely payments.

Furthermore, a contact who works in supporting economic, housing, and community development initiatives described the general banking and credit needs as well as the affordable housing of Tipton County, Tennessee. Concerning the general banking and credit needs of the area, the contact explained that the access to banking branches, products, and services in Tipton is accessible to everyone, including low- and moderate-income individuals, and most residents have banking accounts because direct deposit is required for those receiving social assistance. Additionally, the individual said that banks have been willing to work with low- and moderate-income customers facing hardships due to the COVID-19 pandemic. Lastly, it was indicated that banks could improve the access to banking products and services for low- and moderate-income people by providing outreach about the products and services targeted to them.

Moreover, the contact described the state of affordable housing and the barriers low- and moderate-income people face. In particular, the contact mentioned that affordable housing, both rental and homeowner properties, are safe and decent, but they are aging and need repairs. The contact explained that elderly individuals own most of the homes in Tipton, and they are having difficulty affording the maintenance needed for their homes. Also, it was stated that there are properties available for sale in the southern and northern portion of Tipton, but the prices are not affordable for the low- and moderate-income population. Further, the contact explained that there is not enough affordable rental and single-family housing stock to meet the demands of area's low- and moderate-income individuals and families, and some families have faced eviction or foreclosure in Tipton due to the COVID-19 pandemic.

The contact explained that there are several barriers preventing low- and moderate-income individuals from accessing affordable housing. Specifically, it was mentioned that the largest financial/credit barriers preventing low- and moderate-income renters from transition to home ownership included the lack of affordable homes and the costs associated with purchasing a home. Also, the contact stated that many low- and moderate-income individuals are already rent- or cost-burdened, and housing is expensive even with down payment assistance. Further, the largest credit barrier faced by current low- and moderate-income homeowners looking to improve or renovate their homes is inadequate income. The contact said that because of these conditions, there is a need for low- and moderate-income home purchase and home improvement products.

Lastly, the contact discussed several opportunities for participation by local financial institutions. These opportunities include:

- Develop a mortgage product targeted to low- and moderate-income individuals as well as conducting outreach that includes homebuyer education and information about low-interest rate loan products;
- Provide down payment assistance for low- and moderate-income borrowers;
- Partner with community development organizations to help clients become mortgage-ready;
- Provide financial literacy, homebuyer education, and outreach to the community, especially in the northern part of Tipton;
- Provide a home repair/rehabilitation program for seniors; and
- Provide funding for financial literacy and homebuyer education online seminars.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE MEMPHIS TN-MS-AR
MULTISTATE ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending test rating in the Memphis assessment area is outstanding. The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans reflects excellent penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making community development loans in the Memphis assessment area.

The analysis included 3,042 HMDA-reportable loans and 2,780 CRA small business loans reported by the bank in the Memphis assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Home Purchase Loans

Of the 3,042 HMDA-reportable loans analyzed, 929 loans (30.5 percent) were home purchase loans. Of the total home purchase loans made, 29 loans (3.1 percent) were located in low-income tracts, and 74 loans (8.0 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is poor. In 2018, Regions Bank's home purchase lending in low-income tracts (2.4 percent) was below the percentage of owner-occupied units (10.1 percent) in these tracts. In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending in low-income tracts (3.5 percent) was below the percentage of owner-occupied units (10.2 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in low-income tracts (2.4 percent) was slightly below the aggregate lending

performance (3.1 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (3.1 percent) was slightly below the aggregate lending performance (3.9 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (3.8 percent) was similar to the aggregate lending performance (4.1 percent) in these tracts.

Home purchase lending in moderate-income tracts is poor. In 2018, Regions Bank's home purchase lending in moderate-income tracts (10.6 percent) was below the percentage of owner-occupied units (17.4 percent) in these tracts. In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending in moderate-income tracts (6.8 percent) was below the percentage of owner-occupied units (16.9 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in moderate-income tracts (10.6 percent) was similar to the aggregate lending performance (9.8 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (6.1 percent) was below the aggregate lending performance (11.2 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (7.3 percent) was below the aggregate lending performance (10.4 percent) in these tracts.

Home Refinance Loans

Of the 3,042 HMDA-reportable loans analyzed, 1,416 loans (46.5 percent) were home refinance loans. Of the total home refinance loans made, 84 loans (5.9 percent) were located in low-income tracts, and 162 loans (11.4 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is excellent. In 2018, Regions Bank's home refinance lending in low-income tracts (9.0 percent) was similar to the percentage of owner-occupied units (10.1 percent) in these tracts. In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending in low-income tracts (5.1 percent) was below the percentage of owner-occupied units (10.2 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in low-income tracts (9.0 percent) was significantly above the aggregate lending performance (3.4 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (7.9 percent) was significantly above the aggregate lending performance (2.3 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (3.6 percent) was significantly above the aggregate lending performance (1.2 percent) in these tracts.

Home refinance lending in moderate-income tracts is good. In 2018, Regions Bank's home refinance lending in moderate-income tracts (12.2 percent) was similar to the percentage of owner-occupied units (17.4 percent) in these tracts. In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending in moderate-income tracts (11.2 percent) was below the percentage of owner-occupied units (16.9 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in moderate-income tracts (12.2 percent) was slightly above the aggregate lending performance (11.0 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (16.5 percent) was significantly above the aggregate lending performance

(8.3 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (8.4 percent) was significantly above the aggregate lending performance (5.4 percent) in these tracts.

Home Improvement Loans

Of the 3,042 HMDA-reportable loans analyzed, 697 loans (22.9 percent) were home improvement loans. Of the total home improvement loans made, 59 loans (8.5 percent) were located in low-income tracts, and 80 loans (11.5 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is excellent. In 2018, Regions Bank's home improvement lending in low-income tracts (8.6 percent) was similar to the percentage of owner-occupied units (10.1 percent) in these tracts. In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending in low-income tracts (8.4 percent) was similar to the percentage of owner-occupied units (10.2 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in low-income tracts (8.6 percent) was significantly above the aggregate lending performance (4.6 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (9.0 percent) was above the aggregate lending performance (6.2 percent) in these tracts. In 2020, the bank's home improvement lending in low-income tracts (7.8 percent) was significantly above the aggregate lending performance (4.6 percent) in these tracts.

Home improvement lending in moderate-income tracts is adequate. In 2018, Regions Bank's home improvement lending in moderate-income tracts (10.4 percent) was below the percentage of owner-occupied units (17.4 percent) in these tracts. In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending in moderate-income tracts (12.0 percent) was similar to the percentage of owner-occupied units (16.9 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in moderate-income tracts (10.4 percent) was similar to the aggregate lending performance (11.0 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (12.7 percent) was slightly above the aggregate lending performance (10.6 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (11.2 percent) was slightly above the aggregate lending performance (9.8 percent) in these tracts.

Small Business Loans

Regions Bank made 2,780 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 473 loans (17.0 percent) were located in low-income tracts, and 484 loans (17.4 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is excellent. In 2018, Regions Bank's small business lending in low-income tracts (17.3 percent) was above the percentage of businesses (12.6 percent) in these tracts. In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in low-income tracts (16.9 percent) was above the percentage of businesses (12.8 percent) in these tracts. Concerning the

bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in low-income tracts (17.3 percent) was significantly above the aggregate lending performance (10.2 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (22.0 percent) was significantly above the aggregate lending performance (10.0 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (15.0 percent) was above the aggregate lending performance (10.4 percent) in these tracts.

Small business lending in moderate-income tracts is good. In 2018, Regions Bank's small business lending in moderate-income tracts (18.2 percent) was above the percentage of businesses (16.3 percent) in these tracts. In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in moderate-income tracts (17.2 percent) was above the percentage of businesses (16.2 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in moderate-income tracts (18.2 percent) was slightly above the aggregate lending performance (15.1 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (21.5 percent) was above the aggregate lending performance (14.8 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (15.6 percent) was similar to the aggregate lending performance (14.6 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is excellent. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is good. In 2018, Regions Bank's home purchase lending to low-income borrowers (6.5 percent) was below the percentage of low-income families (24.5 percent). In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of low-income families in the assessment area remained the same. For the period of 2019 through 2020, the bank's home purchase lending to low-income borrowers (5.0 percent) was below the percentage of low-income families (24.5 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to low-income borrowers (6.5 percent) was significantly above the aggregate lending performance (4.0 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (4.1 percent) was slightly above the aggregate lending performance (3.4 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (5.8 percent) was significantly above the aggregate lending performance (3.7 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is excellent. In 2018, Regions Bank's home purchase lending to moderate-income borrowers (22.3 percent) was above the percentage of moderate-income families (15.8 percent). In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending to moderate-income borrowers (22.1 percent) was above the percentage of moderate-income families (15.7 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to moderate-income borrowers (22.3 percent) was above the aggregate lending performance (15.0 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (20.0 percent) was above the aggregate lending performance (14.1 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (24.0 percent) was above the aggregate lending performance (16.0 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. In 2018, Regions Bank's home refinance lending to low-income borrowers (14.1 percent) was below the percentage of low-income families (24.5 percent). In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of low-income families in the assessment area remained the same. For the period of 2019 through 2020, the bank's home refinance lending to low-income borrowers (9.2 percent) was below the percentage of low-income families (24.5 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to low-income borrowers (14.1 percent) was significantly above the aggregate lending performance (6.6 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (11.8 percent) was significantly above the aggregate lending performance (4.6 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (7.9 percent) was significantly above the aggregate lending performance (2.1 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is excellent. In 2018, Regions Bank's home refinance lending to moderate-income borrowers (19.9 percent) was above the percentage of moderate-income families (15.8 percent). In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending to moderate-income borrowers (16.1 percent) was above the percentage of moderate-income families (15.7 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to moderate-income borrowers (19.9 percent) was significantly above the aggregate lending performance (12.8 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (16.8 percent) was significantly above the aggregate lending performance (9.7 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (15.8 percent) was significantly above the aggregate lending performance (8.0 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is good. In 2018, Regions Bank's home improvement lending to low-income borrowers (7.2 percent) was below the percentage of low-income families (24.5 percent).

In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of low-income families in the assessment area remained the same. For the period of 2019 through 2020, the bank's home improvement lending to low-income borrowers (8.2 percent) was below the percentage of low-income families (24.5 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to low-income borrowers (7.2 percent) was slightly above the aggregate lending performance (6.4 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (8.6 percent) was above the aggregate lending performance (6.5 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (7.8 percent) was significantly above the aggregate lending performance (4.3 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is good. In 2018, Regions Bank's home improvement lending to moderate-income borrowers (11.8 percent) was similar to the percentage of moderate-income families (15.8 percent). In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending to moderate-income borrowers (16.4 percent) was above the percentage of moderate-income families (15.7 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to moderate-income borrowers (11.8 percent) was similar to the aggregate lending performance (12.5 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (18.4 percent) was above the aggregate lending performance (12.7 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (14.2 percent) was above the aggregate lending performance (10.2 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is excellent. In 2018, 72.5 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. By comparison, 89.6 percent of the total businesses in the assessment area were classified as small businesses. In 2019, Benton County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, 58.7 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. During this period, 90.5 percent of the total businesses in the assessment area were classified as small businesses. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending (72.5 percent) was significantly above the aggregate's small business lending performance (41.3 percent). In 2019, the bank's small business lending to small businesses (73.2 percent) was significantly above the aggregate's small business lending performance (40.7 percent) to these businesses. In 2020, the bank's small business lending to small businesses (53.3 percent) was significantly above the aggregate's lending performance (33.3 percent) to these businesses. Lastly, 92.0 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank is a leader in making community development loans in the Memphis assessment area. During the review period, the bank originated or renewed 25 community development loans totaling \$45.8 million and 144 community development PPP loans totaling \$27.0 million. Specifically, the bank originated or renewed \$31.8 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; \$23.7 million in affordable housing initiatives; \$14.0 million to support economic development; and \$3.3 million towards community services benefiting LMI individuals and families. While not separated in the previous totals, the assessment area also benefits from statewide loans detailed later under the state of Tennessee.

Not only does the bank's current volume exceed its previous examination's volume, it also is similar to peer performance in the area when considering market share and the significant opportunity in the area. Moreover, nearly all of the qualified loans were new originations and were impactful and responsive to assessment area needs. These factors exemplify Regions Bank's commitment to new and ongoing relationships throughout the area and provide evidence that the bank continues to become more deeply rooted in the area.

Impactful loans directly benefiting the assessment area include the following:

- Three loans totaling \$14.4 million for new construction of apartments using LIHTCs. The loans were originated as construction and bridge financing in various phases of the LIHTC projects. The projects were designed to create 336 new units of affordable housing for low-income individuals and/or families throughout the assessment area.
- One loan to a statewide CDFI for financing the Memphis Medical District Investment Fund, a large-scale residential and mixed-use project. The loan was originated through RCDC for \$10.0 million, and Regions Bank was noted as the lead lender for the project.
- Two loans totaling \$9.1 million for the purchase and rehabilitation of an apartment complex in Memphis. The property is being converted into affordable housing through issuance of a new contract under HUD. The modification is expected to provide 102 new units of affordable housing to LMI individuals and/or families.
- Ten new loans and/or lines of credit totaling \$3.3 million to eight different nonprofits providing essential community services to LMI residents and food desert communities in the city of Memphis. Services provided by the nonprofits include workforce development, childcare, technology training, education, and social services. These are noteworthy given the absence of many essential services for LMI residents throughout the city of Memphis, as noted by community contacts.
- Four new lines of credit totaling \$1.7 million to a local nonprofit with a mission of revitalizing severely blighted communities in Memphis. Given the concentrations of blighted communities throughout the area, high levels of poverty, and the nonprofit's reputation throughout the area, revitalization efforts through the nonprofit are particularly impactful.
- A \$60,000 loan made through the PPP to a nonprofit daycare for low-income families.

- Approximately 65 percent of the community development PPP loans in this assessment area were originated to nonprofits. This is particularly responsive given the needs of nonprofits and the unique challenges faced by nonprofits during the pandemic.

INVESTMENT TEST

Regions Bank's investment test rating in the Memphis multistate assessment area is outstanding. The bank made an excellent level of investments and contributions totaling \$76.4 million in the assessment area. The bank's investments (excluding contributions) totaled \$75.4 million, of which \$66.6 million (88.4 percent) were new investments acquired during the review period. All of the bank's investments during the review period provided financing for affordable housing. The bank invested \$46.7 million in mortgage-backed securities secured by loans for multifamily rental housing and mortgages to LMI homeowners. Additionally, the bank invested \$20.3 million in three LIHTC projects that provided 430 units of affordable housing. During the review period the bank also renewed a \$250,000 project-related investment in a CDFI that focuses on affordable housing. The bank also held investments from prior review periods, including investments in securities backed by SBA 504 loans and a \$62,000 program-related investment in a scholarship program for LMI students at the University of Memphis. The remaining prior period investments were primarily mortgage-backed securities.

Regions Bank made slightly more than \$1.0 million in contributions that demonstrated excellent responsiveness to credit and community development needs in the Memphis assessment area. Specifically, the bank provided grants totaling \$785,000 to organizations that provide community services targeted to low- and moderate-income individuals; \$118,500 to promote economic development; \$76,750 for affordable housing; and \$52,600 for the revitalization and stabilization of LMI communities. Overall, approximately \$165,700 in donations were responsive to the COVID-19 pandemic, providing support for organizations providing emergency and recovery assistance to LMI individuals, small businesses, and nonprofits. Examples of notable donations include:

- \$345,000 to a large nonprofit organization focused on addressing the high rate of poverty in Memphis by supporting programs and organizations focused on financial stability, education, and health;
- \$25,000 to a CDFI focused on small businesses to help fund their COVID-related efforts, which included aid to troubled borrowers;
- \$80,000 to help sponsor students participating in a workforce development program focused on building information technology talent for unemployed and underemployed LMI individuals;
- \$30,000 to help fund a Financial Empowerment Center in Memphis that provides free one-on-one financial coaching and to support a program that provides training for LMI high school students to learn about the financial trading business;
- \$40,000 to a CDFI focused on affordable housing to support a foreclosure mitigation program, homeownership counseling, and a new fund that will provide down payment assistance and first home purchase mortgages, as well as home repair and rehabilitation loans; and
- A \$15,000 grant to a community development corporation serving a low-income community to support a new community kitchen and food entrepreneurship training program for residents of the community.

SERVICE TEST

Regions Bank's service test rating in the Memphis multistate assessment area is high satisfactory.

Retail Services

Retail banking services are adequate in the Memphis multistate assessment area.

The distribution of 44 branch offices and 52 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The percentage of branches in low-income tracts was less than the percentage of households and greater than the percentage of businesses in the same geography: 17.1 percent of households and 12.8 percent of businesses were located in low-income census tracts compared to 15.9 percent of the bank's branches. The proportion of the bank's branches in moderate-income tracts was less than the percentage of households and businesses in the same geography: 11.4 percent of total branches were in moderate-income tracts compared to 19.5 percent of households and 16.2 percent of businesses. In 2019, Benton County, in which the bank had a branch office in a moderate-income tract, was removed from the MSA. Overall, the bank's retail delivery systems may be considered unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels.

The bank increased weekend hours in moderate-income tracts. Services do not vary in a way that inconveniences the multi-state Memphis assessment area, particularly low- and moderate- geographies and/or low- and moderate- individuals.

During the review period, Regions Bank did not open or close any branches or full-service ATMs in low-income tracts. One branch in a moderate-income tract was closed. The bank opened two branch offices in middle-income tracts and two upper-income tract. Additionally, four full-service ATMs were opened in middle-income tracts and five were opened in upper-income tracts. The bank closed four branch offices in middle-income tracts and two in upper-income tracts as well as closed four full-service ATMs in middle-income tracts and two in upper-income tracts. Overall, the bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area.

Community Development Services

Regions Bank provides a relatively high level of community development services in the Memphis multistate assessment area. During the review period, Regions Bank employees provided 162 service activities for a total of 2,173 service hours to qualified organizations. Regions employees were active in providing a variety of services to a diverse group of local organizations. Regions Bank's community development service activities benefited organizations that provide affordable housing, community services, economic development, and revitalization/stabilization and that support low- and moderate-income individuals, communities, and small

businesses in the Memphis assessment area. Of the bank's total service hours, 1,296 hours were committed to financial and homebuyer education, while approximately 59.8 percent of service hours were board or committee service at community development organizations.

CRA RATING FOR ST. LOUIS MO-IL MULTISTATE: SATISFACTORY

The Lending Test is rated: High Satisfactory

The Investment Test is rated: Low Satisfactory

The Service Test is rated: High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans by borrower income reflects excellent penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a relatively high level of community development loans in the St. Louis multistate assessment area.
- The bank provides an adequate level of qualified community development investments and grants that are responsive to community development needs of the St. Louis multistate assessment area.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment area.
- The bank provides an excellent level of community development services throughout the assessment area.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the St. Louis multistate assessment area are consistent with the overall scope described in the Description of the Institution section of this report. Regions Bank's performance in the St. Louis multistate assessment area was evaluated using full-scope examination procedures.

**DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ST. LOUIS MO-IL MULTISTATE
ASSESSMENT AREA**

Overview

The St. Louis assessment area includes seven counties located in the St. Louis, Missouri-Illinois multistate MSA: Madison, Monroe, St. Clair, and Clinton counties in Illinois; Jefferson, St. Charles, and St. Louis counties in Missouri; as well as the City of St. Louis, Missouri. As of December 31, 2020, Regions Bank operated 63 branches in the assessment area. The St. Louis assessment area accounts for 3.5 percent of the institution's total deposits and 2.6 percent of the bank's total HMDA-reportable and CRA small business loans (by dollar).

According to the FDIC Summary of Deposits Report dated June 30, 2020, with \$4.2 billion in deposits and a market share of 4.1 percent, Regions Bank ranked 6th among 95 financial institutions in the assessment area.¹⁷⁴ Bank of America holds the largest share of deposits in the market at 17.6 percent, followed by U.S. Bank National Association and Stifel Bank & Trust.

HMDA-reportable lending in the assessment area is competitive. Regions Bank originated or purchased 1.3 percent in loans during 2018. For that year, the bank ranked 19th out of 626 reporters. In 2019, Regions Bank originated or purchased 1.3 percent in loans. The bank ranked 23rd out of 637 reporters for the year. Lastly, Regions Bank originated or purchased 1.1 percent in loans during 2020. For that year, Regions Bank ranked 27th out of 684 reporters. From 2018 through 2020, HMDA-reportable lending in the assessment area was primarily dominated by Wells Fargo Bank, U.S. Bank National Association, and DAS Acquisition Company, LLC.

CRA small business lending is also competitive. For CRA small business and small farm lending, Regions Bank ranked 15th out of 161 reporters in 2018, with 1.3 percent of reported loans. In 2019, the bank ranked 17th out of 156 reporters, with 1.0 percent of reported loans. Furthermore, Regions Bank ranked 14th out of 217 reporters, with 2.6 percent of reported loans for 2020. From 2018 through 2020, lending in the assessment area was primarily dominated by U.S. Bank National Association, JPMorgan Chase Bank, and American Express.

Population and Income Characteristics

There has been minimal population growth over the past decade in the St. Louis assessment area. Census data indicates that the assessment area's population increased only 1 percent from April 1, 2010 to April 1, 2020.¹⁷⁵ Currently, the assessment area's total population is 2.5 million people. The majority of residents in the assessment area live in St. Louis County (1 million individuals) and St. Charles County (0.4 million individuals).¹⁷⁶ The independent city of St. Louis is the largest city in the MSA with approximately 0.3 million individuals.¹⁷⁷ From April 1, 2010 to April 1, 2020, St. Louis City's population has declined a total of 5.5 percent.¹⁷⁸ Overall, the city has experienced population decline since 1950, when it was the 8th largest city in the nation with a population of approximately 856,796.¹⁷⁹

According to 2020 FFIEC census data, there are 561 census tracts in the assessment area: 79 (14.1 percent) low-income census tracts, 118 (21.0 percent) moderate-income tracts, 188 (33.5 percent) middle-income tracts, 172 (30.7 percent) upper-income tracts, and 4 (0.7 percent) tracts with unknown income levels.¹⁸⁰

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the St. Louis, MO-IL MSA. The following table sets forth the estimated median family income for 2018 through 2020 and provides a breakdown of the range of estimated annual family income for each income

category (low, moderate, middle, and upper). As shown, the median family income for the St. Louis, MO-IL MSA increased from \$76,600 in 2018 to \$82,600 in 2020. However, there is considerable variation in the median family income throughout the assessment area. The City of St. Louis had the lowest median family income between from the period 2015 through 2019 at \$57,639.¹⁸¹ St. Charles County and Monroe County had the highest median family income at \$100,320 and \$101,294, respectively. It should also be noted that 38.3 percent of families in the assessment area are considered low- to moderate-income.

**Borrower Income Levels
St. Louis, MO-IL MSA**

2018	\$76,600	0 - \$38,299	\$38,300 - \$61,279	\$61,280 - \$91,919	\$91,920 - & above
2019	\$81,200	0 - \$40,599	\$40,600 - \$64,959	\$64,960 - \$97,439	\$97,440 - & above
2020	\$82,600	0 - \$41,299	\$41,300 - \$66,079	\$66,080 - \$99,119	\$99,120 - & above

According to 2020 FFIEC census data, 9.6 percent of families in the assessment area live in poverty.¹⁸² From the period of 2015 through 2019, St. Clair County and St. Louis County were the counties with the highest percentages of families living in poverty at 10.7 percent and 6.8 percent, respectively.¹⁸³ In the assessment area, St. Charles County and Monroe County were the counties with the lowest percentages of families living in poverty at 3.3 percent and 2.9 percent, respectively.¹⁸⁴ From the period of 2015 to 2019, St. Louis City had the highest percentage of families living in poverty within the assessment area at 16.7 percent.¹⁸⁵ According to census data, 36.1 percent of families living in low-income tracts and 15.8 percent of families living in moderate-income tracts in the assessment area are below the poverty level.¹⁸⁶

Economic Conditions

The St. Louis metropolitan area started as a trading center in the late 1700s. As time progressed, the area’s economy changed into being a manufacturing-focused economy. Over the past two decades, the St. Louis metropolitan area experienced an expansion in the service and tech sectors that caused dramatic economic diversification.¹⁸⁷ Currently, the St. Louis metropolitan area’s economy is ranked as the third most economically diverse metropolitan area in the United States.¹⁸⁸ Additionally, the metropolitan area’s economy is the 4th largest economy in the Midwest at \$161 billion.¹⁸⁹

¹⁸⁸ *Ibid.*

¹⁸⁹ *Ibid.*

The St. Louis metropolitan area has many large businesses that represent key industries making up the regional economy. The key industries include bioscience, consumer services and goods, energy, financial services, healthcare, manufacturing, and transportation and distribution.¹⁹⁰ The St. Louis metropolitan area is home to the headquarters of 14 businesses that are Fortune 1000 companies.¹⁹¹ These companies include Centene, Emerson Electric, Reinsurance Group of America, Edward Jones, Graybar Electric, Olin, Ameren Post Holdings, Peabody Energy, Stifel Financial, Caleres, Energizer Holdings, Belden, and Arch Resources.¹⁹² Out of all 14 companies, the top three companies, in terms of revenue, include Centene (\$74.6 billion), Emerson Electric (\$18.4 billion), and Reinsurance Group of America (\$14.3 billion).¹⁹³ For employment, the largest employers in St. Louis include BJCHHealthCare (29,305 employees), Mercy (20,182 employees), Washing University in St. Louis (17,688 employees), Boeing Defense, Space, & Security (14,566 employees), and SSM Health (13,500 employees).¹⁹⁴

Furthermore, the City of St. Louis has a variety of public and private employment opportunities. In 2018, the City of St. Louis had \$200,000 private sector jobs, which accounted for 17 percent of the total jobs in the region.¹⁹⁵ Within the city, the biggest industries included hospitals (29,400 jobs), food services and drinking places (16,700 jobs), and professional, scientific, and technical services (16,700 jobs). Additionally, the City of St. Louis is home to 30,000 public sector jobs; out of the total public sector jobs, 54 percent of jobs are local government positions, 35 percent are federal government positions, and 11 percent are state government positions.

According to 2020 Dun & Bradstreet information, there were 111,994 businesses within the St. Louis assessment area, 89.8 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses.¹⁹⁶ Additionally, 17.6 percent of small businesses in the assessment area were located in moderate-income tracts, while there were fewer in low-income tracts at 6.3 percent.¹⁹⁷ According to CRA reportable data from all reporters in the assessment area, loan originations to small businesses posted growth from 2018 to 2019. Specifically, the number of loans made to small businesses increased by 10.9 percent. From 2019 to 2020, there was a decrease in the number of loans made to small businesses. At this time, there was a 7.6 percent decrease in the number of loans made to small businesses.

The COVID-19 global pandemic was a major event in 2020 that impacted the economy in the assessment area and nationwide. As the pandemic unfolded, many businesses were impacted by stay-at-home orders, which mandated that individuals should only leave their residence for essential activities. For example, on March 21, 2020, the Health Commissioner in the City of St. Louis issued a stay-at-home order that required individuals to stay-at-home, and it limited business activities for certain industries.¹⁹⁸ In response to the decline

in economic activity, the United States' Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 25, 2020; this legislation established the Paycheck Protection Program, which was implemented by the Small Business Administration (SBA), to provide loans to small businesses nationwide for payroll costs and certain other expenses.¹⁹⁹ On a local level, there were resources available to assist small businesses through the pandemic. Specifically, in the City of St. Louis, there were resource programs such as the Small Business Grant Fund, The Gateway Resilience Fund, and the COVID-19 Regional Response Fund that provided funding for small businesses, bars, restaurants, and nonprofits impacted by the pandemic.²⁰⁰

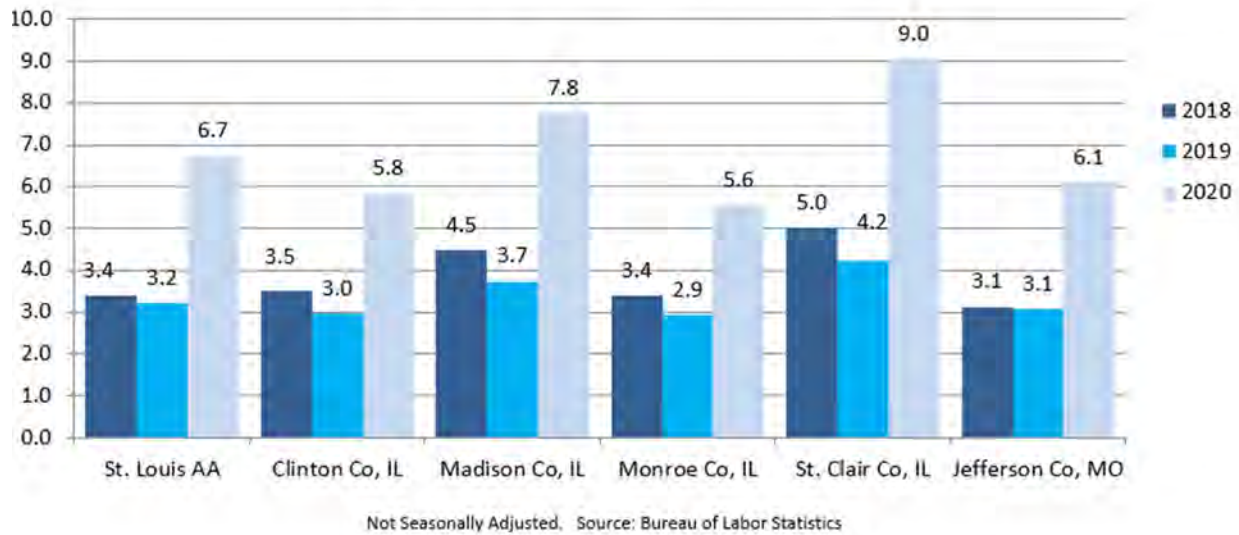

The following graph shows the unemployment rates from 2018 through 2020 for the seven counties in the bank's assessment area, the City of St. Louis, the St. Louis MSA, and the states of Illinois and Missouri. As shown, the assessment area saw a period of both falling and rising unemployment rates. From 2018 to 2019, unemployment in the assessment area decreased from 3.4 percent in 2018 to 3.2 percent in 2019. During this time, St. Charles County had the lowest unemployment rates for 2018 and 2019 at 2.5 percent for both years. The assessment area's overall unemployment rate for 2018 and 2019 was comparable to Missouri's unemployment rate, 3.2 percent in 2018 and 3.3 percent in 2019, and lower than Illinois's unemployment rate, 4.4 percent in 2018 and 4.0 percent in 2019. Unemployment in all counties making up the assessment area, the City of St. Louis, Illinois, and Missouri rose in 2020. During this year, the COVID-19 pandemic started in the United States and impacted the nation's economy, which caused a rise in unemployment.²⁰¹ The assessment area and St. Louis MSA's unemployment rate both rose to 6.7 percent, and the unemployment rate in Illinois and Missouri increased to 9.5 percent and 6.1 percent, respectively. In the assessment area, St. Clair County, St. Louis City, and Madison County had the highest unemployment rates in 2020 of 9.0 percent, 8.5 percent, and 7.8 percent. St. Charles County had the lowest unemployment rate at 5.2 percent.

Unemployment Rates - Multi St. Louis (1 of 2)

Unemployment Rates - Multi St. Louis (2 of 2)

According to census data, the assessment area contained 1,113,005 housing units in 2020, of which 61.6 percent were owner-occupied, 28.1 percent were rental, and 10.3 percent were vacant.²⁰² Housing in the St. Louis MSA is typically older; the median age of the housing stock was 52 years.²⁰³ While most units were owner-occupied, a higher percentage of housing units in low- and moderate-income tracts were rental units or vacant. More specifically, approximately 69.7 percent of all housing units in low-income tracts were rentals or vacant, while 48.7 percent were rentals or vacant in moderate-income census tracts. This factor may suggest that home purchase lending opportunities in low- and moderate-income tracts may be limited, and more opportunities exist for refinancing and home improvement lending.

²⁰² FRB Atlanta calculations of 2020 FFIEC census data.

²⁰³ 2020 FFIEC census data.

The housing market has seen an increase in prices during the review period. Based on real estate activity for St. Louis City and County combined, prices for residential property and townhouses/condominiums have been increasing. For 2018, the median sales price for a residential property and for a townhouse/condominium was \$195,000 and \$156,000, respectively.²⁰⁴ For 2019, the median sales price for a residential property increased 6.7 percent to \$208,000, and the median sales price for a townhouse/condominium increased 5.8 percent to \$165,000. The prices for both residential properties and townhouse/condominiums increased further in 2020. For that year, the median sales price for a residential property increased 10.6 percent to \$230,000, and the median sales price for a townhouse increased 5.5 percent to \$174,000.

Rising home prices in St. Louis City and County indicate that homeownership for low- and moderate-income families is becoming less affordable. Using the assumption that a borrower can obtain a loan for approximately three times the borrower's annual income and using the 2020 FFIEC median family income for St. Louis City and St. Louis County, affordable homes would be priced at \$133,002 for St. Louis City and \$232,197 for St. Louis County.²⁰⁵ As mentioned earlier, the median sales price in 2020 for a residential property and townhouse/condominium was \$230,000 and \$174,000, respectively. This data indicates that homeownership is become less affordable in St. Louis City as compared to St. Louis County; however, rising home prices have an overall bigger impact on home affordability for low- and moderate-income families.

Demographic Characteristics by Census Tract

The following table presents key demographic and business information used to help develop a performance context for the assessment area. The data reflects the 2020 FFIEC census data and the 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development and economic landscapes, individuals familiar with the community and with community development activities were contacted. These individuals discussed the various opportunities and challenges in the region and how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

One contact engaged in community and small business development was interviewed. This person stated that North St. Louis, North County, and East St. Louis combined have the highest concentrated poverty rate in the state and are among the poorest in the country. Additionally, the contact said that St. Clair County, Illinois is mostly rural and faces poverty challenges due to a lack of economic opportunities. Further, it was mentioned that there has been a population shift in the St. Louis MSA over the past several decades as more people are moving to St. Louis County and North County through HUD's Section 8 Voucher Programs. The contact said the main reason for this outward migration was due to the better quality of affordable housing.

Furthermore, the contact indicated that the St. Louis MSA has a robust and thriving banking industry with a lot of bank branches. However, the individual mentioned that banks are not taking a proactive approach in designing products and services that meet the needs of poor urban communities. Also, it was stated that the lack of product innovation and adaption has resulted in residents from poor urban communities having to rely on predatory financial providers, which causes further debt and continued poverty. The contact explained that some communities have lost trust in banks. Concerning business lending, the contact stated that many minority businesses are not able to apply for loans because they do not qualify under the commercial lending standards of banks.

The contact mentioned that there are opportunities for financial institutions to assist in the community. In particular, the contact stated that financial institutions need take more risk and work with community partners to elevate minority-owned businesses and to build-up poor urban neighborhoods. Also, there are opportunities for banks to provide tiered services for small business customers; specifically, banks can provide low interest business loans to customers who have established a relationship with a bank, per the contact. Lastly, it was stated that banks can be innovative and partner with CDFIs to share some of the risk to provide lower interest rate micro loans to small minority-owned businesses as well as start-ups. Per the contact, this service will allow businesses to grow so that they are eligible to receive loans from traditional banks.

A contact engaged in affordable housing was also interviewed. The contact stated that the access to credit was good to adequate in the city of St. Louis. This person explained that while the majority of banks have more branches in middle- and upper-income areas of the city, those banks are working with CDFI intermediaries. The contact explained that based on the needs of his clients, the products with the highest need are affordable home improvement/repair and home purchase loans. It was mentioned that most single-family homes in the city are around 100 years old, and there is very little to no new construction. In the North and South City neighborhoods, many homes need repairs, and there is a high percentage of abandoned homes in North City. The contact explained that there is a lack of decent affordable housing in the city.

Furthermore, the contact described the issues facing low- and moderate-income areas and low- and moderate-income people. The contact mentioned that 30 percent to 40 percent of housing in low- to moderate-income areas

are rentals with project-based multifamily units being newer construction, whereas rentals provided by property owners participating in the Section 8 Voucher program are of older housing stock. In general, rental housing used for the Section 8 programs are in better repair because management companies and area property owners must meet HUD guidelines to continue to receive subsidy payments, per the contact. The contact indicated that the largest barriers low- to moderate-income people face when applying for bank mortgages include poor credit histories, being able to afford down payments, and low appraisal amounts in North City. The contact explained that the mortgage products most in need for low and moderate-income people in St. Louis City include first time homebuyer and home repair programs.

The contact talked about an opportunity for banks to get involved in affordable housing initiatives. Specifically, the contact mentioned that there are several organizations, like Justine Peterson, IF, Gateway Neighborhood, and Gateway Lending Funders, that are working to improve affordable housing in St. Louis City; these organizations are looking for both loans and investments, per the contact.

Both contacts discussed the impact that the COVID-19 pandemic had on the St. Louis region. According to contacts, the pandemic caused temporary and permanent closures of businesses, which resulted in job losses and income losses for many people. Additionally, many households are having issues paying rent or mortgages due to job losses and business closures. According to one contact, credit companies are working with their organization to help homeowners apply for and receive loan forbearance. Another contact said that they are seeing more requests for mortgage assistance and forbearance. Through discussions with contacts, it was mentioned that food insecurity is a concern due to job losses during the pandemic, and it was stated that health care bills are not being paid and people are unable to afford their medications. Also, one person said that there is a need for utility assistance. One contact stated that the major credit challenges during the pandemic include banks raising the minimum credit score needed for home loans and that banks are not buying mortgages. Lastly, contacts discussed how funding is an issue for themselves as well as other organizations that provide services to low- and moderate-income families and to the community.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE ST. LOUIS MO-IL MULTISTATE ASSESSMENT AREA

LENDING TEST

Regions Bank's lending rating in the St. Louis assessment area is high satisfactory. The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans reflects excellent penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a relatively high level of community development loans in the St. Louis assessment area.

The analysis included 3,757 HMDA-reportable loans and 2,811 CRA small business loans reported by the bank in the St. Louis assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Home Purchase Loans

Of the 3,757 HMDA-reportable loans analyzed, 1,115 loans (29.7 percent) were home purchase loans. Of the total home purchase loans made, 28 loans (2.5 percent) were located in low-income tracts, and 180 loans (16.1 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's home purchase lending in low-income tracts (2.5 percent) was below the percentage of owner-occupied units (5.5 percent) in these tracts. In 2018, the bank's home purchase lending in low-income tracts (2.0 percent) was similar to the aggregate lending performance (1.9 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (2.4 percent) was slightly above the aggregate lending performance (2.1 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (3.0 percent) was above the aggregate lending performance (2.2 percent) in these tracts.

Home purchase lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (16.1 percent) was similar to the percentage of owner-occupied units (17.1 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (17.1 percent) was slightly above the aggregate lending performance (14.3 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (15.9 percent) was similar to the aggregate lending performance (14.8 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (15.6 percent) was similar to the aggregate lending performance (14.7 percent) in these tracts.

Home Refinance Loans

Regions Bank made 1,878 home refinance loans from 2018 through 2020, which represents 50.0 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, 32 loans (1.7 percent) were located in low-income tracts, and 210 loans (11.2 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is excellent. From 2018 through 2020, Regions Bank's home refinance lending in low-income tracts (1.7 percent) was below the percentage of owner-occupied units (5.5 percent) in these tracts. In 2018, the bank's home refinance lending in low-income tracts (2.0 percent) was slightly above the aggregate lending performance (1.6 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (2.6 percent) was significantly above the aggregate lending performance (1.0 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (1.2 percent) was significantly above the aggregate lending performance (0.6 percent) in these tracts.

Home refinance lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (11.2 percent) was below the percentage of owner-occupied units (17.1 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (12.2 percent) was similar to the aggregate lending performance (11.9 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (13.3 percent) was significantly above the aggregate lending performance (8.5 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (9.9 percent) was above the aggregate lending performance (7.2 percent) in these tracts.

Home Improvement Loans

Regions Bank made 764 home improvement loans from 2018 through 2020, which represents 20.3 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, 18 loans (2.4 percent) were located in low-income tracts, and 81 loans (10.6 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is good. From 2018 through 2020, Regions Bank's home improvement lending in low-income tracts (2.4 percent) was below the percentage of owner-occupied units (5.5 percent) in these tracts. In 2018, the bank's home improvement lending in low-income tracts (1.7 percent) was similar to the aggregate lending performance (1.6 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (2.2 percent) was above the aggregate lending performance (1.7 percent) in these tracts. In 2020, the bank's home improvement lending in low-income tracts (3.2 percent) was significantly above the aggregate lending performance (1.6 percent) in these tracts.

Home improvement lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (10.6 percent) was below the percentage of owner-occupied units (17.1 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income tracts (11.3 percent) was slightly above the aggregate lending performance (9.4 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (10.9 percent) was similar to the aggregate lending performance (11.1 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (9.5 percent) was similar to the aggregate lending performance (8.8 percent) in these tracts.

Small Business Loans

Regions Bank made 2,811 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 273 loans (9.7 percent) were located in low-income tracts, and 548 loans (19.5 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is excellent. From 2018 through 2020, Regions Bank's small business lending in low-income tracts (9.7 percent) was above the percentage of businesses (6.4 percent) in these tracts. In 2018, the bank's small business lending in low-income tracts (11.9 percent) was significantly above the aggregate lending performance (5.3 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (9.9 percent) was significantly above the aggregate lending performance (5.5 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (8.7 percent) was significantly above the aggregate lending performance (5.5 percent) in these tracts.

Small business lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (19.5 percent) was above the percentage of businesses (17.9 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (23.3 percent) was above the aggregate lending performance (17.0 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (17.5 percent) was similar to the aggregate lending performance (17.1 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (18.5 percent) was slightly above the aggregate lending performance (16.8 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is excellent. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is excellent. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (15.4 percent) was similar to the percentage of low-income families (21.4 percent). In 2018, the bank's home purchase lending to low-income borrowers (15.6 percent) was significantly above the aggregate lending performance (9.2 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (13.2 percent) was above the aggregate lending performance (10.4 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (17.0 percent) was significantly above the aggregate lending performance (10.9 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is excellent. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (27.7 percent) was above the percentage of moderate-income families (16.9 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (25.1 percent) was above the aggregate lending performance (19.7 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (27.4 percent) was above the aggregate lending performance (20.9 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (30.1 percent) was above the aggregate lending performance (22.6 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (11.9 percent) was below the percentage of low-income families (21.4 percent). In 2018, the bank's home refinance lending to low-income borrowers (16.2 percent) was

significantly above the aggregate lending performance (8.3 percent) to these borrowers. In 2019, the Regions Bank's home refinance lending to low-income borrowers (13.5 percent) was significantly above the aggregate lending performance (6.1 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (9.8 percent) was significantly above the aggregate lending performance (4.2 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is excellent. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (20.2 percent) was above the percentage of moderate-income families (16.9 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (21.6 percent) was slightly above the aggregate lending performance (17.3 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (22.7 percent) was significantly above the aggregate lending performance (14.7 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (18.7 percent) was above the aggregate lending performance (13.5 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is excellent. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (11.4 percent) was below the percentage of low-income families (21.4 percent). In 2018, the bank's home improvement lending to low-income borrowers (9.1 percent) was significantly above the aggregate lending performance (5.7 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (14.1 percent) was significantly above the aggregate lending performance (8.3 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (9.9 percent) was above the aggregate lending performance (7.4 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is excellent. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (22.3 percent) was above the percentage of moderate-income families (16.9 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (20.0 percent) was significantly above the aggregate lending performance (12.6 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (22.1 percent) was above the aggregate lending performance (16.7 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (24.8 percent) was significantly above the aggregate lending performance (14.1 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. From 2018 through 2020, 61.7 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 89.8 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (71.4 percent) was significantly above the aggregate lending performance (45.4 percent) to these businesses. In 2019, the bank's small business lending to small businesses (70.5 percent) was above the aggregate lending performance (47.5 percent) to these businesses. In 2020, the bank's small business lending to small businesses (54.0 percent) was above the aggregate lending performance (40.7 percent) to these businesses. Lastly, 91.5 percent of small business loans were originated in amounts of

\$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes a relatively high level of community development loans in the St. Louis assessment area. During the review period, the bank originated or renewed 30 community development loans totaling \$35.5 million and 136 community development PPP loans totaling \$15.1 million. Specifically, the bank originated or renewed \$22.5 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; \$14.2 million to support economic development; \$13.9 million towards community services benefiting LMI individuals and families; and \$100,000 in affordable housing initiatives.

Many of the qualified loans were impactful, aligning directly with formal revitalization plans. In addition, the bank continues to form partnerships with local CDCs and/or CDFIs to address area-specific needs not only in the city of St. Louis but also in the Illinois portion of the metro, which community contacts consistently note as severely blighted and an area of concentrated disinvestment. While the bank's current dollar of lending is below most peer dollar volume in this area, the bank's number of loans continues to increase and exceeds the number of loans originated by peers. Continued increases in the number of loans indicates that more organizations are benefiting from Regions Bank's efforts but for smaller dollar amounts, which further aligns with micro lending needs in the area.

Some of the most impactful loans directly benefiting the assessment area include:

- An \$8 million loan to restore low-income housing in the Historic Preservation District of St. Louis. As outlined in formal revitalization plans, restoration of housing within the area is critical to help spur future development in the area.
- A \$2 million loan to construct and open a new grocery store in a food desert within the city of St. Louis.
- Twenty-two loans totaling \$1.2 million made through the PPP to small businesses located in low-income and blighted areas of Illinois. All 22 loans were made to nonprofits serving residents throughout St. Clair and Madison counties, including East St. Louis and Granite City, among others.
- A \$1 million line of credit to a local CDFI serving the greater St. Louis area, particularly focused in the city of St. Louis, Missouri, and areas in and around East St. Louis, Illinois. The line of credit was created to form a loan pool for micro lending to underserved small businesses in the area.
- A \$250,000 loan to a nonprofit offering essential preventive health care for low-income residents of East St. Louis, Illinois. This loan is particularly noteworthy given that East St. Louis is a community with a continued level of disinvestment toward essential services and has one of the highest poverty rates in the nation.
- A \$100,000 loan to a local CDC for the rehabilitation and development of vacant homes for low-income individuals in North St. Louis.

- Two loans totaling \$78,000 to a nonprofit for necessary improvements to public housing for low-income residents in the city of Wellston. These loans are especially impactful given the improvements kept the housing development from being demolished, which would have displaced approximately 200 low-income individuals.

INVESTMENT TEST

Regions Bank's investment test rating in the St. Louis multistate assessment area is low satisfactory. The bank made an adequate level of investments relative to its presence in the assessment area. Combined investment and contribution activity inside the assessment area totaled \$34.0 million. The bank's investments (excluding contributions) totaled \$32.4 million, of which \$24.1 million (74.3 percent) were new investments acquired during the review period. During the review period, the bank invested \$23.6 million in mortgage-backed securities. Additionally, the bank purchased stock in a fund designed to provide mortgage financing in markets where low home values make it difficult to obtain first mortgages, particularly for homes that need significant rehabilitation and where appraised values are low. The fund will target LMI and majority African American neighborhoods in St. Louis and is responsive to the need for creative financing solutions to support affordable housing. The bank also held investments from prior review periods with a book value of \$8.3 million at the end of the review period. The bank had investments in two LIHTC projects with a book value of \$4.6 million; the remaining prior period investments were primarily mortgage-backed securities.

Regions Bank made \$1.6 million in contributions that demonstrated responsiveness to credit and community development needs in the St. Louis assessment area. Specifically, the bank provided \$1.2 million to organizations that provide community services targeted to low- and moderate-income individuals; \$223,300 for activities that promote economic development; \$193,400 for support affordable housing; and \$27,500 for activities that support revitalization and stabilization of LMI communities. Overall, approximately \$200,000 in donations were responsive to the COVID-19 pandemic, providing support for organizations providing emergency and recovery assistance to LMI individuals, small businesses, and nonprofits.

Examples of notable donations include:

- A \$100,000 donation to a nonprofit organization to support affordable housing, workforce development, and homebuyer education targeted to a low-income neighborhood in north St. Louis;
- A \$75,000 donation to a fund that will provide emergency grants and relief to underserved small businesses impacted by COVID-19;
- \$50,000 in grants to a community development organization focused on affordable housing and community development in a suburb of St. Louis that has suffered decades of disinvestment and decline. The grants will support homebuyer education and a home repair program;
- \$50,000 in grants to provide operational support to a nonprofit working to create employment and workforce development opportunities through education and outreach for low-income, unemployed, and formerly incarcerated individuals and families;

- \$45,000 in grants to a CDFI to support work with small businesses, including a grant to assist with operational needs to meet the increased demand for PPP loans from CDFI customers; and
- \$15,000 to support a regional community development initiative working to encourage growth and reduce inequality across the St. Louis MSA, with a particular focus on economically distressed communities.

SERVICE TEST

Regions Bank's service test performance in the St. Louis multistate assessment area is rated high satisfactory.

Retail Services

Retail banking services are adequate in the St. Louis multistate assessment area.

The distribution of 63 branch offices and 63 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The percentage of branches in low-income tracts was similar to the percentage of households and greater than businesses in the same geography: 9.4 percent of households and 6.4 percent of businesses were located in low-income census tracts compared to 9.5 percent of the bank's branches. The proportion of the bank's branches in moderate-income tracts was comparable to the percentage of households and businesses in the same geography: 20.6 percent of total branches were in moderate-income tracts compared to 19.9 percent of households and 17.9 percent of businesses. Overall, the bank's retail delivery systems are reasonably accessible to Regions Bank's geographies and individuals of different income levels.

The bank's hours and services do not vary in a way that inconveniences the multi-state St. Louis assessment area, particularly low- and moderate-geographies and/or low- and moderate-individuals.

During the review period, Regions Bank opened 14 branch offices: one in a low-income tract, four in moderate-income tracts, and nine in upper-income census tracts. The bank also closed 12 branch offices: one in a low-income tract, one in a moderate-income tract, seven in middle-income tracts, and three in upper-income tracts. Regarding full-service ATMs, the bank opened 16 full-service ATMs: two in low-income tracts, four in moderate-income tracts, one in a middle-income tract, and nine in upper-income tracts. However, 13 full-service ATMs were closed: one was closed in a low-income tract, one was closed in a moderate-income tract, seven in middle-income tracts, and four in upper-income tracts. Overall, the bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area.

 DTO - Drive thru only is a subset of total branches
 SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

Regions Bank provides an excellent level of community development services in the St. Louis multistate assessment area. During the review period, Regions Bank employees provided 199 service activities for a total of 3,816 service hours to qualified organizations. Regions employees were active in providing a variety of services to a diverse group of local organizations. Regions Bank’s community development service activities benefited organizations that provide affordable housing, community services, revitalization/stabilization, and economic development and that support low- and moderate-income individuals, communities, and small businesses in the St. Louis assessment area. Of the bank’s total service hours, 770 hours were committed to financial and homebuyer education. Additionally, 76.2 percent of service hours were board service at community development organizations or committee memberships.

CRA RATING FOR TEXARKANA TX-AR MULTISTATE: SATISFACTORY

The Lending Test is rated: High Satisfactory

The Investment Test is rated: Low Satisfactory

The Service Test is rated: High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes an adequate level of community development loans in the Texarkana multistate assessment area.
- The bank provides an adequate level of qualified community development investments and grants that are responsive to community development needs of the Texarkana multistate assessment area.
- Retail services are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment area.
- The bank provides an excellent level of community development services throughout the assessment area.

SCOPE OF EXAMINATION

The time period, products, and affiliates evaluated for the Texarkana multistate assessment area are consistent with the overall scope described in the Description of the Institution section of this report. Regions Bank's performance in the Texarkana multistate assessment area was evaluated using full-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE TEXARKANA TX-AR MULTISTATE ASSESSMENT AREA

Overview

The Texarkana assessment area includes Bowie County in Texas and Little River and Miller counties in Arkansas, which make up the Texarkana MSA. As of December 31, 2020, Regions Bank operated three branches inside the assessment area, which represent 0.2 percent of the institutional branches. In addition, 0.2 percent of the bank's deposits are in this market. The assessment area represents 0.2 percent of the institution's combined HMDA-reportable and CRA small business lending by dollar volume.

Texarkana is an active banking market. According to the FDIC Summary of Deposits Report dated June 30, 2020, there were 16 financial institutions operating 46 branch offices inside the assessment area with a total of

\$2.8 billion in deposits.²⁰⁶ Wells Fargo, Farmers Bank & Trust, BancorpSouth Bank, and Guaranty Bank hold the largest share of deposits at 58.3 percent collectively.²⁰⁷ Regions Bank ranks 5th, with \$259 million in deposits and 9.2 percent of total deposits.²⁰⁸

HMDA-reportable lending in the assessment is similarly competitive. Regions Bank originated or purchased 2.7 percent in loans during 2018. For that year, the bank ranked 11th out of 179 reporters. In 2019, Regions Bank originated or purchased 2.5 percent in loans. The bank ranked 13th out of 193 reporters for the year. Lastly, Regions Bank originated or purchased 2.9 percent in loans during 2020. For that year, Regions Bank ranked 11th out of 212 reporters. From 2018 through 2020, HMDA-reportable lending in the assessment area was primarily dominated by Farmers Bank and Trust Company, Red River Credit Union, and State Bank of Dekalb.

CRA small business lending is also competitive. For CRA small business and small farm lending, Regions Bank ranked 14th out of 74 reporters in 2018, with 1.6 percent of reported loans. In 2019, the bank ranked 14th out of 69 reporters, with 1.1 percent of reported loans. Furthermore, Regions Bank ranked 11th out of 91 reporters, with 2.3 percent of reported loans for 2020. From 2018 through 2020, lending in the assessment area was primarily dominated by Farmers Bank & Trust Company, BankcorpSouth Bank, Guaranty Bank, and American Express.

Population and Income Characteristics

The assessment area population decreased from 2010 to 2020 by 1.1 percent, reaching an estimated 149,198 residents as of April 1, 2020.²⁰⁹ The majority of people reside in Bowie County, which is home to the city of Texarkana. During this same period, the population in Arkansas and Texas increased by 15.9 and 3.3 percent, respectively.²¹⁰

The assessment area comprises 34 census tracts.²¹¹ According to 2020 FFIEC census data, 1 tract is low-income (2.9 percent), 9 tracts are moderate-income (26.5 percent), 18 tracts are middle-income (52.9 percent), 5 tracts are upper-income (14.7 percent), and 1 tract has an unknown income level (2.9 percent).²¹²

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Texarkana, TX-AR MSA. As shown, the median family income increased from \$52,500 in 2018 to \$69,200 in 2020. Data shows that the median family income varied across the assessment area. The highest median family income was in Bowie County (\$51,792) compared to the lowest in Little River County (\$47,237).²¹³ In addition, 39.0 percent of families were considered low- to moderate-income in the assessment area in 2020.²¹⁴

Rising poverty rates are a concern in the assessment area, particularly in Miller County. The percentage of families living below the federal poverty line in Miller County was 17.3 percent between 2015 and 2019.²¹⁵ In Bowie County and Little River County, the percentage of families living below the federal poverty line was 12.9 percent and 11.1 percent, respectively.²¹⁶ The statewide percentage of families living in poverty for Arkansas and Texas was 12.4 percent and 11.3 percent, respectively.²¹⁷ In addition, a significant percentage of families living in low- and moderate-income tracts live below the poverty level. Specifically, 51.1 percent of families living in low-income census tracts are below the poverty level, and 31.6 percent of families living in moderate-income census tracts are below the poverty level.²¹⁸

Economic Conditions

The Texarkana economy is largely based on manufacturing, specifically the paper industry and the U.S. Army’s maintenance and repair of tactical wheeled vehicles. Even though the economy is focused on manufacturing, Texarkana serves as the retail, transportation, medical, manufacturing, educational, and residential hub for the region.²¹⁹ Texarkana’s trade area encompasses 17 counties and is part of three states.²²⁰ Furthermore, the area’s workforce is also drawn from a 60-mile radius.²²¹ As of August 2019, the top five employers include Red River Army Depot & Tenants (3,797 employees), CHRISTUS St. Michael Health System (1,902 employees), Cooper Tire and Rubber (1,750 employees), Texarkana, TX ISD (1,200 employees,) and Southern Refrigerated Transport (1,115 employees).²²²

The Texarkana area has a variety of occupations. In 2019, the five largest occupations include office and administrative support (10,033 employees), sales and related (7,500 employees), food preparation and serving related (7,066 employees), transportation and material moving (5,783 employees), and production

(5,734 employees).²²³ Additionally, the five occupations with highest average annual wages in the Texarkana area include architecture and engineering (\$85,300), management (\$78,900), computer and mathematical (\$71,400) healthcare practitioners and technical (\$70,400), and legal (\$69,400).²²⁴

Furthermore, the Texarkana area's Gross Domestic Product (GDP) consists of ten sectors: manufacturing, health care and social assistance, public administration, retail trade, educational services, wholesale trade, real estate and rental and leasing, transportation and warehousing, construction, and accommodation and food services.²²⁵ In terms of GDP, which is defined as the total value of goods and services produced by an area, the three largest sectors in 2018 was manufacturing (\$1.3 billion), health care and social assistance (\$732.9 million), and public administration (\$563.7 million).²²⁶ The three smallest sectors were transportation and warehousing (\$355 million), construction (\$304 million), and accommodation and food services (\$237 million).²²⁷

In terms of economic conditions for small businesses, there were 5,745 businesses within the Texarkana assessment area in 2020, of which 91.0 percent had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses.²²⁸ Additionally, 24.5 percent of small businesses in the assessment area were in moderate-income tracts, while there were far fewer in low-income tracts at 0.5 percent.

According to CRA reportable data from all reporters in the assessment area, loan originations made to small businesses posted growth from 2018 to 2019. From 2018 to 2019, there was a 5.4 percent increase in loan originations to small businesses. Even though there was an increase in loan originations from 2018 to 2019, there was a decline in loan originations made to small businesses from 2019 to 2020. Specifically, the number of loan originations declined 2.3 percent.

The COVID-19 global pandemic was a major event in 2020 that impacted the economy in the assessment area and nationwide. As the pandemic unfolded, many businesses were impacted by stay-at-home orders. These orders indicated that individuals should only leave their residence for essential activities. As a result, some businesses were impacted due to a decrease in the number of customers they saw. In response to the decline in economic activity, the United States' Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 25, 2020; this legislation established the Paycheck Protection Program, which was implemented by the Small Business Administration (SBA), to provide loans to small businesses nationwide for payroll costs and certain other expenses.²²⁹ Locally, the Texarkana USA Chamber of Commerce created the COVID-19 Business Support Program by committing \$25,000 to support small businesses in the Texarkana area.²³⁰ All these efforts were available to businesses in order to help support their operations during the pandemic.

The Texarkana assessment area experienced both a fall and a rise in unemployment during the review period. The unemployment rate in the assessment area was 4.9 percent in 2018 and decreased to 4.3 percent in 2019. During this time, the assessment area’s unemployment rate was more than both Arkansas and Texas’s unemployment rates. In 2020, unemployment in the assessment area, Arkansas, and Texas collectively increased due to the negative impact that the COVID-19 global pandemic had on the U.S. economy.²³¹ Unemployment rates in the assessment area, Arkansas, and Texas increased to 7.2 percent, 6.1 percent, and 7.6 percent, respectively. Out of all the counties in the assessment area, Bowie County had the highest unemployment rate at 7.4 percent, followed by Miller County at 6.9 percent and Little River County at 6.4 percent.

Unemployment Rates - Multi Texarkana

Census data indicates there were 64,837 housing units located in the assessment area in 2020, of which 56.8 percent were owner-occupied, 29.0 percent were rental units, and 14.2 percent were vacant.²³² Rental and vacant units were more concentrated in low- and moderate-income tracts. Specifically, 69.4 percent of units in low-income census tracts and 63.2 percent of units in moderate-income tracts were rental or vacant.²³³ The median age of the housing stock across the assessment area was 42 years, though housing was older in low- and moderate-income census tracts at 54 years and 50 years, respectively.²³⁴ These factors suggest that home purchase lending opportunities may be limited in low- and moderate-income census tracts.

The assessment area’s housing market experienced a rise in home prices during the review period. The median listing price for a home in the Texarkana, TX-AR CBSA was \$133,900 in January 2018.^{235,236} From January 2018 to January 2019, the median listing price for a home increased 14.6 percent to \$153,400.²³⁷ Furthermore, the

²³⁵ Core-Based Statistical Area (CBSA) is a term that refers to both Metropolitan and Micropolitan Statistical Areas.

²³⁶ “Market Hotness: Median Listing Price in Texarkana, TX-AR (CBSA).” *Federal Reserve Bank of St. Louis*, 8 Feb. 2022, <https://fred.stlouisfed.org/series/MELIPRMSA45500>. Accessed 28 Feb. 2022.

²³⁷ *Ibid.*

median listing price increased an additional 5.9 percent to \$162,400 by January 2020.²³⁸ From January 2020 to December 2020, the median listing price for a home increased 17.0 percent to \$190,000.²³⁹

The rise in home prices in the assessment area indicates that homeownership for low- and moderate- income families is becoming less affordable. Using the assumption that a borrower can obtain a loan for approximately three times the borrower's annual income and using the 2020 FFIEC median family income for the assessment area, affordable homes would be priced at \$153,888.²⁴⁰ As stated previously, the median sales price for a home in December 2020 was \$190,000.

Demographic Characteristics by Census Tract

The following table presents key demographic and business information used to help develop a performance context for the assessment area. The data reflects the 2020 FFIEC census data and the 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

²³⁸ Ibid.

²³⁹ Ibid.

²⁴⁰ According to 2020 FFIEC census data, the median family income was \$51,296 for the assessment area.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the community development and economic landscapes, community development experts were contacted. These individuals discussed the various opportunities and challenges across the region as well as how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

One contacted engaged in affordable housing was contacted and interviewed. This contact indicated that Bowie and Miller counties are economically stable as compared to the states of Arkansas and Texas. The individual mentioned that there have been significant events within the last few years that have affected the economic conditions in the Texarkana MSA, which include threats of business closures and the sale of major manufacturers. Specifically, the contact mentioned that the government has proposed closing the Red River Army Depot, which would mean the loss of many jobs. Additionally, the contact mentioned that there were two paper mills that were bought out, and Cooper Tire and Rubber Company was sold. The individual further stated that the three largest industries in the Texarkana MSA include health care and social assistance, retail trade, and manufacturing, while the largest employers are Red River Army Depot, Christus St. Michael Hospital System, Graphic Packaging, and Cooper Tire and Rubber Company. Lastly, the contact mentioned that there has been growth in the healthcare industry, especially with nursing jobs and programs.

Furthermore, this same contact mentioned that the population in the MSA has remained stable and has not grown much over the past few years. The individual did state that current population trends show that people are moving to smaller, rural communities where the school districts are smaller and are considered to have a better-quality education. The contact stated that leadership in the area has been trying to create opportunities to bring people back to area by working with the high schools and community colleges to incorporate more trades into the educational curriculum and collaborating with large manufacturers for jobs.

Moreover, the contact mentioned that there is not enough affordable single-family and rental housing stock to meet the demand of low- and moderate-income individuals in the area. The contact explained that there are several community partners that are working towards increasing affordable housing options in the Texarkana MSA. Specifically, there are revitalization efforts in some of the buildings in downtown Texarkana, Texas to make affordable rentals available. Additionally, there have been some post-war housing developments demolished and new housing developments are being constructed on those sites. The contact stated that most of the affordable single-family stock and rentals are concentrated in northwest area of Texarkana, Texas, and Texarkana has not had a lot of new affordable housing development. The contact stated that the largest financial and credit barriers preventing low- and moderate-income renters from transiting to home ownership is the lack of money management and poor credit histories. Also, the interviewee said that there is need for first-time home purchase mortgage products in the area.

The contact also indicated that there are opportunities for local financial institutions to provide loans, investments, and services in the area. Specifically, the contact mentioned that financial institutions can help by participating in home repair programs to help older residents (age 65 and older) with the critical repairs needed for their homes. Additionally, the contact stated that there are opportunities for banks to provide services and investments through grants to support financial and homebuyer education workshops. The interviewee

explained that there is an opportunity in the area to continue to implement housing-related programs that assist low- and moderate-income individuals in qualifying for mortgages. Lastly, it was mentioned that there is an opportunity for banks to collaborate with community organizations involved in affordable housing by providing them with community development loans, investments, and services.

Furthermore, another contact who is engaged in regional economic development was contacted and interviewed. This individual mentioned that Bowie and Miller counties have been economically stagnant compared to the states of Texas and Arkansas, and the COVID-19 pandemic has had a positive and negative impact on the community. Specifically, the contact explained that there are manufacturers within the MSA that have continued to do well during the pandemic; however, retail stores, hotels, and restaurants were negatively impacted because people did not travel to the area to shop, stay, or eat. Lastly, the contact stated that other significant events that have impacted the area include the threat of closing the Red River Army Depot.

Moreover, the contact mentioned that the Texarkana MSA has favorable attributes for businesses looking to start, expand, or relocate, which includes a dedicated workforce in key industries, strategic location to consumers, suppliers, and markets, and a good transportation infrastructure. However, the contact indicated that there are barriers that detract businesses from starting or expanding in the MSA, including a lack of start-up capital and a lack of awareness of the resources within the region that businesses can use. Additionally, the individual stated that the barriers start-up and existing small businesses face when applying for credit include the lack of business history.

There are opportunities for financial institutions to get involved in the community. The contact stated that banks can assist in creating an angel fund or capital investment fund for new and existing small businesses. Additionally, it was mentioned that banks can invest in the new creator's space or in an incubator to be developed for the Texarkana MSA. The contact stated that there is an opportunity for banks to collaborate with groups that serve the Texarkana MSA, such as the TexAmericas Center and the Chamber of Commerce, and to provide them with any community development loans, investments, and services needed.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE TEXARKANA TX-AR MULTISTATE ASSESSMENT AREA

LENDING TEST

Regions Bank's lending test performance in the Texarkana assessment area is high satisfactory. The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes an adequate level of community development loans in the Texarkana assessment area.

The analysis included 272 HMDA-reportable loans and 157 CRA small business loans reported by the bank in the Texarkana assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was

assigned to home purchase loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Home Purchase Loans

Of the 272 HMDA-reportable loans analyzed, 112 loans (41.2 percent) were home purchase loans. Of the total home purchase loans made, none were located in the one low-income tract within the assessment area; however, 22 home purchase loans (19.6 percent) were located in moderate-income tracts.

Home purchase lending in the one low-income tract within the assessment area was not rated due to a low share of owner-occupied housing within that tract (0.8 percent) and a low volume of lending by all lenders in that tract.

Home purchase lending in moderate-income tracts is excellent. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (19.6 percent) was above the percentage of owner-occupied units (13.2 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (25.0 percent) was significantly above the aggregate lending performance (10.0 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (13.8 percent) was slightly above the aggregate lending performance (11.1 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (20.6 percent) was significantly above the aggregate lending performance (10.6 percent) in these tracts.

Home Refinance Loans

Regions Bank made 102 home refinance loans from 2018 through 2020, which represents 37.5 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, none were located in the one low-income tract within the assessment area; however, 11 home refinance loans (10.8 percent) were located in moderate-income tracts.

Home refinance lending in the one low-income tract within the assessment area was not rated due to a low share of owner-occupied housing in that tract (0.8 percent) and a low volume of lending by all lenders in that tract.

Home refinance lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (10.8 percent) was similar to the percentage of owner-occupied units (13.2 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (18.8 percent) was significantly above the aggregate lending performance (8.8 percent) in these tracts. In 2019, Regions Bank made no home refinance loans (0.0 percent) in moderate-income tracts and was significantly below the aggregate lending performance (8.5 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (10.0 percent) was significantly above the aggregate lending performance (5.4 percent) in these tracts.

Home Improvement Loans

Regions Bank made 58 home improvement loans from 2018 through 2020, which represents 21.3 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, none were located in the one low-income tract within the assessment area; however, six home improvement loans (10.3 percent) were located in moderate-income tracts.

Home improvement lending in the one low-income tract within the assessment area was not rated due to a low share of owner-occupied housing in that tract (0.8 percent); also, Regions Bank as well as the other lenders in the assessment area did not make any home improvement loans in the one low-income tract in the assessment area during the period of 2018 through 2020.

Home improvement lending in moderate-income tracts is poor. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (10.3 percent) was similar to the percentage of owner-occupied units (13.2 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income tracts (5.3 percent) was below the aggregate lending performance (7.9 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (20.0 percent) was similar to the aggregate lending performance (18.9 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (5.3 percent) was below the aggregate lending performance (9.0 percent) in these tracts.

Small Business Loans

Regions Bank made 157 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, one loan (0.6 percent) was located within the one low-income tract in the assessment area, and 41 loans (26.1 percent) were located in moderate-income tracts.

Small business lending in the one low-income tract was not rated due to a low share of businesses within that tract (0.5 percent) and a low volume of lending by all lenders in that tract.

Small business lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (26.1 percent) was above the percentage of businesses (24.4 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (33.3 percent) was significantly above the aggregate lending performance (20.3 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (17.6 percent) was similar to the aggregate lending performance (19.4 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (25.6 percent) was above the aggregate lending performance (18.1 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is excellent. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (13.4 percent) was below the percentage of low-income families (23.0 percent). In 2018, the bank's home purchase lending to low-income borrowers (10.0 percent) was significantly above the aggregate lending performance (2.1 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (10.3 percent) was significantly above the aggregate lending performance (2.7 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (15.9 percent) was significantly above the aggregate lending performance (7.4 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is good. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (28.6 percent) was above the percentage of moderate-income families (16.1 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (10.0 percent) was slightly below the aggregate lending performance (11.6 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (10.3 percent) was below the aggregate lending performance (14.5 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (42.9 percent) was significantly above the aggregate lending performance (21.5 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (9.8 percent) was below the percentage of low-income families (23.0 percent). In 2018, the bank's home refinance lending to low-income borrowers (6.3 percent) was above the aggregate lending performance (4.4 percent) to these borrowers. In 2019, Regions Bank made no home refinance loans to low-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (2.8 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (16.0 percent) was significantly above the aggregate lending performance (2.9 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is excellent. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (19.6 percent) was above the percentage of moderate-income families (16.1 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (21.9 percent) was significantly above the aggregate lending performance (9.4 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (10.0 percent) was slightly above the aggregate lending performance (8.8 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (22.0 percent) was significantly above the aggregate lending performance (10.0 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (8.6 percent) was below the percentage of low-income families (23.0 percent). In 2018, the bank's home improvement lending to low-income borrowers (5.3 percent) was below the aggregate lending performance (7.9 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (10.0 percent) was slightly above the aggregate lending performance (8.4 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (10.5 percent) was significantly above the aggregate lending performance (4.5 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is poor. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (5.2 percent) was below the percentage of moderate-income families (16.1 percent). In 2018, the bank made no improvement loans to moderate-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (5.3 percent) to these borrowers. In 2019, Regions Bank made no home improvement loans to moderate-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (10.5 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (15.8 percent) was similar to the aggregate lending performance (14.9 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. From 2018 through 2020, 61.1 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 91.0 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (73.3 percent) was significantly above the aggregate lending performance (48.6 percent) to these businesses. In 2019, the bank's small business lending to small businesses (76.5 percent) was significantly above the aggregate lending performance (48.1 percent) to these businesses. In 2020, the bank's small business lending to small businesses (47.4 percent) was slightly above the aggregate lending performance (39.5 percent) to these businesses. Lastly, 85.4 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes an adequate level of community development loans in the Texarkana assessment area. During the review period, the bank originated two community development loans totaling \$1.4 million – both loans supporting affordable housing initiatives – and five community development PPP loans totaling \$2.9 million – all to support economic development.

While the bank's current lending by number of loans and dollar volume is lower than peer performance in this area, performance is deemed adequate in light of the bank's presence and available community development opportunities in the area. Additionally, most of the qualified loans were impactful and responsive to affordable housing needs in the assessment area, including two loans to a nonprofit for the construction of two apartment complexes providing 1,166 units of affordable housing in Texarkana.

INVESTMENT TEST

Regions Bank's investment test rating in the Texarkana multistate assessment area is low satisfactory. The bank made an adequate level of investments and grants given its presence and available community development opportunities in the assessment area. Combined investment and contribution activity inside the assessment area totaled \$1.4 million. The bank made two investments during the review period for approximately \$448,600 in a mortgage-backed security secured by loans to low- and moderate-income individuals. The bank held investments from prior review periods, including LIHTC investments and mortgage-backed securities.

During the review period, the bank made contributions totaling \$105,000. Specifically, the bank provided \$101,900 to organizations that provide community services for LMI individuals and \$3,000 to support affordable housing. Regions donated about \$52,000 in advertising to local food banks to help solicit food donations to meet the increased need during the pandemic. The bank also donated approximately \$46,000 to a national financial education provider to fund financial education in schools in the assessment area that serve a majority of LMI students.

SERVICE TEST

Regions Bank's service test rating in the Texarkana multistate assessment area is high satisfactory.

Retail Services

Retail banking services are adequate in the Texarkana multistate assessment area.

The distribution of three branch offices and three full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank had no branches in low-income tracts compared to 1.5 percent of households and 0.5 percent of businesses in the same geography. The proportion of the bank's branches in moderate-income tracts, however, was greater than the percentage of households and businesses in the same geography: 33.3 percent of total branches were in moderate-income tracts compared to 19.7 percent of households and 24.4 percent of businesses. Overall, the bank's retail delivery systems are reasonably accessible to Regions Bank's geographies and individuals of different income levels.

The bank's hours and services do not vary in a way that inconveniences the multi-state Texarkana assessment area, particularly low- and moderate-geographies and/or low- and moderate-individuals.

During the review period, Regions Bank did not open a branch or full-service ATM in the assessment area. However, one branch and one full-service ATM were closed in a moderate-income tract. Overall, the bank's record of opening and closing of branches has limited the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area.

Community Development Services

Regions Bank provides an excellent level of community development services in the Texarkana multistate assessment area. During the review period, Regions Bank employees engaged in 17 qualified service activities for a total of 273 qualified service hours. Notably, 64.2 percent of service hours were board or committee service at community development organizations. Bank employees engaged in service hours related to affordable housing, community services, and neighborhood revitalization and stabilization. The bank's performance is excellent considering the bank's size and presence in the assessment area and the opportunities that exist for community development.

Alabama

CRA RATING FOR ALABAMA: OUTSTANDING

The Lending Test is rated: High Satisfactory

The Investment Test is rated: Outstanding

The Service Test is rated: Outstanding

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank is a leader in making community development loans in its Alabama assessment areas.
- The bank provides an excellent level of qualified community development investments and grants that are responsive to community development needs of the Alabama assessment areas.
- Retail banking services are good in the bank's Alabama assessment areas.
- The bank is a leader in providing community development services that benefit residents and small businesses throughout the Alabama assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment areas in Alabama:

- Birmingham
- Mobile

Limited-scope reviews were conducted for the remaining 14 assessment areas:

- Anniston
- Auburn
- Coffee-Covington-Escambia
- Daphne-Fairhope-Foley
- Decatur
- Dothan
- Florence
- Gadsden
- Huntsville
- Montgomery
- Northern Alabama
- Southern Alabama
- Talladega-Tallapoosa
- Tuscaloosa

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN ALABAMA

As of June 30, 2020, Regions Bank had \$29.4 billion in deposits in Alabama accounting for 24.4 percent of the bank's total deposits. Regions Bank operated 194 branch offices in Alabama as of December 31, 2020, representing 14.2 percent of the bank’s total branches. HMDA-reportable lending in Alabama accounted for 18.9 percent of total institutional HMDA-reportable lending by number of loans and 16.9 percent by dollar volume. CRA small business lending in Alabama accounted for 13.0 percent of the bank’s total CRA small business lending by number of loans and 15.5 percent by dollar volume. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was less than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN ALABAMA

Lending Test

The lending test rating in the state of Alabama is high satisfactory. Overall, performance in Alabama with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, Regions is a leader in making community development loans in Alabama.

During the review period, Regions Bank reported 25,662 HMDA-reportable loans and 11,475 small business loans in Alabama. The rating for Alabama is based on performance in the Birmingham and Mobile full-scope

assessment areas. Approximately 52.0 percent of the bank's HMDA-reportable and small business lending by number of loans in Alabama occurred within these assessment areas.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of Alabama is derived from the Birmingham and Mobile full-scope assessment areas. A detailed discussion of the borrower and geographic distribution of lending for these assessment areas is included in the next sections of this report.

Community Development Lending

Regions Bank is a leader in making community development loans in the state of Alabama. During the review period, the bank originated or renewed 803 qualifying community development loans totaling \$409.7 million within its Alabama assessment areas, including 495 loans totaling \$244.9 million directly benefiting the full-scope assessment areas of Birmingham and Mobile. Moreover, 12 of the 14 limited-scope assessment areas had noticeable improvement since the previous CRA examination, with the bank being rated a leader in four limited-scope assessment areas where the bank has significant market share.

The total community development lending includes ten loans totaling \$11.8 million with a purpose, mandate, or function (P/M/F) of serving a broader statewide or regional area that includes more than one of the bank's assessment areas in the state. Some of the most impactful loans include:

- A \$3 million loan to a nonprofit for the initial construction and permanent financing of 40 units of transitional housing across the state. The housing development qualified for and received additional funding through the Federal Home Loan Bank of Atlanta's Affordable Housing Program, which restricts incomes of residents to less than 80 percent of area median income.
- A \$2.5 million loan to a statewide loan fund that provides early-stage venture capital funding primarily to small businesses.

The bank was considered responsive to the credit and community development needs within the state of Alabama. As a result, and in addition to the total community development lending previously noted, the bank received positive consideration for 19 community development loans totaling \$60.1 million that were outside any of the bank's assessment areas in the state. The most impactful of these loans included \$50.5 million that provided critical operating support to a Historically Black College and University that serves a majority of students receiving Pell grants. More information on community development loans can be found in the full-scope assessment area sections of this report.

Investment Test

The investment test rating for Alabama is outstanding.

Regions Bank made an excellent level of qualified investments and contributions totaling \$221.7 million in Alabama. The bank had qualified investments of \$199.6 million in the Alabama assessment areas, with approximately 53.8 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$16.1 million. Further, the bank made \$450,000 in investments and \$1.4 million in contributions that benefit a broader statewide area that includes the Alabama assessment areas. The contributions included support for several statewide organizations and initiatives including those focused on microenterprise and small business development, financial stability, and fostering partnerships between financial institutions and community partners to increase community development capacity across the state. The bank also provided nearly \$175,000 to support three CDFIs that serve the state of Alabama.

Notable statewide investments and contributions include:

- A \$150,000 program-related investment in a regional CDFI to fund a loan loss reserve pool that will help municipalities in the Alabama Black Belt leverage funding provided by the Coronavirus Aid, Relief, and Economic Security Act (the CARES Act) to help reimburse local governments for COVID-19 related expenses;
- A project-related investment to fund a pilot program to explore whether a healthcare coaching model can be used to provide academic coaching for the benefit of LMI Alabama students who are at risk of underperforming academically or failing to graduate from Alabama public two- and four-year institutions of higher learning. The pilot program will initially benefit schools located in the Mobile and Daphne assessment areas;
- A \$65,000 donation to an organization that runs volunteer income tax assistance sites across the state that provide free tax assistance to LMI individuals; and
- \$312,000 in contributions to a statewide organization that provides programs and services to the Lantix community, including free tax assistance, small business education, and homebuyer education. The contributions also support an emergency assistance program for LMI families impacted by job and income loss due to the COVID-19 pandemic as well as a microloan program to assist small business owners.

Birmingham and Mobile were the two assessment areas in the state reviewed using full-scope procedures. Approximately 42.5 percent of combined investment and contribution activity was in these assessment areas, compared to 59.8 percent of deposits in these markets as of June 30, 2021. Performance in the Birmingham assessment area was considered excellent while performance in Mobile was adequate; performance in the Birmingham assessment area had the greatest impact on the investment test rating for the state. The bank was considered responsive to community credit needs in the state. Therefore, positive consideration was given for

\$3.7 million in investments and \$355,322 in donations that benefit a broader statewide area, without a purpose, mandate or function of serving the Alabama assessment areas. The investments were in LIHTC projects that provide affordable housing.

Additional details regarding investments and contributions can be found in the full-scope assessment area sections.

Service Test

The service test rating for Alabama is outstanding.

Retail Services

Overall, the bank's retail service performance is considered good in Alabama. This evaluation was driven primarily by performance in the two full-scope assessment areas with more weight given to the Birmingham assessment area. Regions Bank's retail banking services are good in the Birmingham assessment area while the Mobile assessment area exhibited adequate performance. Delivery systems, including ATMs and branch office locations, are accessible to the bank's geographies and individuals of different income levels in the assessment areas. Statewide, banking services and hours of operations do not vary in a way that inconveniences the bank's assessment areas, including low- and moderate-income geographies or low- and moderate-income individuals. The record of opening and closing of branches has not adversely affected the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period, the bank opened two branch offices in Alabama: one in a low-income tract and one in an upper-income tract. However, the bank closed 23 branch offices: two in low-income tracts, four in moderate-income tracts, eight in middle-income tracts, and nine in upper-income tracts.

Community Development Services

Regions Bank is a leader in providing community development services that benefit residents and small businesses in Alabama. Employees engaged in 1,067 qualified service activities totaling 19,027 service hours during the examination period throughout the bank's assessment areas in the state. Performance in the two full-scope assessment areas was the primary driver for the statewide rating, with Birmingham having the largest impact. Performance in Birmingham, the larger of the two full-scope assessment areas, was excellent with 14,642 qualified service hours. Performance in Mobile was adequate with 787 qualified service hours. Bank employees served as board and committee members for a significant number of activities in the full-scope assessment areas. Additionally, financial education and homebuying activities were a primary community development service provided by the bank. Also, employees engaged in 3,598 service hours in limited-scope assessment areas. Finally, bank employees engaged in 1,047 hours of qualified service activities that benefited a broader statewide or regional area, including the bank's assessment areas. Overall, the community development service performance is considered excellent in Alabama.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area sections of this report.

**METROPOLITAN AREA
FULL-SCOPE REVIEW**

**DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE BIRMINGHAM, ALABAMA
ASSESSMENT AREA**

Overview

The Birmingham assessment area included all six counties in the Birmingham MSA: Blount, Chilton, Jefferson, Shelby, St. Clair, and Walker counties. In 2019, Walker County was removed from the MSA and the assessment area. As a result, Walker County was added to the bank's Northern Alabama assessment area. Regions operated 59 branches in the Birmingham assessment area as of December 31, 2020, which represent 30.4 percent of the bank's branches statewide, 54.5 percent of the bank's deposits statewide and 48.7 percent of the bank's total statewide HMDA-reportable and CRA small business loans (by dollar).

The Birmingham assessment area is a highly competitive banking market where national and regional banks have a significant presence. According to the June 30, 2020 FDIC Summary of Deposits Report, there were 47 financial institutions operating 296 branch offices in the Birmingham assessment area with a total of \$51.8 billion in deposits. Regions Bank had the largest deposit market share at 30.9 percent of deposits (\$16.0 billion). BBVA USA, Wells Fargo Bank, and ServisFirst Bank also held a significant share of deposits in the assessment area at 42.8 percent collectively.²⁴¹

HMDA-reportable and CRA small business lending are similarly competitive. In 2018, Regions Bank originated or purchased 7.5 percent of the HMDA-reportable loans in the Birmingham assessment area, ranking 1st out of 459 reporters. In 2020, the bank originated or purchased 8.1 percent of the HMDA-reportable loans in the assessment area, ranking 1st out of 527 reporters. The other top HMDA lenders in the market were Wells Fargo Bank, Quicken Loans, and Fairway Independent Mortgage Corporation.

For CRA small business and small farm lending, Regions Bank ranked 6th out of 126 reporters in 2018, with 5.2 percent of reported loans in the Birmingham assessment area. In 2020, the bank ranked 2nd out of 159 reporters, with 10.9 percent of reported loans in the assessment area. Other top CRA lenders in the assessment area included American Express, ServisFirst Bank, and Wells Fargo Bank.

Population and Income Characteristics

The assessment area population increased 5.3 percent from 2010 to 2020, reaching approximately 1.1 million residents as of 2020.²⁴² In the same time period, Alabama's population grew 5.1 percent and the United States' population grew 7.4 percent.²⁴³ Shelby County and St. Clair County, which grew at 14.3 percent and 9.0 percent

²⁴¹ "Offices and Deposits of all FDIC-Insured Institutions: Deposit Market Share Report." *Federal Deposit Insurance Corporation*, <https://www7.fdic.gov/sod/sodMarketRpt.asp?barItem=2&sZipCode=&InfoAsOf=2020&SortBy=Market%20Share&reRun=Y>. Accessed 25 March 2022.

²⁴² "QuickFacts: United States; St. Clair County, Alabama; Shelby County, Alabama; Jefferson County, Alabama; Chilton County, Alabama; Blount County, Alabama." *United States Census Bureau*, <https://www.census.gov/quickfacts/fact/table/US.stclaircountyalabama.shelbycountyalabama.jeffersoncountyalabama.chiltoncountyalabama.blountcountyalabama/PST045221>. Accessed 25 March 2022.

²⁴³ *Ibid.*

respectively between 2010 and 2020, were the fastest growing counties in the assessment area.²⁴⁴ Jefferson County, the most populous county in the state, experienced the slowest population growth in the assessment area between 2010 and 2020 at 2.5 percent.²⁴⁵

According to 2020 FFIEC census data, the assessment area is made up of 242 census tracts: 31 tracts are low-income (12.8 percent), 63 tracts are moderate-income (26.0 percent), 75 tracts are middle-income (31.0 percent), 71 tracts are upper-income (29.3 percent), and 2 tracts are an unknown income level (0.8 percent). According to 2018 FFIEC census data, in 2018 there were 260 census tracts distributed as follows: 11.9 percent low-income, 27.3 percent moderate-income, 31.9 percent middle-income, 28.1 percent upper-income, and 0.8 percent unknown income. Therefore, the change in census tract distribution between 2018 and 2020 was as follows: +0.9 percent low-income census tracts, -1.3 percent moderate-income census tracts, -0.9 percent middle-income census tracts, +1.2 percent upper-income census tracts, and no change in unknown income census tracts. Note that the total number of census tracts and the distribution of census tracts were affected by the 2019 removal of Walker County from both the MSA and the assessment area. The paragraph below contains additional discussion on this removal and its effects.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Birmingham-Hoover MSA. The table below provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper) in the MSA. As shown, the median family income increased from \$69,400 in 2018 to \$71,100 in 2020. Note that Walker County was removed from the MSA and the assessment area in 2019. Walker County’s median family income from 2016-2020 was \$45,833 and its population as of the 2020 Census was 65,342.²⁴⁶ Because Walker County’s median income was lower than the median income for the MSA, the removal of Walker County had a positive effect on the median family income in the MSA. However, Walker County comprised less than 6 percent of the MSA’s population before its removal, so this effect was limited.

**Borrower Income Levels
Birmingham-Hoover, AL MSA**

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2018	\$69,400	0 - \$34,699	\$34,700 - \$55,519	\$55,520 - \$83,279	\$83,280 - & above
2019	\$69,000	0 - \$34,499	\$34,500 - \$55,199	\$55,200 - \$82,799	\$82,800 - & above
2020	\$71,100	0 - \$35,549	\$35,550 - \$56,879	\$56,880 - \$85,319	\$85,320 - & above

There is a wide disparity in economic conditions within the assessment area. For example, the highest income county in the assessment area (Shelby County) had a median family income of \$95,848 between 2015 and 2019, which is nearly 75 percent higher than the median family income for the lowest income county in the assessment

area (Chilton County, at \$54,928).²⁴⁷ Additionally, the percentage of families living in poverty between 2015 and 2019 was only 4.3 percent in Shelby County, while it was 15.4 percent in Chilton County.²⁴⁸ 39.6 percent of families in low-income census tracts and 20.1 percent of families in moderate-income census tracts in the assessment area have incomes below the poverty level, which may limit lending opportunities in these areas.²⁴⁹

Economic Conditions

Birmingham was historically a manufacturing-based economy driven by the iron and steel industry. The economy has gradually transitioned to a diversified service-based economy, with manufacturing declining to only 6.9 percent of total employment in the region in 2020.²⁵⁰ The top sectors by employment count include trade/transportation; government; education and health services; and professional services.²⁵¹ The University of Alabama at Birmingham is the largest employer in the region with 23,000 employees. Other major employers include Regions Financial Corp., St. Vincent's Health System, Children's of Alabama, AT&T, and Honda Manufacturing of Alabama.²⁵²

Employment in the Birmingham MSA totaled approximately 537,100 in December 2020, which represented 1.1% growth since January 2018.²⁵³ The industries experiencing the most employment growth by percentage from 2018 to 2020 were construction, trade/transportation/utilities, and professional/business services.²⁵⁴ Meanwhile, the leisure/hospitality, mining/logging, and manufacturing industries saw net decreases in total jobs during this timeframe.

Small businesses play an important role in the Birmingham metro economy. A healthy entrepreneurial infrastructure is in place to help local entrepreneurs turn ideas into viable businesses. Available resources for these entrepreneurs include the University of Alabama at Birmingham's Institute for Innovation and Entrepreneurship²⁵⁵ and the Innovation Depot, which has helped launch over 110 member companies.²⁵⁶

According to Dun & Bradstreet data, there were 46,798 businesses in the Birmingham assessment area in 2020.²⁵⁷ This represented a 1.2 percent decrease from 2018.²⁵⁸ Note that this decrease can be attributed to the 2019 removal of Walker County from the assessment area. Of the total businesses in the assessment area, 90.3 percent had total annual revenues less than or equal to \$1 million and thus were considered small businesses.²⁵⁹ Only 6.5 percent

of small businesses in the assessment area were in low-income census tracts, while 21.1 percent of small businesses were in moderate-income census tracts.²⁶⁰ This distribution may present challenges for originating small business loans in low- and moderate-income census tracts.

Total lending to small businesses posted strong growth during the review period of 2018 to 2020. According to analysis of CRA loan data, the total number of small business loans (loans less than \$1 million in principal) originated in the assessment area increased by 24.9 percent between 2018 and 2020, with 25,267 loans made in 2020. 39.0 percent of these loans in 2020 were made to small businesses (less than \$1 million in annual revenue), while 43.8 percent of these loans in 2018 were made to small businesses.

The COVID-19 pandemic had a harmful effect on the Birmingham area's economy, much as it did across the nation. On March 20, 2020, the Alabama Department of Public Health issued a statewide order that prohibited all non-work gatherings of 25 people or more.²⁶¹ On March 24, 2020, the City of Birmingham instituted a shelter-in-place order.²⁶² On March 27, 2020, Governor Kay Ivey ordered all "non-essential businesses" in the state to be temporarily closed.²⁶³ On April 3, 2020, Governor Ivey issued a statewide stay-at-home order lasting through April 30, 2020.²⁶⁴ Alabama gradually began reopening in May 2020, but continued to struggle with some of the highest COVID-19 case numbers and mortality rates in the nation.²⁶⁵ The COVID-19 pandemic and the resulting restrictions had an adverse effect on many businesses in the assessment area, but had a particularly negative effect on those in the leisure and hospitality industry.²⁶⁶ To help keep the nation's economy afloat during the crisis, the U.S. Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act. The CARES Act established the Paycheck Protection Act (PPP), which provided fully forgivable loans to small businesses to cover payroll costs.²⁶⁷ In the assessment area alone, 38,384 PPP loans were approved for a total of nearly \$2.7 billion.²⁶⁸

Labor market conditions in the Birmingham assessment area were generally strong throughout the review period. As shown in the graph below, the assessment area unemployment rate declined from 3.5 percent in 2018 to 2.7 percent in 2019 before increasing to 5.5 percent in 2020 due to the COVID-19 pandemic. As of 2020, Shelby County had the lowest unemployment rate within the assessment area at 3.9 percent. Meanwhile, Jefferson County had the highest unemployment rate at 6.2 percent.

Unemployment Rates - AL Birmingham

According to FFIEC census data, there were 465,453 total housing units in the assessment area as of 2020. 59.9 percent were owner-occupied, 27.2 percent were rental units, and 12.9 percent were vacant. In low-income census tracts, only 29.5 percent of units were owner occupied, while 49.7 percent of units were owner-occupied in moderate-income census tracts. The median age of housing stock in the assessment area was 42 years. However, the median age of housing stock in low- and moderate-income census tracts was significantly higher, at 60 years and 50 years, respectively. These factors may result in limited opportunities for home purchase loans in low- and moderate-income census tracts, but opportunities for refinancing and home improvement lending may be more abundant.

The Birmingham housing market experienced significant price appreciation from 2018 to 2020. From January 2018 to December 2020, the median listing price in the MSA increased 30.7 percent, from \$199,900 to \$261,250.²⁶⁹ Meanwhile, median days on the market in the MSA declined by 40.6 percent, from 106 days to 63 days.²⁷⁰ Median home sales price in the assessment area varies widely by county. In 2020, Shelby County had the highest median home sales price at \$320,431 while Chilton County had the lowest, at \$186,679.²⁷¹ Homeownership rates also vary significantly by county, from a low of 62.7 percent in Jefferson County to a high of 80.5 percent in Shelby County.²⁷²

The recent price appreciation in the Birmingham metro area is making homeownership less affordable for low- and moderate-income families in the assessment area. Using the assumption that a borrower can obtain a loan for approximately three times their annual income, and using the 2020 FFIEC median income figures, affordable homes would be priced at \$106,647 or below for low-income families and \$170,637 or below for moderate-income families. As mentioned in the paragraph above, the median home sales price in 2020 was \$186,679 or higher in all counties in the assessment area.

Demographic Characteristics by Census Tract

The following tables present key demographic and business information used to help develop a performance context for the assessment area for the years 2018 through 2020. The data reflects the 2018 and 2020 FFIEC census data and Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development and economic landscapes, individuals familiar with the community and with community development activities were contacted. These individuals discussed the various opportunities and challenges and how financial institutions can be responsive to local community development needs.

Individuals from an organization involved in revitalization and economic development in Birmingham were contacted. These individuals indicated that there has been a steady increase in small business growth in Birmingham. They further explained that private investments have been plentiful to assist with revitalization efforts and the creation of small businesses. Per the contacts, the catalyst of small business growth is with the food industry, and the retail industry has also been very strong. It was mentioned that retail and food businesses have a significant role in the creation of small businesses in Birmingham. The contacts further stated that their organization has seen greater challenges among minority and women-owned businesses due to financial literacy and financial foundation (e.g. how to structure a business). The individuals expressed that financial education is a major need as well as a need to provide a higher level of support to small businesses. It was explained that because many businesses in Birmingham are food related, there are a lot of traditional financial institutions that are hesitant to invest because of the risk and high failure rates of those businesses.

The contacts further talked about the challenges facing small businesses. It was mentioned by the contacts that Community Development Financial Institutions (CDFIs) strive to help small businesses; however, if the small businesses cannot articulate a good business plan, then it becomes difficult for those businesses to get capital through CDFIs. The contacts explained that a lot of institutions offer learning workshops; however, the contacts feel that it has been proven to be difficult to implement what has been learned in those workshops, such as setting up QuickBooks. For the food service businesses, the individuals mentioned that obtaining commissary space is a challenge, and this space can be very expensive.

Lastly, the contacts explained that banks could be more responsive in the area. The organization believes that banks have taken a “boxed-CRA” approach that is no longer sustainable. The individuals indicated that they would like more creativity in how projects are funded. Also, it was mentioned that there is difficulty to get small businesses to attend workshops provided by banks when those learning sessions are not engaging, especially when the sessions cover marketing strategies and how to start a business.

A community contact engaged in providing community development services was also interviewed. This contact stated that prior to the COVID-19 pandemic, the organization witnessed an influx of families who were actively seeking employment and educational opportunities. However, since the pandemic, residents of the community are currently facing many obstacles including unemployment, housing stability, food insecurity, mental health issues and education challenges as they attempt to navigate the changing economic and social climate. In addition to being unsure how to regroup and navigate the current working environment, the contact stated that the organization is noticing that families are stuck in, what the contact referred to as, “the deserving mode,” which she explained as those who do not want to seek employment but are more comfortable receiving government assistance. She said that a study was conducted by her organization and found that pre-pandemic government assistance/social benefits amounted to approximately \$25K to \$29K annually; currently, individuals are receiving

approximately \$32K to \$35K annually, so there is a challenge within the community to get persons back to becoming self-sufficient.

The contact indicated that one challenge facing small businesses within the community was the communication style of larger institutions when approached to establish a banking relationship. The contact stated that these larger banks tend to have high standards and communicate in a language that is not easily understandable. She said that based on her experience, smaller financial institutions and credit unions are more responsive to the needs of small businesses. These institutions are more likely to take the time to explain complex terms and are better at forming interpersonal relationships and connections with the business owners so that there is a comfort level when approaching these smaller institutions, per the contact.

Lastly, the contact said that one way financial institutions can be more responsive to the needs of the community is by partnering with local organizations to offer career and trade opportunities; provide education on general budgeting and credit building; provide financial literacy and education; and provide mentorship programs. She mentioned that there is an immediate need for financial literacy programs since a lot of residents have low credit scores, which affects their ability to obtain credit.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE BIRMINGHAM, ALABAMA ASSESSMENT AREA

LENDING TEST

Regions Bank's lending performance in the Birmingham assessment area is good. The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making community development loans in the Birmingham assessment area.

The analysis included 9,203 HMDA-reportable loans and 4,889 CRA small business loans reported by the bank in the Birmingham assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Birmingham assessment area accounted for 50.8 percent of Regions Bank's total HMDA-reportable lending in Alabama by dollar volume and 40.5 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 54.5 percent of Regions Bank's Alabama deposits are in the Birmingham assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 9,203 HMDA-reportable loans analyzed, 3,535 loans (38.4 percent) were home purchase loans. Of the total home purchase loans made, 44 loans (1.2 percent) were located in low-income tracts, and 385 loans (10.9 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is adequate. In 2018, Regions Bank's home purchase lending in low-income tracts (1.3 percent) was below the percentage of owner-occupied units (4.9 percent) in these tracts. In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending in low-income tracts (1.2 percent) was below the percentage of owner-occupied units (5.2 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in low-income tracts (1.3 percent) was slightly above the aggregate lending performance (1.1 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (1.3 percent) was similar to the aggregate lending performance (1.3 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (1.2 percent) was similar to the aggregate lending performance (1.3 percent) in these tracts.

Home purchase lending in moderate-income tracts is poor. In 2018, Regions Bank's home purchase lending in moderate-income tracts (10.0 percent) was below the percentage of owner-occupied units (21.7 percent) in these tracts. In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending in moderate-income tracts (11.2 percent) was below the percentage of owner-occupied units (20.8 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in moderate-income tracts (10.0 percent) was slightly below the aggregate lending performance (12.7 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (11.2 percent) was slightly below the aggregate lending performance (13.6 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (11.2 percent) was slightly below the aggregate lending performance (12.9 percent) in these tracts.

Home Refinance Loans

Of the 9,203 HMDA-reportable loans analyzed, 3,954 loans (43.0 percent) were home refinance loans. Of the total home refinance loans made, 86 loans (2.2 percent) were located in low-income tracts, and 384 loans (9.7 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is good. In 2018, Regions Bank's home refinance lending in low-income tracts (4.2 percent) was similar to the percentage of owner-occupied units (4.9 percent) in these tracts. In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending in low-income tracts (1.7 percent) was below the percentage of owner-occupied units (5.2 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in low-income tracts (4.2 percent) was significantly above the aggregate lending performance (1.8 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (3.4 percent) was significantly above the aggregate lending performance (1.3 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (1.0 percent) was slightly above the aggregate lending performance (0.8 percent) in these tracts.

Home refinance lending in moderate-income tracts is adequate. In 2018, Regions Bank's home refinance lending in moderate-income tracts (15.6 percent) was similar to the percentage of owner-occupied units (21.7 percent) in these tracts. In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending in moderate-income tracts (8.4 percent) was below the percentage of owner-occupied units (20.8 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in moderate-income tracts (15.6 percent) was slightly above the aggregate lending performance (13.2 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (12.5 percent) was slightly above the aggregate lending performance (10.6 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (6.6 percent) was slightly below the aggregate lending performance (7.8 percent) in these tracts.

Home Improvement Loans

Of the 9,203 HMDA-reportable loans analyzed, 1,714 loans (18.6 percent) were home improvement loans. Of the total home improvement loans made, 42 loans (2.5 percent) were located in low-income tracts, and 149 loans (8.7 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is adequate. In 2018, Regions Bank's home improvement lending in low-income tracts (2.9 percent) was below the percentage of owner-occupied units (4.9 percent) in these tracts. In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending in low-income tracts (2.3 percent) was below the percentage of owner-occupied units (5.2 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in low-income tracts (2.9 percent) was above the aggregate lending performance (2.2 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (3.0 percent) was slightly above the aggregate lending performance (2.5 percent) in these tracts. In 2020, the bank's home improvement lending in low-income tracts (1.3 percent) was slightly below the aggregate lending performance (1.6 percent) in these tracts.

Home improvement lending in moderate-income tracts is poor. In 2018, Regions Bank's home improvement lending in moderate-income tracts (8.5 percent) was below the percentage of owner-occupied units (21.7 percent)

in these tracts. In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending in moderate-income tracts (8.8 percent) was below the percentage of owner-occupied units (20.8 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in moderate-income tracts (8.5 percent) was slightly below the aggregate lending performance (9.6 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (8.8 percent) was slightly below the aggregate lending performance (10.6 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (8.8 percent) was slightly below the aggregate lending performance (10.0 percent) in these tracts.

Small Business Loans

Regions Bank made 4,889 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 395 loans (8.1 percent) were located in low-income tracts, and 899 loans (18.4 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is good. In 2018, Regions Bank's small business lending in low-income tracts (8.3 percent) was above the percentage of businesses (6.5 percent) in these tracts. In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in low-income tracts (8.0 percent) was above the percentage of businesses (6.9 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in low-income tracts (8.3 percent) was slightly above the aggregate lending performance (7.2 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (9.7 percent) was above the aggregate lending performance (7.1 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (7.5 percent) was similar to the aggregate lending performance (7.1 percent) in these tracts.

Small business lending in moderate-income tracts is adequate. In 2018, Regions Bank's small business lending in moderate-income tracts (18.0 percent) was similar to the percentage of businesses (20.2 percent) in these tracts. In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in moderate-income tracts (18.5 percent) was similar to the percentage of businesses (21.3 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in moderate-income tracts (18.0 percent) was similar to the aggregate lending performance (17.7 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (19.6 percent) was similar to the aggregate lending performance (18.3 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (18.2 percent) was similar to the aggregate lending performance (18.0 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is poor. In 2018, Regions Bank's home purchase lending to low-income borrowers (5.2 percent) was below the percentage of low-income families (24.0 percent). In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending to low-income borrowers (6.0 percent) was below the percentage of low-income families (23.9 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to low-income borrowers (5.2 percent) was below the aggregate lending performance (7.2 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (5.2 percent) was slightly below the aggregate lending performance (6.2 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (6.6 percent) was similar to the aggregate lending performance (6.7 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is adequate. In 2018, Regions Bank's home purchase lending to moderate-income borrowers (18.4 percent) was above the percentage of moderate-income families (15.8 percent). In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending to moderate-income borrowers (22.1 percent) was above the percentage of moderate-income families (15.7 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to moderate-income borrowers (18.4 percent) was slightly below the aggregate lending performance (21.4 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (20.3 percent) was similar to the aggregate lending performance (20.5 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (23.4 percent) was similar to the aggregate lending performance (21.7 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. In 2018, Regions Bank's home refinance lending to low-income borrowers (12.3 percent) was below the percentage of low-income families (24.0 percent). In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending to low-income borrowers (5.8 percent) was below the percentage of low-income families (23.9 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to low-income borrowers (12.3 percent) was above the aggregate lending performance (9.1 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (11.0 percent) was significantly above the aggregate lending performance (5.9 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (3.5 percent) was similar to the aggregate lending performance (3.3 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is adequate. In 2018, Regions Bank's home refinance lending to moderate-income borrowers (18.1 percent) was above the percentage of moderate-income families (15.8 percent). In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending to moderate-income borrowers (12.1 percent) was similar to the percentage of moderate-

income families (15.7 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to moderate-income borrowers (18.1 percent) was similar to the aggregate lending performance (17.6 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (15.3 percent) was slightly above the aggregate lending performance (13.0 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (10.6 percent) was similar to the aggregate lending performance (10.9 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. In 2018, Regions Bank's home improvement lending to low-income borrowers (5.8 percent) was below the percentage of low-income families (24.0 percent). In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending to low-income borrowers (6.3 percent) was below the percentage of low-income families (23.9 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to low-income borrowers (5.8 percent) was slightly below the aggregate lending performance (6.6 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (6.8 percent) was similar to the aggregate lending performance (6.2 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (5.5 percent) was slightly above the aggregate lending performance (4.9 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is adequate. In 2018, Regions Bank's home improvement lending to moderate-income borrowers (13.3 percent) was similar to the percentage of moderate-income families (15.8 percent). In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending to moderate-income borrowers (13.3 percent) was similar to the percentage of moderate-income families (15.7 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to moderate-income borrowers (13.3 percent) was similar to the aggregate lending performance (13.0 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (13.5 percent) was similar to the aggregate lending performance (14.8 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (13.0 percent) was slightly above the aggregate lending performance (11.8 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is excellent. In 2018, 71.5 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. By comparison, 89.1 percent of the total businesses in the assessment area were classified as small businesses. In 2019, Walker County was removed from the MSA and the bank's assessment area, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, 57.7 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. During this period, 90.3 percent of the total businesses in the assessment area were classified as small businesses. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending (71.5 percent) was significantly above the aggregate's small business lending performance (41.2 percent). In 2019, the bank's small business

lending to small businesses (65.8 percent) was significantly above the aggregate's small business lending performance (39.8 percent) to these businesses. In 2020, the bank's small business lending to small businesses (55.3 percent) was above the aggregate's lending performance (37.6 percent) to these businesses. Lastly, 90.5 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank is a leader in making community development loans in the Birmingham assessment area. During the review period, the bank originated or renewed 37 community development loans totaling \$53.1 million and 299 community development PPP loans totaling \$85.1 million. Specifically, the bank originated or renewed \$75.2 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; \$44.4 million towards community services benefiting LMI individuals and families; \$14.2 million to support economic development; and \$4.4 million in affordable housing initiatives.

Many of the qualified loans were impactful, and the bank's current lending by number of loans and dollar volume exceeds peer performance in this area. Additionally, while not included directly in the Birmingham totals, several loans were originated or renewed to organizations operating in Birmingham that serve multiple areas throughout Alabama. These loans had a positive impact on performance in this assessment area, but as described previously, were credited to the state of Alabama.

Some of the most impactful loans directly benefiting the assessment area include:

- A \$2.9 million loan used to extend the LIHTC construction term for a 120-unit apartment complex. The original loan was used to support the first phase of redevelopment for public housing that is part of the city's Rental Assistance Demonstration program. The renewal provided additional time to meet stabilization requirements associated with obtaining permanent financing for the LIHTC project.
- \$2.5 million in newly originated loans to nonprofits and the renewal of a \$1.5 million loan to a small business incubator, all for the purpose of revitalization and stabilization. The loans provided funds for redevelopment and creation of new businesses throughout downtown, the Historic District, the Theatre District, and the Civil Rights District. Each loan's purpose aligned with needs noted in formal city plans for Birmingham.
- Six loans totaling \$1.8 million were highly responsive to the needs of nonprofits impacted by COVID-19. They included two lines of credit totaling \$1.3 million for emergency cash flow needs in early March 2020 before the PPP was created and four PPP loans totaling \$467,000 to homeless shelters and a daycare.
- A \$780,000 line of credit to a nonprofit for the creation of seven affordable single-family homes exclusively for LMI individuals and families in Jefferson and St. Clair counties.

- A \$500,000 loan to a nonprofit for city improvement projects in Midfield, a city that is primarily LMI. The loan was used to pay for construction of streets and sidewalks and helped the city obtain reimbursement from state grant funds that require payment upfront.
- A \$300,000 line of credit and a \$213,000 working capital loan to a newly formed charter school. The funds were used by the nonprofit to cover operating expenses during initial opening, and Regions Bank partnered with a CDFI to provide a flexible repayment schedule that coincided with anticipated grant receipts from the Department of Education and venture funds from nonprofits.

INVESTMENT TEST

Regions Bank's investment performance in the Birmingham assessment area is excellent. The bank made an excellent level of investments and grants, and made significant use of complex investments to support community development initiatives. Qualified investments and contributions demonstrate excellent responsiveness to a wide range of identified assessment area needs. Combined investment and contribution activity inside the assessment area totaled nearly \$79.0 million.

The bank made investments (excluding contributions) totaling \$66.3 million in the Birmingham assessment area, including \$36.0 million in new investments during the review period. The bank was responsive to the need across the region for affordable rental housing, including \$4.2 million for a LIHTC project that provided 48 new affordable units during the review period. This LIHTC project was developed by a local Neighborworks affiliate and involved multiple financing partners, including an Alabama-based CDFI bank, which provided the construction financing utilizing Capital Magnet Funds awarded to the bank by the CDFI Fund. The bank also provided financing for affordable housing through current period investments in mortgage-backed securities (MBS) totaling \$31.7 million. The bank's MBS investments provided financing for both affordable rental housing projects and mortgages to LMI borrowers. During the review period, Regions also made a \$100,000 project-related investment in a nonprofit to support the development of a cultural center in a low-income neighborhood. This investment will both revitalize the area and support the development of a unique educational program for LMI students to receive high school diplomas and obtain hands-on experience in the construction trades. During prior examination periods, the bank invested \$30.3 million, which primarily financed affordable housing through LIHTCs and MBS. Lastly, the bank made several investments in a regional CDFI that serves multiple states, including Alabama, and benefited the Birmingham assessment area.

Regions Bank made contributions totaling \$12.7 million during the review period. Specifically, the bank provided \$10.0 million for community services benefiting low- and moderate-income individuals, \$1.5 million to support economic development, \$208,000 for affordable housing initiatives, and \$920,000 to support revitalization and stabilization activities in low- and moderate-income communities. The bank made significant contributions that were highly responsive to addressing the COVID-19 pandemic, providing support for emergency and recovery assistance. The bank also made contributions responsive to community needs ranging from educational support for LMI students; emergency and transitional housing, particularly for the homeless; small business education and technical assistance; supportive services and affordable housing for LMI persons; and the ongoing

revitalization of low- and moderate-income communities in downtown Birmingham. In addition, the bank provided \$1.4 million in contributions that benefited a broader regional area that includes the bank's assessment area.

Examples of notable contributions include:

- Contributions to multiple organizations totaling \$1.6 million to help provide services to LMI individuals, small businesses, and nonprofits to help sustain operations during the COVID-19 pandemic, including funding for educational institutions to support online learning, support for food banks, and other critical service providers. Contributions also included \$250,000 to Birmingham Strong, which is a public-private partnership formed to build, link, and coordinate people, projects, and resources to strengthen Birmingham's COVID-19 response;
- A \$500,000 donation to support a charter school that serves 500 students and their families that is part of a comprehensive revitalization effort for a low-income community led by a local foundation;
- A \$595,000 donation to a city-wide coalition of community, civic, and business leaders committed to creating a more vibrant and racially inclusive economy in Birmingham, that includes a specific focus on supporting minority- and women-owned businesses.
- \$2.0 million in donations over the review period to support a public-private partnership focused on improving educational and economic outcomes for youth in Birmingham, working through the city schools where the majority of students receive free or reduced-price lunch;
- \$400,000 in donations to support a small business incubator, specifically targeting funds to support a program that provides resources and training for new entrepreneurs; and
- \$250,000 to a CDFI to support early-stage investments in technology companies that are founded by people of color or women.

SERVICE TEST

Regions Bank's service test performance in the Birmingham assessment area is excellent.

Retail Services

Retail banking services are good in the Birmingham full-scope assessment area.

The distribution of 59 branch offices and 74 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The percentage of branches in low-income tracts exceeded the percentage of households and businesses in the same geography: 9.3 percent of households and 6.9 percent of businesses were located in low-income census tracts compared to 11.9 percent of the bank's branches. Additionally, the proportion of the bank's branches in moderate-income tracts was above the percentage of households and businesses in the same geography: 25.4 percent of total branches were in moderate-income-tracts compared to 23.9 percent of households and 21.3 percent of businesses. Overall, the bank's retail delivery systems are accessible to the bank's geographies and individuals of different income levels.

It was noted that in 2019, Walker County was removed from the Birmingham MSA and the bank’s assessment area. As a result, Walker County became part of the Northern Alabama assessment area. During the review period, the bank opened no branch offices in low- or moderate-income census tracts. However, nine full-service ATMs were opened, including three in moderate-income tracts. The bank closed 10 branch offices in the assessment area. Two branches were closed in a moderate-income tracts. Additionally, 10 full-service ATMs were closed: two in moderate-income tracts. Therefore, the bank’s record of opening and closing of branches has not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

Community Development Services

Regions Bank is considered a leader in providing community development services in the Birmingham assessment area. During the review period, employees engaged in 543 qualified service activities totaling 14,642 hours that positively impacted the assessment area. The bank’s service activities benefited organizations that provide affordable housing, community services, economic development, and revitalization and stabilization activities for low- and moderate-income individuals, geographies, and small businesses in the Birmingham assessment area. Of the bank’s total service hours, 1,604 supported adult and youth financial education and homebuyer education through partnership with local schools, organizations, and businesses. Additionally, the bank provided 5,870 hours of technical assistance to a variety of organizations that provide community services in low- and moderate-income geographies and for low- and moderate-income individuals. Bank employees also engaged in 7,147 hours of board or committee service to various qualified nonprofit organizations.

Highlighted below are examples of community development services considered responsive during the review period:

- A bank employee served as president and later as a board member for an organization that serves as a coalition of community, civic and business leaders to help create an inclusive economy in the Greater Birmingham area. The organization is working to bring businesses and industries that create sustainable jobs as well as access to these opportunities to the Birmingham area.
- A Regions associate served on the board of directors and provided financial education classes for an organization that provides literacy and enrichment programs for students in Birmingham City Schools. The organization’s programs empower community youth by helping them increase their reading comprehension and retention skills.
- Regions senior managers served on the board and provided technical assistance for a foundation that supports the revitalization efforts in the Woodlawn community in Birmingham. The foundation is engaged

in researching and purchasing property for future land-bank uses and has been involved in a land assembly initiative that will include affordable housing, charter schools and other revitalization efforts in the community.

- Several bank managers and associates served over 159 hours in various capacities, including on the board of directors, as committee members, homebuyer education instructors and provided technical assistance, for an organization that provides programs and services to LMI individuals within the Birmingham Latino community. This organization provides support with life skill development, homebuying education, tax preparation and small business development.

METROPOLITAN AREA FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE MOBILE, ALABAMA ASSESSMENT AREA

Overview

The Mobile assessment area includes only Mobile County, which is one of the two counties that comprise the Mobile, AL MSA. Prior to 2019, the Mobile, AL MSA consisted of only Mobile County; however, Washington County was added in 2019. After Washington County was added to the MSA, the family income distribution for the assessment area did not change. As of December 31, 2020, Regions operated 24 branches in the assessment area, which represented 12.4 percent of the bank’s branches statewide, 9.7 percent of the bank’s statewide deposits and 7.7 percent of the bank’s total statewide HMDA-reportable and CRA small business loans (by dollar).

The Mobile assessment area is a smaller banking market where national, regional, and local banks have a presence. According to the June 30, 2020 FDIC Summary of Deposits Report, there were 24 financial institutions operating 113 branch offices in the Mobile assessment area with a total of \$8.6 billion in deposits.²⁷³ Regions Bank had the largest deposit market share at 31.2 percent of deposits (\$2.7 billion). After Regions, Hancock Whitney Bank, BBVA USA, and PNC Bank were the other deposit share leaders in the assessment area.²⁷⁴

HMDA-reportable and CRA small business lending in the assessment area is competitive. In 2018, Regions Bank originated or purchased 8.3 percent of the HMDA-reportable loans in the Mobile assessment area, ranking 1st out of 305 reporters. In 2019, the bank originated or purchased 8.1 percent of the HMDA-reportable loans in the assessment area, ranking 1st out of 331 reporters. For 2020, Regions Bank originated or purchased 6.3 percent of the HMDA-reportable loans in the assessment, ranking 3rd out of 328 reporters. Besides Regions, the other top HMDA lenders in the market were Wells Fargo Bank, Trustmark National Bank, and Quicken Loans, LLC.

For CRA small business and small farm lending, Regions Bank ranked 8th out of 86 reporters in 2018, with 4.1 percent of reported loans in the Mobile assessment area. In 2019, the bank ranked 14th out of 87 reporters, with 2.5 percent of reported loans in the assessment area. For 2020, Regions Bank ranked 3rd out of 103 reporters, with

²⁷⁴ *Ibid.*

8.0 percent of reported loans in the assessment area. In general, the top CRA lenders in the assessment area included American Express, PNC Bank, and Hancock Whitney Bank.

Population and Income Characteristics

The assessment area’s population has not significantly increased since the last decennial census. As of April 1, 2020, the assessment area population increased 0.4 percent from 2010, reaching approximately 414,809 residents.²⁷⁵ The city of Mobile, which is the seat of Mobile County, had a 4.1 percent decrease in population since the last decennial census, and the population as of April 1, 2020, was estimated to be 187,041 residents.²⁷⁶ Since the last decennial census, population growth in the assessment area from 2010 to 2020 was significantly below the state’s population growth, which was 5.1 percent.²⁷⁷

According to 2020 FFIEC census data, the assessment area is made up of 115 census tracts: 19 tracts are low-income (16.5 percent), 27 tracts are moderate-income (23.5 percent), 37 tracts are middle-income (32.2 percent), 30 tracts are upper-income (26.1 percent), and 2 tracts are an unknown income level (1.7 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Mobile, AL MSA. The table below provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper) in the MSA. As shown, the median family income remained relatively stable throughout the review period. In 2018, the median family income was \$59,800, and it decreased slightly to \$58,300 in 2019. By 2020, the median family income for the MSA increased to \$59,800, which was the same as the median family income for 2018. For Mobile County, the median family income between the period 2015 through 2019 was \$60,779,²⁷⁸ which is comparable to the MSA’s median family income.

**Borrower Income Levels
Mobile, AL MSA**

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2018	\$59,800	0 - \$29,899	\$29,900 - \$47,839	\$47,840 - \$71,759	\$71,760 - & above
2019	\$58,300	0 - \$29,149	\$29,150 - \$46,639	\$46,640 - \$69,959	\$69,960 - & above
2020	\$59,800	0 - \$29,899	\$29,900 - \$47,839	\$47,840 - \$71,759	\$71,760 - & above

Concerning poverty, 15.7 percent of families in the assessment area live below the poverty level.²⁷⁹ Additionally, 43.7 percent of families in low-income census tracts and 28.2 percent of families in moderate-income tracts live below the poverty level.²⁸⁰ The high percentages of families living below the poverty level in low- and moderate-income census tracts may impact the lending opportunities in those area.

²⁸⁰ *Ibid.*

Furthermore, the percentage of families living in poverty in Mobile County has remained relatively the same from the period of 2010 through 2014 and from the period 2015 through 2019. Specifically, the percentage of families living in poverty from the period 2010 through 2014 was 16.2 percent.²⁸¹ From the period 2015 through 2019, the percentage of families living in poverty decreased slightly to 14.1 percent.²⁸² Overtime, there has not been much change in the percentage of families living in poverty in Mobile County.

Economic Conditions

The assessment area is located in the southwest corner of the state of Alabama and is home to the city of Mobile, which is the fourth most populated and the oldest city in Alabama.²⁸³ The Mobile area has access to five Class I railroads as well as Interstates 10 and 65 that lead to major markets in the United States, and there are two airports, Mobile Downtown Airport and Mobile Regional Airport, that service the area.²⁸⁴ Mobile has a strong foreign investment presence with more than 40 companies that represent more than 20 countries.²⁸⁵ The established clusters of key industries in the area include aviation/aerospace, chemical, and steel manufacturing.²⁸⁶

Mobile is home to the Port of Mobile, which is the 9th largest port by tonnage in the United States.²⁸⁷ This port is vital to the state's economy because 58 million tons of international and domestic cargo is handled annually, which delivers \$26.8 billion in economic value to the state each year.²⁸⁸ The Port of Mobile also generates 161,130 jobs due to the activity handled by the port's public and private terminals on an annual basis.²⁸⁹

Furthermore, Mobile is also home to Airbus, which began operations in 2015 and is the first commercial aircraft manufacturing facility in the United States.²⁹⁰ By the fifth-year production anniversary for the company, the business had increased its employment base from an initial workforce of around 250 to 1,000 employees.²⁹¹ Additionally, the factory had delivered more than 180 A320 Family Aircrafts that have flown 60 million passengers 500 million miles.²⁹²

Mobile has a variety of manufacturing and non-manufacturing businesses that offer employment opportunities to the area. The top five manufacturing employers in the mobile area, by number of employees, include Austal USA (4,000 plus), AM/NS Calvert (1,600 plus), Airbus U.S. Manufacturing Facility (1,100 plus), VT MAE (1,060 plus), and Outokumpu Stainless (1,000 plus).²⁹³ The top five non-manufacturing employers, by number of

employees, in the Mobile area include Mobile County Public Schools (7,200 plus), University of South Alabama and Medical Facilities (6,000 plus), Infirmary Health System (5,400 plus), City of Mobile (2,000 plus), AltaPointe (1,700 plus), and Springhill Medical Center (1,600 plus).²⁹⁴

According to 2020 Dun & Bradstreet data, there were 15,507 businesses in the Mobile assessment area.²⁹⁵ Of the total businesses in the assessment area, 90.0 percent had total annual revenues less than or equal to \$1 million and thus were considered to be small businesses.²⁹⁶ Only 6.3 percent of small businesses in the assessment area were in low-income census tracts, while 18.3 percent of small businesses were in moderate-income census tracts.²⁹⁷ This distribution may present challenges for originating small business loans in low- and moderate-income census tracts.

Furthermore, lending to small businesses has both increased and decreased during the review period. According to an analysis of CRA loan data, the total number of small business loans (loans less than \$1 million in principal amount) originated to small businesses located in the assessment area decreased 2.8 percent between 2018 and 2019. From 2019 to 2020, there was a 12.0 percent increase in the total small business loans made to small businesses. This significant increase in small business lending during 2020 was most likely due to Paycheck Protection Loans made during the COVID-19 pandemic.

The COVID-19 pandemic had a harmful effect on the Mobile area's economy like it did across the nation. On March 20, 2020, the Alabama Department of Public Health issued a statewide order that prohibited all non-work gatherings of 25 people or more.²⁹⁸ On March 27, 2020, Governor Kay Ivey ordered all "non-essential businesses" in the state to be temporarily closed.²⁹⁹ On April 3, 2020, Governor Ivey issued a statewide stay-at-home order lasting through April 30, 2020.³⁰⁰ The statewide order impacted the economy because many businesses had to reduce or cease operations during the pandemic. To help keep the nation's economy afloat during the crisis, the U.S. Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act. The CARES Act established the Paycheck Protection Act (PPP), which provided loans to small businesses to cover payroll costs.³⁰¹ In the assessment area alone, 20,632 PPP loans were approved for a total of \$1.0 billion.³⁰² On a local level, the City of Mobile created Ignite Mobile as a grant program to provide financial support for local businesses that

were forced to close under state mandated orders.³⁰³ Within a week of accepting applications for relief, 182 businesses had been awarded funds from the grant program.³⁰⁴ Overall, many businesses were impacted by the pandemic, and they utilized federal and local relief resources to help sustain operations during this period.

The Mobile assessment area has seen both a decrease and an increase in unemployment during the review period. In 2018, the unemployment rate in the assessment area was 4.7 percent. In 2019, the unemployment rate decreased to 3.7 percent. For 2018 and 2019, the unemployment rate in the assessment area was higher than the unemployment rate for the state, which was 3.9 percent in 2018 and 3.0 percent in 2019. In 2020, the COVID-19 pandemic had a significant impact on the United States economy and caused unemployment to rise.³⁰⁵ In the assessment area, the unemployment rate was 7.9 percent for the year, which was greater than the unemployment rate for the state at 5.9 percent.

Unemployment Rates - AL Mobile

*The MSA changed in 2019

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

According to 2020 FFIEC census data, there were 180,932 total housing units in the assessment area: 56.7 percent were owner-occupied, 28.5 percent were rental units, and 14.8 percent were vacant. In low-income census tracts, 35.1 percent of units were owner occupied, and 44.1 percent of units were owner-occupied in moderate-income census tracts.³⁰⁶ Additionally, 40.9 percent of units were rental, and 24.0 percent of units were vacant in low-income census tracts; for moderate-income census tracts, 36.8 percent of units were rental, 19.2 percent of units were vacant.³⁰⁷ The median age of housing stock in the assessment area was 44 years.³⁰⁸ However, the median age of housing stock in low- and moderate-income census tracts was significantly higher, at 61 years and 52 years,

³⁰³ Bullard, Lindsey. "182 Businesses Awarded Ignite Mobile Grants Amid Coronavirus Pandemic." *NBC15News*, 12 May 2022, <https://myNBC15.com/news/local/182-businesses-awarded-ignite-mobile-grants-amid-coronavirus-pandemic>. Accessed 11 Apr. 2022.

³⁰⁶ FRB Atlanta calculations of 2020 FFIEC census data.

³⁰⁷ Ibid.

³⁰⁸ Ibid.

respectively.³⁰⁹ These factors may result in limited opportunities for home purchase loans in low- and moderate-income census tracts, but opportunities for refinancing and home improvement lending may be more abundant. During the review period, home prices in the assessment area have increased year-over-year. In 2018, the median sales price for a single-family home in Mobile County was \$145,209.³¹⁰ In 2019, the median sales price for a single-family home in Mobile County increased 5.1 percent to \$152,575.³¹¹ By 2020, the median sales price for a single-family home in Mobile County increased 9.5 percent to \$167,053.³¹²

The price appreciation for single-family residences in the Mobile assessment area is having an impact on home affordability. Using the assumption that a borrower can obtain a loan for approximately three times their annual income and using the 2020 FFIEC median family income for the assessment area, affordable homes would be priced at \$163,179 or below.³¹³ As mentioned in the paragraph above, the median home sales price in 2020 was \$167,053. Overall, even though the affordable home statistic and the median sales price for a single-family residence are similar, the upward trend in home prices are impacting home affordability in the assessment area, especially for low- and moderate-income families.

Demographic Characteristics by Census Tract

The following table presents key demographic and business information used to help develop a performance context for the assessment area for the years 2018 through 2020. The data reflects the 2020 FFIEC census data and Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the community and economic development landscapes, community and economic development practitioners were contacted. These individuals discussed the various needs and opportunities across the region as well as how financial institutions can be responsive to local community development needs. Several themes emerged from the discussions; contacts noted that the city of Mobile is performing well from an economic perspective, and capital is largely available to businesses, particularly those which operate near the port; however, low- to moderate-income communities outside the city of Mobile struggle to find affordable housing, access to credit, and local jobs.

According to a contact focused on economic development, the retail and food industries in Mobile County struggled during the early stages of the COVID-19 pandemic. Some of these businesses closed permanently, but most of them successfully adapted and recovered. The contact added that Mobile's economy bounced back quickly from the pandemic and is now stronger than ever. Further, it was explained that the city of Mobile is a port city and although global supply chain delays were noted as a significant concern for continued economic stability, she said that the areas nearest to the port are doing especially well.

According to another contact focused on affordable housing much of Mobile County is rural, and there is a need in those communities for commercial development in order to produce jobs, which would help keep dollars within the smaller communities. This contact primarily focuses on affordable housing on areas outside the city limits of Mobile and explained that from 2018 to early 2020 public housing was considered affordable with many communities having vacancies, and the majority of those in need were families seeking three or more bedrooms. During this time, the contact said housing was moderately increasing in price, and the county-led down payment assistance program was adequate in helping low- and moderate-income individuals secure a home. However, as the pandemic continued and home prices became unattainable, the homeless population increased significantly, and the county's down payment assistance program became restrictive causing many individuals in the Section 8 housing program to no longer qualify. Most public housing communities are currently on a waitlist and the demand for more affordable one- and two-bedroom units has skyrocketed. The contact noted that there is a need for new construction as housing stock in Mobile County is quite old and lacking quality. This sentiment was echoed by the economic development contact which stated that Mobile is healthy as a commercial district but not as a residential area. This person explained that over the last 15 years many people who work in Mobile have elected to live in the neighboring county of Baldwin, and this trend is especially prevalent for more affluent residents.

One of the contacts discussed the banking and community development needs of the area. Specifically, it was mentioned that there is a need for less restrictive down payment assistance programs, more access to credit to purchase homes, more affordable one- and two-bedroom homes, the use of alternative credit score for obtaining homes, and to provide more money to be a community partner for building homes. These may be opportunities for banks to help assist individuals and businesses within the community.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE MOBILE, ALABAMA
ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending performance in the Mobile assessment area is good. The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making community development loans in the Mobile assessment area.

The analysis included 2,054 HMDA-reportable loans and 1,450 CRA small business loans reported by the bank in the Mobile assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Mobile assessment area accounted for 6.6 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Alabama and 12.2 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 9.1 percent of Regions Bank's Alabama deposits are in the Mobile assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 2,054 HMDA-reportable loans analyzed, 672 loans (32.7 percent) were home purchase loans. Of the total home purchase loans made, six loans (0.9 percent) were located in low-income tracts, and 55 loans (8.2 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's home purchase lending in low-income tracts (0.9 percent) was below the percentage of owner-occupied units (5.7 percent) in these tracts. In 2018, the bank's home purchase lending in low-income tracts (1.1 percent) was significantly above the aggregate lending performance (0.7 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (0.9 percent) was above the aggregate lending performance (0.7 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (0.7 percent) was below the aggregate lending performance (1.0 percent) in these tracts.

Home purchase lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (8.2 percent) was below the percentage of owner-occupied units (15.0 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (8.2 percent) was slightly above the aggregate lending performance (6.6 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (9.7 percent) was slightly above the aggregate lending performance (7.9 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (7.0 percent) was similar to the aggregate lending performance (7.8 percent) in these tracts.

Home Refinance Loans

Regions Bank made 883 home refinance loans from 2018 through 2020, which represents 43.0 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, 13 loans (1.5 percent) were located in low-income tracts, and 77 loans (8.7 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is good. From 2018 through 2020, Regions Bank's home refinance lending in low-income tracts (1.5 percent) was below the percentage of owner-occupied units (5.7 percent) in these tracts. In 2018, the bank's home refinance lending in low-income tracts (1.6 percent) was slightly above the aggregate lending performance (1.3 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (2.4 percent) was significantly above the aggregate lending performance (1.1 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (0.8 percent) was slightly above the aggregate lending performance (0.7 percent) in these tracts.

Home refinance lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (8.7 percent) was below the percentage of owner-occupied units (15.0 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (7.8 percent) was similar to the aggregate lending performance (8.6 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (10.4 percent) was above the aggregate lending performance (7.2 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (8.2 percent) was significantly above the aggregate lending performance (5.4 percent) in these tracts.

Home Improvement Loans

Regions Bank made 499 home improvement loans from 2018 through 2020, which represents 24.3 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, five loans (1.0 percent) were located in low-income tracts, and 58 loans (11.6 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home improvement lending in low-income tracts (1.0 percent) was below the percentage of owner-occupied units (5.7 percent) in these tracts. In 2018, the bank's home improvement lending in low-income tracts (2.5 percent) was similar to the aggregate lending performance (2.6 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (0.4 percent) was significantly below the aggregate lending performance (1.3 percent) in these tracts. In 2020, the bank made no home improvement loans in low-income tracts (0.0 percent) and was significantly below the aggregate lending performance (1.1 percent) in these tracts.

Home improvement lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (11.6 percent) was similar to the percentage of owner-occupied units (15.0 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income tracts (8.0 percent) was slightly above the aggregate lending performance (7.2 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (13.2 percent) was above the aggregate lending performance (9.7 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (13.6 percent) was above the aggregate lending performance (9.2 percent) in these tracts.

Small Business Loans

Regions Bank made 1,450 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 107 loans (7.4 percent) were located in low-income tracts, and 266 loans (18.3 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is good. From 2018 through 2020, Regions Bank's small business lending in low-income tracts (7.4 percent) was above the percentage of businesses (6.6 percent) in these tracts. In 2018, the bank's small business lending in low-income tracts (6.4 percent) was similar to the aggregate lending performance (6.4 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (10.2 percent) was significantly above the aggregate lending performance (6.0 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (7.1 percent) was similar to the aggregate lending performance (6.5 percent) in these tracts.

Small business lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (18.3 percent) was similar to the percentage of businesses (18.8 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (21.1 percent) was slightly above the aggregate lending performance (18.1 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (13.0 percent) was below the aggregate lending performance (17.6 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (18.6 percent) was similar to the aggregate lending performance (17.6 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (6.5 percent) was below the percentage of low-income families (24.0 percent). In 2018, the bank's home purchase lending to low-income borrowers (8.8 percent) was significantly above the aggregate lending performance (5.8 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (6.0 percent) was similar to the aggregate lending performance (5.5 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (5.5 percent) was similar to the aggregate lending performance (5.3 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (21.6 percent) was above the percentage of moderate-income families (15.6 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (22.0 percent) was slightly above the aggregate lending performance (19.9 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (23.5 percent) was above the aggregate lending performance (18.2 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (19.8 percent) was similar to the aggregate lending performance (20.8 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (7.7 percent) was below the percentage of low-income families (24.0 percent). In 2018, the bank's home refinance lending to low-income borrowers (8.2 percent) was similar to the aggregate lending performance (8.4 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (10.0 percent) was significantly above the aggregate lending performance (5.9 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (5.8 percent) was significantly above the aggregate lending performance (3.1 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is excellent. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (16.5 percent) was above the percentage of moderate-income families (15.6 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (21.6 percent) was above the aggregate lending performance (15.0 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (17.7 percent) was above the aggregate lending performance (11.8 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (12.4 percent) was above the aggregate lending performance (8.3 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is good. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (9.8 percent) was below the percentage of low-income families (24.0 percent). In 2018, the bank's home improvement lending to low-income borrowers (8.6 percent) was similar to the aggregate lending performance (7.9 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (9.3 percent) was slightly above the aggregate lending performance (8.2 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income

borrowers (12.7 percent) was significantly above the aggregate lending performance (6.5 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (15.2 percent) was similar to the percentage of moderate-income families (15.6 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (20.4 percent) was slightly above the aggregate lending performance (17.7 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (13.7 percent) was similar to the aggregate lending performance (13.1 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (10.9 percent) was slightly below the aggregate lending performance (14.1 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. From 2018 through 2020, 58.6 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 90.0 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (72.8 percent) was significantly above the aggregate lending performance (40.3 percent) to these businesses. In 2019, the bank's small business lending to small businesses (58.8 percent) was significantly above the aggregate lending performance (37.6 percent) to these businesses. In 2020, the bank's small business lending to small businesses (52.9 percent) was significantly above the aggregate lending performance (32.9 percent) to these businesses. Lastly, 90.5 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank is a leader in making community development loans in the Mobile assessment area. During the review period, the bank originated or renewed 13 community development loans totaling \$83.9 million and 146 community development PPP loans totaling \$22.7 million. Specifically, the bank originated or renewed \$73.0 million towards community services benefiting LMI individuals and families; \$21.5 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; \$7.5 million in affordable housing initiatives; and \$4.6 million to support economic development. The dollar volume of community development lending exceeds the bank's performance at its previous examination and exceeds peer performance in this area.

Some of the most impactful loans directly benefiting the assessment area include:

- A \$35 million line of credit originated to ensure continued funding for approximately 90 Community Eligibility Provision (CEP) schools in the area. The line of credit was issued to provide continued operations and cover current expenses for the schools due to temporary delays in funding from the state. Under the CEP, high poverty schools and those in low-income areas can provide free meals to all students. The dollar amount of the loan, coupled with the need for continued operations within CEP schools, makes it impactful.

- Two loans totaling \$7.5 million made through RCDC for construction and/or renovations of housing units under the HUD Section 8 program. Renovations impact 176 units across three separate developments, including one LIHTC development, and all residents are low income.
- A \$416,000 loan and a \$2.0 million renewing line of credit to a nonprofit for revitalization efforts impacting the city of Prichard. The loan was originated for the purchase of new equipment used for trash services and replacement of outdated equipment used for other basic services throughout the city. Similarly, the line of credit was renewed for use of improvements to the city's water and sewer system. Prichard is located in a moderate-income tract, and improvements to basic services were specifically noted in a grant proposal for the city.
- A \$94,000 loan made through the PPP for a nonprofit drug and alcohol recovery center serving LMI women.
- A \$92,000 loan to purchase buses for a nonprofit organization offering daycare services in a moderate-income tract. The organization's day care center offers a childcare subsidy program to LMI families as administered by the state and primarily serves families that are LMI.

INVESTMENT TEST

Regions Bank's investment performance in the Mobile assessment area is adequate. The bank made an adequate level of investments and grants that demonstrated adequate responsiveness to credit and community development needs in the assessment area. Combined investment and contribution activity inside the assessment area totaled \$12.8 million. The bank's investments (excluding contributions) totaled \$12.0 million, of which \$8.3 million (68.5 percent) were new investments acquired during the review period. The bank's investments during the review period provided financing for affordable housing, including mortgage-backed securities secured by loans for multifamily rental housing and mortgages for low- and moderate-income individuals. The bank also purchased a \$250,000 certificate of deposit in a minority-owned bank, which is also a CDFI, and renewed a \$250,000 investment in a regional CDFI that serves southern Alabama and northwest Florida, including the Mobile assessment area. Lastly, the bank made several investments in a regional CDFI that serves multiple states, including Alabama, and benefited the Mobile assessment area.

Regions Bank also made contributions totaling \$733,300 in the Mobile assessment area. Specifically, the bank provided \$458,000 to organizations that offer community services to low- and moderate-income individuals, \$222,800 to support economic development, \$50,000 for revitalization and stabilization efforts, and \$2,500 toward affordable housing initiatives. Overall, approximately \$73,000 in donations were responsive to the COVID-19 pandemic, providing support for organizations providing emergency and recovery assistance to LMI individuals, small businesses, and nonprofits. Notable contributions include \$250,000 to a minority-owned bank that is also a CDFI (also supported by the certificate of deposit described above). The funding provided support for the bank to hire a new relationship manager and provided funding to be used as loan-loss reserve to enhance lending for minority-owned businesses in Mobile County. Additionally, Regions donated about \$26,000 in advertising to a local food bank to help solicit food donations to meet the increased need during the pandemic.

The bank also made \$450,000 in investments and \$1.4 million in donations that benefited all assessment areas in Alabama, which positively impacted the bank’s performance in Mobile.

SERVICE TEST

Regions Bank’s service test performance in the Mobile assessment area is adequate.

Retail Services

Retail banking services are adequate in the Mobile full-scope assessment area.

The distribution of 24 branch offices and 26 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank had one branch (4.2 percent) in a low-income tract compared to 8.2 percent of households and 6.6 percent of businesses in the same geography. The distribution of the bank’s branches in moderate-income tracts was less than the percentage of households and businesses in the same geography: 16.7 percent of total branches were in moderate-income tracts compared to 18.3 percent of households and 18.8 percent of businesses. Overall, the bank’s retail delivery systems are reasonably accessible to the bank’s geographies and individuals of different income levels.

During the review period, the bank neither opened nor closed any branch offices or full-service ATMs in low- or moderate-income census tracts. Therefore, the bank’s record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the Mobile assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

 SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

Regions Bank provides an adequate level of community development services in the Mobile assessment area. During the review period, Regions Bank employees engaged in 84 qualified service activities totaling 787 hours. The bank's service activities benefited organizations that provide affordable housing, community services, economic development, and revitalization and stabilization support to low- and moderate-income individuals, communities, and small businesses in the Mobile assessment area. Of the bank's total service activities, 308 activities supported adult and youth financial education and homeownership counseling. Additionally, bank staff engaged in 462 hours of board or committee member service to various qualified organizations, making up 58.7 percent of total hours in the assessment area. Most notably, a bank manager served on the board of a corporation that coordinates enhanced services within a business improvement district in Mobile. The corporation works with the city and the county to support projects that revitalize the area, encouraging new sustainable business development and investments. Another Regions associate served on a committee of the South Alabama Regional Planning Commission. The committee oversaw the South Alabama Regional Planning Commission Revolving Loan Fund, which is a locally controlled source of capital used to finance small business start-ups and expansions whose projects must create permanent jobs.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ALABAMA METROPOLITAN ASSESSMENT AREA

- *Anniston Assessment Area (Calhoun County)*
 - As of December 31, 2020, Regions Bank operated six branches in the assessment area, representing 3.1 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$475.4 million in deposits in this assessment area, representing a market share of 21.4 percent and 1.6 percent of Regions Bank's total deposits in Alabama.
- *Auburn Assessment Area (Lee County)*
 - As of December 31, 2020, Regions Bank operated three branches in the assessment area, representing 1.5 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$261.4 million in deposits in this assessment area, representing a market share of 7.0 percent and 0.9 percent of Regions Bank's total deposits in Alabama.
- *Daphne-Fairhope-Foley Assessment Area (Baldwin County)*
 - As of December 31, 2020, Regions Bank operated 10 branches in the assessment area, representing 5.2 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$1.1 billion in deposits in this assessment area, representing a market share of 19.8 percent and 3.6 percent of Regions Bank's total deposits in Alabama.
- *Decatur Assessment Area (Lawrence and Morgan counties)*
 - As of December 31, 2020, Regions Bank operated five branches in the assessment area, representing 2.6 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$619.7 million in deposits in this assessment area, representing a market share of 23.4 percent and 2.1 percent of Regions Bank's total deposits in Alabama.
- *Dothan Assessment Area (Houston County)*
 - As of December 31, 2020, Regions Bank operated five branches in the assessment area, representing 2.6 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$ 538.7 million in deposits in this assessment area, representing a market share of 16.5 percent and 1.8 percent of Regions Bank's total deposits in Alabama.
- *Florence Assessment Area (Colbert and Lauderdale counties)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 2.1 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$261.2 million in deposits in this assessment area, representing a market share of 8.1 percent and 0.9 percent of Regions Bank's total deposits in Alabama.
- *Gadsden Assessment Area (Etowah County)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 2.1 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$286.1 million in deposits in this assessment area, representing a market share of 22.0 percent and 1.0 percent of Regions Bank's total deposits in Alabama.

- *Huntsville Assessment Area (Limestone and Madison counties)*
 - As of December 31, 2020, Regions Bank operated 18 branches in the assessment area, representing 9.3 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$2.4 billion in deposits in this assessment area, representing a market share of 23.1 percent and 8.2 percent of Regions Bank’s total deposits in Alabama.
- *Montgomery Assessment Area (Autauga, Elmore, and Montgomery counties)*
 - As of December 31, 2020, Regions Bank operated 17 branches in the assessment area, representing 8.8 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$1.8 billion in deposits in this assessment area, representing a market share of 20.0 percent and 6.3 percent of Regions Bank’s total deposits in Alabama.
- *Tuscaloosa Assessment Area (Tuscaloosa County)*
 - As of December 31, 2020, Regions Bank operated eight branches in the assessment area, representing 4.1 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$803.1 million in deposits in this assessment area, representing a market share of 19.6 percent and 2.7 percent of Regions Bank’s total deposits in Alabama.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Tuscaloosa	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

For the lending test, Regions Bank received a rating of high satisfactory for the State of Alabama. Performance in two metropolitan limited-scope assessment areas was consistent with the statewide lending test performance, while performance was below the statewide lending test performance in the remaining eight metropolitan limited-scope assessment areas. For the geographic distribution of loans, lending levels were adequate in Anniston, Decatur, Dothan, Gadsden, Huntsville, Montgomery, and Tuscaloosa, and poor in Auburn, Daphne-Fairhope-Foley, and Florence. Performance was good for the borrower distribution of loans in Anniston, Decatur, Dothan, Gadsden, Huntsville, Montgomery, and Tuscaloosa, and adequate in Auburn, Daphne-Fairhope-Foley, and Florence. Community development lending performance in limited-scope metropolitan assessment areas was as follows: the bank was a leader in Florence (\$10.8 million), Huntsville (\$46.3 million), and Montgomery (\$37.5 million); made an adequate level in Decatur (\$5.2 million) and Anniston (\$3.5 million); made a low level in Daphne-Fairhope-Foley (\$1.6 million) and Tuscaloosa (\$2.2 million); and made few, if any, in Auburn (\$68,000), Dothan (\$352,000), and Gadsden (\$794,000).

For the investment test, Regions Bank received a rating of outstanding for the State of Alabama. Performance in the Auburn and Florence metropolitan limited-scope assessment areas was consistent with the bank's statewide investment test performance; however, performance was below the bank's statewide investment test performance in the remaining eight metropolitan limited-scope assessment areas. The bank's level of lending was excellent in the Auburn and Florence assessment areas; significant in the Montgomery assessment area; adequate in the Gadsden and Tuscaloosa assessment areas; and poor in the Anniston, Daphne-Fairhope-Foley, Decatur, Dothan, and Huntsville assessment areas.

For the service test, Regions Bank received a rating of outstanding for the State of Alabama. Performance in all the limited-scope metropolitan assessment areas was weaker than the bank's state performance. The overall service performance in Decatur, Florence, Huntsville, Montgomery, and Tuscaloosa metropolitan assessment areas was considered good, while the performance in Anniston, Auburn, Gadsden, and Daphne-Fairhope-Foley was considered adequate. The Dothan metropolitan assessment area had poor levels of services primarily due to limited community development performance.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating.

NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ALABAMA NON-METROPOLITAN ASSESSMENT AREAS

- *Coffee-Covington-Escambia Assessment Area (Coffee, Covington, and Escambia counties)*
 - As of December 31, 2020, Regions Bank operated five branches in the assessment area, representing 2.6 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$233.2 million in deposits in this assessment area, representing a market share of 9.6 percent and 0.8 percent of Regions Bank's total deposits in Alabama.
- *Northern Alabama Assessment Area (Cherokee, Cullman, Dekalb, Jackson, Marshall, Fayette, and Walker(removed in 2019) counties)*
 - As of December 31, 2020, Regions Bank operated 11 branches in the assessment area, representing 5.7 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$1.2 billion in deposits in this assessment area, representing a market share of 15.6 percent and 4.1 percent of Regions Bank's total deposits in Alabama.
- *Southern Alabama Assessment Area (Choctaw, Clarke, Conecuh, Dallas, Marengo, Monroe, Pike and Sumter counties)*
 - As of December 31, 2020, Regions Bank operated 11 branches in the assessment area, representing 5.7 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$510.9 million in deposits in this assessment area, representing a market share of 14.0 percent and 1.7 percent of Regions Bank's total deposits in Alabama.
- *Talladega-Tallapoosa Assessment Area (Talladega and Tallapoosa counties)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 2.1 percent of its branches in Alabama.
 - As of June 30, 2020, the bank had \$191.3 million in deposits in this assessment area, representing a market share of 10.8 percent and 0.7 percent of Regions Bank's total deposits in Alabama.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Coffee-Covington-Escambia	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Northern Alabama	Consistent	Not Consistent (Below)	Not Consistent (Below)
Southern Alabama	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Talladega-Tallapoosa	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

For the lending test, Regions Bank received a rating of high satisfactory for the State of Alabama. Performance was consistent with the statewide performance in one of the nonmetropolitan limited-scope assessment areas, while performance was below the statewide lending test in the remaining three nonmetropolitan limited-scope assessment areas. For the geographic distribution of loans, lending levels were good in Coffee-Covington-Escambia, Northern Alabama, and Southern Alabama, while adequate in Talladega-Tallapoosa. Performance was good for the borrower distribution of loans in Coffee-Covington-Escambia and Northern Alabama, while adequate in Southern Alabama and Talladega-Tallapoosa. Community development lending performance in limited-scope nonmetropolitan assessment areas was as follows: the bank was a leader in Northern Alabama (\$37.0 million); made an adequate level in Southern Alabama (\$6.3 million); made a low level in Talladega-Tallapoosa (\$2.2 million); and made few, if any, in Coffee-Covington (\$185,000).

For the investment test, Regions Bank received a rating of outstanding for the State of Alabama. Performance in all four of the nonmetropolitan limited-scope assessment areas was below the bank’s statewide investment test performance. The bank’s level of investments was significant in the Coffee-Covington-Escambia, Southern Alabama, and Talladega-Tallapoosa assessment areas, while adequate in the Northern Alabama assessment area.

For the service test, Regions Bank received a rating of outstanding for the State of Alabama. Performance in the five nonmetropolitan limited-scope assessment areas was weaker than the bank’s state performance. The performance in Northern Alabama, and Southern Alabama was considered adequate based on community development service and retail delivery services. The Coffee-Covington-Escambia assessment area performance was also adequate—retail delivery services were good in the assessment area; however, the community development performance was poor. Additionally, performance in Talladega-Tallapoosa was considered poor, which was due to weak retail delivery services and community development performance.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

Arkansas

CRA RATING FOR ARKANSAS: SATISFACTORY

The Lending Test is rated: High Satisfactory

The Investment Test is rated: Low Satisfactory

The Service Test is rated: Low Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects good penetration throughout the assessment areas, and the distribution of loans by borrower income reflects excellent penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a low level of community development loans in its Arkansas assessment areas.
- The bank provides an adequate level of qualified community development investments and grants that are responsive to community development needs of the Arkansas assessment areas.
- Retail banking services are adequate in the bank's Arkansas assessment areas.
- The bank provides an adequate level of community development services throughout the Arkansas assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in Arkansas:

- Little Rock

Limited-scope reviews were conducted for the remaining eight assessment areas:

- Fayetteville
- Ft. Smith
- Hot Springs
- Jonesboro
- Northeast Arkansas
- Northwest Arkansas
- Southern Arkansas
- Union

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN ARKANSAS

As of June 30, 2020, Regions Bank had \$3.9 billion in deposits in Arkansas accounting for 3.3 percent of the bank's total deposits. Regions Bank operated 61 branch offices in Arkansas as of December 31, 2020, representing 4.5 percent of the bank’s total branches. HMDA-reportable lending in Arkansas accounted for 4.8 percent of total institutional HMDA-reportable lending by number of loans and 3.9 percent by dollar volume. CRA small business lending in Arkansas accounted for 2.8 percent of the bank’s total CRA small business lending by number of loans and 3.7 percent by dollar volume. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was greater than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Statewide Summary of Lending Activity
Assessment Areas Located in
Arkansas

Loan Type	#	%	\$ (000s)	%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN ARKANSAS

Lending Test

The lending test rating in the state of Arkansas is high satisfactory. Overall, performance in Arkansas with regard to the geographic distribution of loans reflects good penetration throughout the assessment areas. The distribution of loans by borrower income reflects excellent penetration among customers of different income levels and businesses of different sizes. Additionally, Regions Bank makes a low level of community development loans in Arkansas.

During the review period, Regions Bank reported 6,447 HMDA-reportable loans and 2,475 small business loans in Arkansas. The rating for Arkansas is based on performance in the Little Rock full-scope assessment area.

Approximately 45.7 percent of the bank's HMDA-reportable and small business lending by number of loans in Arkansas occurred within this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is good, and the distribution of loans by borrower income and revenue size of businesses is excellent. As noted above, the rating for the state of Arkansas is derived from the Little Rock full-scope assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

Regions Bank makes a low level of community development loans in the state of Arkansas. During the review period, the bank originated or renewed 108 qualifying community development loans totaling \$56.7 million benefiting the Arkansas assessment areas, including four loans totaling \$10.1 million that benefit a broader regional area that includes two limited-scope assessment areas in the state.

Most of the community development dollars were attributed to the Fayetteville limited-scope assessment area while performance was poor in the Little Rock full-scope assessment area, which is the primary driver in determining the state rating. Additionally, performance in five of the eight limited-scope assessment areas was consistent with or below the poor performance of Little Rock, including assessment areas where Regions Bank has significant market share. Therefore, the bank's community development lending activities that occurred outside of its Arkansas assessment areas were not given consideration for this evaluation. More information on community development lending can be found in the full-scope assessment area section of this report.

Investment Test

The investment test rating for Arkansas is low satisfactory.

Regions Bank made an adequate level of qualified investments and contributions totaling \$44.5 million in Arkansas. The bank had qualified investments of \$44.0 million in the Arkansas assessment areas, with approximately 40.1 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$552,100. Further, the bank made \$109,000 in contributions that benefit a broader statewide area that includes the Arkansas assessment areas. Notable contributions include \$95,000 to two separate CDFIs to assist with COVID-relief efforts.

Little Rock was the assessment areas in the state reviewed using full-scope procedures. Approximately 30.2 percent of combined investment and contribution activity was in Little Rock, compared to 47.7 percent of deposits in the market as of June 30, 2021. Performance in the Little Rock assessment area was considered adequate. The bank was considered responsive to community credit needs in the state. Therefore, positive consideration was given for \$19.3 million in investments and \$26,000 in donations that benefit a broader statewide area, without a

purpose, mandate, or function of serving the Arkansas assessment areas. The investments were in LIHTC projects that provide affordable housing.

Additional details regarding investments and contributions can be found in the full-scope assessment area section.

Service Test

The service test rating for Arkansas is low satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas. Overall, banking services and hours of operations do not vary in a way that inconveniences the bank's assessment areas, including low- and moderate-income geographies or low- and moderate-income individuals. The record of opening and closing of branch offices has generally not adversely affected the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period, the bank did not open any branch offices in the state. The bank closed 17 branch offices, primarily through consolidation. Of those closed, one was in a low-income tract, three in moderate-income tracts, 11 in middle-income tracts, and two in upper-income tracts. Overall, the bank's retail service performance is considered adequate in Arkansas.

Community Development Services

Regions Bank provides an adequate level of community development services that benefit residents and small businesses in Arkansas. Employees engaged in 158 qualified service activities totaling 2,077 hours in the Arkansas assessment areas. The majority of community development service hours were provided in the Little Rock full-scope assessment, where performance was considered adequate. Employees engaged in 1,134 total service hours in limited-scope assessment areas. Finally, bank employees engaged in 105 hours of qualified community development services that benefited a broader statewide or regional area, including the bank's assessment areas.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

METROPOLITAN AREA
FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE LITTLE ROCK, ARKANSAS
ASSESSMENT AREA

Overview

The Little Rock assessment area includes Faulkner, Grant, Lonoke, Pulaski, and Saline counties, which are five of the six counties located in the Little Rock-North Little Rock-Conway, Arkansas MSA. As of December 31, 2020, Regions Bank operated 24 branches inside the assessment area, which represent 39.3 percent of the branches statewide. In addition, 48.4 percent of the bank's statewide deposits are in this market. The assessment area represents the largest concentration of combined HMDA-reportable and CRA small business lending by dollar volume in the state at 51.6 percent.

According to the FDIC Summary of Deposits Report dated June 30, 2020, there were 37 financial institutions operating 301 branch offices inside the assessment area with a total of \$28.4 billion in deposits.³¹⁴ Bank of the Ozarks, Bank of America, and Arvest Bank hold the largest share of deposits at 52.7 percent collectively. Regions Bank ranks 6th, with \$1.9 billion in deposits and 6.8 percent of total deposits.³¹⁵

HMDA-reportable lending in the assessment area is competitive. Regions Bank originated or purchased 3.6 percent in loans during 2018. For that year, the bank ranked 6th out of 365 reporters. In 2019, Regions Bank originated or purchased 3.4 percent in loans and ranked 6th out of 373 reporters for the year. Lastly, Regions Bank originated or purchased 3.0 percent in loans for the assessment area during 2020. For that year, Regions Bank ranked 12th out of 408 reporters. From 2018 through 2020, HMDA-reportable lending in the assessment area was primarily dominated by Well Fargo Bank, Arvest Bank, and Penny Mac Loan Services, LLC.

CRA small business lending is also competitive. For CRA small business and small farm lending, Regions Bank ranked 14th out of 101 reporters in 2018, with 2.5 percent of reported loans. In 2019, the bank ranked 15th out of 105 reporters, with 1.8 percent of reported loans. Furthermore, Regions Bank ranked 11th out of 146 reporters, with 3.6 percent of reported loans for 2020. From 2018 through 2020, lending in the assessment area was primarily dominated by American Express, U.S. Bank, Lake Forest Bank, and Capital One Bank.

Accessed 23 Feb. 2022.

³¹⁵ *Ibid.*

Population and Income Characteristics

The assessment area population increased from 2010 to 2020 by 7.1 percent, reaching 738,012 residents in 2020.³¹⁶ The majority of people reside in Pulaski County, home to Little Rock, but Saline County was one of the fastest growing counties in the state, growing 15.2 percent between 2010 and 2020. During this same period, the state’s population grew by 3.3 percent.³¹⁷

The assessment area has 161 census tracts. According to 2020 FFIEC census data, 11 tracts are low-income (6.8 percent), 38 tracts are moderate-income (23.6 percent), 62 tracts are middle-income (38.5 percent), 48 tracts are upper-income (29.8 percent), and 2 tracts have an unknown income level (1.2 percent).³¹⁸

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Little Rock-North Little Rock-Conway, AR MSA. As shown, the median family income increased from \$65,900 in 2018 to \$72,300 in 2020. Data shows that the median family income varied across the assessment area. The highest median family income was in Saline County (\$65,438) compared to the lowest in Grant County (\$57,052).³¹⁹ In addition, 38.8 percent of families were considered low- to moderate-income (LMI) in the assessment area in 2020.³²⁰

**Borrower Income Levels
Little Rock-North Little Rock-Conway, AR MSA**

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2018	\$65,900	0 - \$32,949	\$32,950 - \$52,719	\$52,720 - \$79,079	\$79,080 - & above
2019	\$69,800	0 - \$34,899	\$34,900 - \$55,839	\$55,840 - \$83,759	\$83,760 - & above
2020	\$72,300	0 - \$36,149	\$36,150 - \$57,839	\$57,840 - \$86,759	\$86,760 - & above

Poverty is a concern in the assessment area. Pulaski County had the highest percentage of people living in poverty at 16.8 percent, and the percentage of people living in poverty was the lowest in Saline County at 9.2 percent.³²¹ Pulaski County had the highest percentage of families living in poverty at 12.3 percent, and Saline County had the lowest percentage of families living in poverty at 6.1 percent.³²² In the assessment area, 36.8 percent of families in low-income tracts and 18.0 percent of families in moderate-income tracts lived below the poverty level.³²³

³²³ FRB Atlanta calculations of 2020 FFIEC census data.

Economic Conditions

The assessment area is home to the city of Little Rock, which is the state capital of Arkansas and the state's most populous city. Little Rock is an economic engine and fuels much of the state's economic activity. The area has a diverse economy consisting of various sectors such as advanced manufacturing, aerospace, information technology, medical and healthcare, military, and nonprofit industries.³²⁴ Little Rock has many major employers in the region. The federal, state, and local government are the largest employers in the region with 71,900 employees.³²⁵ Outside the government sector, other major employers include Baptist Health with 7,340 employees, Arkansas Children's Hospital with 4,370 employees, CHI St. Vincent with 3,000 employees, AT&T with 2,615 employees, Arkansas Blue Cross Blue Shield with 2,610 employees, Entergy Arkansas with 2,580 employees, Verizon Wireless with 2,500 employees, and Dillard's, Inc. with 2,000 employees.³²⁶

Small businesses are an integral part of the assessment area's economy. In 2020, there were 33,696 businesses within the Little Rock assessment area, of which 90.7 percent had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses.³²⁷ Additionally, 20.1 percent of small businesses in the assessment area were in moderate-income tracts, while there were far fewer in low-income tracts at 4.5 percent.³²⁸ According to CRA reportable data from all reporters in the assessment area, loan originations made to small businesses posted growth from 2018 to 2019. Specifically, there was a 5.5 percent increase in loan originations to small businesses during that time. On the contrary, there was a decrease in the percentage of loan originations made to small businesses from 2019 to 2020. During that period, there was a 4.6 percent decline in the number of loan originations.

The COVID-19 global pandemic represented a major event impacting the economy in the assessment area and nationwide. Because of the impact, the State of Arkansas established a \$7 million loan program on March 17, 2020, to provide assistance to businesses as well as a Quick Action Loan Program to prioritize loans for small- and medium-sized businesses.³²⁹ Furthermore, to sustain the nation's economy, the United States' Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 25, 2020; this legislation established the Paycheck Protection Program, which was implemented by the Small Business Administration (SBA), to provide loans to small businesses for payroll costs and certain other expenses.³³⁰ These programs allowed businesses in the assessment area to access credit to help sustain operations during the pandemic.

Unemployment rates in the Little Rock MSA have varied during the review period. The chart below shows that there was a slight decrease, 0.1 percent, in unemployment in the assessment area from 2018 to 2019. During this time, Saline had the lowest unemployment rate, which was 3.0 percent in 2018 and 2.8 percent in 2019. Pulaski County had the highest unemployment at 3.4 percent for both 2018 and 2019. From 2018 through 2019, the

assessment area’s unemployment rate was less than the state’s unemployment rate, 0.4 percent less in 2018 and 0.3 percent less in 2019. However, during 2020, the unemployment rates in the assessment area, MSA, and state significantly rose due to the impact that the COVID-19 pandemic had on the global economy.³³¹ At this time, unemployment rose to 6.5 percent in the assessment area. Additionally, during 2020, Pulaski County had the highest unemployment rate at 7.4 percent, and Lonoke and Faulkner counties each had unemployment rates of 5.5 percent. For 2020, the unemployment rate in the assessment was 0.4 percent higher than Arkansas’ unemployment rate at 6.1 percent.

Unemployment Rates - AR Little Rock

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

2020 FFIEC census data indicates there were 310,822 housing units located in the assessment area, of which 56.7 percent were owner-occupied, 31.0 percent were rental units, and 12.3 percent were vacant. Rental and vacant units were more concentrated in low- and moderate-income tracts. The median age of the housing stock across the assessment area was 36 years, though housing was much older in low- and moderate-income census tracts at 49 years and 46 years, respectively.

Furthermore, the 2020 FFIEC census data shows that 20.9 percent of the housing stock in the assessment area is in moderate-income tracts and 5.1 percent is in low-income census tracts. In moderate-income census tracts, 44.6 percent of the housing is owner-occupied while 39.6 percent of housing is rental. In low-income tracts, 27.7 percent of the housing is owner-occupied, and 49.2 percent is rental. These factors suggest that residential lending opportunities, both home purchase and home improvement, exist but to a greater extent in moderate-income geographies than in low-income geographies.

³³¹ *Unemployment Rates During the COVID-19 Pandemic*. Congressional Research Service, updated 20 Aug. 2021, <https://crsreports.congress.gov/product/pdf/R/R46554>. Accessed 22 Feb. 2022.

The Little Rock-North Little Rock-Conway Core-Based Statistical Area (CBSA) has seen an increase in the median listing price for housing during the review period.³³² In January 2018, the median listing price for housing inventory was \$173,250.³³³ By January 2019, the median listing price for housing inventory in the CBSA increased 5.5 percent to \$182,750.³³⁴ From January 2019 to January 2020, the median listing price in 2020 for housing inventory increased further by 9.1 percent to \$199,400.³³⁵

As home prices increase, homeownership for low- and moderate-income families in the assessment area becomes less affordable. Using the assumption that a borrower can obtain a loan for approximately three times the borrower's annual income and using 2020 FFIEC median family income figures for the assessment area, affordable homes would be priced at \$184,260 or below.³³⁶ As mentioned before, the median listing price for housing inventory in the Little Rock-North Little Rock-Conway CBSA was \$199,400.

Demographic Characteristics by Census Tract

The following table presents key demographic and business information used to help develop a performance context for the assessment area. The data reflects the 2020 FFIEC census data and the 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

³³² Core-Based Statical Area (CBSA) is a term that refers to both Metropolitan and Micropolitan Statistical Areas.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the community development and economic landscapes, community development experts were contacted. These individuals discussed the various opportunities and challenges across the region as well as how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

One community contact engaged in small business development was interviewed. This person stated that Grant and Saline counties are significantly economically different compared to the other counties in the Little Rock MSA. Specifically, the contact mentioned that there is industry, retail, and population growth occurring in Saline County; whereas Grant County is not growing, and the population is declining. The contact stated that there have not been any significant events, other than the COVID-19 pandemic, that have impacted the economic conditions in Grant and Saline counties over the past few years. It was indicated that the pandemic put a strain on businesses, which resulted in some temporary and permanent closures. Also, personal care businesses, such as barbershops, nail salons, etcetera, had to close, and restaurants had restrictions on indoor dining, per the contact.

Moreover, the contact described the general banking and credit needs of Saline and Grant counties. It was mentioned that Saline County has a good supply of banks, and there is healthy competition amongst them. However, it was mentioned that Grant County has some banks, but there are banking deserts in that area. The contact said that credit offering gaps exist due to the presence of fewer banks. The individual mentioned there is a demand for personal, small dollar loans for low- to moderate-income individuals as well as for businesses in both counties. The contact explained that low- and moderate-income individuals in the area rely more on alternative financial providers, like check cashers, due to the physical proximity and the need and convenience of services. It was mentioned that banks can improve the access to banking products and services by designing products that meet the needs of the populations they are trying to reach.

Furthermore, this contact described the state of small business activity in Grant and Saline counties. It was mentioned that there are more businesses in Saline County as compared to Grant County due to Grant County's size and rural characteristics. Additionally, Saline County has seen a growing population and an increase in residential, commercial, and retail developments, which makes the area favorable for businesses looking to start, expand, and relocate, per the contact. It was stated that small businesses and start-ups in both counties face issues when applying for credit due to a lack of collateral, personal capital, or poor credit.

The contact mentioned that there are opportunities that financial institutions can get involved in within the community. The contact stated that one opportunity is for banks to design a loan product that is targeted to small businesses or start-ups that have deferred or interest-only payment features or that have fixed-terms with no balloon features. Furthermore, it was mentioned that banks can improve the flow of credit to potential and existing small businesses by taking a wholistic view of each project and evaluating the underwriting guidelines, credit scores, debt service, and collateral requirements. The contact indicated that there are opportunities for banks to provide technical assistance, referrals, and funding to organizations that assist small businesses. Lastly, the contact stated that banks should work with groups that serve Grant and Saline counties to provide community development loans, investments, and services.

Another contact who works in providing affordable housing in Saline County was interviewed. The individual stated that the economy in Saline County has been growing over the past few years, and the county tends to draw and retain higher wealth individuals and families who are looking for better schools and surroundings to raise families. The contact further explained that Saline County is one of the more affluent counties in the MSA, and the affluent individuals live north of the interstate while the majority of low- and moderate-income communities are found in the county's rural areas and near Pulaski County, which is south of the interstate. The contact mentioned that the county's population has been growing, and the general population increase has created a need for more affordable housing.

For housing, the contact mentioned that the needs of low- to moderate-income individuals include purchase money mortgage loans with additional funds for rehabilitation, refinance mortgages, and small dollar (\$10,000 or less) home repair/rehabilitation loans for current homeowners. The contact indicated that most affordable homes in the area are of older construction and usually require repairs. Also, when affordable homes are available on the market, low- to moderate-income individuals face a lot of competition from landlords who want to purchase the properties. These landlords typically win contracts because they offer cash to purchase properties or have access to lending relationships through bankers with whom they have an established history. Overall, the contact stated that the largest barriers facing most low- to moderate-income individuals in obtaining credit is a lack of financial literacy and poor credit histories due to late payments, unpaid debt, and student loans. Also, for the individuals who are not facing those issues, they do not have sufficient funds for down payments or have no access to lending avenues with area bankers with whom they have an established history. The contact stated that homeowner education and down payment assistance programs are limited in Saline County.

Concerning banking needs, the contact explained that there is a lot of competition among banks, and there is good access to bank branches, products, and services. However, there is a large portion of low- to moderate-income individuals who do not utilize banking services due to lack of financial literacy or having previous bad experiences with banks. The contact stated that many low- and moderate-income people use check cashing services as well as buy-here and pay-here financing through local car dealers who charge higher interest rates. The contact reiterated that the lack of financial literacy has left many low- and moderate-income individuals in a cycle of high interest rate debts that they cannot exit.

The contact indicated several opportunities for banks to get involved in with the community. One opportunity is for banks to provide grants to community organizations to fund home repair loan programs. Additionally, there is an opportunity to provide financial literacy to students in the local school system. The contact mentioned that banks can provide donations to organizations like the Central Arkansas Development Corporation; this organization has several funds that help low- to moderate- income individuals pay rent, mortgages, and utilities during the pandemic and has been a resource for down payment assistance in the past.

Moreover, another contact working in housing and economic development in Little Rock was interviewed. This person mentioned that start-up businesses and minority businesses are experiencing issues due to a lack of capital to grow and sustain their businesses. Also, the contact stated that there are several small minority-owned businesses that do not have relationships with banks; these businesses struggle to have the capacity banks are

looking for to lend to them. The contact mentioned that there does not appear to be a good connection with the Small Business Administration in the community.

For housing, the contact indicated that the real estate industry in the area is growing, and the cost of housing has increased. It was mentioned that there is a small supply of affordable housing, and there are community-based organizations that are pushing for more affordable housing; however, some community-based organizations engaged in affordable housing have closed due to a lack of funding. The contact explained that down payment assistance and homebuyer counseling is needed for first time homebuyers. Additionally, the contact stated that affordable housing is the highest need in the area, followed by a need for decent paying jobs and better access to grocery stores.

The contact stated that there are opportunities for banks to be more responsive to the needs of the community. It was mentioned that banks need to establish relationships with community organizations that serve the community to build trust between the banks and community development organizations and find ways to collaborate and to support these community-based entities.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE LITTLE ROCK, ARKANSAS ASSESSMENT AREA

LENDING TEST

Regions Bank's lending performance in the Little Rock assessment area is good. The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans reflects excellent penetration among borrowers of different income levels and businesses of different revenue sizes. However, the bank makes a low level of community development loans in the Little Rock assessment area.

The analysis included 2,610 HMDA-reportable loans and 1,239 CRA small business loans reported by the bank in the Little Rock assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home purchase loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Little Rock assessment area accounted for 51.0 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Arkansas and 54.0 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 48.4 percent of Regions Bank's Arkansas deposits are in the Little Rock assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Home Purchase Loans

Of the 2,610 HMDA-reportable loans analyzed, 1,444 loans (55.3 percent) were home purchase loans. Of the total home purchase loans made, 34 loans (2.4 percent) were located in low-income tracts, and 183 loans (12.7 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is excellent. From 2018 through 2020, Regions Bank's home purchase lending in low-income tracts (2.4 percent) was similar to the percentage of owner-occupied units (2.5 percent) in these tracts. In 2018, the bank's home purchase lending in low-income tracts (1.6 percent) was above the aggregate lending performance (1.2 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (2.5 percent) was significantly above the aggregate lending performance (1.3 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (2.8 percent) was significantly above the aggregate lending performance (1.1 percent) in these tracts.

Home purchase lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (12.7 percent) was similar to the percentage of owner-occupied units (16.4 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (13.2 percent) was above the aggregate lending performance (10.4 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (13.2 percent) was above the aggregate lending performance (10.5 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (11.8 percent) was slightly above the aggregate lending performance (10.7 percent) in these tracts.

Home Refinance Loans

Regions Bank made 756 home refinance loans from 2018 through 2020, which represents 29.0 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, 11 loans (1.5 percent) were located in low-income tracts, and 83 loans (11.0 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is good. From 2018 through 2020, Regions Bank's home refinance lending in low-income tracts (1.5 percent) was below the percentage of owner-occupied units (2.5 percent) in these tracts. In 2018, the bank's home refinance lending in low-income tracts (0.7 percent) was significantly below the aggregate lending performance (1.5 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (1.3 percent) was significantly above the aggregate lending performance (0.8 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (1.7 percent) was significantly above the aggregate lending performance (0.6 percent) in these tracts.

Home refinance lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (11.0 percent) was below the percentage of owner-occupied units (16.4 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (17.0 percent) was above the aggregate lending performance (12.4 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (13.2 percent) was above the aggregate lending performance (9.4 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (8.4 percent) was above the aggregate lending performance (6.7 percent) in these tracts.

Home Improvement Loans

Regions Bank made 410 home improvement loans from 2018 through 2020, which represents 15.7 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, four loans (1.0 percent) were located in low-income tracts, and 52 loans (12.7 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home improvement lending in low-income tracts (1.0 percent) was below to the percentage of owner-occupied units (2.5 percent) in these tracts. In 2018, the bank's home improvement lending in low-income tracts (0.7 percent) was significantly below the aggregate lending performance (2.6 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (2.1 percent) was similar to the aggregate lending performance (2.1 percent) in these tracts. In 2020, the bank made no home improvement loans in low-income tracts (0.0 percent) and was significantly below the aggregate lending performance (1.3 percent) in these tracts.

Home improvement lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (12.7 percent) was similar to the percentage of owner-occupied units (16.4 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income tracts (13.1 percent) was similar to the aggregate lending performance (13.5 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (14.7 percent) was slightly above the aggregate lending performance (12.9 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (9.8 percent) was slightly below the aggregate lending performance (11.1 percent) in these tracts.

Small Business Loans

Regions Bank made 1,239 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 81 loans (6.5 percent) were located in low-income tracts, and 278 loans (22.4 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is excellent. From 2018 through 2020, Regions Bank's small business lending in low-income tracts (6.5 percent) was above the percentage of businesses (4.8 percent) in these tracts. In 2018, the bank's small business lending in low-income tracts (6.1 percent) was above the aggregate lending performance (4.7 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (9.2 percent) was significantly above the aggregate lending performance (5.0 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (5.5 percent) was slightly above the aggregate lending performance (4.8 percent) in these tracts.

Small business lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (22.4 percent) was above the percentage of businesses (20.5 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (26.2 percent) was above the aggregate lending performance (18.3 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (23.3 percent) was above the aggregate lending performance (17.9 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (19.9 percent) was similar to the aggregate lending performance (18.4 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is excellent. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is good. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (8.9 percent) was below the percentage of low-income families (21.3 percent). However, the bank's lending performance improved over the review period and was above aggregate lending performance for two of the three years in the review period. In 2018, the bank's home purchase lending to low-income borrowers (5.2 percent) was similar to the aggregate lending performance (5.4 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (8.8 percent) was above the aggregate lending performance (6.6 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (12.1 percent) was above the aggregate lending performance (8.3 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is excellent. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (28.8 percent) was above the percentage of moderate-income families (17.5 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (28.2 percent) was above the aggregate lending performance (19.1 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (29.4 percent) was above the aggregate lending performance (20.5 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (28.8 percent) was above the aggregate lending performance (21.1 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (5.8 percent) was below the percentage of low-income families (21.3 percent). In 2018, the bank's home refinance lending to low-income borrowers (9.9 percent) was above the aggregate lending performance (7.3 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (8.6 percent) was significantly above the aggregate lending performance (5.5 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (3.7 percent) was slightly above the aggregate lending performance (3.0 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (15.2 percent) was similar to the percentage of moderate-income families (17.5 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (15.6 percent) was similar to the aggregate lending performance (14.3 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (20.5 percent) was significantly above the aggregate lending performance (11.5 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (13.4 percent) was above the aggregate lending performance (9.9 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is excellent. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (10.0 percent) was below the percentage of low-income families (21.3 percent). However, in 2018, the bank's home improvement lending to low-income borrowers (6.2 percent) was similar to the aggregate lending performance (6.7 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (14.0 percent) was significantly above the aggregate lending performance (7.6 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (9.8 percent) was significantly above the aggregate lending performance (6.1 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is excellent. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (24.6 percent) was above the percentage of moderate-income families (17.5 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (22.8 percent) was significantly above the aggregate lending performance (13.8 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (20.3 percent) was above the aggregate lending performance (15.9 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (32.0 percent) was significantly above the aggregate lending performance (13.7 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is excellent. From 2018 through 2020, 61.3 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 90.7 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (69.7 percent) was significantly above the aggregate lending performance (43.4 percent) to these businesses. In 2019, the bank's small business lending to small businesses (68.6 percent) was significantly above the aggregate lending performance (41.8 percent) to these businesses. In 2020, the bank's small business lending to small businesses (53.3 percent) was significantly above the aggregate lending performance (33.4 percent) to these businesses. Lastly, 86.4 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes a low level of community development loans in the Little Rock assessment area. During the review period, the bank originated or renewed 5 community development loans totaling \$4.4 million and 51 community development PPP loans totaling \$13.6 million. Specifically, the bank originated or renewed \$9.7 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; \$3.9 million to support economic development; \$3.8 million in affordable housing initiatives; and \$643,000 towards community services benefiting LMI individuals and families.

The most impactful loan in this area was a bridge loan to fund a newly formed LIHTC in North Little Rock. The LIHTC development created 104 new apartment units of affordable housing for LMI individuals and/or families. While the LIHTC loan is impactful, the remaining loans demonstrate limited responsiveness to the area, and the bank's current lending by number of loans and dollar volume is below performance of peers in this area.

INVESTMENT TEST

Regions Bank's investment performance in the Little Rock assessment area is adequate. The bank made an adequate level of investments and grants that demonstrated adequate responsiveness to credit and community development needs. Combined investment and contribution activity inside the assessment area totaled \$13.4 million. The bank's investments (excluding contributions) totaled \$13.1 million, of which \$10.8 million (82.3 percent) were new investments acquired during the review period. During the review period, the bank invested \$6.8 million in a LIHTC project that provided 104 units of housing affordable to families earning less than 60 percent of the area median income. The bank's remaining investments during the review period also provided financing for affordable housing through purchases of mortgage-backed securities secured by loans to low- and moderate-income individuals. The bank also held investments from prior review periods that financed affordable housing, including mortgage-backed securities and several LIHTC investments. The bank also made several investments in regional CDFIs that serve multiple states, including Arkansas, and benefited the Little Rock assessment area.

Regions Bank made contributions totaling \$373,000 in the Little Rock assessment area. Specifically, the bank provided \$180,400 to organizations that provide community services targeted to low- and moderate-income individuals, \$155,000 to support economic development, and \$37,500 for affordable housing. Overall, approximately \$169,000 in donations were responsive to the COVID-19 pandemic, providing support for organizations providing emergency and recovery assistance to LMI individuals, small businesses, and nonprofits. The bank provided support for several local CDFIs, including \$100,000 to a CDFI to provide financing for women- and minority-owned small businesses impacted by COVID-19 and \$25,000 to a second CDFI to provide COVID relief. Other notable contributions include a grant for \$45,000 to an area chamber of commerce to support a workforce development program targeting LMI high school students and \$25,000 to a local Habitat affiliate to support the construction of four new affordable homes.

The bank also made \$109,000 in donations that benefited all assessment areas in Arkansas, which positively impacted the bank's performance in Little Rock.

SERVICE TEST

Regions Bank’s service test performance in the Little Rock full-scope assessment area is adequate.

Retail Services

Retail banking services are adequate in the Little Rock full-scope assessment area.

The distribution of 24 branch offices and 30 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank had two branches in low-income tracts and exceeded the percentage of households and businesses in the same geography: 4.5 percent of households and 4.8 percent of businesses were located in low-income census tracts compared to 8.3 percent of the bank’s branches. The proportion of the bank’s branches in moderate-income tracts, however, was less than the percentage of households and businesses in the same geography: 12.5 percent of total branches were in moderate-income tracts compared to 20.1 percent of households and 20.5 percent of businesses. Overall, the bank’s retail delivery systems are reasonably accessible to the bank’s geographies and individuals of different income levels in the Little Rock assessment area.

During the review period, Regions Bank did not open or close any branch offices or full-service ATMs in low- or moderate-income tracts. However, the bank closed five branches in middle-income tracts and one branch in an upper-income tract. Additionally, the bank opened two full-service ATMs in middle-income tracts and two in upper-income tracts while they closed three full-service ATMs in middle-income tracts and one in an upper-income tract. Overall, the bank’s record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

Community Development Services

Regions Bank provides an adequate level of community development services in the Little Rock assessment area. During the review period, employees engaged in 72 qualified service activities totaling 943 hours that positively impacted the assessment area. The bank's service activities benefited organizations that provide affordable housing, community service, economic development, and revitalization and stabilization activities for low- and moderate-income individuals, geographies, and small businesses in the Little Rock assessment area. Of the bank's total service hours, 324 hours were committed to adult and youth financial and homebuyer education in partnership with schools, community organizations and local businesses. Bank employees served almost 60 percent of their total hours on boards and committees for various qualified organizations, demonstrating good community leadership and engagement. Overall, the bank's activities exhibited adequate responsiveness to community development needs in the Little Rock assessment area.

Highlighted below are examples of community development services performed during the review period:

- A Regions associate served as the treasurer of the board of directors for a coalition that focuses on the need for affordable and sustainable housing solutions in the City of Little Rock.
- Regions associates logged over 148 hours with an organization that focuses on providing life skills for LMI youth. Associates sat on the board, conducted financial education classes, and served as mentors.
- A Regions associate served as the chairman of the board of directors for a nonprofit organization that is focused on economic development and the revitalization of the South Main Street area. The organization pushes capacity building and historic preservation for small businesses in the area.

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE ARKANSAS METROPOLITAN ASSESSMENT AREAS

- *Fayetteville Assessment Area (Benton and Washington counties)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 6.6 percent of its branches in Arkansas.
 - As of June 30, 2020, the bank had \$300.1 million in deposits in this assessment area, representing a market share of 2.3 percent and 7.6 percent of Regions Bank’s total deposits in Arkansas.
- *Ft. Smith Assessment Area (Sebastian County)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 6.6 percent of its branches in Arkansas.
 - As of June 30, 2020, the bank had \$207.5 million in deposits in this assessment area, representing a market share of 6.0 percent and 5.2 percent of Regions Bank’s total deposits in Arkansas.
- *Hot Springs Assessment Area (Garland County)*
 - As of December 31, 2020, Regions Bank operated five branches in the assessment area, representing 8.2 percent of its branches in Arkansas.
 - As of June 30, 2020, the bank had \$461.2 million in deposits in this assessment area, representing a market share of 20.2 percent and 11.7 percent of Regions Bank’s total deposits in Arkansas.
- *Jonesboro Assessment Area (Craighead County)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 3.3 percent of its branches in Arkansas.
 - As of June 30, 2020, the bank had \$221.4 million in deposits in this assessment area, representing a market share of 6.4 percent and 5.6 percent of Regions Bank’s total deposits in Arkansas.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Fayetteville	Consistent	Not Consistent (Above)	Not Consistent (Below)
Ft. Smith	Consistent	Not Consistent (Below)	Not Consistent (Above)
Hot Springs	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Above)
Jonesboro	Not Consistent (Below)	Not Consistent (Above)	Consistent

For the lending test, Regions Bank received a rating of high satisfactory for the State of Arkansas. Performance in two of the four metropolitan limited-scope assessment areas was consistent with the statewide lending test performance, while performance in the Hot Springs and Jonesboro assessment areas was below the statewide performance. For the geographic distribution of loans, the lending level was good in Ft. Smith, while adequate in the remaining three metropolitan limited-scope assessment areas. Performance was good for the borrower distribution of loans in three assessment areas and adequate in Fayetteville. Community development lending performance in limited scope metropolitan assessment areas was as follows: the bank was a leader in Fayetteville (\$21.6 million); made an adequate level in Fort Smith (\$1.3 million); made a low level in Hot Springs (\$2.3 million); and made few, if any, in Jonesboro (\$801,444). It is worth noting that performance in Fort Smith was enhanced by four community development loans totaling \$10.1 million with a P/M/F of serving the broader regional area of Western Arkansas. Because these loans impact a broader regional area that includes two of the bank's assessment areas, their volume was included within totals for the state of Arkansas.

For the investment test, Regions Bank received a rating of low satisfactory for the State of Arkansas. Performance in the Fayetteville and Jonesboro metropolitan limited-scope assessment areas was stronger than the bank's statewide investment test performance. Additionally, performance in the Ft. Smith and Hot Springs metropolitan limited-scope assessment areas was weaker than the statewide investment test performance. The bank had an excellent level of investments in Fayetteville; a significant level of investments in Jonesboro; and a poor level of investments in Ft. Smith and Hot Springs.

For the service test, Regions Bank received a rating of low satisfactory for the State of Arkansas. Ft. Smith and Hot Springs metropolitan assessment areas exceeded the bank's state performance primarily due to excellent community development performance. The Jonesboro assessment area was consistent with the bank's state performance even though it had limited retail delivery services. However, the Fayetteville assessment area was weaker than the bank's state performance due to limited retail delivery services and weak community development performance.

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ARKANSAS NON-METROPOLITAN ASSESSMENT AREAS

- *Northeast Arkansas Assessment Area (Clay (REMOVED IN 2019), Cross, Greene, Jackson, Lawrence, St. Francis, White, and Mississippi counties)*
 - As of December 31, 2020, Regions Bank operated 11 branches in the assessment area, representing 18.0 percent of its branches in Arkansas.
 - As of June 30, 2020, the bank had \$353.4 million in deposits in this assessment area, representing a market share of 7.0 percent and 8.9 percent of Regions Bank's total deposits in Arkansas.
- *Northwest Arkansas Assessment Area (Boone, Conway, Johnson, Logan, Pope, and Van Buren counties)*
 - As of December 31, 2020, Regions Bank operated 8 branches in the assessment area, representing 13.1 percent of its branches in Arkansas.
 - As of June 30, 2020, the bank had \$365.8 million in deposits in this assessment area, representing a market share of 10.7 percent and 9.2 percent of Regions Bank's total deposits in Arkansas.

- *Southern Arkansas Assessment Area (Clark, Dallas (REMOVED IN 2019), and Howard counties)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 3.3 percent of its branches in Arkansas.
 - As of June 30, 2020, the bank had \$80.1 million in deposits in this assessment area, representing a market share of 8.6 percent and 2.0 percent of Regions Bank’s total deposits in Arkansas.
- *Union Assessment Area (Union County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 1.6 percent of its branches in Arkansas.
 - As of June 30, 2020, the bank had \$51.9 million in deposits in this assessment area, representing a market share of 4.0 percent and 1.3 percent of Regions Bank’s total deposits in Arkansas.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Northeast Arkansas	Consistent	Not Consistent (Above)	Not Consistent (Below)
Northwest Arkansas	Consistent	Not Consistent (Below)	Not Consistent (Below)
Southern Arkansas	Not Consistent (Below)	Not Consistent (Above)	Not Consistent (Below)
Union	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Above)

For the lending test, Regions Bank received a rating of high satisfactory for the State of Arkansas. While performance in Northeast Arkansas and Northwest Arkansas was consistent with the statewide lending test performance, the performance in Southern Arkansas and Union was below the statewide performance. For the geographic distribution of loans, lending levels were good in Northeast Arkansas and Northwest Arkansas, while poor in Union. The geographic distribution of loans in Southern Arkansas was not rated because this nonmetropolitan limited-scope assessment area did not have any low- or moderate-income tracts. Performance was good for the borrower distribution of loans in Northeast Arkansas and Northwest Arkansas, while adequate in Southern Arkansas and Union. Community development lending performance in limited-scope nonmetropolitan assessment areas was as follows: the bank made an adequate level in Northwest Arkansas (\$1.9 million); made a low level in Northeast Arkansas (\$718,000); and made no community development loans in

Southern Arkansas or in Union. It is worth noting that performance in Northwest Arkansas was enhanced by four community development loans totaling \$10.1 million with a P/M/F of serving the broader regional area of Western Arkansas. Because these loans impact a broader regional area that includes two of the bank's assessment areas, their volume was included within totals for the state of Arkansas.

For the investment test, Regions Bank received a rating of low satisfactory for the State of Arkansas. The bank's investment performance was stronger than the statewide investment test performance in the Northeast Arkansas and Southern Arkansas nonmetropolitan limited-scope assessment areas, while performance was weaker in the Northwest Arkansas and Union nonmetropolitan limited-scope assessment areas. The bank had an excellent level of investments in Northeast Arkansas and Southern Arkansas, while there was a poor level of investments in Northwest Arkansas. Lastly, the bank made few, if any, investments in Union.

For the service test, Regions Bank received a rating of low satisfactory for the State of Arkansas. The performance in the Union assessment area exceeded the state's performance due to excellent community development performance. The service test performance in the Northeast Arkansas, Northwest Arkansas and Southern Arkansas nonmetropolitan assessment areas was weaker than the bank's state performance. Both the Northeast and Northwest Arkansas assessment areas had limited retail delivery services. However, the Northwest Arkansas assessment area also had poor community development performance. Additionally, weak community development performance was observed in the Southern Arkansas assessment area.

Florida

CRA RATING FOR FLORIDA: SATISFACTORY

The Lending Test is rated: High Satisfactory

The Investment Test is rated: High Satisfactory

The Service Test is rated: Low Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a relatively high level of community development loans in its Florida assessment areas.
- The bank provides a significant level of qualified community development investments and grants that are responsive to community development needs of the Florida assessment areas.
- Retail banking services are adequate in the bank's Florida assessment areas.
- The bank provides an adequate level of community development services that benefit residents and small businesses in the Florida assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment areas in Florida:

- Orlando
- Tampa

Limited-scope reviews were conducted for the remaining 21 assessment areas:

- Daytona
- Ft. Lauderdale
- Ft. Myers
- Ft. Walton
- Gainesville
- Homosassa Springs
- Jacksonville
- Lakeland
- Miami
- Naples
- Northern Florida
- Ocala
- Okeechobee
- Palm Bay
- Panama City
- Pensacola
- Punta Gorda
- Sarasota
- Tallahassee
- The Villages
- West Palm Beach

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN FLORIDA

As of June 30, 2020, Regions Bank had \$23.1 billion in deposits in Florida accounting for 19.1 percent of the bank's total deposits. Regions Bank operated 289 branch offices in Florida as of December 31, 2020, representing 21.1 percent of the bank’s total branches. HMDA-reportable lending in Florida accounted for 22.2 percent of total institutional HMDA-reportable lending by number of loans and 26.8 percent by dollar volume. CRA small business lending in Florida accounted for 40.2 percent of the bank’s total CRA small business lending by number of loans and 35.2 percent by dollar volume. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was greater than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Statewide Summary of Lending Activity
Assessment Areas Located in
Florida

Loan Type	#	%	\$ (000s)	%
HMDA Home Purchase	10,832	16.5%	\$3,585,007	37.5%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN FLORIDA

Lending Test

The lending test rating in the state of Florida is high satisfactory. Overall, performance in Florida with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, Regions makes a relatively high level of community development loans in Florida.

During the review period, Regions Bank reported 30,010 HMDA-reportable loans and 35,434 small business loans in Florida. The rating for Florida is based on performance in the Orlando and Tampa full-scope assessment areas. Approximately 32.8 percent of the bank's HMDA-reportable and small business lending by number of loans in Florida occurred within these assessment areas.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of Florida is derived from the Orlando and Tampa full-scope assessment areas. A detailed discussion of the borrower and geographic distribution of lending for these assessment areas is included in the next sections of this report.

Community Development Lending

Regions Bank makes a relatively high level of community development loans in the state of Florida. During the review period, the bank originated or renewed 948 qualifying community development loans totaling \$606.2 million within the Florida assessment areas, including 379 loans totaling \$173.0 million directly benefiting the full-scope assessment areas of Tampa and Orlando. Performance in Tampa was adequate, and performance in Orlando was at a relatively high level.

The bank's presence and impact, with branches spanning across 23 different assessment areas throughout the state of Florida, are significant. Furthermore, a number of assessment areas analyzed under limited-scope examination procedures have similar levels of market share and/or number of branches as full-scope assessment areas, including Jacksonville, Miami, Panama City, and Northern Florida – all of which were rated as leaders. As such, stronger performance in limited-scope areas was considered in the assessment of the bank's overall community development lending performance for the state of Florida.

The total community development lending includes five loans totaling \$5.8 million serving a broader statewide or regional area that includes more than one of the bank's assessment areas in the state. Each of these loans was impactful and include:

- \$3.7 million toward essential improvements to nursing facilities in Jacksonville, Ocala, and Orlando. The loan allowed flexibility for the borrower to fund projects across the facilities as needed, with no prescribed amount reserved to individual facilities.
- A \$1 million loan to a CDFI for the creation of a statewide loan fund designed to provide flexible financing to families in low-income communities.
- A loan and a renewing line of credit totaling \$1.1 million to a statewide nonprofit focused on empowering low-income and minority communities by attracting investments for health, education, home ownership, employment, and minority entrepreneurship.

The bank was considered responsive to the credit and community development needs within the state of Florida. As a result, and in addition to the total community development lending previously noted, the bank received positive consideration for seven community development loans totaling \$2.0 million that were outside any of the bank's assessment areas in the state. More information on community development loans can be found in the full-scope assessment area sections of this report.

Investment Test

The investment test rating for Florida is high satisfactory.

Regions Bank made a significant level of qualified investments and contributions totaling \$556.4 million in Florida. The bank had qualified investments of \$553.9 million in the Florida assessment areas, with approximately 65.3 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$2.6 million. Further, the bank made \$1.0 million in investments and \$53,000 in contributions that benefit a broader statewide area that includes the Florida assessment areas, including a \$13,000 donation to a CDFI that serves the state of Florida. Additional statewide contributions supported statewide organizations or initiatives focused on small business technical assistance, workforce development, financial stability, and other community services targeting LMI individuals.

Orlando and Tampa were the two assessment areas in the state reviewed using full-scope procedures. Approximately 43.1 percent of combined investment and contribution activity was in these assessment areas, compared to 37.3 percent of deposits in these markets as of June 30, 2021. Performance in both assessment areas was considered good. The bank was considered responsive to community credit needs in the state. Therefore, positive consideration was given for a \$2.6 million investment in a LIHTC project and \$26,000 in donations that benefit a broader statewide area, without a purpose, mandate, or function of serving the Florida assessment areas.

Additional details regarding investments and contributions can be found in the full-scope assessment area sections.

Service Test

The service test rating for Florida is low satisfactory.

Retail Services

Overall, the bank's retail service performance is considered adequate in Florida. This evaluation was driven primarily by performance in the two full-scope assessment areas, Orlando and Tampa. Regions Bank's retail banking service performance is adequate in both full-scope assessment areas. Delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas. Overall, banking services and hours of operations do not vary in a way that inconveniences the bank's assessment areas, including low- and moderate-income geographies or low- and moderate-income individuals. The record of opening and closing of branch offices has generally not adversely affected the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period the bank opened four branch offices in Florida: two in middle-income tracts and two in upper-income tracts. The bank closed 31 branch offices throughout the state; of those closed, one was in a low-income tract, six were in moderate-income tracts, 13 in middle-income tracts, and 11 in upper-income tracts. Overall, the bank's retail service performance is considered adequate in Florida.

Community Development Services

Regions Bank provides an adequate level of community development services that benefit residents and small businesses in Florida. The bank provided a total of 876 qualified service activities for a total of 6,573 qualified service hours during the examination period. These hours include 545 hours in the Orlando full-scope assessment area and 2,270 hours in the Tampa full-scope assessment area. Performance in Tampa, the larger of the two full-scope assessment areas, was adequate. Performance in Orlando was also adequate. Employees engaged in 3,758 service hours in limited-scope assessment areas. Finally, bank employees engaged in 121 service hours in statewide organizations that benefited a broader statewide or regional area, including the bank's assessment areas.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area sections of this report.

**METROPOLITAN AREA
FULL-SCOPE REVIEW**

**DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ORLANDO, FLORIDA ASSESSMENT
AREA**

Overview

The Orlando assessment area consists of Lake County, Orange County, Osceola County, and Seminole County, which are the four counties that comprise the Orlando-Kissimmee-Sanford, FL MSA. As of December 31, 2020, Regions Bank operated 32 branches in the assessment area, representing 11.1 percent of the institution's branches statewide and 11.2 percent of the institution's deposits statewide. The assessment area accounts for 11.2 percent of the bank's combined HMDA and small business loan originations (by dollar) in Florida.

Regions operates in a highly competitive environment in the Orlando assessment area. According to the June 30, 2020 FDIC Summary of Deposits Report, there were 42 financial institutions operating 517 branch locations in the assessment area.³³⁷ Truist Bank was the leader in the Orlando assessment area with 24.2 percent of total deposits, while Bank of America ranked 2nd with 18.2 percent. Regions Bank ranked 5th in the market with a deposit market share of 4.2 percent.³³⁸

Regions Bank's loan production accounted for 2.2 percent of total CRA-reportable activity and 0.8 percent of total HMDA-reportable lending activity in the assessment area from 2018 through 2020. The bank's market share of CRA-reportable activity was 2.1 percent in 2018, 1.5 percent in 2019, and 3.0 percent in 2020. The bank's market share of HMDA-reportable activity was 1.0 percent in 2018, 0.8 percent in 2019, and 0.8 percent in 2020. The leading CRA lenders in the assessment area included American Express, Bank of America, and JP Morgan Chase, while the leading HMDA lenders included Quicken Loans, Wells Fargo Bank, and Freedom Mortgage Corporation.

Population and Income Characteristics

The Orlando assessment area has grown rapidly in the past decade. Population in the assessment area was approximately 2.7 million as of the 2020 Census, representing an increase of 25.3 percent since 2010, which was significantly above the state (14.6 percent) and national (7.4 percent) growth levels in the same timeframe.³³⁹ Osceola County was the fastest growing county in the assessment area with 44.7 percent growth from 2010 through 2020, while Seminole County was the slowest growing county with 11.4 percent growth from 2010 through 2020.³⁴⁰ Orange County is the most populous county in the assessment area, with a population of more than 1.4 million as of the 2020 Census.³⁴¹

³³⁷ "Offices and Deposits of All FDIC-Insured Institutions Deposit Market Share Report." *Federal Deposit Insurance Corporation*, 30 June 2020, <https://www7.fdic.gov/sod/sodMarketRpt.asp?barItem=2>. Accessed 7 April 2022.

³³⁸ *Ibid.*

³³⁹ "QuickFacts: Florida; Seminole County, Florida; Osceola County, Florida; Orange County, Florida; Lake County, Florida; United States." *United States Census Bureau*, <https://www.census.gov/quickfacts/fact/table/FL,seminolecountyflorida,osceolacountyflorida,orangecountyflorida,lakecountyflorida,US/PST045221>. Accessed 7 April 2022.

³⁴⁰ *Ibid.*

³⁴¹ *Ibid.*

According to 2020 FFIEC Census data, the assessment area contains 390 total census tracts: 14 (3.6 percent) low-income tracts, 116 (29.7 percent) moderate-income tracts, 140 (35.9 percent) middle-income tracts, 118 (30.3 percent) upper-income tracts, and 2 (0.5 percent) unknown-income tracts.³⁴² For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Orlando-Kissimmee-Sanford, FL MSA. The table below provides a detailed breakdown of the estimated median family income for each income category (low, moderate, middle, and upper) in the MSA. Between 2018 and 2020, the estimated median family income in the assessment area increased from \$62,900 to \$68,100.³⁴³

Borrower Income Levels
Orlando-Kissimmee-Sanford, FL MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2018	\$62,900	0 - \$31,449	\$31,450 - \$50,319	\$50,320 - \$75,479	\$75,480 - & above
2019	\$65,100	0 - \$32,549	\$32,550 - \$52,079	\$52,080 - \$78,119	\$78,120 - & above
2020	\$68,100	0 - \$34,049	\$34,050 - \$54,479	\$54,480 - \$81,719	\$81,720 - & above

Within the assessment area, 39.6 percent of families are considered low- or moderate-income (LMI).³⁴⁴ Furthermore, 38.6 percent of families living in low-income tracts and 20.6 percent of families in moderate-income tracts have incomes below the poverty level, which may limit lending opportunities in these areas.³⁴⁵

Economic Conditions

The Orlando assessment area has a diverse economy with a large presence in several sectors, including tourism, technology, aerospace/defense, and healthcare.³⁴⁶ Leading employers in the metro area include Walt Disney World, AdventHealth, Universal Orlando, Orlando Health, Orlando International Airport, Publix Supermarkets, University of Central Florida, and Lockheed Martin.³⁴⁷ Between January 2018 and December 2020, total nonfarm payrolls in the Orlando MSA declined 2.6 percent, from 1.268 million to 1.235 million.³⁴⁸ In the same timeframe, total nonfarm payrolls in the United States declined 3.5 percent, from 147.662 million to 142.497 million.³⁴⁹ Within the assessment area, industries experiencing the highest-percentage employment growth from January 2018 to December 2020 included manufacturing (+7.3 percent), construction (+5.1 percent), and financial activities (+5.0 percent).³⁵⁰ Meanwhile, the industries that experienced the highest-percentage employment decline during this period included leisure and hospitality (-19.1 percent), other services (-8.9 percent), and

information (-5.6 percent).³⁵¹ The leisure and hospitality industry's decline was caused by a rapid decrease of visitors to Disney World, Universal Studios, and Sea World in 2020 due to the COVID-19 pandemic.³⁵² This reduction in theme park visitors also led to decreased employment in the hotels and resorts that house these visitors during their stays.

Small businesses play an important role in the Orlando metro economy. According to 2020 Dun & Bradstreet data, there were 181,937 businesses in the Orlando assessment area. Of these businesses, 94.5 percent had revenues less than or equal to \$1 million and thus were considered small businesses. 26 percent of the small businesses were in moderate-income census tracts, while only 1.6 percent were in low-income census tracts. As a result, opportunities for lending to small businesses in moderate-income census tracts exist, but opportunities are likely scarce in low-income census tracts.

Total lending to small businesses in the assessment area posted strong growth over the past several years. According to an analysis of CRA loan data, the total number of small business loans (loans less than \$1 million in principal) originated in the assessment area increased by 22.3 percent between 2018 and 2020, with 78,460 loans made in 2020. 43.5 percent of these loans in 2020 were made to small businesses (less than \$1 million in annual revenue), which represented a 5.9 percent decrease from 49.4 percent of such loans in 2018. Despite a reduction in the share of total small loans, small loans to small businesses (less than \$1 million in annual revenue) still increased 7.6 percent between 2018 and 2020, from 31,692 loans to 34,111 loans.

The early stages of the COVID-19 pandemic had a harmful effect on the economy in the Orlando assessment area. On March 9, 2020, Florida Governor Ron DeSantis declared a state of emergency in response to the COVID-19 outbreak.³⁵³ On March 17, 2020, Governor DeSantis issued an additional executive order closing bars and limiting restaurants to half capacity.³⁵⁴ On March 24, 2020, Orange County (the most populous county in the assessment area) issued a stay-at-home order.³⁵⁵ Governor DeSantis followed by issuing a statewide "safer at home" order limiting citizens to only leaving their home for essential activities on April 1, 2020.³⁵⁶ The state gradually began reopening in early June 2020.³⁵⁷ However, the COVID-19 pandemic and the associated restrictions resulted in a significant decline in economic activity and a spike in unemployment across the country, including in the assessment area. In an effort to counteract these effects across the nation, the United States Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 25, 2020. This legislation established the Paycheck Protection Program (PPP), which provided fully forgivable loans to small

businesses to cover payroll costs.³⁵⁸ In the assessment area, 123,842 total PPP loans were approved for a sum of nearly \$6.1 billion.³⁵⁹ Although there were still significant job losses in the assessment area, this allowed many small businesses to keep their doors open and their workers on the payroll until economic activity accelerated again.

As shown in the following chart, the unemployment rate in the Orlando assessment area improved from 2018 to 2019 but spiked in 2020 due to the economic ramifications of the COVID-19 pandemic. From 2018 to 2019, the unemployment rate for the assessment area decreased from 3.4 percent to 3.2 percent before spiking to 10.2 percent in 2020. The unemployment rate in the assessment area was slightly lower than overall state unemployment rate for 2018 and 2019 but was 2.5 percent higher than the state level in 2020. Additionally, the unemployment rates of the counties in the assessment area diverged widely in 2020; Osceola County (13.5 percent) and Orange County (10.6 percent) had double digit unemployment rates while Lake County (8.9 percent) and Seminole County (7.2 percent) had unemployment rates more in line with the state average. Osceola County and Orange County are home to the Disney World and Universal Studios theme parks, both of which experienced rapidly declining foot-traffic and massive layoffs in response to the COVID-19 pandemic.³⁶⁰ The decrease in tourists visiting these parks also adversely affected the various businesses that serve these tourists during their stays, including restaurants and hotels, resulting in further layoffs in these businesses. Ultimately, this led to a weak labor market in the assessment area in 2020, particularly in the tourism-centric Orange County and Osceola County.

According to 2020 FFIEC census data, there were 964,253 housing units in the assessment area, 50.5 percent of which were owner-occupied, 32.3 percent of which were rental units, and 17.2 percent of which were vacant. Rental units represented a disproportionate share of housing in LMI tracts. In low-income census tracts, 62.4 percent of housing units were rentals, 18.6 percent were owner-occupied, and 19 percent were vacant. In moderate-income census tracts, 43.7 percent of housing units were rentals, 38 percent were owner-occupied, and 18.3 percent were vacant. This could indicate limited mortgage lending opportunities in these areas, particularly low-income tracts.

The area's population growth, limited new home construction, and record-low interest rates have contributed to a tight housing market.³⁶¹ As of December 2020, housing inventory available for sale in the assessment area stood at 6,800, which was a 23.0 percent decrease from 8,833 available in January 2018.³⁶² During the same time period, the median days on the market for a house available for sale in the assessment area decreased from 75 to 65.³⁶³ Meanwhile, the housing price index in the assessment area increased 18.6 percent from Q1 2018 to Q4 2020.³⁶⁴

First-time homebuyers and LMI families may find it challenging to purchase homes at current prices. Under the assumption that a borrower can obtain a loan for approximately three times their annual income, affordable homes would be priced at \$163,437 or less for the moderate-income households and \$102,147 or less for lower-income households in 2020 (see table above for 2020 FFIEC Estimated Median Family Income). The median sales price in the assessment area was far above that level in December 2020, at \$287,180.³⁶⁵ These high housing prices may present a barrier to homeownership in the assessment area, especially for LMI individuals and households.

The rental market in the assessment area has also experienced rising prices. Median monthly gross residential rent in the assessment area stood at \$1,303 in 2019, which represented a 5.2 percent increase from 2018.³⁶⁶ Rental prices vary by neighborhood, with the most expensive areas, including College Park, Lake Shore Village, and Palomar seeing average rents well over \$2,000 per month.³⁶⁷ The rental vacancy rate stood at 11.7 percent in 2019, which was higher than the state rate of 8.7 percent and the national rate of 6.0 percent.³⁶⁸ Despite this

relatively high vacancy rate, developers have continued to build new apartment complexes in anticipation of continued population inflows to the Orlando area.³⁶⁹

Demographic Characteristics by Census Tract

The following table presents key demographic and business information used to help develop a performance context for the assessment area for the years 2018 through 2020. The data reflects the 2020 FFIEC census data and 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

Although Regions Bank operates in a competitive financial market within the assessment area, community needs and opportunities for community development engagement still exist in the Orlando area. To better understand those community development and credit needs, local community development organizations were contacted. Individuals of these organizations discussed the various opportunities and challenges across the region as well as how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

One contact engaged in neighborhood housing revitalization that serves the West Lake area of Orlando was interviewed. The contact explained that the area's median income was around \$20,000 prior to the pandemic, and the prevalence of the underserved and low-income level population was brought to light after the pandemic hit. The contact said that the pandemic exposed the wage levels and wage gaps in the area. However, since 2020, the economy has started to rebound since Orlando is dominated by service-industry/entertainment jobs. Concerning the needs of the area, the contact said that there is a need for more philanthropic dollars and unrestricted dollars, a need for more think tanks for the local community, and need from banks to better serve those who are seeking establishment capital for start-up businesses that lack a guarantor or acceptable collateral.

Furthermore, two contacts from an organization engaged in providing community social services were also interviewed. They stated that the cost of housing compared to average wage has gotten worse since the pandemic, and the gap between the two has become a huge problem for people to find affordable housing. Additionally, the contacts mentioned that the Orlo Vista neighborhood is a specific LMI community within the area that is in most of assistance due to the impact that Hurricane Ian and Hurricane Irma had on it. As it relates to the credit needs, the contact said that access to traditional banking for the LMI community is very limited. The contacts explained that they would like to see banks lower the cost of banking by offering accounts with no minimum balance requirements, free debit cards, access to check cashing and little to no transaction fees.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE ORLANDO, FLORIDA
ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending performance in the Orlando assessment area is adequate. The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans reflects adequate penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a relatively high level of community development loans in the Orlando assessment area.

The analysis included 4,946 CRA small business loans and 2,376 HMDA-reportable loans reported by the bank in the Orlando assessment area during the review period. Therefore, CRA small business lending received greater weight in determining the bank's lending test rating in the assessment area. Within HMDA-reportable lending, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Orlando assessment area accounted for 9.5 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Florida and 16.0 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 11.2 percent of Regions Bank's Florida deposits are in the Orlando assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 2,376 HMDA-reportable loans analyzed, 856 loans (36.0 percent) were home purchase loans. Of the total home purchase loans made, four loans (0.5 percent) were located in low-income tracts, and 128 loans (15.0 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home purchase lending in low-income tracts (0.5 percent) was below the percentage of owner-occupied units (1.0 percent) in these tracts. In 2018, the bank's home purchase lending in low-income tracts (0.6 percent) was below the aggregate lending performance (1.1 percent) in these tracts. In 2019, Regions Bank made no home purchase loans in low-income tracts (0.0 percent) and was significantly below the aggregate lending performance (1.2 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (0.7 percent) was below the aggregate lending performance (1.1 percent) in these tracts.

Home purchase lending in moderate-income tracts is poor. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (15.0 percent) was similar to the percentage of owner-occupied units (21.1 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (12.6 percent) was below the aggregate lending performance (18.8 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (19.3 percent) was similar to the aggregate lending performance (18.6 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (13.8 percent) was slightly below the aggregate lending performance (17.7 percent) in these tracts.

Home Refinance Loans

Regions Bank made 867 home refinance loans from 2018 through 2020, which represents 36.5 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, two loans (0.2 percent) were located in low-income tracts, and 105 loans (12.1 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts was not rated due to a low volume of lending by all lenders in these tracts. Home refinance lending in moderate-income tracts is poor. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (12.1 percent) was below the percentage of owner-occupied units (21.1 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (12.0 percent) was below the aggregate lending performance (18.6 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (14.8 percent) was similar to the aggregate lending performance (15.7 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (10.9 percent) was slightly below the aggregate lending performance (12.8 percent) in these tracts.

Home Improvement Loans

Regions Bank made 653 home improvement loans from 2018 through 2020, which represents 27.5 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, three loans (0.5 percent) were located in low-income tracts, and 92 loans (14.1 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts was not rated due to a low volume of lending by all lenders in these tracts. Home improvement lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (14.1 percent) was below the percentage of owner-occupied units (21.1 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income tracts (13.3 percent) was similar to the aggregate lending performance (12.6 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (16.1 percent) was above the aggregate lending performance (12.2 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (12.8 percent) was slightly above the aggregate lending performance (11.6 percent) in these tracts.

Small Business Loans

Regions Bank made 4,946 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 80 loans (1.6 percent) were located in low-income tracts, and 1,294 loans (26.2 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is good. From 2018 through 2020, Regions Bank's small business lending in low-income tracts (1.6 percent) was similar to the percentage of businesses (1.6 percent) in these tracts. In 2018, the bank's small business lending in low-income tracts (1.7 percent) was above the aggregate lending performance (1.3 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (1.9 percent) was above the aggregate lending performance (1.5 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (1.5 percent) was similar to the aggregate lending performance (1.4 percent) in these tracts.

Small business lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (26.2 percent) was similar to the percentage of businesses (26.2 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (26.1 percent) was similar to the aggregate lending performance (24.1 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (28.8 percent) was slightly above the aggregate lending performance (24.4 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (25.0 percent) was similar to the aggregate lending performance (24.7 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is adequate. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is poor. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (2.2 percent) was below the percentage of low-income families (21.5 percent). In 2018, the bank's home purchase lending to low-income borrowers (1.6 percent) was below the aggregate lending performance (3.0 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (2.4 percent) was slightly below the aggregate lending performance (2.8 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (2.8 percent) was similar to the aggregate lending performance (3.1 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is poor. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (11.3 percent) was below the percentage of moderate-income families (18.1 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (10.4 percent) was slightly below the aggregate lending performance (13.9 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (10.0 percent) was below the aggregate lending performance (14.9 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (13.4 percent) was slightly below the aggregate lending performance (16.2 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is poor. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (3.7 percent) was below the percentage of low-income families (21.5 percent). In 2018, the bank's home refinance lending to low-income borrowers (5.4 percent) was slightly below the aggregate lending performance (7.1 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (4.9 percent) was similar to the aggregate lending performance (4.7 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (2.4 percent) was slightly below the aggregate lending performance (2.8 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (12.7 percent) was similar to the percentage of moderate-income families (18.1 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (15.2

percent) was similar to the aggregate lending performance (16.6 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (15.7 percent) was slightly above the aggregate lending performance (13.1 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (10.2 percent) was similar to the aggregate lending performance (10.4 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (4.3 percent) was below the percentage of low-income families (21.5 percent). In 2018, the bank's home improvement lending to low-income borrowers (4.1 percent) was similar to the aggregate lending performance (4.4 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (3.7 percent) was slightly below the aggregate lending performance (4.5 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (5.0 percent) was similar to the aggregate lending performance (4.8 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is poor. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (9.8 percent) was below the percentage of moderate-income families (18.1 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (10.6 percent) was slightly below the aggregate lending performance (12.1 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (10.6 percent) was slightly below the aggregate lending performance (12.2 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (8.3 percent) was below the aggregate lending performance (12.1 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. From 2018 through 2020, 62.0 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 94.5 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (70.2 percent) was above the aggregate lending performance (47.1 percent) to these businesses. In 2019, the bank's small business lending to small businesses (66.8 percent) was above the aggregate lending performance (48.9 percent) to these businesses. In 2020, the bank's small business lending to small businesses (55.1 percent) was above the aggregate lending performance (41.7 percent) to these businesses. Lastly, 92.7 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes a relatively high level of community development loans in the Orlando assessment area. During the review period, the bank originated or renewed 14 community development loans totaling \$39.0 million and 127 community development PPP loans totaling \$54.6 million. Specifically, the bank originated or renewed \$49.7 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; \$31.0 million to support economic development, nearly all being through the SBA 504 program; and \$12.9 million towards community services benefiting LMI individuals and families. Performance in Orlando was enhanced by a \$3.7 million community development loan with a P/M/F of serving three different assessment areas in Florida. Because this loan impacts multiple Florida assessment areas, its volume was included within totals for the state of Florida.

Some of the most impactful loans directly benefiting the assessment area include:

- Two loans totaling \$6.9 million for the purchase of a shopping center in Orlando. The shopping center primarily contains a supermarket surrounded by a small number of essential service stores including a low-cost general store, a laundromat, a hair and nail salon, a phone store, and a tax preparation office. Not only is the supermarket an anchor business in the shopping center but because the area is a food desert, its continued operation is especially impactful. The loan was originated through the SBA 504 program and is expected to retain approximately 70 LMI jobs throughout the entire shopping center.
- A \$1.9 million loan for the construction and rehabilitation of a Title 1 school in Osceola County. This was part of a loan syndication in which Regions Bank was the lead lender.
- Three loans totaling \$513,000 were highly responsive to the needs of nonprofits impacted by COVID-19. The loans were made through the PPP and originated to homeless shelters in Orlando.

INVESTMENT TEST

Regions Bank's investment performance in the Orlando assessment area is good. The bank made a significant level of investments and grants that demonstrated adequate responsiveness to credit and community development needs. Combined investment and contribution activity inside the assessment area totaled \$129.9 million. The bank's investments (excluding contributions) totaled \$129.7 million, of which \$84.9 million (65.5 percent) were new investments acquired during the review period. The bank invested \$81.0 million in mortgage-backed securities during the review period and \$3.9 million in an SBIC that provided financing for a small business in the assessment area. The bank also held \$44.8 million in investments from prior review periods. All of the prior period investments were in Low Income Housing Tax Credits, including two projects that were financed in 2017 (immediately preceding the current review period) and that provided 438 units of affordable housing to households earning less than 60 percent of the area median income.

Regions Bank made contributions totaling \$180,000 in the Orlando assessment area. Specifically, the bank provided \$117,000 to organizations that provide community services targeted to low- and moderate-income individuals, \$42,000 to support economic development, and \$21,000 for affordable housing. Overall,

approximately \$43,000 in donations were responsive to the COVID-19 pandemic, providing support for organizations providing emergency and recovery assistance to LMI individuals, small businesses, and nonprofits. Notably, the bank provided advertising to an area food bank to solicit donations to meet the increased demand for assistance during COVID-19. The bank also provided a \$10,000 grant to support the operating expenses of a CDFI serving the assessment area and grants totaling \$20,000 to support a public-private partnership working to create a national model to help grow and sustain entrepreneurs and small businesses.

As discussed earlier in the report, the bank also made a \$1.0 million investment and \$53,000 in donations that benefited all assessment areas in Florida, which positively impacted the bank's performance in Orlando.

SERVICE TEST

Regions Bank's service test performance in the Orlando assessment area is adequate.

Retail Services

Retail banking services are adequate in the Orlando full-scope assessment area.

The distribution of 32 branch offices and 33 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank did not have any branches in low-income tracts and therefore was below the percentage of households and businesses in the same geography; 2.6 percent of households and 1.6 percent of businesses were located in low-income census tracts. The proportion of the bank's branches in moderate-income tracts was slightly below the percentage of households and businesses in the same geography: 25.0 percent of total branches were in moderate-income tracts compared to 27.6 percent of households and 26.2 percent of businesses. Overall, the bank's retail delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in its assessment area.

During the review period, the bank neither opened nor closed any branch offices or full-service ATMs in low-income census tracts. However, two branches and full-service ATMs were closed in moderate-income census tracts and none were opened. A review of the area showed there is a branch less than a mile from one of the closed branches and three branches within a five-mile radius of the other closed branch. As a result, the bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

Community Development Services

Regions Bank provides an adequate level of community development services in the Orlando assessment area. Regions Bank’s community development activities in the Orlando assessment area benefited organizations that provide affordable housing, community services, economic development, and revitalization and stabilization to low- and moderate-income individuals and communities. Of the total 55 qualified service activities, 33 activities were committed to adult and youth financial education and homebuyer training through partnerships with various schools, affordable housing communities, and community-based organizations. Bank employees also provided 201 hours as board or committee members for various qualified nonprofit organizations. Overall, the bank’s activities exhibited adequate responsiveness to community development needs in the Orlando assessment area.

Highlighted below are examples of community development activities undertaken during the review period:

- Bank employees served on the board of directors and as committee members of a nonprofit organization designed to empower Hispanic small business entrepreneurs through training, support, and other resources to establish or grow their small businesses.
- A Regions associate served on the board of directors for an organization that provides information and education around business creation and growth for people with disabilities.
- A Regions manager served on the board and provided homebuyer education classes for a HUD-approved agency that was created to assist with the supply and creation of affordable housing, for both rental and ownership.

METROPOLITAN AREA
FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE TAMPA, FLORIDA ASSESSMENT AREA

Overview

The Tampa, Florida assessment area includes Hernando, Hillsborough, Pasco, and Pinellas counties, which comprise the Tampa-St. Petersburg-Clearwater MSA. As of December 31, 2020, Regions Bank operated 61 branches in the assessment area, representing 21.1 percent of its Florida branches. The Tampa assessment area represents the bank's largest concentration of combined HMDA-reportable and CRA small business lending in the state of Florida, at 21.1 percent of total lending by number of loans.

The Tampa MSA is a competitive banking market dominated by several large institutions. According to the FDIC Summary of Deposits Report dated June 30, 2020, there were 57 depository institutions operating 675 branch locations in the assessment area, with a total of \$101.2 billion in deposits. Regions Bank ranked fifth in deposit market share at 5.2 percent of total deposits (\$5.3 billion). Raymond James Bank had the largest deposit marketshare, with 25.2 percent followed by Bank of America and Truist Bank with 13.8 and 13.1 percent, respectively.

HMDA-reportable lending and CRA lending are similarly competitive. For HMDA-reportable lending, Regions Bank originated or purchased 1.7 percent of total HMDA-reportable loans in the assessment area in 2018, 2019, and in 2020. Regions Bank was ranked 14th out of 995 reporters in 2018; in 2019, Regions Bank was ranked 15th out of 1,019 reporters; and in 2020, Regions Bank ranked 12th out of 1,101 reporters. Wells Fargo, Quicken Loans, and United Wholesale Mortgage, LLC were the top HMDA lenders in the market for 2018, 2019, and 2020.

For CRA lending, Regions Bank ranked 11th out of 193 CRA loan reporters in 2018 with 1.8 percent of CRA loans. In 2019, the bank ranked 12th out of 184 reporters with 1.4 percent of total CRA loans. In 2020, Regions Bank ranked 6th out of 289 reporters with 4.1 percent of total CRA loans. American Express Bank, Bank of America, and JP Morgan Chase Bank were the top CRA lenders in the market for 2018, 2019, and 2020.

Population and Income Characteristics

The assessment area is in Central Florida and borders the Gulf of Mexico. As of April 1, 2020, the assessment area had an estimated population of 3.1 million people, and a growth of 14.0 percent since the 2010 census.³⁷⁰ Hillsborough County, home to the city of Tampa, is the most densely populated county in the assessment area with approximately 1.5 million residents and represents about 46 percent of the assessment area's total population.³⁷¹

³⁷¹ *Ibid.*

According to 2020 FFIEC census data, the assessment area contains 746 census tracts: 41 low-income census tracts (5.5 percent), 195 moderate-income tracts (26.1 percent), 271 middle-income tracts (36.3 percent), 222 upper-income tracts (29.8 percent), and 17 tracts with unknown income levels (2.3 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table sets forth the estimated median family income for 2018, 2019, and 2020 for the MSA. The median income increased by \$5,300, or 8.3 percent from 2018 to 2020. The table also provides a range of the estimated annual family income for each income category (low, moderate, middle, and upper).

**Borrower Income Levels
Tampa-St. Petersburg-Clearwater, FL MSA**

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2018	\$63,900	0 - \$31,949	\$31,950 - \$51,119	\$51,120 - \$76,679	\$76,680 - & above
2019	\$66,900	0 - \$33,449	\$33,450 - \$53,519	\$53,520 - \$80,279	\$80,280 - & above
2020	\$69,200	0 - \$34,599	\$34,600 - \$55,359	\$55,360 - \$83,039	\$83,040 - & above

Poverty rates throughout the assessment were in line with statewide poverty rates. Between 2015 and 2019, families in poverty, as a percentage of total families, ranged from a low of 7.8 percent in Pinellas County to a high of 10.6 percent in Hillsborough County.³⁷² The statewide poverty rate during the same timeframe was 9.9 percent.³⁷³ For the MSA, the percentage of families in poverty was 9.4 percent.³⁷⁴ Within the assessment area, 39.5 percent of families are considered low- to moderate-income, and 21.3 percent of the families living in low- and moderate-income tracts have incomes below the poverty level.

Economic Conditions

The COVID-19 global pandemic represented a major event impacting the economy in Tampa and nationwide. During 2018 and 2019, Tampa’s economy was expanding and benefiting from an influx of businesses, migration, and tourism. During the pandemic, job insecurity escalated exponentially, and many businesses suffered due to closing mandates. Tampa’s economy had remained strong during this time, which allowed for the area to withstand the impact of the pandemic.

Tampa’s labor force ranked 1st in 2018, 2019, and 2020 among 24 metropolitan division and metropolitan statistical areas within the state of Florida.³⁷⁵ Tampa’s labor force increased to 1.573 million in December 2019 from 1.529 million in 2018 and reached a high of 1.608 million by March 2020.³⁷⁶ Due to the pandemic, the

labor force was significantly reduced to 1.496 million in April 2020; by the end of December 2020, the labor force had regained some ground and increased to 1.535 million.³⁷⁷

During 2018 and 2019, Tampa's nonfarm payroll surpassed the growth rate of nearby regional areas.³⁷⁸ In 2020, Tampa lost less nonfarm payrolls than the rest of the country.³⁷⁹ As of May 2020, the major occupational groups in Tampa included office and administrative support representing 15.9 percent of local area employment, followed by sales representing 10.9 percent, and food preparation at 9.0 percent, all above the national share.³⁸⁰ However, the hourly wage as of May 2020 was about 8 percent below the national average.³⁸¹ While nonfarm payrolls within Tampa had been experiencing expansion during 2018 and 2019, in April of 2020, 170,900 jobs were lost as a result of the pandemic.³⁸²

As illustrated in the chart below, the unemployment rate in the assessment area was trending downward with 3.6 percent in 2018 followed by 3.4 percent in 2019. In 2020, the COVID-19 pandemic brought about an economic crisis that resulted in unforeseen job losses. In April 2020, the unemployment rate in the country reached 14.8 percent, the highest level since 1948.³⁸³ Representing a similar shift, Tampa's unemployment rate reached 7.2 percent in 2020. Among the four counties encompassing the assessment area, Hernando County already had the highest unemployment rate in 2018 and 2019; in the first year of the pandemic, the county endured the highest surge in unemployment at 8.1 percent. Pasco County had the second highest unemployment rate increase at 7.2 percent.

Unemployment Rates - FL Tampa

Lower income families and individuals suffered considerably as a result of the pandemic because many were employed in industries that were most impacted due to mandatory closures and travel restrictions. For example, within the tourism industry, maids and housekeeping cleaners earned an average of \$11.21 per hour in 2020 (around 33.7 percent the median income in Tampa), waiters and waitresses earned an average of \$14.24 per hour (around 42.8 percent the median income in Tampa), and janitors and building cleaners earned \$16.78 per hour (around 50.4 percent the median income in Tampa).³⁸⁴ Many low- and moderate-income individuals and families had to depend on rent and unemployment assistance.

The assessment area is home to the Port of Tampa, which is Florida’s largest port and within the top ten cruise ports in the United States.³⁸⁵ The port’s annual economic impact is estimated to be \$18 billion, managing approximately 32 million tons of cargo , and supporting about 85,000 jobs.³⁸⁶ The port is also responsible for the influx of 43.0 percent of petroleum being distributed within the state of Florida.³⁸⁷ The Central Florida Pipeline brings 12.0 percent of the operating revenue in the port, followed by Carnival Cruise Lines with 6.3 percent.³⁸⁸ At the beginning of the pandemic, the cruise industry came to a halt; the port lost 67 scheduled cruises, and port-related revenue decreased.³⁸⁹ Similarly, the revenue resulting from petroleum was negatively affected as demand declined due to travel restrictions and mandatory closures. Port operating revenues decreased by \$13.6 million

during 2020.³⁹⁰ Notwithstanding this major event, the port pursues a diversified business strategy enabling the continuous revenues from multiple sources.³⁹¹

The assessment area is also home to the Tampa International Airport and the St. Pete-Clearwater International Airport. Tampa International Airport contributed to the movement of about 492 million pounds in cargo during 2020, and the St. Pete-Clearwater International Airport served about 1.39 million passengers during 2020.³⁹² These venues are also large contributors to the area's economy.

The largest employers in the assessment area were MacDill Air Force Base, HCA West Florida, the University of South Florida, and BayCare Health System.³⁹³ These employers are involved in the education, health services, and governmental industries.³⁹⁴ The leisure and hospitality section added the most jobs in 2018. In 2019, the professional and business services saw the biggest increase in jobs with the opening of Baker McKenzie office in the city of Tampa.³⁹⁵

Small businesses play an important role in the assessment area. Out of the 206,053 businesses in the assessment area, 93.9 percent had total annual revenues less than or equal to \$1 million and were considered to be small businesses. From the total number of small businesses, 25.6 percent were in low- or moderate-income tracts. Businesses with revenues less than or equal to \$1 million received a total of 39,047 small business loans (as defined by the Community Reinvestment Act) in 2018, and 43,261 loans in 2019, representing an increase of 10.8 percent.³⁹⁶ Hernando County's small businesses have historically received the lowest number of small business loans, with 1,836 in 2018 and 1,946 in 2019.³⁹⁷ Hillsborough County's small businesses received 17,314 small business loans in 2018, and 19,402 in 2019, the highest number amongst the other counties in the assessment area.³⁹⁸ Additionally, in 2018 and 2019, an average of 96 percent of small business loans were in the amount of less than \$100,000 indicating that banks were providing the types of loans that small businesses need.³⁹⁹

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act) enacted in March 2020 allocated billions of dollars for economic aid. Under this law, businesses in the assessment area received approval for a total of 122,414 Paycheck Protection Program (PPP) loans aimed at job retention.⁴⁰⁰ Businesses in Hernando County received the least number of PPP loans among the remaining counties in the assessment area for a total

of 4,093 loans totaling \$165 million.⁴⁰¹ Businesses in Hillsborough County received the largest number of PPP loans among all the other counties for a total of 64,658 loans totaling \$3.7 billion in approved funds.⁴⁰² To help the local economy, Hernando County offers investment incentive programs designed create new employment opportunities. These include the Economic Development Investment Incentive Program targeted to industries such as aviation, manufacturing, back-office operations, and corporate relocations.⁴⁰³ The program uses a system whereby the higher the number of employments created the more points are earned towards the grant. Additionally, the City of Tampa offers multiple resources, such as the Equal Business Opportunity Program designed to help small businesses, women and minority-owned businesses, Service-Disabled Veteran-Owned Businesses, Veteran-Owned Small Businesses, and LGBT-owned businesses.⁴⁰⁴

According to 2020 census data, the assessment area contains 1,368,924 housing units, of which 53.9 percent of the units are owner occupied, 29.8 percent are rental units, and 16.3 percent are vacant. Only 1.9 percent of the owner-occupied units in the assessment area were in low-income tracts; therefore, opportunities for home mortgage lending in these tracts may be limited. The median age of the housing stock in the assessment area was 39 years. Housing units in the low- and moderate-income census tracts were older compared to the assessment area overall. The median housing value in the assessment area was \$144,603. Hillsborough County had the highest median housing value at \$159,200 and Hernando County had the lowest median housing value at \$109,300.

While the 2018 and 2019 home sales market was stable, inventory was already experiencing low levels of availability. In January 2018, the months' supply of inventory was 2.6, and in January 2019 it was 3.0.⁴⁰⁵ The median time to sell a single-family home in January 2018 and 2019 was about 80 days.⁴⁰⁶ By December 2019, the median time to sell dropped to 72 days with 2.3 months supply of inventory.⁴⁰⁷ As demand accelerated and inventory contracted, the average sales price in the assessment area grew 15.0 percent from December 2019 to 2020.⁴⁰⁸ The average sale price in the assessment area was \$289,900 by the end of 2020 with 1.1 months supply of inventory, a decrease of 52.2 percent from the previous year.⁴⁰⁹ In Hillsborough County, the average price for a new home increased 10.0 percent during 2020, the strongest amongst the other counties, while Pinellas County had the strongest average sale price growth for existing homes.⁴¹⁰ More than 50 percent of the new homes built since 2015 were in Hillsborough County given that the area is home to many of the employment centers.⁴¹¹ In Pinellas County, new homebuilding was mostly limited to infill and redevelopment.⁴¹²

⁴¹² Ibid.

Affordability in the assessment area is an enduring issue because more than half of low-income homeowners paid 30.0 percent or more of household income towards housing costs and were therefore considered to be cost-burdened from 2013-2017. Within the same timeframe, in Hillsborough and Pinellas County, 65.0 percent of low-income homeowners were considered to be cost-burdened. Based on 2020 FFIEC census data, 47.3 percent of households located in low- and moderate- income tracts within the assessment area live below the poverty level.

In Tampa, rental vacancy rates have been falling since the past decade.⁴¹³ By the end of 2020, the vacancy rate had decreased to 4.2 percent.⁴¹⁴ In 2018, the average monthly rent in Tampa was \$1,125, in 2019 it was \$1,238, and in 2020 the average rent reached \$1,242.⁴¹⁵ From 2015 until 2019, rental occupancy varied from 22 percent in Hernando County to 41.4 percent in Hillsborough.⁴¹⁶ In late 2020, West Pasco and Hernando counties had the lowest vacancy rate of 2.0 percent, down from 3.3 percent a year earlier. The areas surrounding the employment center in central Tampa had the highest average asking monthly rent at \$1,816.⁴¹⁷ Population growth because of the pandemic is one of the factors influencing the high demand in rental units, which in turn increases the amount of rent individuals are willing to pay. Therefore, rent affordability continues to be a challenge. The affordability issue is underscored by the percentage of renters that are considered cost-burdened, meaning that rental costs account for more than 30.0 percent of household income. In the assessment area, 81 percent of low-income renters were considered cost-burdened during the period of 2013-2017. Based on 2020 FFIEC census data, 42.9 percent of cost-burdened renters were located in low- and moderate-income tracts within the assessment area.

Demographic Characteristics by Census Tract

The following table, based on 2020 FFIEC census data and Dun & Bradstreet data, presents key demographic and business information used to help develop a performance context for the assessment area.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the community development and economic landscapes, community development experts were contacted. These individuals discussed the various opportunities and challenges across the region as well as how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

A contact engaged in affordable housing was interviewed. This person indicated that there are very few homes in the area for low- to moderate-income individuals to purchase. It was outlined that there is a lot of activity with all-cash investors who are buying properties and flipping within short timeframes in Pinellas and Pasco counties. Also, home prices are rising rapidly. The contact explained that it is a struggle to get low- and moderate-income individuals an affordable home in a safe community. Also, the individual explained that due to the COVID-19 pandemic, people from northeastern states are moving to Florida, which has resulted in higher home prices. According to the contact, South St. Pete is the highest priority low- and moderate-income neighborhood in terms of need for affordable housing. The contact also stated that additional training and education are needed to help lenders in the area develop a better understanding of available down payment assistance programs. Low- and moderate-income individuals are also in need of homebuyer education, and assistance with repairing their credit and providing required documentation for underwriting. Per the contact, there is ample need for assistance and support from banks to support local affordable housing and community development organizations.

A contact engaged in revitalization and stabilization efforts was interviewed. The contact stated that economic growth in Tampa has been strong. It was indicated that the growth comes from residents who migrated to Tampa, especially with residents who work remotely. The contact stated that current residents are not seeing their wages increase as fast as the increase in cost for food, gas, and housing. He indicated that the impact of the pandemic was not as harsh as expected because once the government injected money into the economy, markets like Tampa were seeing a surge in demand for everything. For small businesses, they see an opportunity to repurpose properties and utilize commercial space in an effort to develop office space. According to the contact, Tampa Heights, areas near the University of South Florida, Seminole Heights, Channelside and East Bound are areas with the most need for revitalization. These areas are underserved in terms of food deserts and accessibility to banking and financial institutions. The challenge for private developers is that these areas are so large it is difficult to get funding to develop these areas. The contact said that the areas most impacted by blight are East Tampa and Downtown Temple Terrace. He also mentioned that they are seeing a number of displaced LMI residents and unbanked communities in these areas. Concerning affordable housing, the contact identified that South Tampa, Westshore, and areas near the airport are in most need for affordable housing. The contact said that banks can be responsive by providing underwriting assistance and back-office support to organizations that serve the community. He also said that banks can also be more responsive by supporting CDFIs and offering their knowledge and expertise to organizations with the CDFI application.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE TAMPA, FLORIDA
ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending performance in the Tampa assessment area is adequate. The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes an adequate level of community development loans in the Tampa assessment area.

The analysis included 6,786 CRA small business loans and 6,073 HMDA-reportable loans reported by the bank in the Tampa assessment area. Therefore, CRA small business lending received greater weight in determining the bank's lending test rating in the assessment area. Within HMDA-reportable lending, greater weight was assigned to home purchase loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Tampa assessment area accounted for 21.3 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Florida and 18.4 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 22.9 percent of Regions Bank's Florida deposits are in the Tampa assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 6,073 HMDA-reportable loans analyzed, 2,270 loans (37.4 percent) were home purchase loans. Of the total home purchase loans made, 40 loans (1.8 percent) were located in low-income tracts, and 348 loans (15.3 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's home purchase lending in low-income tracts (1.8 percent) was similar to the percentage of owner-occupied units (1.9 percent) in these tracts. In 2018, the bank's home purchase lending in low-income tracts (1.2 percent) was slightly below the aggregate lending performance (1.6 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (2.1 percent) was similar to the aggregate lending performance (2.1 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (1.9 percent) was similar to the aggregate lending performance (2.1 percent) in these tracts.

Home purchase lending in moderate-income tracts is poor. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (15.3 percent) was below the percentage of owner-occupied units (21.9 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (16.7 percent) was slightly below the aggregate lending performance (18.9 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (16.8 percent) was slightly below the aggregate lending performance (19.5 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (13.2 percent) was below the aggregate lending performance (19.4 percent) in these tracts.

Home Refinance Loans

Regions Bank made 2,249 home refinance loans from 2018 through 2020, which represents 37.0 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, 13 loans (0.6 percent) were located in low-income tracts, and 299 loans (13.3 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home refinance lending in low-income tracts (0.6 percent) was below the percentage of owner-occupied units (1.9 percent) in these tracts. In 2018, the bank's home refinance lending in low-income tracts (0.7 percent) was significantly below the aggregate lending performance (1.6 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (0.6 percent) was significantly below the aggregate lending performance (1.4 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (0.6 percent) was below the aggregate lending performance (1.1 percent) in these tracts.

Home refinance lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (13.3 percent) was below the percentage of owner-occupied units (21.9 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (18.1 percent) was similar to the aggregate lending performance (17.3 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (14.4 percent) was similar to the aggregate lending performance (15.0 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (11.1 percent) was slightly below the aggregate lending performance (12.5 percent) in these tracts.

Home Improvement Loans

Regions Bank made 1,554 home improvement loans from 2018 through 2020, which represents 25.6 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, 13 loans (0.8 percent) were located in low-income tracts, and 249 loans (16.0 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's home improvement lending in low-income tracts (0.8 percent) was below the percentage of owner-occupied units (1.9 percent) in these tracts. In 2018, the bank's home improvement lending in low-income tracts (1.2 percent) was above the aggregate lending performance (0.9 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (0.3 percent) was significantly below the aggregate lending performance (1.4 percent) in these tracts. In 2020, the bank's home improvement lending (1.1 percent) was similar to the aggregate lending performance (1.2 percent) in these tracts.

Home improvement lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (16.0 percent) was similar to the percentage of owner-occupied units (21.9 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income tracts (17.6 percent) was slightly above the aggregate lending performance (14.2 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (15.0 percent) was similar to the aggregate lending performance (14.0 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (15.7 percent) was similar to the aggregate lending performance (14.3 percent) in these tracts.

Small Business Loans

Regions Bank made 6,786 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 265 loans (3.9 percent) were located in low-income tracts, and 1,583 loans (23.3 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's small business lending in low-income tracts (3.9 percent) was similar to the percentage of businesses (4.1 percent) in these tracts. In 2018, the bank's small business lending in low-income tracts (3.9 percent) was similar to the aggregate lending performance (4.2 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (4.8 percent) was similar to the aggregate lending performance (4.6 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (3.6 percent) was slightly below the aggregate lending performance (4.7 percent) in these tracts.

Small business lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (23.3 percent) was above the percentage of businesses (21.7 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (25.3 percent) was slightly above the aggregate lending performance (20.3 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (25.7 percent) was slightly above the aggregate lending performance (21.2 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (21.9 percent) was similar to the aggregate lending performance (20.3 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (3.7 percent) was below the percentage of low-income families (21.6 percent). In 2018, the bank's home purchase lending to low-income borrowers (4.8 percent) was slightly above the aggregate lending performance (3.9 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (4.6 percent) was similar to the aggregate lending performance (4.4 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (2.2 percent) was below the aggregate lending performance (4.1 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (15.4 percent) was similar to the percentage of moderate-income families (17.9 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (17.0 percent) was similar to the aggregate lending performance (16.3 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (14.8 percent) was slightly below the aggregate lending performance (17.5 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (14.6 percent) was slightly below the aggregate lending performance (18.9 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (7.1 percent) was below the percentage of low-income families (21.6 percent). In 2018, the bank's home refinance lending to low-income borrowers (10.7 percent) was above the aggregate lending performance (7.8 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (8.6 percent) was significantly above the aggregate lending performance (5.7 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (5.2 percent) was significantly above the aggregate lending performance (3.2 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (15.2 percent) was similar to the percentage of moderate-income families (17.9 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (18.6 percent) was similar to the aggregate lending performance (17.6 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (17.8 percent) was above the aggregate lending performance (13.5 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (12.9 percent) was slightly above the aggregate lending performance (10.8 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (6.1 percent) was below the percentage of low-income families (21.6 percent). In 2018, the bank's home improvement lending to low-income borrowers (4.8 percent) was slightly below the aggregate lending performance (6.1 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (6.5 percent) was similar to the aggregate lending

performance (6.3 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (7.0 percent) was slightly above the aggregate lending performance (5.7 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is good. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (17.8 percent) was similar to the percentage of moderate-income families (17.9 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (18.0 percent) was slightly above the aggregate lending performance (15.7 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (17.8 percent) was slightly above the aggregate lending performance (15.5 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (17.6 percent) was slightly above the aggregate lending performance (15.3 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. From 2018 through 2020, 63.2 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 93.9 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (70.9 percent) was above the aggregate lending performance (47.5 percent) to these businesses. In 2019, the bank's small business lending to small businesses (71.6 percent) was above the aggregate lending performance (49.2 percent) to these businesses. In 2020, the bank's small business lending to small businesses (57.9 percent) was above the aggregate lending performance (41.5 percent) to these businesses. Lastly, 94.2 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes an adequate level of community development loans in the Tampa assessment area. During the review period, the bank originated 9 community development loans totaling \$15.2 million and 229 community development PPP loans totaling \$64.3 million. Specifically, the bank originated \$57.4 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; \$15.6 million to support economic development; \$5.8 million in affordable housing initiatives; and \$750,000 towards community services benefiting LMI individuals and families.

While the dollar volume of community development lending is below performance of peers in this area, all the community development loans were new originations, and many of them had qualitative impact of being responsive to assessment area needs. These qualitative factors contributed to the overall adequate conclusion for this assessment area.

Some of the most impactful loans directly benefiting the assessment area include:

- A \$2.8 million bridge loan to purchase and renovate a 36-unit apartment complex in Tampa. The apartment complex is a HUD-approved, Section 8 property and restricts all units to individuals and/or families making less than 60 percent of median family income.

- A \$550,000 line of credit to a nonprofit focused on affordable housing opportunities for low-income individuals and families in Pinellas County. The purpose of the line of credit was for the nonprofit to purchase ten land lots and construct affordable homes on those lots for low-income buyers.
- A \$250,000 line of credit to a nonprofit specializing in affordable housing for low-income individuals and families in Hillsborough County.
- A \$200,000 line of credit to a nonprofit offering free legal services to low-income individuals and families throughout the Tampa MSA. The nonprofit handles a variety of legal issues, including mortgage foreclosure, predatory lending, domestic violence, immigration/human trafficking, unemployment, and homelessness. This nonprofit is especially noteworthy in this area given that many of these issues were noted by community contacts in the area as challenges facing the population.
- A \$37,000 loan made through the PPP to a food bank serving LMI individuals and families in Hillsborough County.

INVESTMENT TEST

Regions Bank's investment performance in the Tampa assessment area is good. The bank made a significant level of investments and grants that demonstrated adequate responsiveness to credit and community development needs. Combined investment and contribution activity inside the assessment area totaled \$109.7 million. The bank's investments (excluding contributions) totaled \$109.0 million, of which \$64.4 million (59.1 percent) were new investments acquired during the review period. The bank invested \$50.5 million in mortgage-backed securities during the review period, which primarily financed multifamily affordable housing. Additionally, the bank invested \$4.4 million in Low Income Housing Tax Credits to help finance 36 units of affordable rental housing and \$2.5 million in a fund to help create and preserve affordable housing across several states, including a project in the Tampa assessment area. Finally, the bank invested \$6.9 million in two SBICs that financed small businesses in the assessment area. The bank held \$44.6 million in investments from prior review periods. Prior period investments included investments in Low Income Housing Tax Credits, mortgage-backed securities, SBICs, and a bond to finance school renovations in schools that primarily serve LMI students.

Regions Bank made contributions totaling \$671,500 to a diverse group of organizations in the Tampa assessment area. Specifically, the bank provided \$368,100 to organizations that provide community services targeted to low- and moderate-income individuals, \$240,500 to support economic development, and \$63,000 for affordable housing. Overall, approximately \$112,400 in donations were responsive to the COVID-19 pandemic, providing support for organizations providing emergency and recovery assistance to LMI individuals, small businesses, and nonprofit organizations. Notably, the bank provided \$53,400 to area food banks to solicit donations to meet the increased demand for assistance during COVID-19. The bank provided \$75,000 in grants to support a local organization convening an annual summit on empowering low-income and minority communities, and a \$50,000 grant to support a local foundation's work to develop an inclusive growth initiative for the Tampa Bay region. Regions provided \$42,500 to a local YMCA to help develop a long-term collective impact initiative designed to serve low-income kids and families in a very distressed neighborhood and donations totaling \$59,000 to provide financial support for LMI students in 5th through 8th grade to attend local preparatory schools.

As discussed earlier in the report, the bank also made a \$1.0 million investment and \$53,000 in donations that benefited all assessment areas in Florida, which positively impacted the bank's performance in Tampa.

SERVICE TEST

Regions Bank's service test performance in the Tampa assessment area is adequate.

Retail Services

Retail banking services are adequate in the Tampa full-scope assessment area.

The distribution of 61 branch offices and 61 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The percentage of branches in low-income tracts was slightly less than the percentage of households and businesses in the same geography: 4.3 percent of households and 4.1 percent of businesses were located in low-income census tracts compared to 3.3 percent of the bank's branches. The proportion of the bank's branches in moderate-income tracts, however, exceeded the percentage of households and businesses in the same geography: 31.2 percent of total branches were in moderate-income tracts compared to 24.5 percent of households and 21.7 percent of businesses. Overall, the bank's retail delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in its assessment area.

During the review period, Regions Bank did not open or close any branches or full-service ATMs in low-income tracts. Additionally, the bank did not open or close any branch offices in moderate-income tracts; however, one full-service ATM was closed. The bank closed three branch offices in middle-income tracts. Regions also opened one full-service ATM and closed three full-service ATMs in middle-income tracts. Finally, the bank opened one and closed five branch offices in upper-income tracts as well as opened four and closed five full-service ATMs. The bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

 Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
 DTO - Drive thru only is a subset of total branches
 SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

Regions Bank provides an adequate level of community development services in the Tampa assessment area. During the review period, employees engaged in 175 qualified service activities totaling 2,270 hours that positively affected the assessment area. The bank’s service activities benefited organizations that provide affordable housing, community services, and economic development activities for low- and moderate-income individuals, communities, and small businesses in the Tampa assessment area. Overall, Regions exhibited adequate responsiveness to community development needs in the Tampa assessment area.

Of the bank’s total service hours, 1,754 hours (77.2 percent) were committed to financial education for adults and youth, small business education, and homebuyer education. The bank also provided 458 hours as board or committee members for various qualified nonprofit organizations. Regions employees engaged in over 959 hours with a nonprofit who renders care for the homeless and those at risk of becoming homeless in the greater Tampa area. Services include food, housing, financial education, life skills and other resources to promote dignity and instill self-sufficiency. Employees served in numerous roles including on the board of directors, on non-board committees, and as financial education instructors. In addition, Regions employees dedicated approximately 100 hours towards assisting with an organization dedicated to creating sustainable affordable housing in the Tampa assessment area.

**METROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW**

The following assessment areas were reviewed using limited-scope examination procedures.

**DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE FLORIDA METROPOLITAN
ASSESSMENT AREAS**

- *Daytona Assessment Area (Volusia County)*
 - As of December 31, 2020, Regions Bank operated seven branches in the assessment area, representing 2.4 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$408.9 million in deposits in this assessment area, representing a market share of 3.8 percent and 1.8 percent of Regions Bank's total deposits in Florida.
- *Ft. Lauderdale Assessment Area (Broward County)*
 - As of December 31, 2020, Regions Bank operated 15 branches in the assessment area, representing 5.2 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$1.0 billion in deposits in this assessment area, representing a market share of 1.6 percent and 4.4 percent of Regions Bank's total deposits in Florida.
- *Ft. Myers Assessment Area (Lee County)*
 - As of December 31, 2020, Regions Bank operated nine branches in the assessment area, representing 3.1 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$553.8 million in deposits in this assessment area, representing a market share of 3.0 percent and 2.4 percent of Regions Bank's total deposits in Florida.
- *Ft. Walton Assessment Area (Okaloosa and Walton counties)*
 - As of December 31, 2020, Regions Bank operated 14 branches in the assessment area, representing 4.8 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$1.1 billion in deposits in this assessment area, representing a market share of 17.0 percent and 4.7 percent of Regions Bank's total deposits in Florida.
- *Gainesville Assessment Area (Alachua County)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 0.7 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$111.9 million in deposits in this assessment area, representing a market share of 2.1 percent and 0.5 percent of Regions Bank's total deposits in Florida.
- *Homosassa Springs Assessment Area (Citrus County)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 1.4 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$265.3 million in deposits in this assessment area, representing a market share of 10.6 percent and 1.2 percent of Regions Bank's total deposits in Florida.
- *Jacksonville Assessment Area (Clay, Duval, Nassau, and St. Johns counties)*
 - As of December 31, 2020, Regions Bank operated 18 branches in the assessment area, representing 5.9 percent of its branches in Florida.

- As of June 30, 2020, the bank had \$1.2 billion in deposits in this assessment area, representing a market share of 1.3 percent and 5.3 percent of Regions Bank's total deposits in Florida.
- *Lakeland Assessment Area (Polk County)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 1.0 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$212.8 million in deposits in this assessment area, representing a market share of 2.4 percent and 0.9 percent of Regions Bank's total deposits in Florida.
- *Miami Assessment Area (Miami-Dade County)*
 - As of December 31, 2020, Regions Bank operated 39 branches in the assessment area, representing 13.5 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$4.1 billion in deposits in this assessment area, representing a market share of 2.3 percent and 18.0 percent of Regions Bank's total deposits in Florida.
- *Naples Assessment Area (Collier County)*
 - As of December 31, 2020, Regions Bank operated seven branches in the assessment area, representing 2.4 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$444.6 million in deposits in this assessment area, representing a market share of 2.5 percent and 1.9 percent of Regions Bank's total deposits in Florida.
- *Ocala Assessment Area (Marion County)*
 - As of December 31, 2020, Regions Bank operated 12 branches in the assessment area, representing 4.2 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$756.2 million in deposits in this assessment area, representing a market share of 11.7 percent and 3.3 percent of Regions Bank's total deposits in Florida.
- *Palm Bay Assessment Area (Brevard County)*
 - As of December 31, 2020, Regions Bank operated eight branches in the assessment area, representing 2.8 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$442.6 million in deposits in this assessment area, representing a market share of 4.2 percent and 1.9 percent of Regions Bank's total deposits in Florida.
- *Panama City Assessment Area (Bay County)*
 - As of December 31, 2020, Regions Bank operated nine branches in the assessment area, representing 3.1 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$846.4 million in deposits in this assessment area, representing a market share of 21.7 percent and 3.7 percent of Regions Bank's total deposits in Florida.
- *Pensacola Assessment Area (Escambia and Santa Rosa counties)*
 - As of December 31, 2020, Regions Bank operated 14 branches in the assessment area, representing 4.8 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$1.4 billion in deposits in this assessment area, representing a market share of 17.8 percent and 5.9 percent of Regions Bank's total deposits in Florida.
- *Punta Gorda Assessment Area (Charlotte County)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 1.4 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$243.7 million in deposits in this assessment area, representing

a market share of 5.5 percent and 1.1 percent of Regions Bank’s total deposits in Florida.

- *Sarasota Assessment Area (Manatee and Sarasota counties)*
 - As of December 31, 2020, Regions Bank operated 13 branches in the assessment area, representing 4.5 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$738.7 million in deposits in this assessment area, representing a market share of 2.9 percent and 3.2 percent of Regions Bank’s total deposits in Florida.
- *Tallahassee Assessment Area (Leon County)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 1.4 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$548.0 million in deposits in this assessment area, representing a market share of 6.4 percent and 2.4 percent of Regions Bank’s total deposits in Florida.
- *The Villages Assessment Area (Sumter County)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 0.7 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$109.1 million in deposits in this assessment area, representing a market share of 3.2 percent and 0.5 percent of Regions Bank’s total deposits in Florida.
- *West Palm Beach Assessment Area (Palm Beach County)*
 - As of December 31, 2020, Regions Bank operated eight branches in the assessment area, representing 2.8 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$449.1 million in deposits in this assessment area, representing a market share of 0.7 percent and 1.9 percent of Regions Bank’s total deposits in Florida.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices Gand H for information regarding these areas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Daytona	Not Consistent (Below)	Not Consistent (Above)	Consistent
Ft. Lauderdale	Consistent	Not Consistent (Above)	Consistent
Ft. Myers	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Above)
Ft. Walton	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

For the lending test, Regions Bank received a rating of high satisfactory for the State of Florida. Lending performance in seven of the metropolitan limited-scope assessment areas was consistent with the statewide performance, while performance in the remaining 12 metropolitan limited-scope assessment areas was below the statewide lending performance. For the geographic distribution of loans, lending levels were good in five assessment areas; adequate in 13 assessment areas; and poor in one assessment area. Performance was good for the borrower distribution of loans in six assessment areas and adequate in 13 assessment areas. Community development lending performance in limited scope metropolitan assessment areas was as follows: the bank was a leader in Ft. Lauderdale (\$63.0 million), Jacksonville (\$40.9 million), Miami (\$120.5 million), Palm Bay (\$13.4 million), Panama City (\$66.1 million), The Villages (\$14.3 million), and West Palm Beach (\$32.4 million); made a relatively high level in Daytona (\$10.0 million) and Naples (\$14.0 million); made an adequate level in Ft. Myers (\$8.8 million), Ocala (\$3.6 million), and Sarasota (\$15.2 million); made a low level in Lakeland (\$2.0 million), Pensacola (\$8.8 million), and Tallahassee (\$4.2 million); and made few, if any, in Ft. Walton (\$815,000), Gainesville (70,000), Homosassa Springs (\$277,000), and Punta Gorda (\$462,000). It is worth noting that performance in Jacksonville and Ocala was enhanced by a \$3.7 million community development loan with a P/M/F of serving three different assessment areas in Florida. Because this loan impacts multiple Florida assessment areas, its volume was included within totals for the state of Florida.

For the investment test, Regions Bank received a rating of high satisfactory for the State of Florida. Performance was stronger than the statewide investment test performance in eight metropolitan limited-scope assessment areas, consistent with the statewide investment test performance in two metropolitan limited-scope assessment areas, and weaker than the statewide investment test performance in nine metropolitan limited-scope assessment areas. Investment levels were excellent in Daytona, Ft. Lauderdale, Gainesville, Jacksonville, Lakeland, Naples, The Villages, and West Palm Beach, while investment levels were significant in Sarasota and Tallahassee. Additionally, investment levels were adequate in Miami; poor in Ft. Myers, Ft. Walton, Homosassa Springs, Ocala, Palm Bay, Panama City, and Pensacola; and the bank made few, if any, investments in Punta Gorda.

For the service test, Regions Bank received a rating of low satisfactory for the State of Florida. Performance in the Ft. Myers and Jacksonville metropolitan assessment areas exceeded the bank's state performance due to good and excellent community development services, respectively. The bank had comparable service performance in Daytona, Ft. Lauderdale, Homosassa Springs, Lakeland, Miami, Naples, Ocala, Panama City, Pensacola, Sarasota, Tallahassee, and West Palm Beach. Of the 12 metropolitan assessment areas with comparable service performance, all had similar community development performance to the state with the exception of Homosassa which was weaker. However, retail delivery services were good in Homosassa, Miami, Pensacola, Sarasota, and West Palm Beach. Retail delivery services were adequate in Daytona, Lakeland, Naples, and Panama City and limited in Ft. Lauderdale, Ocala, and Tallahassee. The bank's performance was weaker in Ft. Walton, Gainesville, Palm Bay, Punta Gorda, and The Villages primarily due to limited community development performance.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating.

**NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW**

The following assessment areas were reviewed using limited-scope examination procedures.

**DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE FLORIDA NONMETROPOLITAN
ASSESSMENT AREAS**

- *Northern Florida Assessment Area (Calhoun, Holmes, and Jackson counties)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 1.4 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$237.1 million in deposits in this assessment area, representing a market share of 16.8 percent and 1.0 percent of Regions Bank’s total deposits in Florida.
- *Okeechobee Assessment Area (Okeechobee County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 0.3 percent of its branches in Florida.
 - As of June 30, 2020, the bank had \$27.1 million in deposits in this assessment area, representing a market share of 4.3 percent and 0.1 percent of Regions Bank’s total deposits in Florida.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Northern Florida	Consistent	Not Consistent (Below)	Consistent
Okeechobee	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

For the lending test, Regions Bank received a rating of high satisfactory for the State of Florida. Performance in the Northern Florida nonmetropolitan limited-scope assessment area was consistent with the statewide lending test performance, while the performance in the Okeechobee nonmetropolitan limited-scope assessment area was below the statewide lending test performance. For the geographic distribution of loans, lending levels were adequate in both nonmetropolitan limited-scope assessment areas, and the performance was good for the borrower distribution of loans in both nonmetropolitan limited-scope assessment areas. Community development lending

performance in limited scope nonmetropolitan assessment areas was as follows: the bank was a leader in Northern Florida (\$8.3 million) and made few, if any, in Okeechobee (\$19,000).

For the investment test, Regions Bank received a rating of high satisfactory for the State of Florida. Performance was below the statewide investment test performance in both nonmetropolitan limited-scope assessment areas. Investment levels were poor in the Northern Florida assessment area, and the bank made few, if any, investments in the Okeechobee assessment area.

For the service test, Regions Bank received a rating of low satisfactory for the State of Florida. Performance in the Northern Florida nonmetropolitan assessment area was comparable to the bank's state performance, while performance in the Okeechobee assessment area was weaker. Limited community development performance and retail delivery services contributed to overall poor service performance in the Okeechobee assessment area.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

Georgia

CRA RATING FOR GEORGIA: SATISFACTORY

The Lending Test is rated: Low Satisfactory

The Investment Test is rated: Outstanding

The Service Test is rated: High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a relatively high level of community development loans in its Georgia assessment areas.
- The bank provides an excellent level of qualified community development investments and grants that are responsive to community development needs of the Georgia assessment areas.
- Retail banking services are good in the bank's Georgia assessment areas.
- The bank provides a relatively high level of community development services that benefit low- and moderate-income residents and small business in the Georgia assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in Georgia:

- Atlanta

Limited-scope reviews were conducted for the remaining 12 assessment areas:

- Albany
- Athens
- Dalton
- Elbert-Wilkes
- Gainesville
- Jefferson-Jenkins
- Northeast Georgia
- Northwest Georgia
- Rome
- Savannah
- Southwest Georgia
- Valdosta

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN GEORGIA

As of June 30, 2020, Regions Bank had \$7.5 billion in deposits in Georgia accounting for 6.2 percent of the bank's total deposits. Regions Bank operated 104 branch offices in Georgia as of December 31, 2020, representing 7.6 percent of the bank’s total branches. HMDA-reportable lending in Georgia accounted for 7.5 percent of total institutional HMDA-reportable lending by number of loans and 9.0 percent by dollar volume. CRA small business lending in Georgia accounted for 7.1 percent of the bank’s total CRA small business lending by number of loans and 7.5 percent by dollar volume. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was greater than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Statewide Summary of Lending Activity
Assessment Areas Located in
Georgia

Loan Type	#	%	\$ (000s)	%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN GEORGIA

Lending Test

The lending test rating in the state of Georgia is low satisfactory. Overall, performance in Georgia with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, Regions makes a relatively high level of community development loans in Georgia.

During the review period, Regions Bank reported 10,101 HMDA-reportable loans and 6,266 small business loans in Georgia. The rating for Georgia is based on performance in the Atlanta full-scope assessment area. Approximately 68.0 percent of the bank's HMDA-reportable and small business lending by number of loans in Georgia occurred within this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of Georgia is derived from the Atlanta full-scope assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

Regions Bank makes a relatively high level of community development loans in the state of Georgia. During the review period, the bank originated or renewed 301 qualifying community development loans totaling \$249.1 million within its Georgia assessment areas, including 235 loans totaling \$209.5 million directly benefiting the Atlanta full-scope assessment area.

While the bank was a leader in making community development loans in Atlanta, performance across 11 of the 12 limited-scope assessment areas was noticeably weaker, with 9 of those areas considered poor or very poor. Moreover, all but one of the community development loans made across limited-scope assessment areas were PPP loans, and while PPP loans were a need for part of the review period, they were not the only need throughout these assessment areas. Additionally, the bank has notable market share throughout most of the limited-scope assessment areas. As such, weaker performance in limited-scope areas was considered in the assessment of the bank's overall community development lending performance for the state of Georgia.

The total community development lending includes four loans totaling \$3.5 million with a P/M/F of serving a broader statewide or regional area that includes five of the bank's assessment areas in the state, including Atlanta, Dalton, Rome, Northeast Georgia, and Northwest Georgia. The most impactful of these loans was a renewing line of credit for \$500,000 to a CDFI that provides small business financing and technical assistance in Atlanta and Northeast Georgia.

Despite the weaker performance in limited-scope assessment areas, the bank was considered responsive to the credit and community development needs within the state of Georgia. As a result, and in addition to the total community development lending previously noted, the bank received positive consideration for 25 community development loans totaling \$95.0 million that were outside any of the bank's assessment areas in the state. The most impactful of these activities included three loans totaling \$10.8 million for construction and rehabilitation of affordable housing using LIHTCs. The projects were designed to create 148 new units of affordable housing for low-income individuals and/or families. More information on community development loans can be found in the full-scope assessment area section of this report.

Investment Test

The investment test rating for Georgia is outstanding.

Regions Bank made an excellent level of qualified investments and contributions totaling \$236.1 million in Georgia. The bank had qualified investments of \$233.6 million in the Georgia assessment areas, with approximately 85.7 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$2.5 million. Further, the bank made \$238,000 in contributions that benefit a broader statewide area that includes the Georgia assessment areas. The bank donated \$200,000 to support the statewide network of small business development centers, as well as donations to support statewide microenterprise and workforce development initiatives.

Atlanta was the assessment area in the state reviewed using full-scope procedures. Approximately 91.6 percent of combined investment and contribution activity was in this assessment area, compared to 64.9 percent of deposits in the market as of June 30, 2021. Performance in the assessment area was excellent. The bank was considered responsive to community credit needs in the state. Therefore, positive consideration was given for \$16.7 million in investments and \$26,000 in donations that benefit a broader statewide area, without a purpose, mandate, or function of serving the Georgia assessment areas. All of the investments are in LIHTC projects that provide affordable housing.

Additional details regarding investments and contributions can be found in the full-scope assessment area section.

Service Test

The service test rating for Georgia is high satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas. Overall, banking services and hours of operations do not vary in a way that inconveniences the bank's assessment areas, including low- and moderate-income geographies or low- and moderate-income individuals. The record of opening and closing of branch offices has not adversely affected the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period the bank opened 15 branch offices in Georgia, of which 14 were opened in the Atlanta full-scope assessment area. Of the branches opened, two were located in moderate-income tracts, four were located in middle-income tracts, and nine were located in upper-income tracts. The bank closed 18 branch offices throughout the state; of those closed, one was in a low-income tract, three were in moderate-income tracts, nine in middle-income tracts, and five in upper-income tracts. Overall, the bank's retail service performance is considered good in Georgia.

Community Development Services

Regions Bank provides a relatively high level of community development services that benefit low- and moderate-income residents and small businesses in Georgia. During the examination period, employees engaged in 432 qualified service activities totaling 3,619 hours in the Georgia assessment areas. The majority of community development services were provided in the Atlanta full-scope assessment area, where performance was good. Employees engaged in 708 service hours in limited-scope assessment areas. Finally, bank employees engaged in 23 hours of qualified community development services that benefited a broader statewide or regional area, including the bank's assessment areas.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

METROPOLITAN AREA
FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ATLANTA, GEORGIA ASSESSMENT AREA

Overview

The Atlanta assessment area consists of 24 of the 29 counties that comprise the Atlanta-Sandy Springs-Roswell, Georgia MSA, including Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, Dawson, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Haralson, Heard, Henry, Morgan, Newton, Paulding, Pickens, Rockdale, Spalding and Walton counties. As of December 31, 2020, Regions Bank had 68 branches in the Atlanta assessment area, representing 65.4 percent of its Georgia branches. The Atlanta assessment area's combined HMDA-reportable and CRA small business lending comprises 5.0 percent of the institution's lending overall, by number of loans, and 68.0 percent of the institution's lending in the state.

The Atlanta banking market is competitive, with a significant presence of national and multi-regional banks. According to the June 30, 2020 FDIC Summary of Deposits Report, there were 77 financial institutions operating 1,161 branch locations in the Atlanta assessment area. Ranked 7th, Regions Bank held 2.5 percent deposit market share with approximately \$4.8 billion in total deposits. Leaders in the Atlanta assessment area were Bank of America, followed by Truist Bank and Wells Fargo Bank.

HMDA-reportable lending and CRA lending are similarly competitive. For HMDA-reportable lending, Regions Bank ranked 31st out of all reporters for each year during the review period; even though Regions Bank's ranking remained the same, the number of HMDA reporters in the assessment area changed with 870 reporters in 2018, 920 reporters in 2019, and 886 reporters in 2020. Overall, Regions Bank originated or purchased 0.7 percent of total HMDA-reportable loans in the assessment area in 2018, 0.8 percent in 2019, and 0.7 percent in 2020. Wells Fargo and Quicken Loans were the top HMDA lenders in the market for 2018, 2019, and in 2020.

For CRA lending, Regions Bank ranked 18th out of 209 CRA loan reporters in 2018 with 0.7 percent of CRA loans. In 2019, the bank ranked 18th out of 222 reporters with 0.6 percent of total CRA loans. In 2020, Regions

Bank ranked 17th out of 322 reporters with 1.4 percent of total CRA loans. American Express Bank and Bank of America were the top CRA lenders in the market for 2018, 2019 and 2020.

Population and Income Characteristics

Atlanta is the 9th largest metro area in the U.S., with a population of more than 6.1 million by the end of 2020.⁴¹⁸ The assessment area had an estimated population of 5.9 million, and a growth of 15.4 percent since the 2010 census.⁴¹⁹ Fulton County, home to the City of Atlanta, was the most populous county with 1.1 million people.⁴²⁰ Other large population centers were the neighboring counties of Gwinnett, Cobb, and DeKalb, with a combined population of approximately 2.5 million.⁴²¹ Forsyth County experienced the highest population surge since 2010 with 43.2 percent, followed by Cherokee County with 24.4 percent, and Barrow County with 20.4 percent.⁴²²

According to 2020 FFIEC census data, the Atlanta assessment area contains 934 census tracts: 101 low-income census tracts (10.8 percent), 241 moderate-income tracts (25.8 percent), 285 middle-income tracts (30.5 percent), 299 upper-income tracts (32.0 percent), and 8 tracts with unknown income levels (0.9 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC’s estimated median family income. The following table sets forth the estimated median family income for the Atlanta MSA and shows that the median family income increased between 2018 and 2020. The chart also provides a range of the estimated annual family income for each income category (low, moderate, middle, and upper).

**Borrower Income Levels
Atlanta-Sandy Springs-Roswell, GA MSA**

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2018	\$74,400	0 - \$37,199	\$37,200 - \$59,519	\$59,520 - \$89,279	\$89,280 - & above
2019	\$79,200	0 - \$39,599	\$39,600 - \$63,359	\$63,360 - \$95,039	\$95,040 - & above
2020	\$82,200	0 - \$41,099	\$41,100 - \$65,759	\$65,760 - \$98,639	\$98,640 - & above

There is considerable variation in the median family income in the counties throughout the assessment area. According to 2020 FFIEC census data, Clayton County had the lowest median family income at \$45,702, followed by Spalding at \$48,886 and Heard County at \$51,108. Forsyth County had the highest median family income at \$101,155. Nearly 40.0 percent of families are considered low- to moderate-income, and 22.9 percent of the total families living in low- and moderate-income tracts have incomes below poverty level.

Financial instability is a concern throughout parts of the assessment area. According to 2020 census data, the percentage of families with incomes below the poverty level in the Atlanta MSA was 12.0 percent, while the poverty rate was 14.2 percent statewide. Clayton County had the highest percentage of families living in poverty at 21.1 percent, and the largest percentage of families considered low- to moderate -income at 58.2 percent. Fulton County had the largest number of low-income families at 48,574 where 12.9 percent of families were estimated to live below poverty levels. Spalding County had the largest percentage of families considered low-income at 34.4 percent, and the second largest percentage of families living in poverty at 18.0 percent. The Prosperity Now Scorecard found that 31.1 percent of metro Atlanta households are without sufficient liquid assets to subsist at the poverty level for three months in the absence of income.⁴²³

Economic Conditions

The COVID-19 global pandemic represented a major event impacting the economy in Atlanta and nationwide. During 2018 and 2019, the Atlanta region continued to benefit from a diverse economy. Key economic drivers included population growth, new businesses and investments, and construction projects.⁴²⁴ At the onset of the COVID-19 pandemic, job insecurity escalated exponentially, and many businesses suffered due to closing mandates. Three industries impacted by this major event were hospitality, restaurants, and aviation, which accounted for 4.7 percent of the Gross Domestic Product (GDP) share in the state of Georgia.⁴²⁵ Notwithstanding the damages of the pandemic, the Atlanta MSA had the lowest rate for job loss at 2.8 percent compared to other major metropolitan areas in the country.⁴²⁶

The economic impact of the pandemic was reflected in the unemployment rates across the nation. While in 2018 and 2019 the unemployment rates were trending downwards, in 2020, they suffered sharp increases. In April 2020, the unemployment rate in the country reached 7.2 percent, the highest level since 1948.⁴²⁷ In the state of Georgia, the unemployment rate went from 4.0 percent in 2018 to 3.5 percent in 2019, and, by 2020, the rate reached 6.5 percent.⁴²⁸ Similarly, within the assessment area, the unemployment rate went from 3.9 percent in 2018 to 3.4 percent in 2019. By 2020, the unemployment rate increased to 6.9 percent.⁴²⁹

As illustrated in the charts below, among all the counties in the assessment area, Clayton County had the highest unemployment rate in 2018 at 5.0 percent, and 2019 at 4.4 percent. During the pandemic in 2020, Clayton County endured the highest surge in unemployment reaching 10.3 percent. According to the Census data in 2019, this county had 3,781 employer establishments ranking 17th among the other counties in the assessment area, and a

population of 297,595. Although in 2018 and 2019, Newton and Spalding counties followed in ranking of high unemployment rates, Fulton and DeKalb counties suffered the second highest surge as a result of the pandemic in 2020. Based on the Census data in 2019, Fulton County had largest number of employer establishments with 37,892 and DeKalb County had the 4th largest with 17,293 employer establishments.

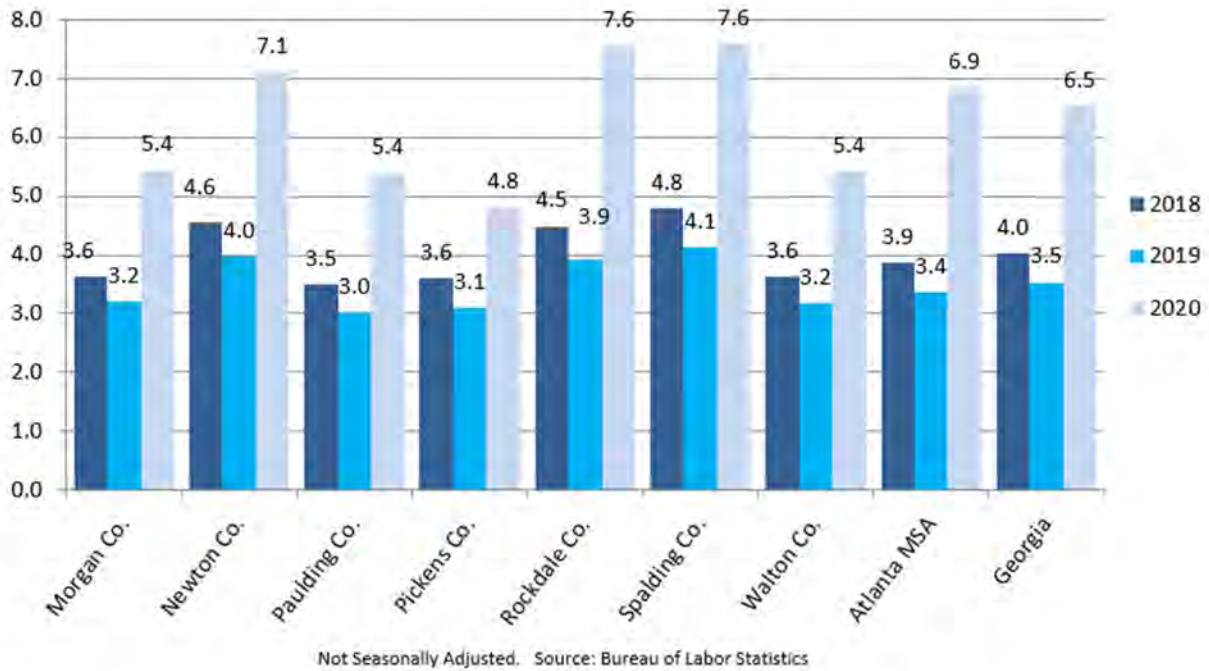

Unemployment Rates - GA Atlanta (1 of 3)

Unemployment Rates - GA Atlanta (2 of 3)

Unemployment Rates - GA Atlanta (3 of 3)

The Atlanta MSA is the 9th largest labor market in the nation.⁴³⁰ Largest sectors of the economy include government, retail trade, health care, and accommodation and food services.⁴³¹ The metropolitan area is also a hub for Fortune 1000 companies and elite Fortune 500 companies.⁴³² Some of these were also the largest employers in the metropolitan area in 2020, namely The Home Depot with 16,500 employees and Delta Airlines with 34,500 employees.⁴³³ Atlanta is also home to the Hartsfield-Jackson Atlanta International Airport, the world’s busiest passenger airport for 21 consecutive years as of 2019.⁴³⁴ The airport’s estimated annual economic impact in 2020 was \$65 billion providing 63,000 jobs.⁴³⁵ The United Postal Service (UPS) was also a major contributor to the economy of the area by creating 3,000 jobs in 2018.⁴³⁶

As of March 2020, the economic conditions in the metropolitan area were considered to be robust.⁴³⁷ As of March 2020, nonfarm payrolls increased 2.1 percent from 2019.⁴³⁸ Additionally, the education and health services industries expanded by adding 18,000 jobs, as such, Emory University and Emory Healthcare were among the top employers in the metropolitan area.⁴³⁹ Correspondingly, as of May 2020, the healthcare support occupational group earned above the national mean wage at \$16.40 (a 2.0 percent difference), while educational instruction and library occupational group earned below the national mean wage at \$25.94 (a negative 10.0 percent difference).⁴⁴⁰ Occupations with higher mean hourly wages included computer network architects and statisticians, at \$59.85 and \$53.21, respectively. Occupations with lower mean hourly wages included computer user support specialists and computer network support specialists at \$28.15 and \$34.62, respectively.⁴⁴¹

Small businesses are an important part of the economy in the assessment area. Out of the 336,476 businesses, 93.1 percent had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses. From the total number of small businesses, 28.2 percent were in low- or moderate-income tracts. Businesses with revenues less than or equal to \$1 million received a total of 73,389 small business loans (as defined by the Community Reinvestment Act) in 2018, and 80,605 loans in 2019, representing an increase of 9.8 percent.⁴⁴² Heard County's small businesses have historically received the lowest number of small business loans, with 40 received for each of both years 2018 and 2019. Fulton County's small businesses received 17,451 small business loans in 2018, and 19,039 in 2019, the highest number amongst the other counties in the assessment area.⁴⁴³ Additionally, in 2018 and 2019, an average of 95.1 percent of small business loans were in the amount of less than \$100,000 indicating that banks were providing the types of loans that small businesses need.⁴⁴⁴

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act) enacted in March 2020 allocated billions of dollars for economic aid. Under this law, businesses in the assessment area received approval for a total of 381,091 Paycheck Protection Program (PPP) loans aimed at job retention.⁴⁴⁵ Businesses in Heard County received the least number of PPP loans among the remaining counties in the assessment area for a total of 169 loans totaling \$5 million in approved funds.⁴⁴⁶ Businesses in Fulton County received the largest number of PPP loans among all the other counties with 106,528 loans totaling \$6.5 billion.⁴⁴⁷

Businesses in the assessment area have access to different resources. For example, the Small Business Development Center in the University of Georgia provides resources and training.⁴⁴⁸ This center has been designated as one of Georgia’s providers of small business assistance.⁴⁴⁹ Additionally, the city of Atlanta offers investment programs designed to revitalize targeted commercial areas, promote business development projects, and stimulate job creation.⁴⁵⁰ They also offer resources for small and women-owned businesses looking to expand or relocate to Atlanta.⁴⁵¹

According to 2020 census data, there are approximately 2.2 million housing units in the assessment area, of which 56.6 percent are owner-occupied, 32.7 percent are rental units, and 10.7 percent are vacant. From the total of housing units, 13.1 percent were owner-occupied units located in low-income tracts. The median age of the housing stock in the assessment area was 30 years. Housing units in the low- and moderate-income census tracts were older compared to the assessment area overall, with the median age of housing stock at 43 for low -income tracts and 35 for moderate-income tracts. The median housing value in the assessment area was \$169,037. Forsyth County had the highest median housing value at \$267,300 and Clayton County had the lowest median housing value at \$85,200. Forsyth, Fayette, Dawson, Cherokee, Pickens, Paulding, and Barrow counties had the highest homeownership rates (above 75.0 percent), and Clayton County had the lowest rate at 49.5 percent.⁴⁵² Within the low-income tracts, rental units accounted for more than half of the housing units at 57.6 percent. Similarly, within moderate-income tracts, rental units accounted for 43.6 percent of the total units within this category. Also, 20.6 percent of total units within low-income tracts were vacant. These factors suggest that lending may be more challenging in low- and moderate- income areas than in other areas.

The housing market for the Atlanta metropolitan area was considered balanced as of March 2020, with a declining sales vacancy rate of 2.1 percent.⁴⁵³ The low available inventory of 3.1 months was associated with a decrease in distress properties in the market.⁴⁵⁴ New homes sales were estimated to be 21,550 with an average sale price of \$364,600, while existing home sales were estimated to be 132,200 with an average sale price of \$269,700.⁴⁵⁵ High sales prices were related to a significant decline in distress properties.⁴⁵⁶ Construction of new homes was considered moderate, with a total of 26,000 approved new single-family homes in February of 2020.⁴⁵⁷ Cobb and Gwinnett Counties accounted for 42.0 percent of the new single-family home permits.⁴⁵⁸

Furthermore, the percentage of homes affordable for a four-person family earning 80.0 percent of the area median income between 2014 and 2018 varied by county.⁴⁵⁹ Only 8.8 percent of all homes were affordable to those earning 80.0 percent of the area median income in Forsyth County, followed by Fayette County at 14.4 percent.⁴⁶⁰ This figure increased drastically to 78.4 percent in Clayton County. More than half of low-income homeowners paid 30.0 percent or more of household income towards housing costs and were therefore considered cost-burdened from 2013-2017. In Fayette County, 75.0 percent of low-income homeowners were cost-burdened, followed by Dekalb County at 73.0 percent and Gwinnett County at 72 percent. The number of cost-burdened households with annual incomes between \$35,000 and \$50,000 sustained the greatest increase in 2020.⁴⁶¹ Based on 2020 FFIEC census data, 55.8 percent of households below poverty level were in low- and moderate-income tracts within the assessment area.

During the 2018 through 2020 period, the Atlanta MSA rental housing market experienced renter household growth and low vacancy rates at 5.5 percent.⁴⁶² The price of rent increased faster than household incomes among renters, which magnified the problem of rent affordability.⁴⁶³ High demand for rental units and new apartment construction contributed to these surges.⁴⁶⁴ The percentage of one-bedroom rental units considered affordable for a two-person family earning 80.0 percent of the area median income between 2014 and 2018 was the lowest at 41.6 percent in Forsyth County, followed by 45.6 percent in Fulton County.⁴⁶⁵ For a two-person family earning 50.0 percent of the area median income, the affordability reached a low 8.9 percent in Fayette County, followed by 12.6 percent in Henry County.⁴⁶⁶ Based on 2020 FFIEC census data, in the assessment area, 81 percent of low-income renters were considered cost-burdened, meaning that rental costs accounted for more than 30.0 percent of household income. Additionally, 55.9 percent of cost-burdened renters were in low- and moderate-income tracts within the assessment area.

Demographic Characteristics by Census Tract

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development and economic landscapes, individuals familiar with the community and with community development activities were contacted. These individuals discussed the various opportunities and challenges in the region and how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

According to a community contact, small business credit needs remain unmet. There are opportunities for banks to help address the credit needs of small businesses. The contact noted that businesses, particularly those contracting work for federal or local agencies, have been challenged in obtaining unsecured lines of credit. A line of credit of \$1 million or less is the most difficult for small businesses to find, according to the contact. Although some banks may offer a business owner a credit card in lieu of a line of credit, the contact noted that this is not usually a good alternative as the credit card may accrue higher interest, cannot be billed from, and presents longer term challenges for the business. The same contact also described the importance of banks building a relationship with small businesses and opening bank accounts after seeing many businesses blocked from accessing PPP loans because many banks required applicant firms to have a bank account with the institution. There is also an opportunity for banks to provide financial education for small business owners according to the contact.

Another community contact indicated that there is a need for more down payment assistance for homebuyers in the assessment area. The contact noted that the low housing stock in the area has been an issue, in addition to other pressures impacting housing affordability. The contact also noted that the demand for low-income housing tax credits is mostly driven by developers. Based on the information shared by the community contacts, there are opportunities for banks to provide credit products to support small businesses as well as investments or other community service activities that support affordable housing.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE ATLANTA, GEORGIA
ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending performance in the Atlanta assessment area is good. The geographic distribution of loans reflects adequate penetration throughout the assessment area, while the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making community development loans in the Atlanta assessment area.

The analysis included 5,708 HMDA-reportable loans and 4,647 CRA small business loans reported by the bank in the Atlanta assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Atlanta assessment area accounted for 76.0 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Georgia and 73.6 percent of its total statewide CRA small business lending by dollar

volume during the review period. In comparison, 63.1 percent of Regions Bank's Georgia deposits are in the Atlanta assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 5,708 HMDA-reportable loans analyzed, 2,089 loans (36.6 percent) were home purchase loans. Of the total home purchase loans made, 71 loans (3.4 percent) were located in low-income tracts, and 363 loans (17.4 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's home purchase lending in low-income tracts (3.4 percent) was above the percentage of owner-occupied units (3.3 percent) in these tracts. In 2018, the bank's home purchase lending in low-income tracts (2.5 percent) was slightly below the aggregate lending performance (3.2 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (3.8 percent) was similar to the aggregate lending performance (3.6 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (3.8 percent) was similar to the aggregate lending performance (3.7 percent) in these tracts.

Home purchase lending in moderate-income tracts is poor. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (17.4 percent) was similar to the percentage of owner-occupied units (19.9 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (17.5 percent) was slightly below the aggregate lending performance (20.2 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (16.4 percent) was slightly below the aggregate lending performance (20.9 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (18.0 percent) was slightly below the aggregate lending performance (20.5 percent) in these tracts.

Home Refinance Loans

Regions Bank made 2,630 home refinance loans from 2018 through 2020, which represents 46.1 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, 45 loans (1.7 percent) were located in low-income tracts, and 314 loans (11.9 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home refinance lending in low-income tracts (1.7 percent) was below the percentage of owner-occupied units (3.3 percent) in these tracts. In 2018, the bank's home refinance lending in low-income tracts (2.8 percent) was similar to the aggregate lending performance (2.7 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (1.8 percent) was slightly below the aggregate lending performance (2.4 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (1.4 percent) was below the aggregate lending performance (2.0 percent) in these tracts.

Home refinance lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (11.9 percent) was below the percentage of owner-occupied units (19.9 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (16.2 percent) was similar to the aggregate lending performance (16.7 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (14.6 percent) was similar to the aggregate lending performance (15.2 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (9.9 percent) was slightly below the aggregate lending performance (12.8 percent) in these tracts.

Home Improvement Loans

Regions Bank made 989 home improvement loans from 2018 through 2020, which represents 17.3 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, 13 loans (1.3 percent) were located in low-income tracts, and 150 loans (15.2 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home improvement lending in low-income tracts (1.3 percent) was below the percentage of owner-occupied units (3.3 percent) in these tracts. In 2018, the bank's home improvement lending in low-income tracts (2.1 percent) was similar to the aggregate lending performance (2.2 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (0.9 percent) was significantly below the aggregate lending performance (2.0 percent) in these tracts. In 2020, the bank's home improvement lending in low-income tracts (0.9 percent) was significantly below the aggregate lending performance (1.9 percent) in these tracts.

Home improvement lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (15.2 percent) was similar to the percentage of owner-occupied units (19.9 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income tracts (17.0 percent) was above the aggregate lending performance (11.9 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (15.2 percent) was slightly above the aggregate lending performance (13.0 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (13.2 percent) was similar to the aggregate lending performance (12.3 percent) in these tracts.

Small Business Loans

Regions Bank made 4,647 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 199 loans (4.3 percent) were located in low-income tracts, and 1,016 loans (21.9 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's small business lending in low-income tracts (4.3 percent) was similar to the percentage of businesses (5.5 percent) in these tracts. In 2018, the bank's small business lending in low-income tracts (5.3 percent) was slightly above the aggregate lending performance (4.6 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (6.0 percent) was above the aggregate lending performance (4.7 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (3.2 percent) was below the aggregate lending performance (4.9 percent) in these tracts.

Small business lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (21.9 percent) was similar to the percentage of businesses (22.7 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (24.2 percent) was slightly above the aggregate lending performance (20.0 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (24.5 percent) was slightly above the aggregate lending performance (20.4 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (19.9 percent) was similar to the aggregate lending performance (20.6 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is poor. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (5.6 percent) was below the percentage of low-income families (22.9 percent). In 2018, the bank's home purchase lending to low-income borrowers (4.9 percent) was slightly below the aggregate lending performance (6.4 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (5.7 percent) was slightly below the aggregate lending performance (6.9 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (6.0 percent) was slightly below the aggregate lending performance (8.0 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (19.8 percent) was above the percentage of moderate-income families (16.7 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (18.1 percent) was similar to the aggregate lending performance (18.2 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (21.4 percent) was similar to the aggregate lending

performance (21.6 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (19.9 percent) was similar to the aggregate lending performance (22.3 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (7.3 percent) was below the percentage of low-income families (22.9 percent). In 2018, the bank's home refinance lending to low-income borrowers (10.5 percent) was slightly above the aggregate lending performance (9.1 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (9.9 percent) was above the aggregate lending performance (6.6 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (5.5 percent) was slightly above the aggregate lending performance (4.4 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (14.4 percent) was similar to the percentage of moderate-income families (16.7 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (19.7 percent) was slightly above the aggregate lending performance (16.5 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (18.1 percent) was above the aggregate lending performance (14.4 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (11.7 percent) was similar to the aggregate lending performance (11.7 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is good. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (7.3 percent) was below the percentage of low-income families (22.9 percent). In 2018, the bank's home improvement lending to low-income borrowers (7.6 percent) was significantly above the aggregate lending performance (5.0 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (7.8 percent) was above the aggregate lending performance (5.7 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (6.5 percent) was slightly above the aggregate lending performance (5.4 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is good. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (16.2 percent) was similar to the percentage of moderate-income families (16.7 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (15.5 percent) was above the aggregate lending performance (11.3 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (17.6 percent) was slightly above the aggregate lending performance (14.2 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (15.4 percent) was above the aggregate lending performance (12.1 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. From 2018 through 2020, 60.8 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 93.1 percent of total businesses in the assessment area are classified as small businesses. In 2018,

the bank's small business lending to small businesses (68.7 percent) was above the aggregate lending performance (46.7 percent) to these businesses. In 2019, the bank's small business lending to small businesses (69.0 percent) was above the aggregate lending performance (48.0 percent) to these businesses. In 2020, the bank's small business lending to small businesses (54.4 percent) was above the aggregate lending performance (42.3 percent) to these businesses. Lastly, 91.4 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank is a leader in making community development loans in the Atlanta assessment area. During the review period, the bank originated or renewed 30 community development loans totaling \$131.3 million and 205 community development PPP loans totaling \$78.2 million. Specifically, the bank originated or renewed \$89.3 million in affordable housing initiatives; \$64.7 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; \$47.1 million to support economic development; and \$8.4 million towards community services benefiting LMI individuals and families.

Most of the qualified loans were impactful and responsive to assessment area needs. Additionally, the bank's current lending by number of loans and dollar volume exceeds most peer performance in this area. Some of the most impactful loans directly benefiting the assessment area include:

- Eight loans totaling \$77.7 million for new construction of apartments using LIHTCs. The loans were originated as construction, bridge, and permanent financing in various phases of the LIHTC project. The projects were designed to create 673 new units of affordable housing for low-income individuals and/or families throughout the assessment area.
- Two loans totaling \$5.9 million were originated to a nonprofit for the purpose of building new medical facilities using New Market Tax Credits. The medical facilities are Community Health Centers providing affordable health care options to primarily LMI individuals and families.
- \$3.5 million in new originations and a \$500,000 renewal in lines of credit for a nonprofit focused on transitional housing for LMI women and children. Each of these lines of credit was originated for the purchase of condo units and/or apartment complexes used by the organization to house LMI women and children.
- One renewing line of credit to a local CDFI totaling \$1 million. The line of credit was created exclusively for the purpose of allowing the CDFI to create and maintain affordable housing developments in the city of Atlanta.

INVESTMENT TEST

Regions Bank's investment performance in the Atlanta assessment area is excellent. The bank made an excellent level of investments and grants, and made significant use of complex investments to support community development initiatives. Qualified investments and contributions demonstrate excellent responsiveness to a wide

range of community development needs. Combined investment and contribution activity inside the assessment area totaled nearly \$216.3 million.

The bank made investments (excluding contributions) totaling \$214.0 million in the Atlanta assessment area, including \$191.1 million in new investments during the review period. The bank was responsive to the need across the region for affordable housing, utilizing several different types of investment vehicles during the review period. First, the bank invested in six LIHTC projects totaling \$55.0 million that provided nearly 1,000 new affordable units. Additionally, the bank invested approximately \$129.4 million in mortgage-backed securities that primarily financed affordable multifamily housing. Third, the bank invested \$1.5 million in a fund that provides low-interest-rate gap or mezzanine financing for affordable housing projects that might not otherwise get developed, creating a model for private sector engagement in addressing the affordable housing need in Atlanta. During the review period, the bank also invested \$5.3 million in two SBICs, financing small business in the assessment area. Lastly, the bank held investments totaling \$22.9 million from prior examination periods, including several LIHTC investments, two investments in SBICs, and several mortgage-backed securities.

Regions Bank made contributions totaling \$2.3 million during the review period. Specifically, the bank provided \$1.0 million to support economic development, \$929,000 for community services targeting low- and moderate-income individuals, and \$309,250 for affordable housing initiatives. The bank made \$240,000 in contributions responsive to the COVID-19 pandemic, providing support for emergency and recovery assistance to LMI individuals, nonprofits, and small businesses.

Examples of notable contributions include:

- A \$300,000 contribution to a national CDFI to support its expansion into Atlanta to provide its services to low-income women entrepreneurs;
- \$270,000 in donations to a CDFI that creates and preserves affordable housing throughout Atlanta;
- \$150,000 donation to support the construction of a Launch Pad space for small business owners to create prototypes for new products and receive other business services and assistance;
- \$400,000 in donations to support an entrepreneurship training program for small business owners hosted by a local university; and
- \$60,000 in donations to support a crime diversion program, providing educational assistance and workforce training to LMI youth.

The bank also made \$237,500 in donations that benefited all assessment areas in Georgia, which positively impacted the bank's performance in Atlanta.

SERVICE TEST

Regions Bank's service test performance in the Atlanta assessment area is good.

Retail Services

Retail banking services are adequate in the Atlanta full-scope assessment area.

The distribution of 68 branch offices and 66 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank's percentage of branches in low-income tracts was less than the percentage of households and businesses in the same geography: 7.5 percent of households and 5.5 percent of businesses were located in low-income census tracts compared to 2.9 percent of the bank's branches. The proportion of the bank's branches in moderate-income tracts, however, was comparable to the percentage of households and greater than the percentage of businesses in the same geography: 25.0 percent of total branches were in moderate-income tracts compared to 25.4 percent of households and 22.7 percent of businesses. Overall, the bank's retail delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels.

During the review period, Regions Bank did not open or close any branch offices or full-service ATMs in low-income tracts. However, the bank opened two branch offices and two full-service ATMs in moderate-income tracts. Regions also opened four branch offices in middle-income tracts and eight in upper-income tracts. Additionally, seven full-service ATMs were opened in middle-income tracts and nine in upper-income tracts. In terms of closures, Regions Bank closed one branch office and one full-service ATM in a moderate-income tract. The bank also closed seven branch offices in middle-income tracts and three in upper-income tracts. Additionally, seven full-service ATMs were closed in middle-income tracts and three were closed in upper-income tracts. Overall, the bank's record of opening and closing of branches has not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

Community Development Services

Regions Bank provides a relatively high level of community development services in the Atlanta assessment area. During the review period, Regions Bank employees engaged in 336 qualified service activities totaling 2,911 hours. Regions Bank's service activities benefited organizations that provide affordable housing, community services, economic development, and revitalization and stabilization support to low- and moderate-income individuals, communities, and small businesses in the Atlanta assessment area. The majority of the bank's service activities (79.5 percent) supported adult and youth financial education and homeownership counseling through partnerships with schools, community-based organizations serving LMI individuals, and small businesses.

Highlighted below are examples of community development activities undertaken during the review period:

- Bank employees engaged in over 700 hours with a nonprofit community development organization that provides education, housing, and support services to under-resourced neighborhoods in Atlanta.
- A Regions associate provided 80 hours of technical assistance with a nonprofit organization that supports and funds viable micro-businesses in an effort to create new jobs and business opportunities at the local level. The associate provided technical expertise with one of the organization's programs that specifically provides financial education, entrepreneurship training, mentorship, and capital to LMI formerly incarcerated adults.
- Regions employees provided technical assistance for an organization that provides free small business training programs that provide entrepreneurs the tools and networking opportunities to build and grow successful businesses within LMI tracts.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE GEORGIA METROPOLITAN ASSESSMENT AREAS

- *Albany Assessment Area (Dougherty County)*
 - As of December 31, 2020, Regions Bank operated three branches in the assessment area, representing 2.9 percent of its branches in Georgia.
 - As of June 30, 2020, the bank had \$235.6 million in deposits in this assessment area, representing a market share of 14.1 percent and 3.1 percent of Regions Bank's total deposits in Georgia.
- *Athens Assessment Area (Clarke County)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 1.9 percent of its branches in Georgia.
 - As of June 30, 2020, the bank had \$99.7 million in deposits in this assessment area, representing a market share of 2.8 percent and 1.3 percent of Regions Bank's total deposits in Georgia.
- *Dalton Assessment Area (Murray and Whitfield counties)*
 - As of December 31, 2020, Regions Bank operated three branches in the assessment area, representing 2.9 percent of its branches in Georgia.
 - As of June 30, 2020, the bank had \$274.8 million in deposits in this assessment area, representing a market share of 10.7 percent and 3.6 percent of Regions Bank's total deposits in Georgia.
- *Gainesville Assessment Area (Hall County)*
 - As of December 31, 2017, Regions Bank operated five branches in the assessment area, representing 4.8 percent of its branches in Georgia.
 - As of June 30, 2020, the bank had \$658.1 million in deposits in this assessment area, representing a market share of 12.3 percent and 8.7 percent of Regions Bank's total deposits in Georgia.
- *Rome Assessment Area (Floyd County)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 1.9 percent of its branches in Georgia.
 - As of June 30, 2020, the bank had \$237.0 million in deposits in this assessment area, representing a market share of 12.7 percent and 3.1 percent of Regions Bank's total deposits in Georgia.
- *Savannah Assessment Area (Chatham County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 1.0 percent of its branches in Georgia.
 - As of June 30, 2020, the bank had \$87.3 million in deposits in this assessment area, representing a market share of 1.2 percent and 1.2 percent of Regions Bank's total deposits in Georgia.
- *Valdosta Assessment Area (Lowndes County)*
 - As of December 31, 2020, Regions Bank operated one branches in the assessment area, representing 1.0 percent of its branches in Georgia.
 - As of June 30, 2020, the bank had \$114.3 million in deposits in this assessment area, representing a market share of 4.6 percent and 1.5 percent of Regions Bank's total deposits in Georgia.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Albany	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Athens	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Dalton	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Gainesville	Consistent	Not Consistent (Below)	Consistent
Rome	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Savannah	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Valdosta	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

For the lending test, Regions Bank received a rating of low satisfactory for the State of Georgia. Performance in one of the seven metropolitan limited-scope assessment areas was consistent with the statewide lending test performance, while performance in the remaining metropolitan limited-scope assessment areas was below the statewide rating. For the geographic distribution of loans, the lending level was good in Dalton and Gainesville; adequate in Albany, Rome, Savannah, and Valdosta; and poor in Athens. Performance was good for the borrower distribution of loans in Albany, Dalton, Gainesville, and Rome, and adequate in the remaining three metropolitan limited-scope assessment areas. Community development lending performance in limited-scope metropolitan assessment areas was as follows: the bank made a relatively high level in Gainesville (\$29.2 million); made an adequate level in Savannah (\$2.3 million); made a low level in Rome (\$1.4 million); and made few, if any, in Albany (\$299,000), Athens (\$70,000), Dalton (\$227,000), and Valdosta (\$40,000).

For the investment test, Regions Bank received a rating of outstanding for the State of Georgia. Performance was below the statewide investment test performance in all seven metropolitan limited-scope assessment areas. The bank’s level of investments was significant in Athens, Gainesville, Savannah, and Valdosta, while poor in Albany, Dalton, and Rome.

For the service test, Regions Bank received a rating of high satisfactory for the State of Georgia. Service performance in the Gainesville metropolitan assessment area was consistent with the bank's state performance. However, the remaining metropolitan assessment areas' performance was weaker than the state. Dalton and Valdosta had poor retail delivery services and very poor community development services, while Athens had poor retail services and poor community development services. Although the Albany and Rome assessment areas had a poor and very poor community development service performance, respectively, retail delivery services were adequate. The Savannah assessment area displayed excellent performance with community development services, however, very poor retail delivery services.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating.

NONMETROPOLITAN STATEWIDE AREAS LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE GEORGIA NON-METROPOLITAN ASSESSMENT AREAS

- *Elbert-Wilkes Assessment Area (Elbert and Wilkes counties)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 1.9 percent of its branches in Georgia.
 - As of June 30, 2020, the bank had \$99.5 million in deposits in this assessment area, representing a market share of 15.6 percent and 1.3 percent of Regions Bank's total deposits in Georgia.
- *Jefferson-Jenkins Assessment Area (Jefferson and Jenkins counties)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 1.9 percent of its branches in Georgia.
 - As of June 30, 2020, the bank had \$65.5 million in deposits in this assessment area, representing a market share of 14.9 percent and 0.9 percent of Regions Bank's total deposits in Georgia.
- *Northeast Georgia Assessment Area (Banks, Habersham, Jackson, Rabun, Stephens, and White counties)*
 - As of December 31, 2020, Regions Bank operated seven branches in the assessment area, representing 6.7 percent of its branches in Georgia.
 - As of June 30, 2020, the bank had \$488.5 million in deposits in this assessment area, representing a market share of 14.6 percent and 6.5 percent of Regions Bank's total deposits in Georgia.
- *Northwest Georgia Assessment Area (Chattooga, Gilmer, Gordon, and Polk counties)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 3.8 percent of its branches in Georgia.
 - As of June 30, 2020, the bank had \$236.3 million in deposits in this assessment area, representing a market share of 10.0 percent and 3.1 percent of Regions Bank's total deposits in Georgia.
- *Southwest Georgia Assessment Area (Crisp, Clay, Decatur, and Randolph counties)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 3.8 percent of its branches in Georgia.

- As of June 30, 2020, the bank had \$185.7 million in deposits in this assessment area, representing a market share of 16.8 percent and 2.5 percent of Regions Bank’s total deposits in Georgia.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Elbert-Wilkes	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Jefferson-Jenkins	Consistent	Not Consistent (Below)	Not Consistent (Below)
Northeast Georgia	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Northwest Georgia	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Southwest Georgia	Consistent	Not Consistent (Below)	Not Consistent (Below)

For the lending test, Regions Bank received a rating of low satisfactory for the State of Georgia. Performance in one of the five nonmetropolitan limited-scope assessment areas was consistent with the statewide lending test performance, whereas performance in the remaining four nonmetropolitan limited-scope assessment areas was below the statewide performance. For the geographic distribution of loans, lending levels were excellent in Southwest Georgia and adequate in the remaining four nonmetropolitan limited-scope assessment areas. Performance was good for the borrower distribution of loans in Northeast Georgia and Northwest Georgia and adequate in the remaining three nonmetropolitan limited-scope assessment areas. Community development lending performance in limited-scope nonmetropolitan assessment areas was as follows: the bank made an adequate level in Jefferson-Jenkins (\$1.4 million); made a low level in Southwest Georgia (\$1.1 million); and made few, if any, in Elbert-Wilkes (\$0), Northeast Georgia (\$70,000), and Northwest Georgia (\$48,000).

For the investment test, Regions Bank received a rating of outstanding for the State of Georgia. Performance was below the statewide investment test performance in all five nonmetropolitan limited-scope assessment areas. The bank’s investment levels were significant in Jefferson-Jenkins and Northwest Georgia; poor in Northeast Georgia and Southwest Georgia; and the bank made few, if any, investments in Elberton-Wilkes.

For the service test, Regions Bank received a rating high satisfactory for the State of Georgia. Performance in all the nonmetropolitan assessment area were below the bank’s state performance. In all four assessment areas the

retail delivery services, and community development services were weaker than the state performance with the exception of the Southwest assessment area in which the retail delivery service performance was consistent with the state.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

Illinois

CRA RATING FOR ILLINOIS: NEEDS TO IMPROVE

The Lending Test is rated: Low Satisfactory

The Investment Test is rated: Low Satisfactory

The Service Test is rated: Needs to Improve

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects poor penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes an adequate level of community development loans in its Illinois assessment areas.
- The bank provides an adequate level of qualified community development investments and grants that demonstrate adequate responsiveness to community development needs of the Illinois assessment areas.
- Retail banking services are very poor in the bank's Illinois assessment areas.
- The bank provides an adequate level of community development services throughout the Illinois assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in Illinois:

- Southern Illinois

Limited-scope reviews were conducted for the remaining eight assessment areas:

- Bloomington
- Carbondale
- Central Illinois
- Champaign
- Decatur
- Peoria
- Southeast Illinois
- Springfield

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN ILLINOIS

As of June 30, 2020, Regions Bank had \$1.1 billion in deposits in Illinois accounting for 0.9 percent of the bank's total deposits. Regions Bank operated 18 branch offices in Illinois as of December 31, 2020, representing 1.3 percent of the bank’s total branches. HMDA-reportable lending in Illinois accounted for 1.2 percent of total institutional HMDA-reportable lending by number of loans and 0.5 percent by dollar volume. CRA small business lending in Illinois accounted for 0.4 percent of the bank’s total CRA small business lending by number of loans and 0.5 percent by dollar volume. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was similar to the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Statewide Summary of Lending Activity
Assessment Areas Located in
Illinois

Loan Type	#	%	\$ (000s)	%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN ILLINOIS

Lending Test

The lending test rating in the state of Illinois is low satisfactory. Overall, performance in Illinois with regard to the geographic distribution of loans reflects poor penetration throughout the assessment area. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, Regions Bank makes an adequate level of community development loans in Illinois.

During the review period, Regions Bank reported 1,558 HMDA-reportable loans and 387 small business loans in Illinois. The rating for Illinois is based on performance in the Southern Illinois full-scope assessment area.

Approximately 18.1 percent of the bank's HMDA-reportable and small business lending by number of loans in Illinois occurred within this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is poor, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of Illinois is derived from the Southern Illinois full-scope assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

Regions Bank makes an adequate level of community development loans in the state of Illinois. During the review period, the bank originated or renewed 22 qualifying community development loans totaling \$10.1 million benefiting its Illinois assessment areas. The total community development lending includes one loan to a nonprofit for \$1.0 million with a P/M/F of serving a broader regional area that includes the bank's Southern Illinois and Carbondale assessment areas in the state.

The bank was considered responsive to the credit and community development needs within the state of Illinois. As a result, and in addition to the total community development lending previously noted, the bank received positive consideration for two community development loans totaling \$214,000 that were outside any of the bank's assessment areas in the state. More information on community development loans can be found in the full-scope assessment area section of this report.

Investment Test

The investment test rating for Illinois is low satisfactory.

Regions Bank made an adequate level of qualified investments and contributions totaling \$14.4 million in Illinois. The bank had qualified investments of \$12.6 million in the Illinois assessment areas, with approximately 28.9 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$253,500.

Southern Illinois was the assessment area in the state reviewed using full-scope procedures. Approximately 25.5 percent of combined investment and contribution activity was in this assessment area, compared to 19.9 percent of deposits in the market as of June 30, 2021. Performance in the assessment area was adequate.

The bank was considered responsive to the credit and community needs in its assessment areas. Therefore, the bank also received consideration for two investments totaling \$1.6 million within the state of Illinois but did not benefit one or more of the bank's assessment areas. These investments included one investment in an SBIC and one investment in a mortgage-backed security.

Additional details regarding investments and contributions can be found in the full-scope assessment area section.

Service Test

The service test rating for Illinois is needs to improve.

Retail Services

Delivery systems, including ATMs and branch office locations, are unreasonably inaccessible to significant portions of the bank's geographies and individuals of different income levels in the assessment areas. This evaluation was driven primarily by performance in the Southern Illinois full-scope assessment area. While there are no low-income census tracts in the full-scope assessment area, the bank did not have branches in any moderate-income tracts within the assessment area and displayed a limited number of branch offices in most of the low- and moderate-income tracts throughout the state. The reasonableness of business hours and services was not rated given the lack of branches in low- and moderate-income tracts in the full-scope assessment area. The record of opening and closing of branch offices has significantly adversely affected the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period, the bank did not open any branch offices in low- or moderate-income tracts; however, one branch office was opened in a middle-income tract in Illinois. The bank closed five branch offices throughout the state; of those closed, one was in a low-income tract, and four were in middle-income tracts. Overall, the bank's retail service performance is considered very poor in Illinois.

Community Development Services

Regions Bank provides an adequate level of community development services that benefit low- and moderate-income residents and small businesses in Illinois. During the examination period, employees engaged in 43 qualified service activities totaling 718 hours in the Illinois assessment areas, including 615 service hours in limited-scope assessment areas. Performance in the Southern Illinois full-scope assessment area was adequate. Additionally, performance in seven of the eight limited-scope assessment areas was adequate, good, or excellent. Finally, bank employees engaged in 60 service hours that benefited a broader statewide or regional area, including the bank's assessment areas.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

NONMETROPOLITAN STATEWIDE AREA
FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE SOUTHERN ILLINOIS ASSESSMENT
AREA

Overview

The Southern Illinois assessment area included Franklin, Marion, Perry, Randolph, and Washington counties in 2018 and 2019. In 2020, the bank removed Franklin County from the assessment area, and only Marion, Perry, Randolph, and Washington counties remained. As of December 31, 2020, Regions operated 3 branches in the assessment area, which represented 16.7 percent of the bank's branches statewide, 21.0 percent of the bank's statewide deposits, and 14.6 percent of the bank's total statewide HMDA-reportable and CRA small business loans (by dollar).

The Southern Illinois assessment area is a competitive banking market where national, regional, and local banks have a presence. According to the FDIC Summary of Deposits Report dated June 30, 2020, there were 30 financial institutions operating 60 branch offices in the assessment area with a total of \$2.7 billion in deposits.⁴⁶⁷ Regions Bank ranked 1st in deposit market share with 8.5 percent of deposits (\$226.3 million). After Regions, the top financial institutions for deposit market share consisted of Peoples National Bank (\$210.8 million), Buena Vista National Bank (\$189.0 million), and First National Bank of Steeleville (\$186.8 million).⁴⁶⁸

Regions Bank originated or purchased 4.3 percent of the HMDA-reportable loans in the Southern Illinois assessment area in 2018, ranking 5th out of 193 reporters. In 2019, the bank originated or purchased 3.7 percent of the HMDA-reportable loans in the assessment area, ranking 6th out of 188 reporters. In 2020, Regions Bank originated or purchased 4.1 percent of the HDMA-reportable loans in the assessment area, ranking 7th out of 157 reporters. In general, the top HMDA lenders in the market were Buena Vista National Bank, Peoples National Bank, and U.S. Bank National Association.

For CRA small business and small farm lending, Regions Bank ranked 19th out of 66 reporters in 2018, with 0.9 percent of reported loans in the Southern Illinois assessment area. In 2019, the bank ranked 28th out of 62 reporters, with 0.3 percent of reported loans. In 2020, Regions Bank ranked 8th out of 68 reporters, with 4.2 percent of reported loans. CRA lending in the assessment area was generally dominated by American Express, Chase Bank, and U.S. Bank National Association.

Population and Income Characteristics

The assessment area's population has declined since the last decennial census. As of April 1, 2020, the assessment area's population decreased 6.7 percent from 2010, reaching approximately 102,598 residents.⁴⁶⁹ Marion and Randolph counties are the most populous in the assessment area with an estimated 37,729 and 30,163 residents,

⁴⁶⁷ "Offices and Deposits of All FDIC-Insured Institutions Deposit Market Share Report." *Federal Deposit Insurance Corporation*, <https://www7.fdic.gov/sod/sodMarketRpt.asp?barItem=2>. Accessed 29 Mar. 2022.

⁴⁶⁸ *Ibid.*

⁴⁶⁹ "QuickFacts." *United States Census Bureau*, <https://www.census.gov/quickfacts/fact/table/US/PST045221>. Accessed 9 May 2022.

respectively.⁴⁷⁰ Washington County is the least populous county with approximately 13,761 residents.⁴⁷¹ From April 2010 to April 2020, all four counties in the assessment area saw a decrease in population. Randolph County had the largest decrease in population of 9.9 percent, followed by Washington County (6.5 percent), Perry County (6.3 percent), and Marion County (4.3 percent).⁴⁷²

The 2019 FFIEC census data showed that there were 43 census tracts in the five counties in the assessment area: 8 tracts were moderate-income (18.6 percent), 34 tracts were middle-income (79.1 percent), and 1 tract was upper-income (2.3 percent). After removal of Franklin County from the assessment area in 2020, the assessment area is now made up of 31 census tracts: 5 tracts are moderate-income (16.1 percent), 25 tracts are middle-income (80.7 percent), and 1 tract is upper-income (3.2 percent).⁴⁷³ During the review period, there were not any low-income or unknown income census tracts in the assessment area.

Furthermore, Franklin County had distressed middle-income tracts for both 2018 and 2019. During 2018, Franklin County’s distressed middle-income tracts were due to poverty; however, in 2019, the county’s distressed middle-income census tracts were due to unemployment. Additionally, in 2019, Perry County had distressed middle-income census tracts due to unemployment; however, in 2020, the county did not have any distressed middle-income census tracts.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Illinois State nonmetropolitan areas. The table below provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper). As shown, the median family income increased slightly during the review period. The median family income in 2018 was \$63,900 and increased in 2019 to \$64,200. For 2020, the median family income increased slightly again to \$65,800.

**Borrower Income Levels
IL State Non-metro**

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2018	\$63,900	0 - \$31,949	\$31,950 - \$51,119	\$51,120 - \$76,679	\$76,680 - & above
2019	\$64,200	0 - \$32,099	\$32,100 - \$51,359	\$51,360 - \$77,039	\$77,040 - & above
2020	\$65,800	0 - \$32,899	\$32,900 - \$52,639	\$52,640 - \$78,959	\$78,960 - & above

Poverty is a concern in the assessment area. From the period 2015 through 2019, Franklin, Marion, and Perry counties had the highest percentage of families living in poverty at 15.3 percent, 13.5 percent, and 12.4 percent, respectively.⁴⁷⁴ During this same period, Randolph and Washington counties had the lowest percentage of

families living in poverty at 8.6 percent and 4.2 percent, respectively.⁴⁷⁵ According to 2019 FFIEC census data, 23.9 percent of moderate-income families in the assessment area were below the poverty level. After the removal of Franklin County from the assessment area in 2020, the 2020 FFIEC census data showed that there was an increase in this percentage with now 27.5 percent of families located in moderate-income census living below the poverty level.

Economic Conditions

The assessment area is located in the southern portion of Illinois, and the counties comprising the assessment area are a part of different regions within that part of the state. Specifically, Franklin County is in the Southeast Region,⁴⁷⁶ while Randolph and Washington counties the Southwest Region, and Franklin and Marion counties are in the Southern Region.⁴⁷⁷ Most of the assessment area is rural, but residents have access to major highways such as Illinois Interstate Highway 70 and Illinois US Highway 50 that can take them to cities like Effingham and Mount Vernon (in Illinois) as well as St. Louis (in Missouri).⁴⁷⁸

Each region in southern Illinois has key industries that provide employment opportunities to residents in the area. In the Southern Region and Southwest Region, the key industries mostly consist of transportation, distribution logistics, and manufacturing.^{479,480} For the Southeast Region, the key industries include automotive, printing services, furniture, oil and gas production and transportation downstream metal products, production technology and heavy machinery, wood products, upstream chemical products leather and related products, and food processing and manufacturing.⁴⁸¹

Within the different regions in southern Illinois, there are a variety of companies that are headquartered in the area: National Railway Equipment and Pepsi MidAmerica are headquartered in the Southern Region;⁴⁸² Midland States Bancorp, North American Lighting, and RK Holdings, LLP are headquartered in the Southeast Region;⁴⁸³ and, Fkg Oil Company, Gilster-Mary Lee Packaging, and Prairie Farms Dairy are headquartered in the Southwest Region.⁴⁸⁴

Furthermore, there are a variety of employers in the Southern, Southeast, and Southwest regions that provide employment opportunities to the area. In the Southern Region, the largest employers include Aisin Electronics

Illinois, Aisin Light Metals, Aisin Manufacturing IL, Continental Tire, Champion Laboratories, Pepsi MidAmerica, and Walgreens.⁴⁸⁵ In the Southeast Region, the largest employers include North American Lighting, Inc. Continental Mills, Inc., Dana Sealing Manufacturing, and Toyota Boshoku Illinois.⁴⁸⁶ Lastly, in the Southwest Region, the largest employers include ADM, Amazon, Amsted Rail, Boeing, Conoco-Philips Petroleum, Fed Ex, Hershey, Phillips 66, Prairie Farms, P&G, Scott Air Force Base, U.S. Steel, Walgreens, and World Wide Technology.⁴⁸⁷

Regarding education, the assessment area is near Southern Illinois University, located in Carbondale, Illinois, which is ranked among the top five percent of all U.S. higher education institutions for research.⁴⁸⁸ In addition to offering research and education opportunities to the area, the university helps small businesses in southern Illinois by offering advising services, training, and resources through the Illinois Small Business Development Center.⁴⁸⁹ In 2020, the Small Business Development Center advised 696 clients, assisted 28 entrepreneurs to create new businesses, helped 5 businesses expand, created 67 new jobs, and retained 434 jobs.⁴⁹⁰ Additionally, the organization provided \$16.4 million in loans and investments as well as provided 83 business seminars that trained 1,569 individuals.⁴⁹¹

According to 2019 Dun & Bradstreet data, there were 4,573 businesses in the Southern Illinois assessment area.⁴⁹² Of the total businesses, 88.2 percent had total annual revenues less than or equal to \$1 million and thus were considered to be small businesses.⁴⁹³ Out of the total small businesses in the assessment area in 2019, 22.5 percent of them area were located in moderate-income census tracts.⁴⁹⁴ When Franklin County was removed from the assessment area in 2020, there was a decrease in the number of businesses within the assessment area; for 2020, there were 3,381 businesses in the Southern Illinois assessment area, 87.8 percent of those businesses were small businesses, and 20.8 percent of the small businesses were in moderate-income census tracts.⁴⁹⁵

Moreover, lending to small businesses has both increased and decreased during the review period. According to an analysis of CRA loan data from all reporters in the assessment area, the total number of small business loans (loans less than \$1 million in principal amount) originated to small businesses located in the assessment area increased 2.2 percent between 2018 and 2019. From 2019 to 2020, there was a 42.1 percent decrease in small business loans made to small businesses. The significant decrease in CRA reportable small business lending in 2020 was most likely due to competition from financial institutions, who were not CRA loan reporters, that made Paycheck Protection Loans to small businesses during the year.

The COVID-19 pandemic was a major event that impacted the economy in the assessment area. On March 20, 2020, Governor JB Pritzker signed Executive Order 2020-10 to help prevent the spread of the Coronavirus Disease 2019 (COVID-19).⁴⁹⁶ This order implemented stay-at-home orders for residents and instructed non-essential businesses to cease operations except for basic minimum operations.⁴⁹⁷ This order caused some businesses to reduce business operations, which resulted in a decrease in revenue. In order to help keep the nation's economy afloat during the crisis, the U.S. Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act in March 2020.⁴⁹⁸ The CARES Act established the Paycheck Protection Act (PPP), which provided loans to small businesses to cover payroll costs.⁴⁹⁹ In the assessment area, 4,347 PPP loans were approved with a total initial loan approval amount of \$206.3 million.⁵⁰⁰ Marion and Randolph counties had the most PPP loan approvals with the largest initial loan approval amounts. Specifically, Marion County had 1,651 PPP loan approvals with an initial approval amount of \$71.8 million, and Randolph County had 1,083 PPP loan approvals with an initial approval amount of \$66.9 million.⁵⁰¹

During the review period, the Southern Illinois assessment area saw a decrease and increase in unemployment. The unemployment rate in the assessment area was 4.9 percent for 2018 and 4.1 percent for 2019. In 2018 and 2019, Franklin County had the highest unemployment rate of 6.1 percent for 2018 and 5.2 percent for 2019, whereas Washington County had the lowest unemployment rate of 2.9 percent for 2018 and 2.5 percent for 2019. During 2020, the COVID-19 pandemic had a significant impact on the United States economy and caused unemployment to rise.⁵⁰² The unemployment rate in the assessment area increased to 7.9 percent for the year, which was less than the state's unemployment rate of 9.5 percent. Additionally, Marion County had the highest unemployment rate during the year at 9.3 percent, followed by Perry County at 9.4 percent and Randolph County at 7.1 percent.⁵⁰³ For 2020, Washington County had the lowest unemployment rate of 5.3 percent.

Unemployment Rates - IL Southern IL

According to the 2019 FFIEC census data, there were 66,752 total housing units in the assessment area: 65.6 percent were owner-occupied, 21.2 percent were rental, and 13.3 percent were vacant. In moderate-income census tracts 52.3 percent of units were owner-occupied, 31.5 percent were rental, and 16.2 percent were vacant.⁵⁰⁴ After Franklin County was removed from the assessment area, the 2020 FFIEC census data showed that there were 47,986 housing units in the assessment area: 65.9 percent were owner-occupied, 20.5 percent were rental, and 13.6 percent were vacant. In moderate-income census tracts, 50.0 percent of units were owner-occupied, 32.0 percent were rental, 18.0 percent were vacant.⁵⁰⁵ In 2019, the median age of housing stock in the assessment area was 54 years and was 61 years in moderate-income census tracts.⁵⁰⁶ In 2020, the median age of housing stock in the assessment area was slightly lower at 53 years, and the median age of housing stock in moderate-income census tracts remained the same at 61 years. These factors suggests that there may be limited opportunities for home purchase loans in moderate-income census tracts; however, there may be more refinancing and home improvement lending opportunities.

Furthermore, there is a significant portion of homeowners in the assessment area who are cost-burdened with housing.⁵⁰⁷ From the period of 2015 through 2019, Franklin County and Marion County had the highest percentage of homeowners who were cost-burdened at 16.9 percent and 16.6 percent, respectively.⁵⁰⁸ Washington and Perry counties had the second highest percentage of cost-burdened homeowners at 14.6 percent

and 14.2 percent, respectively.⁵⁰⁹ Lastly, Randolph County had the lowest percentage of cost-burdened homeowners in the assessment area at 12.9 percent.⁵¹⁰

Concerning rental expenses, the median gross rent for a two-bedroom apartment varied throughout the assessment area. During the period of 2015 through 2019, Washington County had the highest rental cost for a two-bedroom apartment at \$713.⁵¹¹ The second highest rental cost for a two-bedroom apartment during that period was in Randolph, Franklin, and Marion counties, where the cost was \$673, \$659, and \$622, respectively.⁵¹² Furthermore, Perry County had the lowest rental cost for a two-bedroom apartment at \$550.⁵¹³ Even though rental costs appear to be low in the assessment area, there are many households who are cost-burdened. Specifically, Franklin, Marion, and Perry counties have the highest percentage of renters who are cost-burdened at 39.6 percent, 38.2 percent, and 35.1 percent, respectively.⁵¹⁴ Randolph and Washington counties have the lowest percentage of renters who are cost-burdened at 33.5 percent and 23.3 percent, respectively.⁵¹⁵ Ultimately, the high percentage of renters who are cost-burdened shows that rent affordability is a problem in the assessment area.

Demographic Characteristics by Census Tract

The following tables present key demographic and business information used to help develop a performance context for the assessment area for the years 2018 through 2020. The data reflects the 2019 and 2020 FFIEC census data and Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the tables are discussed in this evaluation as they apply to specific parts of the analysis.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development and economic landscapes, individuals familiar with the community and with community development activities were contacted. These individuals discussed the various opportunities and challenges in the area and how financial institutions can be responsive to local community development needs.

One contact engaged in community development for economically and socially disadvantaged people discussed the challenges people face in Marion County as well as in two other counties that are located outside of the assessment area. This individual mentioned that Marion County and the two other counties consist of rural and poor communities. He explained that these three counties suffer economically due to population loss, lack of job opportunities, the lack of childcare facilities for working parents, and a need for affordable housing for low- and moderate-income people.

The contact discussed how the COVID-19 pandemic impacted the area. It was mentioned that the pandemic caused employment layoffs, and the unemployment rate in Marion County reached a peak of 22.4 percent in April 2020. The contact explained that businesses are rehiring, but the lack of affordable daycare has prevented many workers from returning to work. The contact also stated that finding affordable daycare has been a long-standing issue in Marion County as well as in the other two counties and that the COVID-19 pandemic has exacerbated this problem.

Furthermore, the individual discussed the community development and affordable housing needs of the area. He mentioned that financial education for low- and moderate-income individuals is greatly needed. Also, it was stated that there is a need for more affordable housing and multifamily housing. Concerning credit needs, he explained that those needs include home improvement loans because of the age of housing stock; home mortgages products with down payment assistance and home buyer programs; and small dollar loans. Additionally, the contact explained that there is a need for funding to provide ramps for senior citizens and funding to help repair front porches and roofs. Overall, the contact provided a list of opportunities for financial institutions to participate, which included financial education, budget counseling, homebuyer education, small dollar lending, and home improvement lending. Lastly, the contact stated that he feels that banks need to be intentional about educating the community about the benefits of having relationships with financial institutions.

Moreover, two individuals from an organization engaged in providing community development services for low-income individuals and families were interviewed. These individuals discussed the current economic conditions in Randolph County as well as in other counties that were outside of the assessment area. It was noted by the interviewees that Randolph County's economy is stable and that the higher income parts of the county include Redbud, Chester, Sparta, and Steepleville. One interviewee mentioned that there are many residents who commute to St. Louis, Missouri for higher paying professional jobs because of the higher cost of living in Illinois as well as the lack of high paying jobs within the area. This person also mentioned that the largest employers within Randolph County include Gilster-Mary Lee, Walmart, hospitals, and the school district. Further, it was stated by the contacts that many smaller businesses were not able to sustain themselves during the COVID-19 pandemic. Some of these smaller businesses had to close permanently.

Furthermore, the contacts discussed the general banking and credit needs of the area. For banking and credit needs, the contacts noted that there are many banks, primarily small and locally owned community banks, that are meeting the needs of low- to moderate-income individuals and families. Also, it was explained that although banks offer products and services that meet the needs of low- to moderate-income customers, many individuals use payday services. The contacts suggested that banks should consider removing the \$100 minimum needed to open a checking account as well as relaxing underwriting and collateral standards, especially during the pandemic. Lastly, the contacts highlighted that during the COVID-19 pandemic most banks provided extended drive-thru services to help serve the needs of residents.

The contacts also explained the affordable housing needs of the area and the barriers people face when trying to obtain homeownership. In particular, the contacts mentioned that there is a need from individuals on fixed incomes as well as from senior citizens for more decent affordable housing in Randolph County. Additionally, they stated that the biggest barrier for renters who want to become homeowners is the required down payment. It was noted that another barrier people face when trying to obtain home ownership is credit and credit scores. Lastly, there is a growing need from low- and moderate-income homeowners for funds to repair their homes, per the contacts.

The contacts identified opportunities for participation by local financial institutions. One opportunity is building better relationships between community organizations and financial institutions. Also, it was mentioned that there is an opportunity to institute a referral program with banks that would route low- to moderate-income individuals to the assistive services they need. Lastly, the contacts stated that they would like to see more innovation and non-traditional products and services from the banking community that are for low- to moderate-income individuals.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE SOUTHERN ILLINOIS ASSESSMENT AREA

LENDING TEST

Regions Bank's lending performance in the Southern Illinois assessment area is adequate. The geographic distribution of loans reflects poor penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. The bank makes an adequate level of community development loans in the assessment area.

The analysis included 248 HMDA-reportable loans and 63 CRA small business loans reported by the bank in the Southern Illinois assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Southern Illinois assessment area accounted for 15.9 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Illinois and 9.2 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 21.0 percent of Regions Bank's Illinois deposits are in the Southern Illinois assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance.

This assessment area contained no low-income tracts during the period 2018 through 2020. As a result, examiners did not rate performance in low-income tracts for each product but instead evaluated the bank's performance in moderate-income tracts. Considering all of these factors, Regions Bank's geographic distribution of loans reflects poor penetration throughout the assessment area.

Home Purchase Loans

Of the 248 HMDA-reportable loans analyzed, 77 loans (31.0 percent) were home purchase loans. Of the total home purchase loans made, six loans (7.8 percent) were located in moderate-income tracts. Home purchase lending in moderate-income tracts is poor. For the period of 2018 through 2019, Regions Bank's home purchase lending in moderate-income tracts (8.3 percent) was below the percentage of owner-occupied units (14.0 percent) in these tracts. In 2020, Franklin County was removed from the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home purchase lending in moderate-income tracts (6.9 percent) was below the percentage of owner-occupied units (11.1 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in moderate-income tracts (11.5 percent) was similar to the aggregate lending performance (12.5 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (4.5 percent) was significantly below the aggregate lending performance (14.9 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (6.9 percent) was below the aggregate lending performance (11.8 percent) in these tracts.

Home Refinance Loans

Of the 248 HMDA-reportable loans analyzed, 118 loans (47.6 percent) were home refinance loans. Of the total home refinance loans made, four loans (3.4 percent) were located in moderate-income tracts.

Home refinance lending in moderate-income tracts is poor. For the period of 2018 through 2019, Regions Bank's home refinance lending in moderate-income tracts (2.8 percent) was below the percentage of owner-occupied units (14.0 percent) in these tracts. In 2020, Franklin County was removed from the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home refinance lending in moderate-income tracts (4.3 percent) was below the percentage of owner-occupied units (11.1 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018,

the bank made no home refinance loans in moderate-income tracts (0.0 percent) and was significantly below the aggregate lending performance (8.3 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (6.5 percent) was slightly below the aggregate lending performance (7.4 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (4.3 percent) was similar to the aggregate lending performance (4.2 percent) in these tracts.

Home Improvement Loans

Of the 248 HMDA-reportable loans analyzed, 53 loans (21.4 percent) were home improvement loans. Of the total home improvement loans made, four loans (7.5 percent) were located in moderate-income tracts.

Home improvement lending in moderate-income tracts is poor. For the period of 2018 through 2019, Regions Bank's home improvement lending in moderate-income tracts (9.8 percent) was similar to the percentage of owner-occupied units (14.0 percent) in these tracts. In 2020, Franklin County was removed from the bank's assessment area, which caused a change in the demographic data for the assessment area. In that year, the bank made no home improvement loans in moderate-income tracts (0.0 percent), yet the percentage of owner-occupied units was 11.1 percent in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in moderate-income tracts (10.5 percent) was similar to the aggregate lending performance (11.6 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (9.1 percent) was slightly below the aggregate lending performance (11.4 percent) in these tracts. In 2020, the bank made no home improvement loans in moderate-income tracts (0.0 percent) and was significantly below the aggregate lending performance (14.6 percent) in these tracts.

Small Business Loans

Regions Bank made 63 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 11 loans (17.5 percent) were located in moderate-income tracts.

Small business lending in moderate-income tracts is good. For the period of 2018 through 2019, Regions Bank's small business lending in moderate-income tracts (33.3 percent) was above the percentage of businesses (22.5 percent) in these tracts. In 2020, Franklin County was removed from the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's small business lending in moderate-income tracts (9.5 percent) was below the percentage of businesses (20.9 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in moderate-income tracts (25.0 percent) was above the aggregate lending performance (18.2 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (60.0 percent) was significantly above the aggregate lending performance (18.6 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (9.5 percent) was below the aggregate lending performance (15.8 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across

borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is good. For the period of 2018 through 2019, Regions Bank's home purchase lending to low-income borrowers (16.7 percent) was similar to the percentage of low-income families (22.0 percent). In 2020, Franklin County was removed from the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home purchase lending to low-income borrowers (13.8 percent) was below the percentage of low-income families (20.6 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to low-income borrowers (19.2 percent) was significantly above the aggregate lending performance (8.4 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (13.6 percent) was above the aggregate lending performance (10.1 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (13.8 percent) was above the aggregate lending performance (10.3 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is good. For the period of 2018 through 2019, Regions Bank's home purchase lending to moderate-income borrowers (41.7 percent) was above the percentage of moderate-income families (18.9 percent). In 2020, Franklin County was removed from the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home purchase lending to moderate-income borrowers (24.1 percent) was above the percentage of moderate-income families (18.5 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to moderate-income borrowers (46.2 percent) was significantly above the aggregate lending performance (28.1 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (36.4 percent) was above the aggregate lending performance (26.2 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (24.1 percent) was similar to the aggregate lending performance (26.6 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. For the period of 2018 through 2019, Regions Bank's home refinance lending to low-income borrowers (7.0 percent) was below the percentage of low-income families (22.0 percent). In 2020, Franklin County was removed from the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home refinance lending to low-income borrowers (10.6 percent) was below the percentage of low-income families (20.6 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to low-income borrowers (2.5 percent) was significantly below the aggregate lending performance (7.9 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (12.9 percent) was significantly above the aggregate lending performance (6.5 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (10.6 percent) was significantly above the aggregate lending performance (4.1 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is good. For the period of 2018 through 2019, Regions Bank's home refinance lending to moderate-income borrowers (21.1 percent) was above the percentage of

moderate-income families (18.9 percent). In 2020, Franklin County was removed from the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home refinance lending to moderate-income borrowers (19.1 percent) was above the percentage of moderate-income families (18.5 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to moderate-income borrowers (25.0 percent) was above the aggregate lending performance (19.2 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (16.1 percent) was similar to the aggregate lending performance (15.7 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (19.1 percent) was significantly above the aggregate lending performance (11.2 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is poor. For the period of 2018 through 2019, Regions Bank's home improvement lending to low-income borrowers (7.3 percent) was below the percentage of low-income families (22.0 percent). In 2020, Franklin County was removed from the bank's assessment area, which caused a change in the demographic data for the assessment area. In that year, the bank made no home improvement loans to low-income borrowers (0.0 percent), yet the percentage of low-income families was 20.6 percent. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank made no home improvement loans to low-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (8.3 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (13.6 percent) was above the aggregate lending performance (10.6 percent) to these borrowers. In 2020, the bank made no home improvement loans to low-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (4.2 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is adequate. For the period of 2018 through 2019, Regions Bank's home improvement lending to moderate-income borrowers (22.0 percent) was above the percentage of moderate-income families (18.9 percent). In 2020, Franklin County was removed from the bank's assessment area, which caused a change in the demographic data for the assessment area. In that year, the bank made no home improvement loans to moderate-income borrowers (0.0 percent), yet the percentage of moderate-income families was 18.5 percent. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to moderate-income borrowers (21.1 percent) was slightly above the aggregate lending performance (19.0 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (22.7 percent) was above the aggregate lending performance (17.1 percent) to these borrowers. In 2020, the bank made no home improvement loans to moderate-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (4.2 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is excellent. For the period of 2018 through 2020, 90.5 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. By comparison, 88.2 percent of the total businesses in the assessment area were classified as small businesses. In 2020, Franklin County was removed from the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, 61.9 percent of the bank's loans were originated to businesses with revenues of \$1 million or less, and 87.8 percent of the total businesses in the assessment area were classified as

small businesses. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending (87.5 percent) was significantly above the aggregate's small business lending performance (40.6 percent). In 2019, the bank's small business lending to small businesses (100.0 percent) was significantly above the aggregate's small business lending performance (41.7 percent) to these businesses. In 2020, the bank's small business lending to small businesses (61.9 percent) was significantly above the aggregate's lending performance (39.1 percent) to these businesses. Lastly, 98.4 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes an adequate level of community development loans in the Southern Illinois assessment area. During the review period, the bank originated or renewed two community development loans totaling \$1.2 million and three community development PPP loans totaling \$495,000. Specifically, the bank originated or renewed \$1.2 million towards community services benefiting LMI individuals and families; \$468,000 to support economic development; and \$27,000 towards revitalization and stabilization efforts both through the PPP and outside of the PPP. Performance in this full-scope area was enhanced by one community development loan for \$1.0 million with a P/M/F of serving the broader regional area of South Illinois. Because the loan impacts a broader regional area that includes two of the bank's assessment areas, its volume was included within totals for the state of Illinois.

INVESTMENT TEST

Regions Bank's investment performance in the Southern Illinois assessment area is adequate. The bank made an adequate level of investments and grants that demonstrated limited responsiveness to credit and community development needs. Combined investment and contribution activity inside the assessment area totaled \$3.3 million. The bank made one investment during the review period for approximately \$200,000 in a mortgage-backed security secured by loans to low- and moderate-income individuals. The bank held investments from prior review periods, including mortgage-backed securities, securities backed by SBA 504 loans, and an investment in a bond that helped rehabilitate or repair schools with a majority of students eligible for free or reduced-price lunch.

During the review period, the bank made contributions totaling \$18,300 to organizations that provide community services to LMI individuals. The bank's donations supported a community organization providing a food pantry during the COVID-19 pandemic and a local HUD-certified housing counseling agency.

SERVICE TEST

Regions Bank's service test performance in the Southern Illinois assessment area is poor.

Retail Services

Retail banking services are very poor in the Southern Illinois full-scope assessment area.

The distribution of three branch offices and four full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The Southern Illinois assessment area does not have any low-income tracts; therefore, no distribution comparison was completed with households and businesses in low-income tracts. The assessment area contains eight moderate-income tracts. The bank does not have any branches in moderate-income tracts. Therefore, the percentage of the bank's branches was less than the percentage of households and businesses in the same geography. Overall, the bank's branch distribution relative to available demographic information is unreasonably inaccessible to significant portions of the bank's geographies and individuals of different income levels in the assessment area.

During the review period, the bank neither opened nor closed any branch offices or full-service ATMs in low- or moderate-income census tracts. However, the bank closed one branch office and one full-service ATM in a middle-income tract. As a result, the bank's record of opening and closing of branches may have significantly adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area.

Community Development Services

Regions Bank provides an adequate level of community development services in the Southern Illinois assessment area. During the review period, Regions Bank employees engaged in four qualified service activities totaling 103 hours. The bank's service activities benefited organizations that provide community services and economic development to low- and moderate-income individuals and communities in the Southern Illinois assessment area.

All of the qualifying service hours from the bank were for technical assistance. A notable activity includes 24 hours a bank associate served as a consultant and provided technical assistance with a nonprofit corporation that works to eliminate the causes and effects of poverty by improving the conditions in which people, live, work, and learn. The bank associate specifically worked with the organization's housing and community development program.

Overall, the bank demonstrated an adequate level of engagement in community services given its limited presence in the Southern Illinois assessment area.

**METROPOLITAN AREAS
LIMITED-SCOPE REVIEW**

The following assessment areas were reviewed using limited-scope examination procedures.

**DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ILLINOIS METROPOLITAN
ASSESSMENT AREAS**

- *Bloomington Assessment Area (McLean County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 5.6 percent of its branches in Illinois.
 - As of June 30, 2020, the bank had \$81.3 million in deposits in this assessment area, representing a market share of 0.5 percent and 7.5 percent of Regions Bank's total deposits in Illinois.
- *Carbondale Assessment Area (Jackson and Williamson counties)*
 - As of December 31, 2020, Regions Bank operated three branches in the assessment area, representing 16.7 percent of its branches in Illinois.
 - As of June 30, 2020, the bank had \$212.0 million in deposits in this assessment area, representing a market share of 8.4 percent and 19.7 percent of Regions Bank's total deposits in Illinois.
- *Champaign Assessment Area (Champaign County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 5.6 percent of its branches in Illinois.
 - As of June 30, 2020, the bank had \$24.4 million in deposits in this assessment area, representing a market share of 0.4 percent and 2.3 percent of Regions Bank's total deposits in Illinois.
- *Decatur Assessment Area (Macon County)*
 - As of December 31, 2020, Regions Bank operated three branch in the assessment area, representing 16.7 percent of its branches in Illinois.
 - As of June 30, 2020, the bank had \$254.0 million in deposits in this assessment area, representing a market share of 12.2 percent and 23.5 percent of Regions Bank's total deposits in Illinois.
- *Peoria Assessment Area (Peoria and Tazewell counties)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 11.1 percent of its branches in Illinois.
 - As of June 30, 2020, the bank had \$74.5 million in deposits in this assessment area, representing a market share of 1.0 percent and 6.9 percent of Regions Bank's total deposits in Illinois.
- *Springfield Assessment Area (Sangamon County)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 11.1 percent of its branches in Illinois.
 - As of June 30, 2020, the bank had \$63.6 million in deposits in this assessment area, representing a market share of 0.9 percent and 5.9 percent of Regions Bank's total deposits in Illinois.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Bloomington	Consistent	Consistent	Not Consistent (Above)
Carbondale	Consistent	Not Consistent (Below)	Not Consistent (Above)
Champaign	Consistent	Not Consistent (Above)	Consistent
Decatur	Not Consistent (Above)	Not Consistent (Below)	Not Consistent (Above)
Peoria	Consistent	Not Consistent (Below)	Not Consistent (Above)
Springfield	Consistent	Not Consistent (Above)	Not Consistent (Above)

For the lending test, Regions Bank received a rating of low satisfactory for the State of Illinois. Performance in Decatur was above the statewide lending performance, while performance was consistent in the remaining five metropolitan limited-scope assessment areas. For the geographic distribution of loans, lending levels were good in Decatur and adequate in the remaining five metropolitan limited-scope assessment areas. Performance was good for the borrower distribution of loans in five of the metropolitan limited-scope assessment areas and adequate in Champaign. Community development lending performance in limited-scope metropolitan assessment areas was as follows: the bank made an adequate level in Carbondale (\$1.5 million), Decatur (\$4.3 million), and Peoria (\$1.5 million); and made few, if any, in Bloomington (\$14,000), Champaign (\$0), and Springfield (\$5,000). It is worth noting that performance in Carbondale was enhanced by one community development loan for \$1.0 million with a P/M/F of serving the broader regional area of South Illinois. Because the loan impacts a broader regional area that includes two of the bank’s assessment areas, its volume was included within totals for the state of Illinois.

For the investment test, Regions Bank received a rating of low satisfactory for the State of Illinois. Performance was stronger than the bank’s statewide investment test performance in Champaign and Springfield; consistent in Bloomington; and weaker in Carbondale, Decatur, and Peoria. The bank’s level of investments was excellent in Champaign and Springfield; adequate in Bloomington; and poor in Carbondale, Decatur, and Peoria.

For the service test, Regions Bank received a rating of needs to improve for the State of Illinois. Performance in the Champaign metropolitan assessment area was consistent with the bank's state performance while performance in the Bloomington, Carbondale, Decatur, Peoria, and Springfield assessment areas was stronger than the bank's state performance. Bloomington, Carbondale, and Springfield had adequate community development services while Decatur and Peoria had good and excellent community development services, respectively. Additionally, Decatur, Peoria, and Springfield had good retail delivery services. Retail delivery services performance in Carbondale was adequate, however it was poor in Bloomington.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating.

NONMETROPOLITAN STATEWIDE AREAS LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ILLINOIS NON-METROPOLITAN ASSESSMENT AREAS

- *Central Illinois Assessment Area (Christian and Logan counties)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 11.1 percent of its branches in Illinois.
 - As of June 30, 2020, the bank had \$85.0 million in deposits in this assessment area, representing a market share of 5.9 percent and 7.9 percent of Regions Bank's total deposits in Illinois.
- *Southeast Illinois Assessment Area (Crawford County)*
 - As of December 31, 2020, Regions Bank operated one branches in the assessment area, representing 5.6 percent of its branches in Illinois.
 - As of June 30, 2020, the bank had \$57.5 million in deposits in this assessment area, representing a market share of 10.8 percent and 5.3 percent of Regions Bank's total deposits in Illinois.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Central Illinois	Consistent	Not Consistent (Below)	Consistent
Southeast Illinois	Consistent	Not Consistent (Below)	Not Consistent (Above)

For the lending test, Regions Bank received a rating of low satisfactory for the State of Illinois. Performance in both of the nonmetropolitan limited-scope assessment areas was consistent with the statewide lending test performance. For the geographic distribution of loans, lending levels were adequate in both nonmetropolitan limited-scope assessment areas. Performance was good for the borrower distribution of loans in both nonmetropolitan limited-scope assessment areas. The bank made few, if any, community development loans in both nonmetropolitan assessment areas reviewed under limited-scope procedures, including Central Illinois (\$64,000) and Southeast Illinois (\$13,000).

For the investment test, Regions Bank received a rating of low satisfactory for the State of Illinois. Performance in both of the nonmetropolitan limited-scope assessment areas was weaker than the statewide investment test performance. The bank’s level of investments was poor in the Central Illinois assessment area, and the bank made few, if any, investments in the Southeast Illinois assessment area.

For the service test, Regions Bank received a rating of needs to improve for the State of Illinois. Performance in the Central Illinois nonmetropolitan assessment area was consistent with the bank’s state performance; the bank provided few, if any, community development services but adequate retail delivery services in this assessment area. In the Southeast Illinois assessment area, the bank had slightly stronger service test performance due to adequate community development performance, but still had poor retail delivery systems.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

Indiana

CRA RATING FOR INDIANA: SATISFACTORY

The Lending Test is rated: **High Satisfactory**

The Investment Test is rated: **High Satisfactory**

The Service Test is rated: **High Satisfactory**

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects good penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a relatively high level of community development loans in its Indiana assessment areas.
- The bank provides a significant level of qualified community development investments and grants that are responsive to community development needs of the Indiana assessment areas.
- Retail banking services are adequate in the bank's Indiana assessment areas.
- The bank provides an excellent level of community development services in the Indiana assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in Indiana:

- Indianapolis

Limited-scope reviews were conducted for the remaining eight assessment areas:

- Bloomington
- Clinton-Grant
- Evansville
- Kokomo
- Lafayette
- Louisville
- Southwest Indiana
- Terre Haute

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN INDIANA

As of June 30, 2020, Regions Bank had \$2.8 billion in deposits in Indiana accounting for 2.3 percent of the bank's total deposits. Regions Bank operated 49 branch offices in Indiana as of December 31, 2020, representing 3.6 percent of the bank’s total branches. HMDA-reportable lending in Indiana accounted for 3.8 percent of total institutional HMDA-reportable lending by number of loans and 3.0 percent by dollar volume. CRA small business lending in Indiana accounted for 1.9 percent of the bank’s total CRA small business lending by number of loans and 2.5 percent by dollar volume. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was greater than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Statewide Summary of Lending Activity
Assessment Areas Located in
Indiana

Loan Type	#	%	\$ (000s)	%
HMDA Home Purchase	1,768	25.6%	\$350,059	35.4%
HMDA Refinance	2,046	29.6%	\$333,861	33.7%

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN INDIANA

Lending Test

The lending test rating in the state of Indiana is high satisfactory. Overall, performance in Indiana with regard to the geographic distribution of loans reflects good penetration throughout the assessment areas. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, Regions Bank makes a relatively high level of community development loans in Indiana.

During the review period, Regions Bank reported 5,085 HMDA-reportable loans and 1,708 small business loans in Indiana. The rating for Indiana is based on performance in the Indianapolis full-scope assessment area. Approximately 56.2 percent of the bank's HMDA-reportable and small business lending by number of loans in Indiana occurred within this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is good, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of Indiana is derived from the Indianapolis full-scope assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

Regions Bank makes a relatively high level of community development loans in the state of Indiana. During the review period, the bank originated or renewed 137 qualifying community development loans totaling \$64.4 million benefiting its Indiana assessment areas, including 88 loans totaling \$33.1 million benefiting the full-scope Indianapolis assessment area. The total community development lending includes one loan for \$1.0 million with a P/M/F of serving a broader statewide area that includes all of the bank's assessment areas in the state. This loan is part of a statewide loan pool consortium through a nonprofit that seeks to provide micro loans to start-up businesses without access to conventional bank financing.

The bank was considered responsive to the credit and community development needs within the state of Indiana. As a result, and in addition to the total community development lending previously noted, the bank received positive consideration for seven community development loans totaling \$1.6 million that were outside any of the bank's assessment areas in the state. More information on community development loans can be found in the full-scope assessment area section of this report.

Investment Test

The investment test rating for Indiana is high satisfactory.

Regions Bank made a significant level of qualified investments and contributions totaling \$55.4 million in Indiana. The bank had qualified investments of \$54.4 million in the Indiana assessment areas, with approximately 83.5 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$1.0 million. Further, the bank made \$48,000 in contributions that benefit a broader statewide area that includes the Indiana assessment areas. The majority of the donations supported a workforce development and career readiness program.

Indianapolis was the assessment area in the state reviewed using full-scope procedures. Approximately 69.2

percent of combined investment and contribution activity was in this assessment area, compared to 61.7 percent of deposits in the market as of June 30, 2021. Performance in the assessment area was good. The bank was considered responsive to community credit needs in the state. Therefore, positive consideration was given to investments and donations that benefit a broader statewide area, without a purpose, mandate, or function of serving the Indiana assessment areas. Specifically, the bank invested \$5.2 million to support affordable housing through investments in LIHTC projects and mortgage-backed securities. The bank also donated \$80,100 to food banks outside the bank's assessment areas in the state to help solicit food donations to support increased demand during the pandemic.

Additional details regarding investments and contributions can be found in the full-scope assessment area section.

Service Test

The service test rating for Indiana is high satisfactory.

Retail Services

The retail services ratings were primarily driven by performance in the Indianapolis full-scope assessment area. Delivery systems, including ATMs and branch office locations, may be unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels in the assessment areas. However, overall, banking services and hours of operations do not vary in a way that inconveniences the bank's assessment areas, including low- and moderate-income geographies and/or low- and moderate-income individuals. Additionally, the record of opening and closing of branch offices has generally not adversely affected the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period, the bank opened one branch office in a middle-income tract and two in upper-income tracts in Indiana. The bank closed five branch offices throughout the state; of those closed, one was in a moderate-income tract, three were in middle-income tracts, and two were in upper-income tracts. Overall, the bank's retail service performance is considered adequate in Indiana.

Community Development Services

Regions Bank provides an excellent level of community development services that benefit low- and moderate-income residents and small businesses in Indiana. During the examination period, employees engaged in 389 qualified service activities totaling 2,787 hours in the Indiana assessment areas. The majority of community development services were provided in the Indianapolis full-scope assessment area, where performance was excellent. Employees engaged in 421 service activities in limited-scope assessment areas. Finally, bank employees engaged in 29 hours of qualified community development services that benefited a broader statewide or regional area, including the bank's assessment areas.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

METROPOLITAN AREA
FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE INDIANAPOLIS, INDIANA
ASSESSMENT AREA

Overview

The Indianapolis assessment area consists of Boone, Hamilton, Johnson, Marion, and Morgan counties, 5 of the 11 counties that comprise the Indianapolis-Carmel-Anderson, Indiana MSA. In 2020, the bank added Boone County to its assessment area. As of December 31, 2020, Regions Bank had 27 branches in the Indianapolis assessment area, representing 55.1 percent of its Indiana branches. The Indianapolis assessment area accounts for 1.4 percent of the institution's total deposits and 2.0 percent of the bank's total HMDA-reportable and CRA small business loans (by dollar).

According to the FDIC Summary of Deposits Report dated June 30, 2020, there were 39 financial institutions operating 394 branch locations in the Indianapolis assessment area.⁵¹⁶ Regions Bank held 2.9 percent deposit market share with approximately \$1.7 billion in total deposits.⁵¹⁷ The deposit leaders in the Indianapolis assessment area were JPMorgan Chase Bank, followed by PNC Bank and Fifth Third Bank.⁵¹⁸

HMDA-reportable lending in the assessment is similarly competitive. Regions Bank originated or purchased 0.9 percent in loans during 2018. For that year, the bank ranked 26th out of 546 reporters. In 2019, Regions Bank originated or purchased 1.1 percent in loans. The bank ranked 22nd out of 725 reporters for the year. Lastly, Regions Bank originated or purchased 1.2 percent in loans for the assessment area during 2020. For that year, Regions Bank ranked 22nd out of 679 reporters. From 2018 through 2020, HMDA-reportable lending in the assessment area was primarily dominated by The Huntington National Bank, Caliber Home Loans, Inc., and JPMorgan Chase Bank.

CRA small business lending is also competitive. For CRA small business and small farm lending, Regions Bank ranked 21st out of 253 reporters in 2018, with 0.9 percent of reported loans. In 2019, the bank ranked 20th out of 232 reporters, with 0.8 percent of reported loans. Furthermore, Regions Bank ranked 14th out of 701 reporters, with 2.0 percent of reported loans in 2020. From 2018 through 2020, lending in the assessment area was primarily dominated by JPMorgan Chase Bank, American Express, and PNC Bank.

Population and Income Characteristics

The population in the assessment area was an estimated 1,629,027 in 2020, representing a 12.9 percent increase since 2010.⁵¹⁹ Indianapolis, located in Marion County, is the capital of Indiana as well as the largest city in the

state.⁵²⁰ As of April 1, 2020, the city had an estimated population of 887,642 individuals, representing an 8.2 percent increase since April 1, 2010.⁵²¹ From April 2010 to April 2020, all counties in the assessment area showed an increase in population. Hamilton County had largest increase in population at 26.5 percent, followed by Boone County at 25.0 percent and Johnson County at 15.8 percent.⁵²²

From 2018 to 2019, the assessment area contained a total of 298 census tracts: 60 low-income tracts (20.1 percent), 88 moderate-income tracts (29.5 percent), 75 middle-income tracts (25.2 percent), 74 upper-income tracts (24.8 percent), and one tract (0.3 percent) with an unknown income level.⁵²³ After Boone County was added in 2020, there were 308 census tracts in the assessment area: 60 low-income tracts (19.5 percent), 89 moderate-income tracts (28.9 percent), 81 middle-income tracts (26.3 percent), 77 upper-income tracts (25.0 percent), and one tract (0.3 percent) with an unknown income level.⁵²⁴

For purposes of classifying borrower income, this evaluation uses the FFIEC’s estimated median family income for each relevant area. The following table sets forth the estimated median family income for the Indianapolis MSA and shows that the median family income increased from \$75,100 in 2018 to \$79,600 in 2020.

**Borrower Income Levels
Indianapolis-Carmel-Anderson, IN MSA**

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2018	\$75,100	0 - \$37,549	\$37,550 - \$60,079	\$60,080 - \$90,119	\$90,120 - & above
2019	\$77,800	0 - \$38,899	\$38,900 - \$62,239	\$62,240 - \$93,359	\$93,360 - & above
2020	\$79,600	0 - \$39,799	\$39,800 - \$63,679	\$63,680 - \$95,519	\$95,520 - & above

There is considerable variation in the median family income in the counties located throughout the assessment area. From the period of 2015 through 2019, Marion County had the lowest median family income at \$62,678 while Hamilton County had the highest median family income at \$116,580.⁵²⁵

Poverty and financial instability are concerns throughout the Indianapolis assessment area, and the percentage of families living below the poverty level varies between counties. From the period 2015 to 2019, Hamilton County had the lowest percentage of families living in poverty at 3.2 percent, followed by Boone County at 4.4 percent and Johnson County at 5.0 percent.⁵²⁶ Morgan County’s percentage of families living in poverty was 7.2 percent

while Marion County’s percentage of families living in poverty was 13.0 percent, which was the highest percentage in the assessment area.⁵²⁷ During the period 2015 to 2019, 14.1 percent of families living in Indianapolis were below the poverty level.⁵²⁸ According to 2020 FFIEC census data, 37.1 percent of families in low-income census tracts and 18.3 percent of families in moderate-income census tracts live below the poverty level.⁵²⁹ The high poverty rates in low- and moderate-income tracts may make lending in these tracts more challenging.

Economic Conditions

The Indianapolis metro area is projected to grow its labor force nearly twice as fast as any other Indiana metro area over the next twenty years.⁵³⁰ The area has a diverse economy with the presence of pharmaceutical, insurance and financial services, automobile manufacturing, transportation and logistics, and high-tech industries.⁵³¹ Since the recession in 2012, the area has seen an increase in nonfarm payroll jobs.⁵³² The fastest growing sector since 2013 has been the transportation and utilities sector with the expansion of 14,400 jobs in the area.⁵³³ Additionally, the professional and business sector added the most jobs, 30,400 jobs, and is the largest employment sector.⁵³⁴ In the metro area, the logistics and distribution and high-tech industries have grown since the 2012 recession.⁵³⁵ For the logistics and distribution industry, new businesses such as Amzon.com, Inc., Kohl’s Corporation, Chewy, Inc. and several foodservice distribution centers have opened in the area.⁵³⁶ Since 2010, these businesses have added 17,000 jobs.⁵³⁷ For the high-tech industry, the area expanded this sector and currently has three businesses that each employ more than 1,000 individuals.⁵³⁸ These businesses include Salesforce.com, InfoSys Limited, and ANGI Homeservices, Inc.⁵³⁹ The metropolitan area is well known for the location of the Indianapolis Motor Speedway and for hosting the Indianapolis 500 racing event. The Indianapolis 500 has an economic impact of upwards of \$336 million annually.⁵⁴⁰

Furthermore, the Indianapolis region has many different employers that offer job opportunities to the area. In terms of employment, city, county, and township governments and the State of Indiana employ the most people with 80,988 and 34,517 individuals, respectively.⁵⁴¹ Outside government, the top five largest employers include

Small businesses play an important role in the Indianapolis assessment area. According to 2020 Dun & Bradstreet information, there were 73,987 businesses within the assessment area, 90.3 percent of them had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses.⁵⁴³ Additionally, 19.6 percent of small businesses were in moderate-income census tracts, while there were fewer in low-income tracts at 9.2 percent.⁵⁴⁴ According to an analysis of CRA loan data for all reporters in the assessment area, the volume of CRA small business loans made to small businesses has both increased and decreased during the review period. Specifically, there was an 18.0 percent increase in the number of loans made to small business from 2018 to 2019. From 2019 to 2020, the number of loans made to small businesses decreased slightly by 0.2 percent.

The COVID-19 pandemic brought many challenges to the economy, both in the assessment area and nationwide. To combat the spread of the coronavirus, Indiana's governor issued stay-at-home orders in March 2020, which mandated that individuals stay at home except for them to engage in essential activities.⁵⁴⁵ These orders also reduced operations for many businesses.⁵⁴⁶ Due to the statewide orders, economic activity declined during the pandemic. On March 25, 2020, the United States' Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act to help the nation's economy; this legislation established the Paycheck Protection Program, which was implemented by the Small Business Administration (SBA), to provide loans to small businesses for payroll costs and certain other expenses.⁵⁴⁷ In the assessment area, Marion County had the largest number of Paycheck Protection Program (PPP) loan approvals (36,424 PPP loans), followed by Hamilton County (10,762 PPP loans), Johnson County (3,747 PPP loans), Boone County (2,080 PPP loans), and Morgan County (1,123 PPP loans).⁵⁴⁸ Businesses in the assessment area also had access to state and local COVID-19 relief resources, such as the Rapid Response Loan Fund and the Indiana Small Business Restart Fund, to help provide support during the pandemic.⁵⁴⁹

As shown in the chart below, the assessment area experienced a period of falling and rising unemployment rates during the review period. In 2018, the unemployment rate in the assessment area was 3.2 percent, which was lower than the state's unemployment rate of 3.4 percent. During this year, Boone County and Hamilton County had the lowest unemployment rates at 2.7 percent. For 2019, the unemployment rate in the assessment area

decreased to 3.0 percent, which was still lower than the state’s unemployment rate of 3.2 percent. Out of all the counties in the assessment area, Boone County had the lowest unemployment rate in 2019 at 2.4 percent. Unemployment in the assessment area, state, and nationwide collectively increased in 2020 due to the impact that the COVID-19 pandemic had on the economy.⁵⁵⁰ The assessment area’s unemployment rate rose to 6.7 percent for the year, and the state’s unemployment rate increased to 7.1 percent. For 2020, Marion County had the highest unemployment rate at 7.9 percent, while Boone County had the lowest unemployment rate at 4.3 percent.

Unemployment Rates - IN Indianapolis

The 2020 FFIEC census data indicates there were approximately 643,536 housing units in the assessment area, of which 55.4 percent were owner-occupied, 33.7 percent were rental units, and 10.9 percent were vacant.⁵⁵¹ Many of the housing units located in low- and moderate-income census tracts were rental or vacant. More specifically, 71.3 percent of housing units in low-income census tracts and 61.0 percent of housing units in moderate-income tracts were rental or vacant.⁵⁵² Out of all the counties in the assessment area, Marion County had the highest number of rental and vacant units at 166,268 units and 55,551 units, respectively.⁵⁵³ The high percentage of rental and vacant units in low- and moderate-income tracts in the assessment area as well as in Marion County indicate that home mortgage lending may be limited in those areas. The median age of housing stock in the assessment area was 44 years, with housing tending to be newest in Hamilton County at 19 years.⁵⁵⁴ Housing units in low- and moderate-income tracts were older at 61 years and 52 years, respectively.⁵⁵⁵

⁵⁵⁵ *Ibid.*

The housing market in the Indianapolis-Carmel-Anderson Indiana CBSA has grown during the review period.⁵⁵⁶ In January 2018, the median listing price for a home in the CBSA was \$229,750.⁵⁵⁷ By January 2019, the median listing price for a home in the CBSA increased 4.4 percent to \$239,950.⁵⁵⁸ For 2020, the median listing price for a home increased an additional 10.4 percent to \$264,950.⁵⁵⁹ The increase in listing prices shows that the housing market is growing in the CBSA.

Even though the housing market is growing, home ownership for low- and moderate-income families is a concern. Using the assumption that a borrower can obtain a loan for approximately three times the borrower's annual income and using 2020 FFIEC median family income, affordable homes would be priced at \$197,178 or below.⁵⁶⁰ As stated previously, the median listing price for a home in 2020 was \$264,950.

For renting, the median gross rent for a two-bedroom apartment varies throughout the assessment area. Morgan County has the lowest median monthly rental cost for a two-bedroom apartment at \$822.⁵⁶¹ For Marion County and Indianapolis, where most of the population resides in the assessment area, the median monthly rental cost for a two-bedroom apartment is \$899 and \$902, respectively.⁵⁶² Overall, Hamilton County has the highest median monthly rental cost for a two-bedroom apartment at \$1,167.⁵⁶³

Moreover, the 2020 FFIEC census data indicates that there are many renters who pay more than 30 percent of their income towards rent, which means that they are cost-burdened with rental expense. Specifically, 48.6 percent of renters in the assessment area are considered cost-burdened.⁵⁶⁴ Additionally, 25.7 percent of renters located in low-income tracts and 39.5 percent of renters located in moderate-income are considered cost-burdened.⁵⁶⁵ Furthermore, the 2020 FFIEC data shows that Marion County, where Indianapolis is located, has the highest percentage of cost-burdened renters at 50.8 percent.⁵⁶⁶ The overall high percentage of cost-burdened renters indicates that rent affordability is a concern throughout the assessment area.

Demographic Characteristics by Census Tract

The following tables present key demographic and business information used to help develop a performance context for the assessment area. One table reflects the 2019 FFIEC Census Data and the 2019 Dun & Bradstreet data and the other table reflects the 2020 FFIEC census data and the 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

⁵⁵⁶ Core-Based Statistical Area (CBSA) is a term that refers to both Metropolitan and Micropolitan Statistical Areas.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development and economic landscapes, individuals familiar with the community and with community development activities were contacted. These individuals discussed the various opportunities and challenges in the region and how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

A community contact at an organization engaged in small business development was interviewed. The contact stated that despite the struggles of small businesses during the COVID-19 pandemic, particularly on the restaurant and services industries, many people began to explore the idea of starting their own business, mainly in logistics, transportation and courier services and storage, warehouse, and liquidation centers, resulting in a need for greater assistance with their start-ups. The contact believes banks should make efforts to participate in micro-lending opportunities for small businesses and more specialized credit products and credit education for entrepreneurs. With the increased number of business start-ups, according to the contact, there is a greater need for microloans in amounts as low as \$5,000 with no collateral required to secure the loan, which is lower than the typical \$50,000, as well as more community loan funds/revolving loan funds and flexible terms. Due to the lack of such products, as many financial institutions tend to focus on more wealthy customers or those with proven track-records, start-ups end up having to use private funds to start their business. However, the contact stated he has seen a community organization with loan funds that offers small business micro loans for \$5,000 to \$15,000 with favorable terms such as interest rates as low as 1 percent and no collateral or credit score requirements.

Two community contacts who work for an organization involved in a variety of affordable and sustainable housing programs to low- to moderate-income were interviewed. The community contacts stated the supply of affordable housing has been decreasing while the median home price has been increasing, particularly due to investors purchasing homes for cash, making affordable housing out of reach for low- to moderate-income individuals. The contacts explained that most of the affordable housing in Indianapolis is geared toward building in low- and moderate-income census tracts but needs to be placed where it benefits low- and moderate-income residents, such as near transit sites so that individuals can have access to jobs, healthcare, etc., and not just a geography. The contacts stated that in addition to affordable housing options, such as purchase money mortgage products with flexible credit terms and no private mortgage insurance requirements, there is a need for loans targeted to individuals on limited fixed incomes for necessary deferred maintenance home repairs to existing homes to keep aging homes habitable or accessible.

Moreover, the contacts stated that low- to moderate-income individuals face several barriers when it comes to obtaining necessary financial assistance. The contacts stated that the top needs in the area are access to banking services, access to credit and access to loan products to both acquire and maintain homes. The contacts mentioned that there are banking deserts in Indianapolis, specifically the Valley area near the GM plant and west of the White River, where low-income areas are located. Regarding home lending, the contacts said that banks need the ability to provide more types of flexible terms and below market rates that are not risk based.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE INDIANAPOLIS, INDIANA
ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending performance in the Indianapolis assessment area is good. The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a relatively high level of community development loans in the Indianapolis assessment area.

The analysis included 2,340 HMDA-reportable loans and 1,183 CRA small business loans reported by the bank in the Indianapolis assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Indianapolis assessment area accounted for 65.2 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Indiana and 75.9 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 60.8 percent of Regions Bank's Indiana deposits are in the Indianapolis assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Home Purchase Loans

Of the 2,340 HMDA-reportable loans analyzed, 893 loans (38.2 percent) were home purchase loans. Of the total home purchase loans made, 58 loans (6.5 percent) were located in low-income tracts, and 162 loans (18.1 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is good. For the period of 2018 through 2019, Regions Bank's home purchase lending in low-income tracts (7.2 percent) was similar to the percentage of owner-occupied units (8.0 percent) in these tracts. In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home purchase lending in low-income tracts (5.7 percent) was similar to the percentage of owner-occupied units (7.7 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in low-income tracts (7.3 percent) was above the aggregate lending performance (5.7 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (7.2 percent) was slightly above the aggregate lending performance (6.2 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (5.7 percent) was similar to the aggregate lending performance (6.4 percent) in these tracts.

Home purchase lending in moderate-income tracts is good. For the period of 2018 through 2019, Regions Bank's home purchase lending in moderate-income tracts (19.8 percent) was above the percentage of owner-occupied units (19.2 percent) in these tracts. In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home purchase lending in moderate-income tracts (16.3 percent) was similar to the percentage of owner-occupied units (18.7 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in moderate-income tracts (21.9 percent) was above the aggregate lending performance (17.2 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (17.9 percent) was similar to the aggregate lending performance (17.2 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (16.3 percent) was similar to the aggregate lending performance (16.9 percent) in these tracts.

Home Refinance Loans

Regions Bank made 1,088 home refinance loans from 2018 through 2020, which represents 46.5 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, 62 loans (5.7 percent) were located in low-income tracts, and 166 loans (15.3 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is excellent. For the period of 2018 through 2019, Regions Bank's home refinance lending in low-income tracts (6.8 percent) was similar to the percentage of owner-occupied units (8.0 percent) in these tracts. In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home refinance lending in low-income tracts (5.1 percent) was below the percentage of owner-occupied units (7.7 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in low-income tracts (6.7 percent) was significantly above the aggregate lending performance (4.3 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (6.9 percent) was significantly above the aggregate lending performance (3.6 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (5.1 percent) was significantly above the aggregate lending performance (2.6 percent) in these tracts.

Home refinance lending in moderate-income tracts is good. For the period of 2018 through 2019, Regions Bank's home refinance lending in moderate-income tracts (17.6 percent) was similar to the percentage of owner-occupied units (19.2 percent) in these tracts. In 2020, Boone County was added to the bank's assessment area, which caused

a change in the demographic data for the assessment area. For that year, the bank's home refinance lending in moderate-income tracts (14.0 percent) was similar to the percentage of owner-occupied units (18.7 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in moderate-income tracts (18.7 percent) was slightly above the aggregate lending performance (15.7 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (16.9 percent) was above the aggregate lending performance (12.7 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (14.0 percent) was above the aggregate lending performance (10.5 percent) in these tracts.

Home Improvement Loans

Regions Bank made 359 home improvement loans from 2018 through 2020, which represents 15.3 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, 21 loans (5.8 percent) were located in low-income tracts, and 39 loans (10.9 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is adequate. For the period of 2018 through 2019, Regions Bank's home improvement lending in low-income tracts (6.2 percent) was similar to the percentage of owner-occupied units (8.0 percent) in these tracts. In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home improvement lending in low-income tracts (5.2 percent) was below the percentage of owner-occupied units (7.7 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in low-income tracts (9.0 percent) was significantly above the aggregate lending performance (5.9 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (4.4 percent) was similar to the aggregate lending performance (4.8 percent) in these tracts. In 2020, the bank's home improvement lending in low-income tracts (5.2 percent) was similar to the aggregate lending performance (4.9 percent) in these tracts.

Home improvement lending in moderate-income tracts is poor. For the period of 2018 through 2019, Regions Bank's home improvement lending in moderate-income tracts (12.4 percent) was below the percentage of owner-occupied units (19.2 percent) in these tracts. In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home improvement lending in moderate-income tracts (8.2 percent) was below the percentage of owner-occupied units (18.7 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in moderate-income tracts (9.0 percent) was below the aggregate lending performance (12.7 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (14.7 percent) was slightly above the aggregate lending performance (12.9 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (8.2 percent) was below the aggregate lending performance (11.4 percent) in these tracts.

Small Business Loans

Regions Bank made 1,183 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 122 loans (10.3 percent) were located in low-income tracts, and 211 loans (17.8 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is good. For the period of 2018 through 2019, Regions Bank's small business lending in low-income tracts (12.2 percent) was above the percentage of businesses (9.8 percent) in these tracts. In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's small business lending in low-income tracts (9.0 percent) was similar to the percentage of businesses (9.4 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in low-income tracts (12.3 percent) was above the aggregate lending performance (9.0 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (12.1 percent) was above the aggregate lending performance (9.5 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (9.0 percent) was similar to the aggregate lending performance (8.6 percent) in these tracts.

Small business lending in moderate-income tracts is adequate. For the period of 2018 through 2019, Regions Bank's small business lending in moderate-income tracts (18.2 percent) was similar to the percentage of businesses (20.3 percent) in these tracts. In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's small business lending in moderate-income tracts (17.6 percent) was similar to the percentage of businesses (19.8 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in moderate-income tracts (18.2 percent) was similar to the aggregate lending performance (18.1 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (18.2 percent) was similar to the aggregate lending performance (18.3 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (17.6 percent) was similar to the aggregate lending performance (17.2 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is excellent. For the period of 2018 through 2019, Regions Bank's home purchase lending to low-income borrowers (15.1 percent) was below the percentage of low-income families (23.7 percent). In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home purchase lending to low-income borrowers (17.7 percent) was similar to the percentage of low-income families (23.2 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to low-income borrowers (18.7 percent) was significantly above the aggregate lending performance (10.5 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (12.0 percent) was slightly above the aggregate lending performance (10.4 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (17.7 percent) was significantly above the aggregate lending performance (10.4 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is excellent. For the period of 2018 through 2019, Regions Bank's home purchase lending to moderate-income borrowers (36.0 percent) was above the percentage of moderate-income families (17.0 percent). In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of moderate-income families in the assessment area remained the same. For that year, the bank's home purchase lending to moderate-income borrowers (28.8 percent) was above the percentage of moderate-income families (17.0 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to moderate-income borrowers (36.5 percent) was significantly above the aggregate lending performance (21.4 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (35.5 percent) was significantly above the aggregate lending performance (22.5 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (28.8 percent) was above the aggregate lending performance (23.0 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. For the period of 2018 through 2019, Regions Bank's home refinance lending to low-income borrowers (15.2 percent) was below the percentage of low-income families (23.7 percent). In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home refinance lending to low-income borrowers (15.4 percent) was below the percentage of low-income families (23.2 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to low-income borrowers (15.3 percent) was above the aggregate lending performance (11.8 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (15.2 percent) was significantly above the aggregate lending performance (7.7 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (15.4 percent) was significantly above the aggregate lending performance (5.8 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is good. For the period of 2018 through 2019, Regions Bank's home refinance lending to moderate-income borrowers (23.1 percent) was above the percentage of moderate-income families (17.0 percent). In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of moderate-income families in the assessment area remained the same. For that year, the bank's home refinance lending to moderate-income borrowers (21.4 percent) was above the percentage of moderate-income families (17.0 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to moderate-income borrowers (24.0 percent) was slightly above the aggregate lending performance (20.3 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (22.5 percent) was above the aggregate lending performance (16.4 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (21.4 percent) was above the aggregate lending performance (14.4 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is good. For the period of 2018 through 2019, Regions Bank's home improvement lending to low-income borrowers (13.3 percent) was below the percentage of low-income families (23.7 percent). In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, the bank's home improvement lending to low-income borrowers (7.5 percent) was below the percentage of low-income families (23.2 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to low-income borrowers (12.4 percent) was above the aggregate lending performance (9.9 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (14.0 percent) was significantly above the aggregate lending performance (7.9 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (7.5 percent) was slightly above the aggregate lending performance (6.6 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is adequate. For the period of 2018 through 2019, Regions Bank's home improvement lending to moderate-income borrowers (13.8 percent) was similar to the percentage of moderate-income families (17.0 percent). In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of moderate-income families in the assessment area remained the same. For that year, the bank's home improvement lending to moderate income borrowers (20.1 percent) was above the percentage of moderate-income families (17.0 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to moderate-income borrowers (13.5 percent) was slightly below the aggregate lending performance (17.8 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (14.0 percent) was slightly below the aggregate lending performance (17.8 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (20.1 percent) was above the aggregate lending performance (14.4 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. For the period of 2018 through 2020, 60.5 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. By comparison, 90.0 percent of the total businesses in the assessment area were classified as small businesses. In 2020, Boone County was added to the bank's assessment area, which caused a change in the demographic data for the assessment area. For that year, 45.9 percent of the bank's loans were originated to businesses with revenues of \$1 million or less, and 90.3 percent of the total businesses in the assessment area were classified as small businesses. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending (59.3 percent) was above the aggregate's small business lending performance (40.8 percent). In 2019, the bank's small business lending to small businesses (61.9 percent) was above the aggregate's small business lending performance (44.1 percent) to these businesses. In 2020, the bank's small business lending to small businesses (45.9 percent) was above the aggregate's lending performance (36.7 percent) to these businesses. Lastly, 87.2 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes a relatively high level of community development loans in the Indianapolis assessment area. During the review period, the bank originated or renewed 23 community development loans totaling \$14.2 million and 65 community development PPP loans totaling \$18.9 million. Specifically, the bank originated or renewed \$16.7 million to support economic development exclusively through SBA programs supporting small businesses; \$14.9 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; and \$1.5 million in affordable housing initiatives through participation in a loan fund operated by a CDFI that provides first mortgages for LMI homebuyers.

Most of the qualified loans were impactful and responsive to assessment area needs. Additionally, the bank's current lending by number of loans and dollar volume exceeds its previous exam performance. Some of the most impactful loans directly benefiting the assessment area include:

- 17 loans totaling \$1.5 million were made in conjunction with the previously noted CDFI's loan fund. The loan fund is designed to allow the strategic acquisition and holding of transit-accessible properties for future development or to preserve existing affordable housing. As a result, while individual loans originated through the loan fund are typically smaller in dollar, the loan fund's overall impact to LMI homebuyers is significant.
- Over 70 percent of the community development PPP loans in this assessment area were originated to nonprofits. This is particularly responsive given the needs of nonprofits and the unique challenges faced by nonprofits during the pandemic.

INVESTMENT TEST

Regions Bank's investment performance in the Indianapolis assessment area is good. The bank made a significant level of investments totaling \$38.4 million in the assessment area. The bank's investments (excluding contributions) totaled \$37.5 million, of which \$29.3 million (78.2 percent) were new investments acquired during the review period. All of the bank's investments during the review period provided financing for affordable housing, including mortgage-backed securities secured by loans for multifamily rental housing and mortgages for low- and moderate-income individuals. The bank also held investments from prior review periods that included an investment in a bond that financed renovations for schools that primarily serve LMI students as well as mortgage-backed securities and one LIHTC investment.

Regions Bank made \$849,200 in contributions that demonstrated responsiveness to credit and community development needs in the Indianapolis assessment area. Specifically, the bank provided \$501,400 to organizations that provide community services targeted to low- and moderate-income individuals, \$246,750 to support economic development, and \$97,000 for affordable housing. Overall, approximately \$255,700 in donations were responsive to the COVID-19 pandemic, providing support for organizations providing emergency and recovery assistance to LMI individuals, small businesses, and nonprofits. Examples of notable donations include:

- \$50,000 donation to help fund a rapid response loan fund that provided affordable loans to small businesses to help sustain them through the pandemic;
- \$50,000 donation to support a program that provided grants to minority-, immigrant-, and women-owned businesses impacted by COVID-19;
- \$50,000 donation to a nonprofit housing organization that develops innovative and nontraditional mortgage products to help LMI individuals become homeowners; and
- \$15,000 donation to support a nonprofit focused on providing micro-enterprise support, with a specific focus on minority entrepreneurship.

The bank also made \$48,000 in donations that benefited all assessment areas in Indiana, which positively impacted the bank's performance in Indianapolis.

SERVICE TEST

Regions Bank's service test performance in the Indianapolis assessment area is good.

Retail Services

Retail banking services are adequate in the Indianapolis full-scope assessment area.

The distribution of 27 branch offices and 26 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The percentage of branches in low-income tracts was less than the percentage of households and businesses in the same geography: 12.9 percent of households and 9.4 percent of businesses were located in low-income census tracts compared to 7.4 percent of the bank's branches. The proportion of the bank's branches in moderate-income tracts was similar to the percentage of households and greater than the percentage of businesses in the same geography: 25.9 percent of total branches were in moderate-income-tracts compared to 25.7 percent of households and 19.8 percent of businesses. The assessment area had a change during the review period. Boone County was added to the assessment area; however, this change did not alter the distribution of the bank's branch offices by census tract income level. The bank's branch distribution showed opportunities for better penetration in low- and moderate-income tracts. Overall, the bank's branch distribution relative to available demographic information might be limited in portions of the bank's geographies and to individuals of different income levels in the assessment area and may therefore be considered unreasonably inaccessible.

During the review period, the bank neither opened nor closed any branch offices or full-service ATMs in low- or moderate-income census tracts. Overall, the bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

Community Development Services

Regions Bank provides an excellent level of community development services in the Indianapolis assessment area. During the review period, Regions Bank employees engaged in 323 qualified service activities totaling 2,366 hours. The bank's service activities benefited organizations that provide affordable housing, community services, economic development, and revitalization and stabilization to low- and moderate-income individuals, communities, and small businesses in the Indianapolis assessment area. Of the bank's total service hours, 1,158 hours supported adult and youth financial education and homebuyer education through partnerships with various

organizations and local schools. The remaining hours were committed to technical assistance to organizations that provide community services in low- and moderate-income geographies and for low- and moderate-income individuals, as well as to service on boards and committees of qualified organizations.

Highlighted below are examples of community development activities undertaken during the review period:

- Bank employees taught a Regions at Work financial basics module for parents and students involved in a summer program hosted by an organization that drives community development initiatives in an LMI community in the assessment area.
- Regions associates provided over 325 hours of service in various capacities, including serving on the board of directors, committees, and financial education instructors for an organization that fosters the advancement of minority youth in Central Indiana as future professional, business owners, and community leaders.
- A Regions employee served on the board of an organization that helps people obtain housing through creative housing solutions. A majority of the participants experience chronic homelessness.
- A Regions associate served on the board of an organization that is located in a low-income tract and serves the surrounding community. The organization focuses on identifying community resources and implementing programs and activities that increase housing opportunities and improve the quality of life for the residents in the area.

**METROPOLITAN AREAS
LIMITED-SCOPE REVIEW**

The following assessment areas were reviewed using limited-scope examination procedures

**DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE INDIANA METROPOLITAN
ASSESSMENT AREAS**

- *Bloomington Assessment Area (Monroe County)*
 - As of December 31, 2020, Regions Bank operated three branches in the assessment area, representing 6.1 percent of its branches in Indiana.
 - As of June 30, 2020, the bank had \$103.3 million in deposits in this assessment area, representing a market share of 3.5 percent and 3.7 percent of Regions Bank's total deposits in Indiana.
- *Evansville Assessment Area (Vanderburgh County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 2.0 percent of its branches in Indiana.
 - As of June 30, 2020, the bank had \$35.2 million in deposits in this assessment area, representing a market share of 0.6 percent and 1.2 percent of Regions Bank's total deposits in Indiana.
- *Kokomo Assessment Area (Howard County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 2.0 percent of its branches in Indiana.
 - As of June 30, 2020, the bank had \$ 19.2 million in deposits in this assessment area, representing a market share of 1.4 percent and 0.7 percent of Regions Bank's total deposits in Indiana.
- *Lafayette Assessment Area (Carroll and Tippecanoe counties)*
 - As of December 31, 2020, Regions Bank operated five branches in the assessment area, representing 10.2 percent of its branches in Indiana.
 - As of June 30, 2020, the bank had \$354.8 million in deposits in this assessment area, representing a market share of 10.0 percent and 12.6 percent of Regions Bank's total deposits in Indiana.
- *Louisville Assessment Area (Clark, Harrison, and Washington counties)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 4.1 percent of its branches in Indiana.
 - As of June 30, 2020, the bank had \$139.1 million in deposits in this assessment area, representing a market share of 12.6 percent and 4.9 percent of Regions Bank's total deposits in Indiana.
- *Terre Haute Assessment Area (Vigo County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 2.0 percent of its branches in Indiana.
 - As of June 30, 2020, the bank had \$23.7 million in deposits in this assessment area, representing a market share of 1.1 percent and 0.8 percent of Regions Bank's total deposits in Indiana.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Bloomington	Consistent	Not Consistent (Above)	Not Consistent (Below)
Evansville	Consistent	Not Consistent (Above)	Not Consistent (Below)
Kokomo	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Lafayette	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Louisville	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Terre Haute	Not Consistent (Below)	Consistent	Consistent

For the lending test, Regions Bank received a rating of high satisfactory for the State of Indiana. Performance in Bloomington and Evansville was consistent with the statewide performance, while performance in the remaining four metropolitan limited-scope assessment areas was below the statewide performance. For the geographic distribution of loans, lending levels were good in Lafayette; adequate in Bloomington, Kokomo, and Terre Haute; and poor in Evansville and Louisville. Performance for the borrower distribution of loans was good in four of the metropolitan limited-scope assessment areas, while adequate in Bloomington and Terre Haute. Community development lending performance in limited-scope metropolitan assessment areas was as follows: the bank was a leader in Bloomington (\$5.5 million) and Evansville (\$2.5 million); made a low level in Kokomo (\$122,000) and Terre Haute (\$175,000); and made few, if any, in Lafayette (\$283,000) and Louisville (\$368,000).

For the investment test, Regions Bank received a rating of high satisfactory for the State of Indiana. Performance was stronger than the bank’s statewide investment test performance in Bloomington and Evansville; consistent in Terre Haute; and weaker in Kokomo, Lafayette, and Louisville. The bank’s level of investments was excellent in Bloomington and Evansville; significant in Terre Haute; and poor in Lafayette and Louisville. The bank made few, if any, investments in Kokomo.

For the service test, Regions Bank received a rating of high satisfactory for the State of Indiana. Performance in the Terre Haute metropolitan assessment area was consistent with the bank’s state performance. In the remaining

five assessment areas, service test performance was weaker than the bank’s state performance. While the retail delivery services were better than the state in Lafayette and Louisville, and comparable in Bloomington and Terre Haute, the bank had weaker retail delivery services in Evansville and Kokomo. It was noted that the bank exited the Kokomo assessment area in May 2020. Community development service performance in the metropolitan limited-scope areas was as follows: excellent in Terre Haute; adequate in Evansville and Lafayette; poor in Bloomington; and few, if any, in Kokomo and Louisville.

**NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW**

The following assessment areas were reviewed using limited-scope examination procedures

**DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE INDIANA NON-METROPOLITAN
ASSESSMENT AREAS**

- *Clinton-Grant Assessment Area (Clinton and Grant counties)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 4.1 percent of its branches in Indiana.
 - As of June 30, 2020, the bank had \$149.4 million in deposits in this assessment area, representing a market share of 11.2 percent and 5.3 percent of Regions Bank’s total deposits in Indiana.
- *Southwest Indiana Assessment Area (Knox, Lawrence, Greene, and Gibson counties)*
 - As of December 31, 2020, Regions Bank operated seven branches in the assessment area, representing 14.3 percent of its branches in Indiana.
 - As of June 30, 2020, the bank had \$282.3 million in deposits in this assessment area, representing a market share of 12.6 percent and 10.0 percent of Regions Bank’s total deposits in Indiana.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Clinton-Grant	Consistent	Not Consistent (Below)	Consistent
Southwest Indiana	Consistent	Not Consistent (Below)	Not Consistent (Below)

For the lending test, Regions Bank received a rating of high satisfactory for the State of Indiana. Performance in both nonmetropolitan limited-scope assessment areas was consistent with the statewide lending test performance. For the geographic distribution of loans, lending levels were excellent in Southwest Indiana and adequate in Clinton-Grant. Performance was good for the borrower distribution of loans in both nonmetropolitan limited-scope assessment areas. Community development lending performance in limited-scope nonmetropolitan assessment areas was as follows: the bank was a leader in Clinton-Grant (\$21.1 million) and made few, if any, in Southwest Indiana (\$278,000).

For the investment test, Regions Bank received a rating of high satisfactory for the State of Indiana. Performance in both nonmetropolitan limited-scope assessment areas was weaker than the bank's statewide investment test performance. Additionally, the bank's level of investments was poor in both nonmetropolitan limited-scope assessment areas.

For the service test, Regions Bank received a rating of high satisfactory for the State of Indiana. Performance in the Clinton-Grant assessment area was consistent with the bank's state performance while performance in the Southwest Indiana assessment area was weaker than the bank's state performance due to limited community development service performance.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

Iowa

CRA RATING FOR IOWA: SATISFACTORY

The Lending Test is rated: Low Satisfactory

The Investment Test is rated: Low Satisfactory

The Service Test is rated: High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a low level of community development loans in its Iowa assessment areas.
- The bank provides an adequate level of qualified community development investments and grants that demonstrate adequate responsiveness to community development needs of the Iowa assessment areas.
- Retail banking services are good in the bank's Iowa assessment areas.
- The bank provides a relatively high level of community development services throughout the Iowa assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in Iowa:

- Waterloo

Limited-scope reviews were conducted for the remaining three assessment areas:

- Cedar Rapids
- Des Moines
- Fayette

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN IOWA

As of June 30, 2020, Regions Bank had \$307.1 million in deposits in Iowa accounting for 0.3 percent of the bank's total deposits. Regions Bank operated eight branch offices in Iowa as of December 31, 2020, representing 0.6 percent of the bank’s total branches. HMDA-reportable lending in Iowa accounted for 0.2 percent of total institutional HMDA-reportable lending by number of loans and 0.1 percent by dollar volume. CRA small business lending in Iowa accounted for 0.1 percent of the bank’s total CRA small business lending by number of loans and by dollar volume for each. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was less than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Statewide Summary of Lending Activity
Assessment Areas Located in
Iowa

Loan Type	#	%	\$ (000s)	%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN IOWA

Lending Test

The lending test rating in the state of Iowa is low satisfactory. Overall, performance in Iowa with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, Regions Bank makes a low level of community development loans in Iowa.

During the review period, Regions Bank reported 308 HMDA-reportable loans and 98 small business loans in Iowa. The rating for Iowa is based on performance in the Waterloo full-scope assessment area. Approximately

31.3 percent of the bank's HMDA-reportable and small business lending by number of loans in Iowa occurred within this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of Iowa is derived from the Waterloo full-scope assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

Regions Bank makes a low level of community development loans in the state of Iowa. During the review period, the bank originated five qualifying community development loans totaling \$77,000, all of which were in the full-scope Waterloo assessment area. More information on community development loans can be found in the full-scope assessment area section of this report.

Investment Test

The investment test rating for Iowa is low satisfactory.

Regions Bank made an adequate level of qualified investments and contributions totaling \$36.2 million in Iowa. During the review period, the bank exited two assessment areas in Iowa (Cedar Rapids and Fayette). Investments in these assessment areas were considered in the review of investments in the state, but the closure of branches in these markets was taken into account. Overall, the bank had qualified investments of \$36.0 million in the Iowa assessment areas, with approximately 84.7 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$122,800. Further, the bank made a contribution of \$15,000 to support a statewide workforce development program that benefits a broader statewide area that includes the Iowa assessment areas.

Waterloo was the assessment area in the state reviewed using full-scope procedures. Approximately 6.1 percent of combined investment and contribution activity was in this assessment area, compared to 59.4 percent of deposits in the market as of June 30, 2021. Performance in the assessment area was adequate. The largest volume of investments during the review period was in the Des Moines assessment area.

The bank was considered responsive to community credit needs in the state. Therefore, positive consideration was given for investments and donations that benefit a broader statewide area, without a purpose, mandate, or function of serving Iowa's assessment areas. Specifically, the bank held an investment of \$11,700 in a mortgage-backed security and made donations of \$80,100 to food banks outside the bank's assessment areas in the state to help solicit food donations to support increased demand during the pandemic.

Additional details regarding investments and contributions can be found in the full-scope assessment area section.

Service Test

The service test rating for Iowa is high satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are accessible to the bank's geographies and individuals of different income levels in the assessment areas. Overall, banking services and hours of operations do not vary in a way that inconveniences the bank's assessment areas, particularly low- and moderate-income geographies and/or low- and moderate-income individuals. The record of opening and closing of branch offices has generally not adversely affected the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period the bank did not open or close any branch offices in Iowa. Overall, the bank's retail service performance is considered good in Iowa.

Community Development Services

Regions Bank provides a relatively high level of community development services that benefit low- and moderate-income residents and small businesses in Iowa. The bank provided a total of 368 qualified service hours during the examination period, including 180 hours in the Waterloo full-scope assessment area, where performance was good. Employees engaged in 188 service hours in limited-scope assessment areas.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

METROPOLITAN AREA FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE WATERLOO, IOWA ASSESSMENT AREA

Overview

The Waterloo assessment area includes only Black Hawk County, which is one of the three counties that comprise the Waterloo-Cedar Falls, IA MSA. As of December 31, 2020, Regions operated 3 branches in the assessment area, which represented 37.5 percent of the bank's branches statewide, 53.2 percent of the bank's statewide deposits and 26.6 percent of the bank's total statewide HMDA-reportable and CRA small business loans (by dollar).

The Waterloo assessment area is a smaller banking market where national, regional, and local banks have a presence. According to the June 30, 2020 FDIC Summary of Deposits Report, there were 13 financial institutions operating 38 branch offices in the Waterloo assessment area with a total of \$2.6 billion in deposits.⁵⁶⁷ Regions Bank ranked 5th in deposit market share with 6.3 percent of deposits (\$163.4 million). In terms of deposit market

⁵⁶⁷ "Offices and Deposits of All FDIC-Insured Institutions Deposit Market Share Report." *Federal Deposit Insurance Corporation*, <https://www7.fdic.gov/sod/sodMarketRpt.asp?barItem=2>. Accessed 20 Apr. 2022.

share, the top financial institutions were Farmers State Bank (\$793.9 million), U.S. Bank National Association (\$457.6 million), and Wells Fargo Bank (\$284.9 million).⁵⁶⁸

Regions Bank's loan production accounted for less than 1.0 percent of the total HMDA- reportable lending activity in the Waterloo assessment area from 2018 through 2020. For CRA-reportable lending, Regions Bank's loan production accounted for less than 1.0 percent of the total CRA-reportable lending activity in the assessment area for 2018 and 2019; however, the bank originated or purchased 1.3 percent of the total reportable lending activity in 2020. In general, the top HMDA lenders in the market were Veridian Credit Union, GreenState Credit Union, and Farmers State Bank, and the top CRA lenders in the assessment area were U.S. Bank, JPMorgan Chase Bank, and American Express.

Population and Income Characteristics

The assessment area's population has not significantly changed since the last decennial census. As of April 1, 2020, the assessment area population increased less than 1.0 percent from 2010, reaching approximately 131,144 residents.⁵⁶⁹ The city of Waterloo, which is the seat of Black Hawk County and the most populous city in the county, had a 1.6 percent decrease in population since the last decennial census with an estimated population of 67,314 residents as of April 1, 2020.⁵⁷⁰ The city of Cedar Falls, which is the second largest city in Black Hawk County, had a 3.7 percent increase in population since the last decennial census with an estimated population of 40,713 as of April 1, 2020.⁵⁷¹ Since the last decennial census, population growth in the assessment area from 2010 to 2020 was significantly below the state's population growth, which was 4.7 percent.⁵⁷²

According to 2020 FFIEC census data, the assessment area is made up of 38 census tracts: 4 tracts are low-income (10.5 percent), 9 tracts are moderate-income (23.7 percent), 18 tracts are middle-income (47.4 percent), 6 tracts are upper-income (15.8 percent), and 1 tract is an unknown income level (2.6 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Waterloo-Cedar Falls, IA MSA. The table below provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper) in the MSA. As shown, the median family income slightly increased during the review period. In 2018, the median family income was \$71,500, and it increased to \$76,800 in 2019. By 2020, the median family income for the MSA decreased to \$73,200, which was comparable to the median family income in 2018 for the MSA.

Concerning poverty, 9.1 percent of families living in the assessment area are below the poverty level; this percentage is slightly higher than the state’s and the MSA’s percentage of families living below the poverty level of 8.1 percent and 7.9 percent, respectively.⁵⁷³ From the period of 2015 through 2019, 9.7 percent of families in Black Hawk County lived in poverty.⁵⁷⁴ During this same period, 13.0 percent of families in Waterloo and 6.5 percent of families in Cedar Falls lived in poverty.⁵⁷⁵ According to the Waterloo/Cedar Falls Home Consortium’s five year consolidated plan, there is a continued need to address poverty in the Waterloo area.⁵⁷⁶

Economic Conditions

The assessment area consists of Black Hawk County, which is located in the northeastern part of Iowa. The county has two main cities, Cedar Falls and Waterloo, where around 80 percent of the population within the county lives.⁵⁷⁷ Black Hawk County is the 5th most populous county in Iowa with 576 square miles of land.⁵⁷⁸ The major employers in the county include John Deere, Wheaton Franciscan Healthcare, Tyson Fresh Meats, University of Northern Iowa, Unity Point Health, Waterloo Community Schools, Hy-Vee Food Stores, CBE Companies, Bertch Cabinet Manufacturing, Target Regional Distribution, Omega Cabinetry, Ltd, Cedar Falls Community Schools, VGM Group, and Black Hawk County.⁵⁷⁹

The Waterloo-Cedar Falls MSA has a variety of industry sectors that provide employment opportunities in the area. The Waterloo-Cedar Falls MSA has a total of 88,684 jobs, which account for 5.7 percent of the state’s total employment.⁵⁸⁰ Most of the jobs in the MSA are in the manufacturing industry (16,664 jobs), followed by education and health services (13,616 jobs) and government (12,444 jobs).⁵⁸¹ According to the Iowa Workforce

Development, 59.4 percent of workers in the MSA live less than 10 miles from their primary place of employment.⁵⁸²

Furthermore, the Waterloo-Cedar Falls MSA saw an increase in industry wages from 2017 to 2018. The average annual wage for all industries in 2017 was \$45,291 and increased 3.5 percent in 2018 to \$46,883.⁵⁸³ From 2017 to 2018, the information industry saw the greatest percentage growth in the average annual wage with wages being \$53,819 in 2017 and increasing 19.1 percent in 2018 to \$60,798.⁵⁸⁴ For 2018, the industries with the highest average annual wages in the MSA included manufacturing (\$67,743), information (\$64,101), and finance, insurance, and real estate (\$60,798), while the industries with the lowest average annual wages included other services (\$35,814), trade (\$35,301), and leisure and hospitality (\$14,938).⁵⁸⁵

According to 2020 Dun & Bradstreet data, there were 5,198 businesses in the Waterloo assessment area.⁵⁸⁶ Of the total businesses in the assessment area, 88.9 percent had total annual revenues less than or equal to \$1 million and thus were considered to be small businesses.⁵⁸⁷ Only 7.0 percent of small businesses in the assessment area were in low-income census tracts, while 16.8 percent of small businesses were in moderate-income census tracts.⁵⁸⁸ This distribution may present challenges for originating small business loans in low- and moderate-income census tracts.

Furthermore, lending to small businesses has both increased and decreased during the review period. According to an analysis of CRA loan data, the total number of small business loans (loans less than \$1 million in principal amount) originated to small businesses located in the assessment area increased 13.5 percent between 2018 and 2019. From 2019 to 2020, there was a 23.0 percent decrease in the total small business loans made to small businesses. The decrease in small business lending in 2020 was most likely due to competition from financial institutions who were not CRA loan reporters, but they made Paycheck Protection Loans to small businesses during the year.

The COVID-19 pandemic had a negative impact on the economy in Black Hawk County like it did across the nation. As the pandemic began, many businesses were impacted by the spread of the novel coronavirus. According to a University of Northern Iowa survey of 529 businesses located in Black Hawk County, 85.5 percent of those businesses indicated that the COVID-19 outbreak had a negative overall organization impact.⁵⁸⁹ This survey showed that business operations, business development/sales, and customer demand of products/services were the top three areas that had the biggest impact on organizations.⁵⁹⁰ Additionally, one of Black Hawk County's largest employers, Tyson Foods, shut down operations on April 22, 2020 due an outbreak of COVID-19 amongst

⁵⁹⁰ Ibid.

its employees.⁵⁹¹ Ultimately, business closures and other events during the pandemic had a negative effect on businesses located in the assessment area.

As mentioned above, the COVID-19 pandemic had a major impact on businesses in the assessment area and nationwide. In order to help keep the nation's economy afloat during the crisis, the U.S. Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act in March 2020.⁵⁹² The CARES Act established the Paycheck Protection Act (PPP), which provided loans to small businesses to cover payroll costs.⁵⁹³ In the assessment area, 4,453 PPP loans were approved for a total amount of \$299.4 million.⁵⁹⁴ On a state-level, Governor Kimberly Reynolds established the Iowa Small Business Relief Program, which provided financial assistance to small businesses impacted by the pandemic; the program allowed small businesses to apply for monetary grants ranging in amounts from \$5,000 to \$25,000.⁵⁹⁵ All these efforts were in place to help small businesses sustain operations during the COVID-19 pandemic.

The Waterloo assessment area has seen an increase in unemployment during the review period. In 2018, the unemployment rate in the assessment area was 2.9 percent, and it increased to 3.2 percent for 2019. During 2020, the COVID-19 pandemic had a significant impact on the United States economy and caused unemployment to rise.⁵⁹⁶ In the assessment area, the unemployment rate increased to 6.2 percent for the year, which was greater than the unemployment rate for the state at 5.3 percent.

Unemployment Rates - IA Waterloo

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

According to 2020 FFIEC census data, there were 56,591 total housing units in the assessment area: 62.5 percent were owner-occupied, 30.1 percent were rental, and 7.4 percent were vacant. In low-income census tracts 33.2 percent of units were owner-occupied; however, in moderate-income census tracts, 52.5 percent of units were owner-occupied.⁵⁹⁷ Furthermore, in low-income census tracts, 52.7 percent of units were rental, and 14.1 percent of units were vacant.⁵⁹⁸ In moderate-income census tracts, 37.0 percent of units were rental, and 10.5 percent of units were vacant.⁵⁹⁹ The median age of housing stock in the assessment area was 58 years.⁶⁰⁰ However, the median age of housing stock in low- and moderate-income census tracts was higher, at 61 years for both tract levels.⁶⁰¹ These factors suggest that there may be limited opportunities for home purchase loans in low- and moderate-income census tracts; however, there may be more refinancing and home improvement lending opportunities within those two tract levels.

During the review period, the median listing price of housing inventory in Black Hawk County increased year-over-year. In January 2018, the median listing price of housing inventory in Black Hawk County was \$129,900.⁶⁰² By January 2019, the median listing price of housing inventory increased 7.7 percent to \$139,900.⁶⁰³ For January 2020, the median sales price of housing inventory showed further growth and increased 9.0 percent to \$152,450.⁶⁰⁴

The price appreciation for housing inventory in Black Hawk County impacts home affordability, especially for low- and moderate-income families. According to 2020 FFIEC data, the estimated median family income range in the MSA for low-income families was \$0 to \$36,599, and the estimated median family income range for

⁵⁹⁷ FRB Atlanta calculations of 2020 FFIEC census data.

⁶⁰⁴ Ibid.

moderate-income families was \$36,600 to \$58,559. Using the assumption that a borrower can obtain a loan for approximately three times their annual income and using the 2020 FFIEC median family income for low- and moderate-income families in the MSA, affordable homes would be priced at \$109,797 and \$175,797, respectively.⁶⁰⁵ As such, these prices show that home affordability for low-income families is a challenge considering that the median sales price of housing inventory in 2020 was \$154,900. For moderate-income families with annual incomes closer to \$58,559, they may not experience as great of a challenge obtaining home ownership. On the contrary, moderate-income families whose income falls on the lower end of the income range (\$36,600) may have trouble obtaining home ownership.

Demographic Characteristics by Census Tract

The following table presents key demographic and business information used to help develop a performance context for the assessment area for the years 2018 through 2020. The data reflects the 2020 FFIEC census data and Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

⁶⁰⁵ This example assumes that the median family income for low-income families would be \$36,599 and the median family income for-moderate income families would be \$58,559.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the community and economic development landscapes, community and economic development practitioners were contacted. These individuals discussed the various needs and opportunities across the region as well as how financial institutions can be responsive to local community development needs. Several themes emerged from the discussions; in particular, contacts noted that low- to moderate-income communities need improvements in overall bank participation, availability of capital, and affordable housing preservation and construction.

From the perspectives of the community contacts, Waterloo has stagnated in many regards. According to one contact focused on affordable housing, the city contains fifty percent of Black Hawk County's population but only thirty percent of new construction takes place within the city. Furthermore, the city is the largest metropolitan area in Iowa but has the lowest median income. It has also experienced home abandonment, and the city government is acquiring these properties after a period of time for revitalization efforts. A contact primarily focused on small business lending listed several concerns pertaining to Waterloo. This contact noted an annual study consistently names Waterloo one of the worst cities in America for minorities, the demographics and population of the city have remained largely unchanged for over fifteen years, small businesses have a growing debt burden coupled with a worker shortage, and it has been years since large companies, such as John Deere and Tyson, have taken interest in Waterloo.

The city's growing stock of abandoned homes was the primary concern and opportunity for the contact focused on affordable housing. The local government is determined to provide affordable housing and has implemented strategies to facilitate the razing of abandoning homes and subsequent new construction. Although rising dwelling costs have incentivized new home construction in wealthier areas of Black Hawk County, city government has implemented an infill program consisting of tax credits, cash incentives, friendly zoning ordinances, approval of many housing styles, and local building partnerships with Habitat for Humanity and Hawk Eye Community College. The contact stated the infill program is focused on providing one-hundred affordable homes per year to low- and moderate-income individuals who live predominately on the North and East sides of Waterloo. The city is meeting only a third of its stated housing goals in part due to funding. Municipal bonds are the primary funding vehicle for the infill program and federal funds are secondary due to associated restrictions.

A community contact that works with small businesses cited access to adequate capital and low commercial appraisals as significant hindrances to economic development. The surrounding area is largely agrarian and relies on heavy machinery for farming. Metal fabrication shops provide needed services to maintain this equipment however, many of these small businesses are owned by aging baby boomers, are heavily debt-burdened from the pandemic and are short-staffed. The contact stated that even though there is interest from younger individuals to purchase these businesses, they do not have access to the amount of capital needed and banks are being overly conservative in their business valuations. The contact believes banks could have greater participation in SBA lending and further financial product and underwriting innovation is needed to serve the community.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE WATERLOO, IOWA
ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending performance in the Waterloo assessment area is adequate. The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a low level of community development loans in the Waterloo assessment area.

The analysis included 82 HMDA-reportable loans and 33 CRA small business loans reported by the bank in the Waterloo assessment area during the review period. Therefore, HMDA-reportable lending received slightly greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Waterloo assessment area accounted for 25.7 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Iowa and 34.0 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 53.2 percent of Regions Bank's Iowa deposits are in the Waterloo assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 82 HMDA-reportable loans analyzed, 22 loans (26.8 percent) were home purchase loans. Of the total home purchase loans made, none were located in low-income tracts; however, nine loans (40.9 percent) were located in moderate-income tracts.

The bank did not make any home purchase loans in low-income tracts during the period of 2018 through 2020. Also, the percentage of owner-occupied units was limited in these tracts at 3.1 percent and aggregate lending

performance also indicated limited lending opportunities in these tracts. Together with the bank's overall low volume of home purchase loans during this three-year review period, home purchase lending in low-income tracts was not rated.

Home purchase lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (40.9 percent) was above the percentage of owner-occupied units (16.7 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (100.0 percent) was significantly above the aggregate lending performance (14.5 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (27.3 percent) was significantly above the aggregate lending performance (13.6 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (37.5 percent) was significantly above the aggregate lending performance (13.5 percent) in these tracts.

Home Refinance Loans

Regions Bank made 39 home refinance loans from 2018 through 2020, which represents 47.6 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, two loans (5.1 percent) were located in low-income tracts, and 10 loans (25.6 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts was not rated due to a low volume of lending by all lenders in these tracts and the limited percentage of owner-occupied units in these tracts.

Home refinance lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (25.6 percent) was above the percentage of owner-occupied units (16.7 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (37.5 percent) was significantly above the aggregate lending performance (16.5 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (33.3 percent) was significantly above the aggregate lending performance (11.4 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (15.8 percent) was significantly above the aggregate lending performance (9.1 percent) in these tracts.

Home Improvement Loans

Regions Bank made 21 home improvement loans from 2018 through 2020, which represents 25.6 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, none were located in low-income tracts; however, three loans (14.3 percent) were located in moderate-income tracts.

The bank did not make any home improvement loans in low-income tracts during the period of 2018 through 2020. As previously mentioned, lending opportunities may also be limited given the percentage of owner-occupied units in these tracts. Together with the bank's overall low volume of home improvement loans during this three-year review period, home improvement lending in low-income tracts was not rated.

Home improvement lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (14.3 percent) was similar to the percentage of owner-occupied units (16.7 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income

tracts (100.0 percent) was significantly above the aggregate lending performance (16.5 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (9.1 percent) was below the aggregate lending performance (16.0 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (11.1 percent) was similar to the aggregate lending performance (12.2 percent) in these tracts.

Small Business Loans

Regions Bank made 33 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, four loans (12.1 percent) were located in low-income tracts, and seven loans (21.2 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's small business lending in low-income tracts (12.1 percent) was above the percentage of businesses (7.1 percent) in these tracts. In 2018, the bank made no small business loans (0.0 percent) in low-income tracts and was significantly below the aggregate lending performance (7.9 percent) in these tracts. In 2019, Regions Bank made no small business loans (0.0 percent) in low-income tracts and was significantly below the aggregate lending performance (6.7 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (20.0 percent) was significantly above the aggregate lending performance (8.2 percent) in these tracts.

Small business lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (21.2 percent) was above the percentage of businesses (17.2 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (50.0 percent) was significantly above the aggregate lending performance (17.1 percent) in these tracts. In 2019, Regions Bank made no small business loans (0.0 percent) in moderate-income tracts and was significantly below the aggregate lending performance (16.3 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (15.0 percent) was slightly below the aggregate lending performance (19.2 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is good. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (36.4 percent) was above the percentage of low-income families (21.0 percent). In 2018, the bank's home purchase lending to low-income borrowers (33.3 percent) was significantly above the aggregate lending performance (13.7 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (36.4 percent) was significantly above the aggregate lending performance (16.0 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (37.5 percent) was significantly above the aggregate lending performance (13.9 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (27.3 percent) was above the percentage of moderate-income families (19.1 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (33.3 percent) was above the aggregate lending performance (25.4 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (36.4 percent) was above the aggregate lending performance (25.5 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (12.5 percent) was significantly below the aggregate lending performance (25.8 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (33.3 percent) was above the percentage of low-income families (21.0 percent). In 2018, the bank's home refinance lending to low-income borrowers (37.5 percent) was significantly above the aggregate lending performance (12.4 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (50.0 percent) was significantly above the aggregate lending performance (9.3 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (21.1 percent) was significantly above the aggregate lending performance (4.5 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (25.6 percent) was above the percentage of moderate-income families (19.1 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (37.5 percent) was significantly above the aggregate lending performance (23.6 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (16.7 percent) was slightly below the aggregate lending performance (19.1 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (26.3 percent) was significantly above the aggregate lending performance (15.7 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (19.0 percent) was similar to the percentage of low-income families (21.0 percent). In 2018, the bank made no home improvement loans to low-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (12.4 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (9.1 percent) was significantly below the aggregate lending performance (18.8 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (33.3 percent) was significantly above the aggregate lending performance (11.5 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is good. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (28.6 percent) was above the percentage of moderate-income families (19.1 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (100.0 percent) was significantly above the aggregate lending performance (26.3 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (45.5 percent) was significantly

above the aggregate lending performance (22.9 percent) to these borrowers. In 2020, the bank made no home improvement loans to moderate-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (23.7 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate. From 2018 through 2020, 36.4 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 88.9 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (50.0 percent) was similar to the aggregate lending performance (47.5 percent) to these businesses. In 2019, the bank's small business lending to small businesses (60.0 percent) was slightly above the aggregate lending performance (48.7 percent) to these businesses. In 2020, the bank's small business lending to small businesses (25.0 percent) was below the aggregate lending performance (39.3 percent) to these businesses. Lastly, 100.0 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes a low level of community development loans in the Waterloo assessment area. During the review period, the bank originated one community development loan totaling \$17,000 toward community service activities benefiting LMI people and four community development PPP loans totaling \$60,000 primarily towards revitalization and stabilization efforts through the PPP.

INVESTMENT TEST

Regions Bank's investment performance in the Waterloo assessment area is adequate. The bank made an adequate level of investments and grants that demonstrated adequate responsiveness to credit and community development needs. Combined investment and contribution activity inside the assessment area totaled \$2.2 million. The bank made one investment during the review period for approximately \$545,400 in a mortgage-backed security secured by loans to low- and moderate-income individuals. The bank held investments from prior review periods, including a LIHTC investment and mortgage-backed securities.

During the review period, the bank made contributions totaling \$38,100. Regions donated about \$26,000 in advertising to a local food bank to help solicit food donations to meet the increased need during the pandemic. The remaining donations were to organizations providing community services to LMI individuals. As described earlier in the report, the bank also made several contributions to statewide organizations that will benefit all of the bank's assessment areas in Iowa, including Waterloo.

SERVICE TEST

Regions Bank’s service test performance in the Waterloo assessment area is good.

Retail Services

Retail banking services are good in the Waterloo full-scope assessment area.

The distribution of three branch offices and three full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The percentage of branches in low-income tracts greatly exceeded the percentage of households and businesses in the same geography: 5.4 percent of households and 7.1 percent of businesses were located in low-income census tracts compared to 33.3 percent of the bank’s branches. The bank had no branches in moderate-income tracts compared to 19.2 percent of households and 17.2 percent of businesses in the same geography. Overall, the bank’s retail delivery systems are accessible to the bank’s geographies and individuals of different income levels in its assessment area.

During the review period, the bank neither opened nor closed any branch offices or full-service ATMs in low- or moderate-income census tracts. As a result, the bank’s record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

 DTO - Drive thru only is a subset of total branches
 SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

Regions Bank provides a relatively high level of community development services in the Waterloo assessment area. During the review period, Regions Bank employees engaged in 12 qualified service activities totaling 180 hours. All of the bank's service activities were committed to organizations that provide community services to low- and moderate-income individuals, communities, and small businesses in the Waterloo assessment area. The bank engaged with two qualifying organizations in the assessment area. A notable activity included a bank employee serving on the board of directors and providing technical assistance to an organization that provides programs assisting with emergency shelter, utility assistance, financial education, and youth services to economically disadvantaged families in the area.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE IOWA METROPOLITAN
ASSESSMENT AREAS

- *Cedar Rapids Assessment Area (Benton, Jones, and Linn counties)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 25.0 percent of its branches in Iowa.
 - As of June 30, 2020, the bank had \$41.2 million in deposits in this assessment area, representing a market share of 0.6 percent and 13.4 percent of Regions Bank’s total deposits in Iowa.
- *Des Moines Assessment Area (Polk and Warren counties)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 25.0 percent of its branches in Iowa.
 - As of June 30, 2020, the bank had \$78.2 million in deposits in this assessment area, representing a market share of 0.4 percent and 25.5 percent of Regions Bank’s total deposits in Iowa.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Cedar Rapids	Consistent	Not Consistent (Above)	Not Consistent (Below)
Des Moines	Consistent	Not Consistent (Above)	Consistent

For the lending test, Regions Bank received a rating of low satisfactory for the State of Iowa. Performance in the Cedar Rapids and Des Moines metropolitan limited-scope assessment areas was consistent with the statewide lending test performance. For the geographic distribution of loans, the lending level was adequate in both of the metropolitan limited-scope assessment areas. Performance was good for the borrower distribution of loans in Des Moines and adequate in Cedar Rapids. The bank made no community development loans in either of the limited-scope metropolitan areas.

For the investment test, Regions Bank received a rating of low satisfactory for the State of Iowa. The bank’s level of investments in the two metropolitan limited scope assessment areas was excellent, and performance was above the bank’s statewide investment test performance for both assessment areas.

For the service test, Regions Bank received a rating of high satisfactory for the State of Iowa. Performance in the Des Moines metropolitan limited-scope assessment area was consistent with the bank’s statewide performance, while Cedar Rapids was weaker than the state performance due to limited community development performance.

**NONMETROPOLITAN STATEWIDE AREA
LIMITED-SCOPE REVIEW**

The following assessment area was reviewed using limited-scope examination procedures.

**DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE IOWA NON-METROPOLITAN
ASSESSMENT AREAS**

- *Fayette Assessment Area (Fayette County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 12.5 percent of its branches in Iowa.
 - As of June 30, 2020, the bank had \$24.2 million in deposits in this assessment area, representing a market share of 4.4 percent and 7.9 percent of Regions Bank’s total deposits in Iowa.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, the assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding this area.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Fayette	Consistent	Consistent	Not Consistent (Below)

For the lending test, Regions Bank received a rating of low satisfactory for the State of Iowa. Performance in the Fayette nonmetropolitan limited-scope assessment area was consistent with the statewide lending test performance. For the geographic distribution of loans, lending levels were good in Fayette. Performance was

adequate for the borrower distribution of loans in Fayette. The bank made no community development loans in the limited-scope nonmetropolitan area.

For the investment test, Regions Bank received a rating of low satisfactory for the State of Iowa. The bank's level of investments in its one limited scope nonmetropolitan assessment area was adequate. Additionally, the bank's investment performance in this assessment area was consistent with the statewide investment test performance.

For the service test, Regions Bank received a rating of high satisfactory for the State of Iowa. Performance in the Fayette assessment area was below the bank's state performance due to weaker retail delivery services and limited community development service performance.

The performance in the nonmetropolitan limited-scope assessment area did not affect the overall state rating.

Kentucky

CRA RATING FOR KENTUCKY: SATISFACTORY

The Lending Test is rated: Low Satisfactory

The Investment Test is rated: Low Satisfactory

The Service Test is rated: Low Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a low level of community development loans in its Kentucky assessment areas.
- The bank provides an adequate level of qualified community development investments and grants in the Kentucky assessment areas.
- Retail banking services are good in the bank's Kentucky assessment areas.
- The bank provides an adequate level of community development services throughout the Kentucky assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in Kentucky:

- Southwest Kentucky

A limited-scope review was conducted for the following assessment area:

- Simpson

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN KENTUCKY

As of June 30, 2020, Regions Bank had \$553.6 million in deposits in Kentucky accounting for 0.5 percent of the bank's total deposits. Regions Bank operated 11 branch offices in Kentucky as of December 31, 2020, representing 0.8 percent of the bank’s total branches. HMDA-reportable lending in Kentucky accounted for 0.7 percent of total institutional HMDA-reportable lending by number of loans and 0.3 percent by dollar volume. CRA small business lending in Kentucky accounted for 0.2 percent of the bank’s total CRA small business lending by both number of loans and dollar volume. Overall, the bank’s HMDA- reportable and CRA lending activity in the state was similar to the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Statewide Summary of Lending Activity
Assessment Areas Located in
Kentucky

Loan Type	#	%	\$ (000s)	%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN KENTUCKY

Lending Test

The lending test rating in the state of Kentucky is low satisfactory. Overall, performance in Kentucky with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, Regions Bank makes a low level of community development loans in Kentucky.

During the review period, Regions Bank reported 944 HMDA-reportable loans and 168 small business loans in Kentucky. The rating for Kentucky is based on performance in the Southwest Kentucky full-scope assessment

area. Approximately 94.2 percent of the bank's HMDA-reportable and small business lending by number of loans in Kentucky occurred within this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of Kentucky is derived from the Southwest Kentucky full-scope assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

Regions Bank makes a low level of community development loans in the state of Kentucky. During the review period, the bank originated nine qualifying community development loans totaling \$1.3 million benefiting its Kentucky assessment areas. All of the community development loans made in Kentucky were PPP loans, and while PPP loans were a need for part of the review period, they were not the only need. Because the bank was not considered responsive to the needs of its Kentucky assessment areas, the bank's community development lending activities that occurred outside of its Kentucky assessment areas were not given consideration for this evaluation. More information on community development loans can be found in the full-scope assessment area section of this report.

Investment Test

The investment test rating for Kentucky is low satisfactory.

Regions Bank made an adequate level of qualified investments and contributions relative to the bank's limited presence in the state. The bank had qualified investments of \$1.7 million in the Kentucky assessment areas, with approximately 17.2 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$275,000.

Southwest Kentucky was the assessment area in the state reviewed using full-scope procedures. Approximately 84.2 percent of combined investment and contribution activity was in this assessment area, compared to 91.2 percent of deposits in the market as of June 30, 2021. Performance in the assessment area was adequate.

The bank was considered responsive to community credit needs in the state. Therefore, positive consideration was given for investments and donations that benefit a broader statewide area, without a purpose, mandate, or function of serving Kentucky's assessment areas. Specifically, the bank had investments totaling \$12.9 million outside the bank's assessment areas, including \$10.5 million in LIHTC projects and \$381,000 in mortgage-backed securities. Additionally, the bank made donations of \$29,700 to a food bank and other organizations providing community services to LMI individuals outside the bank's assessment areas in the state.

Additional details regarding investments and contributions can be found in the full-scope assessment area section.

Service Test

The service test rating for Kentucky is low satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are accessible to the bank's geographies and individuals of different income levels in the assessment areas. Overall, banking services and hours of operations do not vary in a way that inconveniences the bank's assessment areas, including low- and moderate-income geographies or low- and moderate-income individuals. The record of opening and closing of branch offices has generally not adversely affected the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period, the bank did not open any branch offices in Kentucky. The bank closed one branch office in a middle-income tract. Overall, the bank's retail service performance is considered good in Kentucky.

Community Development Services

Regions Bank provides an adequate level of community development services that benefit residents and small businesses in Kentucky. During the examination period, employees engaged in 21 qualified service activities totaling 285 hours in the Kentucky assessment areas. All of the bank's community development services were provided in the Southwest Kentucky full-scope assessment area, where performance was adequate.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

NONMETROPOLITAN STATEWIDE AREA FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE SOUTHWEST KENTUCKY ASSESSMENT AREA

Overview

The Southwest Kentucky assessment area is a nonmetropolitan area consisting of the following five counties: Ballard, Calloway, Graves, McCracken, and Marshall. As of December 31, 2020, Regions Bank operated 10 branch offices in the assessment area. The bank's branch presence in the assessment area represents 90.9 percent of the bank's branches and 91.2 percent of its deposits in Kentucky. In addition, the market represents the largest concentration of the bank's combined HMDA- reportable and CRA small business lending in the state at 94.0 percent by dollar volume.

Southwest Kentucky is an active banking market. According to the FDIC Summary of Deposits Report dated June 30, 2020, there are 15 financial institutions operating 72 branch locations in the assessment area with \$4.6

billion in total deposits.⁶⁰⁶ Regions Bank is ranked 3rd in the market with 11.0 percent of deposits (\$504.8 million).⁶⁰⁷ Community Financial Services Bank had the largest deposit market share at 26.3 percent, and The Paducah Bank and Trust Company was second in deposit market share (13.4 percent).⁶⁰⁸

HMDA-reportable lending in the assessment is competitive. Regions Bank originated or purchased 8.5 percent in loans during 2018. For that year, the bank ranked 3rd out of 204 reporters. In 2019, Regions Bank originated or purchased 7.7 percent in loans. The bank ranked 2nd out of 215 reporters for the year. Lastly, Regions Bank originated or purchased 6.4 percent in loans for the assessment area during 2020. For that year, Regions Bank ranked 5th out of 338 reporters. From 2018 through 2020, HMDA-reportable lending in the assessment area was primarily dominated by U.S. Bank National Association and Independence Bank of Kentucky.

CRA small business lending is also competitive. For CRA small business and small farm lending, Regions Bank ranked 13th out of 64 reporters in 2018, with 1.6 percent of reported loans. In 2019, the bank ranked 18th out of 67 reporters, with 1.1 percent of reported loans. Furthermore, Regions Bank ranked 10th out of 93 reporters, with 3.2 percent of reported loans in 2020. From 2018 through 2020, lending in the assessment area was primarily dominated by U.S. Bank National Association, American Express, and Independence Bank of Kentucky.

Population and Income Characteristics

According to 2020 U.S. census data, the population of the Southwest Kentucky assessment area was 181,014, which is an increase of less than 1 percent since the last decennial census in 2010.⁶⁰⁹ From 2010 to 2020, three counties in the assessment area, Calloway County, Ballard County, and Graves County, posted population losses ranging from 0.2 percent to 6.3 percent.⁶¹⁰ On the contrary, two counties, Marshall County and McCracken County, had population gains of 0.7 percent and 3.5 percent, respectively.⁶¹¹ McCracken County is the most populous county in the assessment area with 67,875 people.⁶¹² Marshall County, Graves County, and Calloway County each have similar total populations at 31,659, 36,649, and 37,103 individuals, respectively.⁶¹³ Ballard County is the least populous county in the assessment area with 7,728 people.⁶¹⁴

According to 2020 FFIEC census data, the assessment area is made up of 44 census tracts: 1 tract is low-income (2.3 percent), 6 tracts are moderate-income (13.6 percent), 19 tracts are middle-income (43.2 percent), and 18 tracts are upper-income (40.9 percent).⁶¹⁵ Ballard County and Calloway County have designated distressed middle-income census tracts due to unemployment or poverty.

⁶¹⁵ FRB Atlanta calculations 2020 FFIEC census data.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Kentucky state nonmetropolitan areas. The table below provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper). As shown, the median family income for the nonmetropolitan areas increased from \$49,400 in 2018 to \$51,500 in 2020. The 2020 FFIEC census data shows that the median family income was highest in McCracken County (\$57,186).⁶¹⁶ Also, the 2020 FFIEC census data indicates that 30.7 percent of families in the assessment area are considered low- to moderate-income.⁶¹⁷

**Borrower Income Levels
KY State Non-Metro**

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2018	\$49,400	0 - \$24,699	\$24,700 - \$39,519	\$39,520 - \$59,279	\$59,280 - & above
2019	\$49,800	0 - \$24,899	\$24,900 - \$39,839	\$39,840 - \$59,759	\$59,760 - & above
2020	\$51,500	0 - \$25,749	\$25,750 - \$41,199	\$41,200 - \$61,799	\$61,800 - & above

Poverty is a concern in the assessment area. The percentage of families living in poverty in Ballard County, Calloway County, Graves County, and McCracken County’s is 12.4 percent, 13.1 percent, 12.5 percent, and 11.3 percent, respectively.⁶¹⁸ Marshall County has the lowest percentage of families living in poverty at 7.1 percent.⁶¹⁹ In the assessment area, 53.0 percent of families living in low-income census tracts and 27.7 percent of families living in moderate-income census tracts are below the poverty level.⁶²⁰

Economic Conditions

The Southwest Kentucky assessment area is near the Illinois, Missouri, and Tennessee state borders and located near three major rivers: the Ohio, Mississippi, and Tennessee. Many of the largest employers are tied to the area’s location along these rivers. Within the Commonwealth of Kentucky there is a network of 15 area development districts formed by state legislation to plan regional and economic development. As of 2017, all five counties in the Southwest Kentucky assessment area are within the Purchase Area Development District (PADD).⁶²¹

According to the South Western Kentucky Economic Development Council, the Fort Campbell Army Post is the largest regional employer with 31,310 workers followed by Christian County Board of Education, Martinrea, Wal-Mart Distribution Center, T.Rad, Jennie Stuart Medical Center, Western State Psychiatric Hospital,

TeleTech Grupo Antolin Kentucky, and TGASK.⁶²² In McCracken County, Baptist Health—Paducah and Mercy Health-Lourdes are the largest employers because they have more than 1,00 employees.⁶²³ Other major employers in McCracken County include city of Paducah, Computer Services, Inc. Credit Bureau Systems, Ingram Barge, Lowes, Lynx Services, Paducah Public Schools, Triangle Enterprises, TVA Shawnee Power Plant, UACJ Automotive/Whitehall Industries, and ViWin Tech Windows & Doors; these employers have 250 to 499 employees.⁶²⁴ During 2021, the workforce in McCracken County was primarily employed in the services industry (45.9 percent), retail trade industry (25.1 percent), and manufacturing industry (7.7 percent).⁶²⁵

Furthermore, over the past few years, the city of Paducah has concentrated its efforts on increasing tourism through the Riverfront Development Plan.⁶²⁶ This plan includes a docking point for passenger riverboats to have easy access from the boat to land.⁶²⁷ The project also includes the installation of multi-use paths for bikes and pedestrians as well as broadband to allow for emergency call boxes, security cameras, and internet access points to be installed along the riverfront.⁶²⁸ In July 2019, the city of Paducah applied for the Better Utilizing Investments to Leverage Development (BUILD) Grant, issued by the U.S. Department of Transportation, to assist with the Riverfront Development project.⁶²⁹ In November 2019, the city received \$10.4 million in funding from the grant.⁶³⁰

There are many opportunities for businesses in the assessment area to take advantage of incentive programs for business development and talent management. Through the Bluegrass State Skills Corporation (BSSC), the Kentucky Cabinet for Economic Development offers financial assistance to qualified companies to expand workforce skills through the Grant-In-Aid and Skills Training Investment Credit programs.⁶³¹

Furthermore, the Kentucky Economic Development Finance Authority (KEDFA) offers business incentives for materials and equipment investment, tax credits for small business and angel investment, direct loans for fixed asset financing, grants, and economic development bonds.⁶³² In addition to bank lending, the Purchase Area Development District (PADD) offers assistance services to small businesses from start-up through expansion.⁶³³ PADD helps businesses by providing them with access to credit through the Small Business Administration (SBA), United States Department of Agriculture (USDA), and Economic Development Administration (EDA) loan programs.⁶³⁴

According to 2020 Dun & Bradstreet information, there were 7,854 businesses within the Southwest Kentucky assessment area, 90.7 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses.⁶³⁵ Additionally, 13.2 percent of small businesses in the assessment area were in moderate-income tracts, while there were far fewer in low-income tracts at less than 1.0 percent.⁶³⁶ According to CRA reportable data from all reporters in the assessment area, loan originations made to small businesses posted growth from 2018 to 2019. Specifically, during that time, there was a 3.4 percent increase in loan originations to small businesses. On the contrary, from 2019 to 2020, there was a 3.0 percent decline in the number of loan originations made to small businesses.

The COVID-19 global pandemic represented a major event impacting the economy in Southwest Kentucky and nationwide. As the pandemic unfolded, many Kentucky businesses had to reduce or close because of the state's stay-at-home orders that prohibited non-essential in-person work; this order went into effect on March 25, 2020.⁶³⁷ In order to sustain the nation's economy, the United States' Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 25, 2020; this legislation established the Paycheck Protection Program, which was implemented by the SBA, to provide loans to small businesses for payroll costs and certain other expenses.⁶³⁸ Also as a result of the declining economy, PADD offered working capital loans to help support local small businesses impacted by the pandemic.⁶³⁹ This program was only available to businesses that did not receive loans through the Paycheck Protection Program or the Economic Injury Disaster Loan Program. The loans from the capital loan program ranged from \$5,000 to \$25,000 in amount and could be used to meet short-term payroll, rent, utilities, loan interest, supply, inventory management, and supplier payment needs.⁶⁴⁰

Moreover, the assessment area experienced both a fall and a rise in unemployment during the review period. As shown in the chart below, the assessment area's unemployment rate decreased between 2018 and 2019. Despite this decrease, Callaway County was the only county that saw an increase in unemployment during that time. Specifically, the unemployment rate for the county increased from 3.8 percent in 2018 to 4.0 percent in 2019. Overall, during 2018 and 2019, Ballard County had the highest unemployment rate in the assessment area with a rate of 6.5 percent in 2018 and a rate of 5.5 percent in 2019. In 2020, unemployment rates in the assessment area, Non-MSA Kentucky, and Kentucky collectively increased because of the negative impact the COVID-19 pandemic had on the U.S. economy.⁶⁴¹ For this year, the unemployment rate in the assessment area increased to 6.5 percent.

According to the 2020 FFIEC census data, there were 86,119 housing units located in the assessment area, of which 59.3 percent were owner-occupied, 25.1 percent were rental units, and 15.7 percent were vacant.⁶⁴² While most units were owner-occupied, a disproportionately higher percentage of housing units in low- and moderate-income tracts were rental units or vacant. In low-income census tracts, 75.2 percent of all housing units were rentals or vacant.⁶⁴³ In moderate-income census tracts, 70.1 percent of the units were rental or vacant.⁶⁴⁴ The median age of the housing stock was 44 years, though the median age of housing was older, 61 years, in the one low-income census tract in the assessment area compared to 45 years in both the moderate- and middle-income census tracts.⁶⁴⁵

During the review period, the assessment area experienced an increase in the number of HMDA-reportable home purchase loans. Based on HMDA-reportable data, there was a 6.1 percent increase in the number of home purchase loan originations from 2018 to 2019. From 2019 to 2020, there was a 24.5 percent increase in the number of home purchase loans.

Even though there has been an increase in home purchase lending in the assessment area, there is a significant portion of homeowners who are cost-burdened with housing. Cost-burdened means that someone spends more than 30 percent of their income on housing. The percentage of homeowners who are considered to be cost-

⁶⁴² FRB Atlanta calculations of 2020 FFIEC census data.

⁶⁴³ Ibid.

⁶⁴⁴ Ibid.

⁶⁴⁵ Ibid.

burdened was greater than 15 percent for each county in the assessment area.⁶⁴⁶ Ballard County had the lowest percentage of cost-burdened homeowners in the assessment area at 15.7 percent.⁶⁴⁷ Both Graves County and McCracken County had similar percentages of cost-burdened homeowners at 16.6 percent and 17.6 percent, respectively.⁶⁴⁸ Lastly, Marshall County and Calloway County had the highest percentage of cost-burdened homeowners at 18.2 and 18.9 percent, respectively.⁶⁴⁹

The median gross rent for a two-bedroom apartment varies throughout the assessment area. Marshall County, Graves County, and Ballard County have the lowest median monthly rental cost for a two-bedroom apartment at \$607, \$612, and \$625, respectively.⁶⁵⁰ The median monthly rental cost for a two-bedroom apartment in McCracken County is \$749.⁶⁵¹ The highest median monthly rental cost for a two-bedroom apartment is in Calloway County at \$817.⁶⁵² In the assessment area, 43.2 percent of renters pay more than 30 percent of their income towards rent.⁶⁵³ Overall, this means that there is a large number of individuals in the assessment area who are cost-burdened with rental expense.⁶⁵⁴

Demographic Characteristics by Census Tract

The following table presents key demographic and business information used to help develop a performance context for the assessment area. The data reflects the 2020 FFIEC census data and the 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the community development and economic landscapes, community development experts were contacted. These individuals discussed the various opportunities and challenges in Calloway and McCracken counties and how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

The contacts stated that Calloway County is a college area with around 10,000 students who attend Murray Kentucky University. It was mentioned that Murray University is a major employer; however, manufacturing is also a key economic driver in the region. Based on the interview, the contacts noted that many manufacturing plants in the area are small to medium size, and German, Korean, and Canadian companies have a strong presence. The interviewees highlighted that some of the economic challenges in Calloway County are:

- Individuals having to work two to three jobs to make a livable wage,
- There is a lack of a skilled workforce such as HVAC, plumbers, electricians, and welders. To rectify this issue, the county has started a plumbing training program and is developing an electrical program. These programs target individuals who are unemployed and underemployed,
- Lack of available locations for businesses to locate and expand,
- Calloway lacks the ease of access to major routes. The geographic location of Calloway County is not near a major interstate and that is a barrier for attracting businesses, and
- Within the last year, the county has seen an increase in its transient homeless population.

The contacts discussed the demographics and challenges facing McCracken County. It was noted that McCracken County has a population of just over 65,000 residents, and the major industries in the county include healthcare, education, manufacturing, and transportation. It was also noted that the city in McCracken County is a great place to live and work; however, the area is not without its challenges. According to contacts, about 25 percent to 30 percent of the residents are low-to moderate income individuals/families residing primarily in the Southside within the urban core of Paducah. Per the contacts, some of the challenges of the Southside's low- to moderate-income individuals include:

- The Southside of Paducah is a food desert with a high density of food insecurity among its residents,
- There is a lack of adequate transitional and supportive housing for emergency situations,
- The area faces a shortage of affordable housing—about 600 clients currently are on the Housing Authority's wait list, and
- The lack of accurate data on the actual count of homeless individuals in the community—especially for those that are couch surfing or doubling and tripling up with family/friends.

It was mentioned that Paducah is trying to meet the needs of these individuals/families with various food pantries located throughout the community. Also, several partner organizations and the public school system are looking for ways to address the affordable housing issues. Further, it was noted by the contacts that the city has identified strategic solutions to address housing needs, but it is not close to fully addressing those gaps.

Concerning affordable housing, the contacts mentioned that there is a shortage of affordable housing in both Calloway and McCracken counties. It was noted that Murray, KY (located in Calloway County) has a plethora of rental units for college students, but the quality of those units varies greatly. The contacts explained that there are new apartment complexes that have amenities such as swimming pools and gyms for the students who can afford them, and there are also older complexes and dilapidated homes where six or seven students share units just to afford the rent. The individuals also said that in Paducah City (located in McCracken County) there is a shortage of safe, decent, and affordable housing and rentals. It was noted that most of the affordable units are located within Paducah's city limits, and many families live in places that are not up to code.

Furthermore, the contacts discussed the area's housing market. It was mentioned that when homes are put up for sale, they are selling within 24 hours to 7 days. The contacts noted that starter homes in Murray, KY (located in Calloway County) are selling for over \$250,000, which makes finding affordable housing nearly impossible. The contacts also stated that most low- to moderate-income individuals are in the northeast part of the city, and it is rare to find vacancies. Also, the northeast section of the city falls within an Opportunity Zone, and developers are looking to leverage New Market Tax Credits and Opportunity Zone tax credits to develop more affordable housing and combat the affordable housing issue.

Concerning small businesses, the contacts discussed the state of small businesses and how the COVID-19 pandemic impacted them. It was mentioned that the success of small businesses in both counties varied, but some businesses closed permanently. One contact noted that he saw new businesses start during the pandemic, and these businesses flourished while other firms were unstable. Contacts mentioned that minority-owned businesses have suffered the most due to a lack of access to capital, resources, and technical assistance during the pandemic. The contacts explained that some of the reasons businesses have succeeded during the COVID-19 pandemic included:

- The ability to adapt and pivot with the use of technology during COVID-19,
- Support from an organization which manages funds from a grant set aside by the city of Murray, KY, prior to start of PPP, aimed at making modest grants to other businesses to cover payroll,
- Paycheck Protection Program funds which saved many businesses, and financial institutions were very responsive in processing PPP loans,
- Employers improving their company's culture and focusing on retaining employees and using them as active recruiters for the company, and
- The pandemic forced employers to self-reflect on ways to retain and attract employees including offering/paying livable wages.

However, some of the challenges for businesses during the pandemic included:

- Businesses facing labor shortages and struggling to find people who wanted to work,
- Business borrowers having difficulty finding resources due to a lack of outreach from banks and other financial service providers,
- Finding resources is a "scattered process" that lacks smooth connections between organizations and providers,
- Bank have become more conservative in lending practices, and

- Access to capital for business owners needing \$50,000 to \$100,000 is a challenge. Microloans are available up to \$50,000, but there is difficulty finding funding for small dollar loans for around \$75,000.

The contacts provided several opportunities that financial institutions can help with in the area. The following opportunities were brought forward:

- Relationship building—banks can play an important role in educating the community on financial literacy, but these programs are found not to be very beneficial if there is not a lasting relationship built between the attendees and the banks,
- Additional credit recovery classes which are of great value for low- and moderate-income individuals,
- Assistance with packaging small business loans, and
- Bank outreach with community residents to break down the barriers of mistrust and fear of financial institutions.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE SOUTHWEST KENTUCKY ASSESSMENT AREA

LENDING TEST

Regions Bank's lending performance in the Southwest Kentucky assessment area is adequate. The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a low level of community development loans in the assessment area.

The analysis included 697 HMDA-reportable loans and 157 CRA small business loans reported by the bank in the Southwest Kentucky assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Southwest Kentucky assessment area accounted for 93.6 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Kentucky and 96.3 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 91.2 percent of Regions Bank's Kentucky deposits are in the Southwest Kentucky assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context

information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 697 HMDA-reportable loans analyzed, 193 loans (27.7 percent) were home purchase loans. Of the total home purchase loans made, none were located within the one low-income tract in the assessment area; however, 10 loans (5.2 percent) were located in moderate-income tracts.

Home purchase lending within the one low-income tract in the assessment area was not rated because of a low share of owner-occupied housing inside that tract (0.4 percent) and due to a low volume of lending by all lenders in that tract.

Home purchase lending in moderate-income tracts is poor. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (5.2 percent) was similar to the percentage of owner-occupied units (6.1 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (13.5 percent) was significantly above the aggregate lending performance (7.9 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (1.7 percent) was significantly below the aggregate lending performance (6.1 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (2.4 percent) was significantly below the aggregate lending performance (5.6 percent) in these tracts.

Home Refinance Loans

Regions Bank made 368 home refinance loans from 2018 through 2020, which represents 52.8 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, none were located within the one low-income tract in the assessment area; however, 16 loans (4.3 percent) were located in moderate-income tracts.

Home refinance lending within the one low-income tract in the assessment area was not rated due to a low share of owner-occupied housing inside that tract (0.4 percent) and due to a low volume of lending by all lenders in that tract.

Home refinance lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (4.3 percent) was similar to the percentage of owner-occupied units (6.1 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (4.6 percent) was similar to the aggregate lending performance (5.1 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (6.3 percent) was slightly above the aggregate lending performance (5.5 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (3.0 percent) was below the aggregate lending performance (4.6 percent) in these tracts.

Home Improvement Loans

Regions Bank made 136 home improvement loans from 2018 through 2020, which represents 19.5 percent of the

HMDA-reportable loans analyzed. Of the total home improvement loans made, one loan (0.7 percent) was located within the one low-income tract in the assessment area, and four loans (2.9 percent) were located in moderate-income tracts.

Home improvement lending within the one low-income tract in the assessment area was not rated because of a low share of owner-occupied housing inside that tract (0.4 percent) and due to a low volume of lending by all lenders in that tract.

Home improvement lending in moderate-income tracts is poor. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (2.9 percent) was below the percentage of owner-occupied units (6.1 percent) in these tracts. In 2018, the bank made no home improvement loans in moderate-income tracts (0.0 percent) and was significantly below the aggregate lending performance (2.5 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (2.0 percent) was significantly below the aggregate lending performance (4.2 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (6.1 percent) was similar to the aggregate lending performance (6.5 percent) in these tracts.

Small Business Loans

Regions Bank made 157 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, two loans (1.3 percent) were located in the one low-income tract within the assessment area, and 28 loans (17.8 percent) were located in moderate-income tracts.

Small business lending within the low-income tract in the assessment area is poor. From 2018 through 2020, Regions Bank's small business lending in the low-income tract (1.3 percent) was above the percentage of businesses (1.0 percent) in this tract. In 2018, the bank made no small business loans within the low-income tract (0.0 percent) and was significantly below the aggregate lending performance (2.1 percent) in that tract. In 2019, Regions Bank made no small business loans in the low-income tract (0.0 percent) and was significantly below the aggregate lending performance (1.5 percent) in that tract. In 2020, the bank's small business lending in the low-income tract (2.3 percent) was above the aggregate lending performance (1.7 percent) in that tract.

Small business lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (17.8 percent) was above the percentage of businesses (13.5 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (17.5 percent) was above the aggregate lending performance (13.3 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (17.2 percent) was slightly above the aggregate lending performance (14.0 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (18.2 percent) was above the aggregate lending performance (14.5 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (4.1 percent) was below the percentage of low-income families (16.6 percent). In 2018, the bank's home purchase lending to low-income borrowers (1.9 percent) was significantly below the aggregate lending performance (4.1 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (3.4 percent) was similar to the aggregate lending performance (3.4 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (6.0 percent) was significantly above the aggregate lending performance (3.8 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is excellent. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (24.9 percent) was above the percentage of moderate-income families (14.1 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (21.2 percent) was above the aggregate lending performance (15.8 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (24.1 percent) was significantly above the aggregate lending performance (15.0 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (27.7 percent) was significantly above the aggregate lending performance (16.8 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (7.1 percent) was below the percentage of low-income families (16.6 percent). In 2018, the bank's home refinance lending to low-income borrowers (7.4 percent) was slightly above the aggregate lending performance (6.5 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (3.1 percent) was slightly below the aggregate lending performance (3.5 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (9.1 percent) was significantly above the aggregate lending performance (1.9 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is excellent. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (18.5 percent) was above the percentage of moderate-income families (14.1 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (16.7 percent) was above the aggregate lending performance (12.2 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (22.9 percent) was significantly above the aggregate lending performance (12.1 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (17.1 percent) was significantly above the aggregate lending performance (8.1 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is good. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (7.4 percent) was below the percentage of low-income families (16.6 percent). In 2018, the bank's home improvement lending to low-income borrowers (7.9 percent) was above the aggregate lending performance (5.6 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (6.1 percent) was similar to the aggregate lending performance (5.6 percent) to

these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (8.2 percent) was significantly above the aggregate lending performance (5.1 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is good. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (18.4 percent) was above the percentage of moderate-income families (14.1 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (18.4 percent) was above the aggregate lending performance (12.5 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (18.4 percent) was similar to the aggregate lending performance (18.1 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (18.4 percent) was slightly above the aggregate lending performance (15.2 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. From 2018 through 2020, 50.3 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 90.7 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (50.0 percent) was slightly above the aggregate lending performance (42.9 percent) to these businesses. In 2019, the bank's small business lending to small businesses (69.0 percent) was significantly above the aggregate lending performance (44.7 percent) to these businesses. In 2020, the bank's small business lending to small businesses (44.3 percent) was similar to the aggregate lending performance (44.6 percent) to these businesses. Lastly, 87.9 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes a low level of community development loans in the southwest Kentucky assessment area. During the review period, the bank originated seven community development PPP loans totaling \$1.3 million primarily to support economic development needs during the pandemic.

INVESTMENT TEST

Regions Bank's investment performance in the Southwest Kentucky assessment area is adequate. The bank made an adequate level of investments and grants that demonstrated adequate responsiveness to credit and community development needs. Combined investment and contribution activity inside the assessment area totaled \$1.7 million. The bank made one investment during the review period for approximately \$171,500 in a mortgage-backed security secured by loans to low- and moderate-income individuals. The bank held investments from prior review periods, including securities backed by SBA 504 loans and mortgage-backed securities.

During the review period, the bank made contributions totaling \$256,900. Specifically, the bank provided \$236,000 for community services targeting low- and moderate-income individuals and \$21,000 for affordable housing. The bank's largest donations were to a national nonprofit to support a financial counselor based in a Regions branch in the Southwest Kentucky area to assist individuals with credit counseling, small business

assistance, disaster recovery and other financial needs. Additionally, the bank provided approximately \$20,000 in donations to organizations that provided assistance to LMI families impacted by the COVID-19 pandemic.

SERVICE TEST

Regions Bank’s service test performance in the Southwest Kentucky assessment area is adequate.

Retail Services

Retail banking services are good in the Southwest Kentucky full-scope assessment area.

The distribution of 10 branch offices and 9 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank had no branches in low-income tracts; however, the assessment area includes only one low-income tract, which contains only 0.9 percent of the households and 1.0 percent of the businesses in the assessment area. The percentage of branches in moderate-income tracts was slightly less than the percentage of households and businesses in the same geography: 12.0 percent of households and 13.5 percent of businesses were located in moderate-income census tracts compared to 10.0 percent of the bank’s branches. Overall, the bank’s retail delivery systems are accessible to the bank’s geographies and individuals of different income levels in its assessment area.

During the review period, the bank neither opened nor closed any branch offices or full-service ATMs in low- or moderate-income census tracts. However, one branch office was closed in a middle-income tract. As a result, the bank’s record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

Community Development Services

Regions Bank provides an adequate level of community development services in the Southwest Kentucky assessment area. The bank’s service activities in Southwest Kentucky benefited organizations that provide affordable housing and community services to low- and moderate-income individuals and communities. Of the total 285 qualified service hours, 79 hours were committed to financial education and homebuyer education for LMI adults and youth through partnerships with a variety of schools and community organizations. Bank employees also provided 199 hours of board or committee member service to qualified nonprofit organizations—69.8 percent of total hours. Notably, bank employees contributed 190 hours serving on the board of directors, two committees, and providing technical assistance for a nonprofit organization that builds affordable homes for low- and moderate-income residents in the Southwest Kentucky area.

**NONMETROPOLITAN STATEWIDE AREA
LIMITED-SCOPE REVIEW**

The following assessment area was reviewed using limited-scope examination procedures.

**DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE KENTUCKY NON-METROPOLITAN
ASSESSMENT AREAS**

- *Simpson Assessment Area (Simpson County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 9.1 percent of its branches in Kentucky.
 - As of June 30, 2020, the bank had \$48.8 million in deposits in this assessment area, representing a market share of 9.4 percent and 8.8 percent of Regions Bank’s total deposits in Kentucky.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, the assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding this area.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Simpson	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

For the lending test, Regions Bank received a rating of low satisfactory for the State of Kentucky. Performance in Simpson, the one nonmetropolitan limited-scope assessment area, was below the statewide lending test

performance. The geographic distribution of loans was not rated because there are no low-or moderate- income tracts in Simpson. Performance was adequate for the borrower distribution of loans in Simpson. The bank made few, if any, community development loans in the limited-scope nonmetropolitan area. During the review period, the bank made \$12,000 in community development loans within the Simpson assessment area.

For the investment test, Regions Bank received a rating of low satisfactory for the State of Kentucky. Performance in Simpson, the one nonmetropolitan limited-scope assessment area, was weaker than the bank's statewide investment test performance, and the level of investments was poor within this assessment area.

For the service test, Regions Bank received a rating of low satisfactory for the State of Kentucky. Performance in the Simpson assessment area was weaker than the bank's state performance with poor community development performance. There are no low- or moderate-income tracts in the Simpson assessment area, therefore the bank's retail delivery system performance was not rated.

The performance in the nonmetropolitan limited-scope assessment area did not affect the overall state rating.

Louisiana

CRA RATING FOR LOUISIANA: SATISFACTORY

The Lending Test is rated: Low Satisfactory

The Investment Test is rated: Outstanding

The Service Test is rated: High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes an adequate level of community development loans in its Louisiana assessment areas.
- The bank provides an excellent level of qualified community development investments and grants that demonstrate responsiveness to community development needs of the Louisiana assessment areas.
- Retail banking services are adequate in the bank's Louisiana assessment areas.
- The bank is a leader in providing community development services that benefit residents and small businesses in the Louisiana assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment areas in Louisiana:

- Baton Rouge
- New Orleans

Limited-scope reviews were conducted for the remaining nine assessment areas:

- Alexandria
- Hammond
- Houma
- Lafayette
- Monroe
- Morehouse-West Carroll
- Northwest Louisiana
- Shreveport
- Southern Louisiana

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN LOUISIANA

As of June 30, 2020, Regions Bank had \$8.1 billion in deposits in Louisiana accounting for 6.7 percent of the bank’s total deposits. Regions Bank operated 92 branch offices in Louisiana as of December 31, 2020, representing 6.7 percent of the bank’s total branches. HMDA-reportable lending in Louisiana accounted for 5.0 percent of total institutional HMDA-reportable lending by number of loans and 5.0 percent by dollar volume. CRA small business lending in Louisiana accounted for 5.5 percent of the bank’s total CRA small business lending by number of loans and 5.4 percent by dollar volume. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was less than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN LOUISIANA

Lending Test

The lending test rating in the state of Louisiana is low satisfactory. Overall, performance in Louisiana with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, Regions makes an adequate level of community development loans in Louisiana.

During the review period, Regions Bank reported 6,819 HMDA-reportable loans and 4,846 small business loans in Louisiana. The rating for Louisiana is based on performance in the New Orleans and Baton Rouge full-scope

assessment areas. Approximately 62.5 percent of the bank's HMDA-reportable and small business lending by number of loans in Louisiana occurred within these assessment areas.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of Louisiana is derived from the Baton Rouge and New Orleans full-scope assessment areas. A detailed discussion of the borrower and geographic distribution of lending for these assessment areas is included in the next sections of this report.

Community Development Lending

Regions Bank makes an adequate level of community development loans in the state of Louisiana, driven in large part by a low level of lending in the bank's New Orleans assessment area. During the review period, the bank originated or renewed 306 qualifying community development loans totaling \$245.5 million within its Louisiana assessment areas, including 173 loans totaling \$104.9 million directly benefiting the full-scope assessment areas of New Orleans and Baton Rouge. The bank was a leader in community development lending in Baton Rouge, while community development lending was at a low level in New Orleans.

Most of the community development lending dollars in Louisiana were attributed to the Baton Rouge full-scope assessment area, followed by the Shreveport and Monroe limited-scope assessment areas. While these and other areas of Louisiana had strong performance, the bank's presence and market share are by far greatest in New Orleans, which was a key factor in the overall state rating.

The total community development lending includes six loans totaling \$4.8 million with a P/M/F of serving a broader regional area that includes more than one of the bank's assessment areas in Louisiana. The most impactful of these loans included:

- Two loans totaling \$2.3 million to a federally qualified health center. The loans were used to renovate commercial buildings into new medical clinics serving underserved areas throughout Baton Rouge and Hammond.
- A \$1.0 million loan to build a new warehouse location for a food bank serving Northwest Louisiana and Shreveport.

Despite the weaker performance in New Orleans, the bank made an adequate level of lending in Louisiana overall and was considered responsive to the credit and community development needs within the state. As a result, and in addition to the total community development lending previously noted, the bank received consideration for 11 community development loans totaling \$31.2 million that were outside any of the bank's assessment areas in the state. The most impactful of these activities included six loans totaling \$27.8 million for construction and

rehabilitation of affordable housing using LIHTCs. The projects were designed to create 450 new units of affordable housing for LMI individuals and/or families in Lake Charles and Tallulah. More information on community development loans can be found in the full-scope assessment area sections of this report.

Investment Test

The investment test rating for Louisiana is outstanding.

Regions Bank made an excellent level of qualified investments and contributions totaling \$179.8 million in Louisiana. The bank had qualified investments of \$177.8 million in the Louisiana assessment areas, with approximately 63.2 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$2.0 million. Further, the bank made \$241,200 in contributions that benefit a broader statewide area that includes the Louisiana assessment areas. The bank made a \$75,000 donation to support small business development centers in the state that were assisting small businesses impacted by COVID-19. Additionally, the bank provided \$87,500 to a CDFI to support a training program for women-owned small businesses and approximately \$35,000 in funding to two CDFIs to assist with their COVID-19 relief programs.

Baton Rouge and New Orleans were the two assessment areas in the state reviewed using full-scope procedures. Approximately 37.2 percent of combined investment and contribution activity was in these assessment areas, compared to 62.6 percent of deposits in these markets as of June 30, 2021. Performance in both assessment areas was considered good. The bank was considered responsive to community credit needs in the state. Therefore, the bank's investment test performance for the state was enhanced by the consideration of 10 investments totaling \$14.0 million in LIHTC projects located in the broader statewide area, without a purpose, mandate, or function of serving Louisiana assessment areas.

Additional details regarding investments and contributions can be found in the full-scope assessment area sections.

Service Test

The service test rating for Louisiana is high satisfactory.

Retail Services

Overall, the bank's retail service performance is considered adequate in Louisiana. The delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels. Overall, banking services and hours of operations do not vary in a way that inconveniences the bank's assessment areas, including low- and moderate-income geographies or low- and moderate-income individuals. The record of opening and closing of branch offices has generally not adversely affected the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period, the bank opened three branch offices: one in a moderate-income tract, one in a middle-income tract, and one in an upper-income tract in Louisiana. The bank closed 12 branch offices throughout the state; of those closed, one was in a low-income tract, seven were in middle-income tracts, and four were in upper-income tracts.

Community Development Services

Regions Bank is a leader in providing community development services that benefit residents and small businesses in Louisiana. During the examination period, employees engaged in 394 qualified services totaling 4,746 hours in the Louisiana assessment areas. The greatest number of community development service hours were provided in the New Orleans and Baton Rouge full-scope assessment areas, where performance in both assessment areas was excellent. Employees engaged in 1,212 hours in limited-scope assessment areas. Finally, bank employees engaged in 331 qualified community development service hours that benefited a broader statewide or regional area, including the bank's assessment areas.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area sections of this report.

METROPOLITAN AREA FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE BATON ROUGE, LOUISIANA ASSESSMENT AREA

Overview

The Baton Rouge assessment area includes the Parishes of Ascension, East Baton Rouge, Livingston, Pointe Coupee and West Baton Rouge. The assessment area includes five of the nine parishes that make up the Baton Rouge MSA. Additionally, in 2019, Assumption Parish was added to the MSA and the assessment area. As of December 31, 2020, Regions Bank operated 22 branch offices in the assessment area, which represents 1.6 percent of the institution's total branches. The Baton Rouge assessment area represents 23.4 percent of the bank's statewide total deposits and 27.5 percent of the bank's statewide HMDA-reportable and CRA small business-reportable loans by dollar volume.

According to the FDIC Summary of Deposits Report dated June 30, 2020, there are 31 financial institutions operating in the assessment area, with \$22.6 billion in total deposits.⁶⁵⁵ Regions Bank ranks 4th in the assessment area with \$1.9 million in deposits and 8.4 percent of the deposit market share.⁶⁵⁶ JP Morgan Chase Bank, N.A. and Capital One, N.A. are the market leaders, with 34.6 percent and 17.1 percent of deposit market share, respectively.⁶⁵⁷

From 2018 to 2020, Regions Bank competed against an increasing number of HMDA reporters each year in the Baton Rouge assessment area. In 2018, Regions Bank ranked 11th out of 378 reporters, originating 2.2 percent of total HMDA-reportable loans. In 2019, the Bank ranked 12th out of 384 reporters, originating 2.1 percent of total HMDA-reportable loans. In 2020, Regions Bank ranked 12th out of 405 reporters, originating 2.0 percent of total

⁶⁵⁷ *Ibid.*

HMDA-reportable loans. GMFS LLC was the market leader for all three years, along with Wells Fargo Bank and Assurance Financial Group.

Regions Bank faced competition among CRA reporters in the assessment area. In 2018, Regions Bank ranked 12th out of 98 reporters, originating 1.3 percent of total CRA loans. In 2019, Regions Bank ranked 13th out of 93 reporters, originating 1.2 percent of total CRA loans. In 2020, the Regions Bank ranked 7th out of 140 reporters, originating 3.5 percent of total CRA loans. From 2018 to 2020, American Express dominated CRA lending in the MSA.

Population and Income Characteristics

As of 2020, the assessment area has a population of 773,520, representing a 7.1 percent increase since the 2010 population.⁶⁵⁸ East Baton Rouge Parish is the most populous Parish in the assessment area with a population of 456,781.⁶⁵⁹ However, between 2010 to 2020, Ascension Parish had the fastest population growth rate of 17.9 percent, followed by West Baton Rouge Parish (14.3 percent), Livingston Parish (11.1 percent), and East Baton Rouge Parish (3.8 percent).⁶⁶⁰ During this same period, Pointe Coupee Parish saw a 8.9 percent decline in population.⁶⁶¹

According to the 2018 FFIEC census data, the assessment area comprised of 134 census tracts: 18 low-income tracts (13.4 percent), 35 moderate-income tracts (26.1 percent), 44 middle-income tracts (32.8 percent), 36 upper-income tracts (26.9 percent) and 1 unknown-income tract (0.8 percent).⁶⁶² In 2019, Assumption Parish was added to the MSA, which resulted in a slight change in the census tract distribution. According to the 2020 FFIEC census data, the assessment area is comprised of 134 census tracts: 17 low-income tracts (12.7 percent), 35 moderate-income tracts (26.1 percent), 43 middle-income tracts (32.1 percent), 38 upper-income tracts (28.4 percent), and 1 unknown-income tract (0.7 percent).⁶⁶³

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Baton Rouge, LA MSA. The following table sets forth the estimated median family income from 2018 through 2020 for the Baton Rouge, LA MSA and provides a breakdown of the range of estimated family income for each income category (low, moderate, middle, and upper).

Baton Rouge, LA MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2018	\$74,500	0 - \$37,249	\$37,250 - \$59,599	\$59,600 - \$89,399	\$89,400 - & above
2019	\$70,500	0 - \$35,249	\$35,250 - \$56,399	\$56,400 - \$84,599	\$84,600 - & above
2020	\$73,800	0 - \$36,899	\$36,900 - \$59,039	\$59,040 - \$88,559	\$88,560 - & above

As seen from the table above, the median family income decreased from \$74,500 in 2018 to \$73,800 in 2020. Additionally, there is wide variation in median family income among the Parishes in the MSA. According to the U.S. census, between 2015 to 2019, Ascension Parish had the highest median family income of \$92,889.⁶⁶⁴ The 2020 FFIEC census data shows that the median family income for the State of Louisiana is \$57,144.⁶⁶⁵ The 2020 FFIEC census data also indicates that 39.1 percent of families in the assessment area are considered low-to-moderate-income.⁶⁶⁶

Poverty in the assessment area is a concern. Between 2015 to 2019, Pointe Coupee Parish had the highest number of families living in poverty of 12.9 percent, followed by East Baton Rouge Parish (12.3 percent), Livingston Parish (9.7 percent), Ascension Parish (8.1 percent) and West Baton Rouge Parish (7.8 percent).⁶⁶⁷ The number of families living in poverty in the assessment area was lower than that of the State of Louisiana (14.5 percent).⁶⁶⁸

In 2018, 34.6 percent of families in low-income census tracts and 20.7 percent of families in moderate-income tracts in the assessment area were below the poverty line.⁶⁶⁹ The 2020 FFIEC census data showed a slight increase in the percentage of families living below the poverty line to 34.8 percent in low-income census tracts and to 20.9 percent in moderate-income census tracts.⁶⁷⁰

Economic Conditions

Located in East Baton Rouge Parish, on the eastern bank of the Mississippi River, Baton Rouge is the state capital of Louisiana. The name Baton Rouge is French for “Red Stick.” The name Baton Rouge was given to the area by the Native Americans who were there over 300 years ago and used a red stick to demarcate the different tribal hunting grounds.⁶⁷¹

East Baton Rouge Parish is the largest employment center in the MSA.⁶⁷² Baton Rouge is Louisiana's economic engine, and the Baton Rouge Area chamber leads the economic development efforts in East Baton Rouge Parish.⁶⁷³ The Baton Rouge area has access to multimodal transportation options that help industries grow.⁶⁷⁴ These industries have access to an extensive network of deep and shallow water ports, six major interstate highways and all six of North America's class one railroads.⁶⁷⁵

According to the Baton Rouge Area Chamber, the largest industries in the area are healthcare (53,864 employees/13.2 percent), retail trade (52,544 employees/12.8 percent), professional/scientific/technical services (41,529/10.1 percent) and educational services (29,312/7.2 percent).⁶⁷⁶ There are approximately 29 healthcare facilities in the MSA.⁶⁷⁷ With Louisiana State University's Medical school⁶⁷⁸ and other medical training programs in the area such as Baton Rouge General,⁶⁷⁹ and Fortis,⁶⁸⁰ to name a few, healthcare facilities have a qualified pool of candidates to recruit from for their institutions. Retail trade is the second largest industry in the area. According to Dun & Bradstreet, there were 2,837 companies that fell in this category, ranging from retail stores, restaurants, wholesalers to car dealerships.⁶⁸¹ With great food, a growing downtown and Louisiana State University football home games, there is impetus for growth in the retail trade area.⁶⁸² Following retail trade are professional/scientific/technical firms, which provide employment opportunities through 4,544 companies.⁶⁸³ Companies like Pennington Biomedical Research Center⁶⁸⁴ and The Water Institute of the Gulf⁶⁸⁵ are a few examples of businesses in this category. Furthermore, the educational services industry employs 7.2 percent of the workforce in the area. Baton Rouge houses several universities and colleges, such as Louisiana State University, Franciscan Missionaries of Our Lady University, Baton Rouge Community College and Southern University and A&M College, among others.⁶⁸⁶ These educational centers provide a young workforce pipeline for the area's businesses.⁶⁸⁷

Employers in the area have a young and educated talent pool to recruit from. The median age in Baton Rouge is 32 years, younger than the median age of the State of Louisiana (37 years) and the United States (38 years).⁶⁸⁸ The area has 87.4 percent of high school graduates, in line with the national rate of 88.5 percent and higher than the State of Louisiana with 85.9 percent.⁶⁸⁹ Also, Baton Rouge has 34.9 percent of graduates with a Bachelor’s degree or higher, higher than the national rate of 32.9 percent and a lot higher than the State of Louisiana of 24.9 percent.⁶⁹⁰

In 2018, unemployment rates ranged from 4.0 percent for Livingston Parish to 5.3 percent for Pointe Coupee Parish, while East Baton Rouge Parish was in the middle with 4.3 percent. Similarly, in 2019, unemployment rates decreased slightly, with Livingston Parish having the lowest rate in the assessment area of 3.9 percent and Point Coupee Parish having the highest rate of 5.2 percent, and East Baton Rouge Parish was in the middle with an unemployment rate of 4.3 percent. In 2020, unemployment rates rose because of the pandemic. Like the rest of the country, the Baton Rouge MSA was impacted by the COVID-19 pandemic. Stay-at-home orders and changed work timings and environment affected the employment rates in the state and area.⁶⁹¹ Livingston Parish had the lowest rate of 6.4 percent and while Pointe Coupee Parish and East Baton Rouge Parish, both had the highest unemployment rates of 7.8 percent. In 2020, the unemployment rate for the State of Louisiana was 8.3 percent.⁶⁹²

As previously mentioned, the COVID-19 pandemic impacted the area's unemployment as several businesses in the either temporarily shut down or permanently closed. Restaurants in the Baton Rouge area, such as the Rum House⁶⁹³ and Rama⁶⁹⁴ are examples of restaurants who were unable to stay afloat during the pandemic. Non-eatery businesses such as Poise'n Ivy, which is a clothing store, and Fleauxt, a massage therapy center, closed after being financially affected by the pandemic.⁶⁹⁵ However, there are also businesses that have expanded during the pandemic. In November 2020, Ochsner Health announced plans to invest \$100 million to open 15 community health centers in underserved areas, two of which will be in the Baton Rouge and Lafayette area.⁶⁹⁶ ExxonMobil will also be investing several hundred million dollars in its Baton Rouge refinery to make it more competitive and prime it for potential expansion in the coming years.⁶⁹⁷ Mitsubishi Chemical Corporation, a subsidiary of automaker Mitsubishi Motors, purchased 67-acres of land in December 2020 in Ascension Parish, to build up a synthetic rubber manufacturing plant.⁶⁹⁸ This is anticipated to create 100 full-time positions, along with 25 contractor positions, and the jobs needed for construction crews to build the plant.⁶⁹⁹

There are resources that small businesses in the Baton Rouge MSA can avail of during start-up and growth. The Louisiana Small Business Development Center (LSBDC) has partnered with Louisiana State University to provide existing and start-up small businesses with specialized help with technology.⁷⁰⁰ Part of the LSBDC mission is to work with entrepreneurs and businesses to commercialize inventions that enhance the economy and benefit the public.⁷⁰¹ The LSBDC provides free technical assistance to small business entrepreneurs who have been impacted by the pandemic.⁷⁰² Another resource is Nexus Louisiana, which provides coaching, capital, and connection to local start-up high-potential technology-enabled companies to grow their ideas and transform the technology industry in Louisiana.⁷⁰³

Small businesses are pivotal to the economy of the Baton Rouge MSA. According to Dun & Bradstreet, in 2018, there were 37,656 businesses in the assessment area, of which 34,240 (90.9 percent) are small businesses,⁷⁰⁴ defined as businesses with gross revenue of less than or equal to \$1 million. Of the 34,240 small businesses, 1,934 (5.6 percent) small businesses were in low-income tracts and 6,801 (19.9 percent) were in moderate-income

tracts.⁷⁰⁵ In 2020, the Dun & Bradstreet data shows there were 38,527 businesses in the assessment area. Of the total businesses, 35,331 businesses (91.7 percent)⁷⁰⁶ were small businesses, a slight increase over 2018. Out of the total number of small businesses, 1,924 businesses (5.4 percent)⁷⁰⁷ were located in low-income tracts, a slight decrease over 2018. Small businesses in moderate-income tracts also showed a slight percentage decrease from 2018 to 6,960 (19.7 percent).⁷⁰⁸ Small business loans, defined as loans with a principal of \$1million or less, has declined from 2018 through 2020. Data from CRA reporters in the assessment area shows that in 2018 there were 34.2 percent of small business loans made to small businesses. In 2019, 33.4 percent of loans made were small business loans made to small businesses, decreasing to 31.4 percent in 2020.

To help businesses, especially small businesses in the MSA, sustain operations during the pandemic, the Small Business Administration (SBA), as part of the Coronavirus Aid, Relief, and Economic Security (CARES) Act passed by Congress,⁷⁰⁹ provided businesses access to loans through the Paycheck Protection Program (PPP). In the assessment area, there were 35,950 loans approved, totaling \$2.1 billion.⁷¹⁰ In the assessment area, East Baton Rouge Parish had the highest amount of PPP loans approved, with 25,294 loans totaling \$1.6 billion.⁷¹¹

According to the 2018 FFIEC census data, there were total of 307,616 housing units in the assessment area.⁷¹² Of this total, 60.0 percent were owner-occupied, 29.3 percent were rental, and 10.7 percent were vacant.⁷¹³ In low-income tracts, 30.4 percent of units were owner-occupied and 52.2 percent were rental; in moderate-income tracts, 48.6 percent of units were owner-occupied, while 38.0 percent were rental.⁷¹⁴ The trend is reversed in upper-income tracts with 67.6 percent of units being owner-occupied and 24.6 percent being rental units.⁷¹⁵ After the MSA change in 2019, there was a slight change in housing occupancy. The 2020 FFIEC census data shows that of the total 307,616 housing units, 60.0 percent were owner-occupied, and 29.3 percent were rental units, with 10.7 percent vacant units.⁷¹⁶ In low-income tracts, 29.6 percent were owner-occupied units and 52.5 percent were rental units; in moderate-income tracts, 48.3 percent were owner-occupied while 38.4 percent were rental units.⁷¹⁷ Upper-income tracts show a higher percentage of housing units as owner-occupied units (66.9 percent) compared to rental units (25.2 percent).⁷¹⁸

⁷¹⁸ Ibid.

In the assessment area, housing units in low-income tracts have a median age of 54 years, and those in moderate-income tracts have a median age of 44 years.⁷¹⁹ In comparison, the median age of housing in upper-income tracts is 29 years.⁷²⁰ Based on the age of the homes in low- and moderate-income tracts, there may be home improvement and refinance lending opportunities in those tracts.

The median housing value in the assessment area is \$164,348, with East Baton Rouge Parish having the highest median housing value of \$170,500.⁷²¹ The median sales price for single-family homes has increased each year from 2018 through 2020. In 2018, the median sales price was \$210,600.⁷²² In 2019, median sales price increased to \$216,400 and increased further in 2020 to \$229,700.⁷²³

Overall, the median sales price for a residence influences home affordability. Using the assumption that a borrower can service a loan that is approximately three times the borrower's gross annual income and using the 2020 Area Median Income for the assessment area (\$67,073),⁷²⁴ families can afford homes priced around \$201,219, which is lower than the actual 2020 median house sales prices of 229,700. This information suggests that there are opportunities for more affordable housing in the assessment area.

Comparatively, a family is more likely to afford a two-bedroom rental unit in the assessment area. In 2018, the median rent for a 2-bedroom apartment in the Baton Rouge MSA was \$906.⁷²⁵ In 2019, median rent increased to \$981.⁷²⁶ In 2020, the same apartment rented for less at \$894 per month.⁷²⁷ According to research conducted by the U.S. Department of Housing and Urban Development, the rental vacancy rate as of the second quarter of 2020 is 10.0 percent, up from 9.5 percent during the second quarter of 2019.⁷²⁸ This increase is because of relatively high levels of new apartment construction since the mid-2010s and a recent decrease in demand as the temporary workforce left the area because of the pandemic.⁷²⁹

Demographic Characteristics by Census Tract

The following tables present key demographic and business information used to help develop a performance context for the assessment area. The data reflects the 2020 FFIEC census data and the 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the tables are discussed in this evaluation as they apply to specific parts of the analysis.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development needs and economic landscape, individuals familiar with the community and with community development activities were contacted. These individuals discussed the various opportunities and challenges and how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

One contact engaged in affordable housing in the Baton Rouge area was interviewed. The contact mentioned that the COVID-19 pandemic had a drastic effect on local economic conditions, both through decreased economic activity/job opportunities and through increased housing and rental prices. Low- and moderate-income households have been particularly harmed, as the sharply increasing expenses have stressed these households' already tight budgets. Increasingly, low-income individuals and households in Baton Rouge have been forced out of traditional housing arrangements and into hotels, living with family, or staying in homeless shelters.

This contact mentioned that most of the low- and moderate-income census tracts in Baton Rouge are in the north and mid-city regions. The city as a whole has roughly a 40,000 unit affordable housing shortage, with an outsized percentage of these units needed in the aforementioned areas. However, the contact mentioned that community leaders have been looking to increase the prevalence of "mixed-income neighborhoods" across the entire city by building affordable housing in middle- and upper-income areas as well.

Regarding how financial institutions can be more responsive to the affordable housing needs in Baton Rouge, the contact said that institutions could be more responsive by educating low- and moderate-income populations on first-time homebuyer and FHA loan options, as well as by offering alternative ways of proving credit history, such as rental and utility payment history.

The second community contact interviewed was involved in small business assistance. According to this contact, economic conditions in the Baton Rouge area are stagnant, and the COVID-19 pandemic had a "crushing" effect on the local small business landscape. He mentioned that small retailers in the area were hit hardest by the pandemic, followed closely by small restaurants. However, he mentioned that small service businesses in the area were relatively resilient during the pandemic.

The contact mentioned that obtaining financing is a very difficult proposition for small businesses in the area, especially early-stage businesses. The contact stated that without adequate collateral or a strong personal guarantee, start-ups with less than a two-year track record are usually unable to obtain financing from commercial banks. As a result, they generally must turn to alternative sources of financing. Based on these comments, offering loan programs specifically for early-stage businesses may be an opportunity in the assessment area.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE BATON ROUGE,
LOUISIANA ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending performance in the Baton Rouge assessment area is good. The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making community development loans in the Baton Rouge assessment area.

The analysis included 1,437 HMDA-reportable loans and 1,131 CRA small business loans reported by the bank in the Baton Rouge assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home purchase loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Baton Rouge assessment area accounted for 28.1 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Louisiana and 25.6 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 23.4 percent of Regions Bank's Louisiana deposits are in the Baton Rouge assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis, the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 1,437 HMDA-reportable loans analyzed, 643 loans (44.7 percent) were home purchase loans. Of the total home purchase loans made, 12 loans (1.9 percent) were located in low-income tracts, and 97 loans (15.1 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is good. In 2018, Regions Bank's home purchase lending in low-income tracts (2.7 percent) was below the percentage of owner-occupied units (4.4 percent) in these tracts. In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending in low-income tracts (1.5 percent) was below the percentage of owner-occupied units (4.1 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in low-income tracts (2.7 percent) was significantly above the aggregate lending performance (1.5 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (2.5 percent) was significantly above the aggregate lending performance (1.2 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (0.8 percent) was below the aggregate lending performance (1.2 percent) in these tracts.

Home purchase lending in moderate-income tracts is adequate. In 2018, Regions Bank's home purchase lending in moderate-income tracts (16.0 percent) was similar to the percentage of owner-occupied units (19.1 percent) in these tracts. In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending in moderate-income tracts (14.7 percent) was similar to the percentage of owner-occupied units (18.7 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in moderate-income tracts (16.0 percent) was slightly above the aggregate lending performance (14.4 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (17.4 percent) was slightly above the aggregate lending performance (15.6 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (12.5 percent) was slightly below the aggregate lending performance (14.2 percent) in these tracts.

Home Refinance Loans

Of the 1,437 HMDA-reportable loans analyzed, 582 loans (40.5 percent) were home refinance loans. Of the total home refinance loans made, five loans (0.9 percent) were located in low-income tracts, and 61 loans (10.5 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is poor. In 2018, Regions Bank's home refinance lending in low-income tracts (0.9 percent) was below the percentage of owner-occupied units (4.4 percent) in these tracts. In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending in low-income tracts (0.8 percent) was below the percentage of owner-occupied units (4.1 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in low-income tracts (0.9 percent) was below the aggregate lending performance (1.7 percent) in these tracts. In 2019, Regions Bank made no home refinance loans in low-income tracts (0.0 percent) and was significantly below the aggregate lending performance (1.1 percent) in these tracts. In 2020, the bank's home

refinance lending in low-income tracts (1.2 percent) was significantly above the aggregate lending performance (0.7 percent) in these tracts.

Home refinance lending in moderate-income tracts is adequate. In 2018, Regions Bank's home refinance lending in moderate-income tracts (12.8 percent) was below the percentage of owner-occupied units (19.1 percent) in these tracts. In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending in moderate-income tracts (9.9 percent) was below the percentage of owner-occupied units (18.7 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in moderate-income tracts (12.8 percent) was similar to the aggregate lending performance (13.0 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (11.2 percent) was similar to the aggregate lending performance (12.1 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (9.4 percent) was similar to the aggregate lending performance (9.2 percent) in these tracts.

Home Improvement Loans

Of the 1,437 HMDA-reportable loans analyzed, 212 loans (14.8 percent) were home improvement loans. Of the total home improvement loans made, three loans (1.4 percent) were located in low-income tracts, and 19 loans (9.0 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is poor. In 2018, Regions Bank's home improvement lending in low-income tracts (1.3 percent) was below the percentage of owner-occupied units (4.4 percent) in these tracts. In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending in low-income tracts (1.5 percent) was below the percentage of owner-occupied units (4.1 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in low-income tracts (1.3 percent) was below the aggregate lending performance (1.8 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (3.1 percent) was significantly above the aggregate lending performance (1.7 percent) in these tracts. In 2020, the bank made no home improvement loans in low-income tracts (0.0 percent) and was significantly below the aggregate lending performance (3.4 percent) in these tracts.

Home improvement lending in moderate-income tracts is poor. In 2018, Regions Bank's home improvement lending in moderate-income tracts (9.1 percent) was below the percentage of owner-occupied units (19.1 percent) in these tracts. In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending in moderate-income tracts (8.9 percent) was below the percentage of owner-occupied units (18.7 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in moderate-income tracts (9.1 percent) was slightly below the aggregate lending performance (11.1 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (7.7 percent) was below the aggregate lending performance (11.8 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (10.0 percent) was similar to the aggregate lending performance (9.9 percent) in these tracts.

Small Business Loans

Regions Bank made 1,131 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 46 loans (4.1 percent) were located in low-income tracts, and 205 loans (18.1 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is poor. In 2018, Regions Bank's small business lending in low-income tracts (1.0 percent) was below the percentage of businesses (5.8 percent) in these tracts. In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in low-income tracts (4.7 percent) was similar to the percentage of businesses (5.5 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in low-income tracts (1.0 percent) was significantly below the aggregate lending performance (5.2 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (4.7 percent) was similar to the aggregate lending performance (4.7 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (4.7 percent) was similar to the aggregate lending performance (4.8 percent) in these tracts.

Small business lending in moderate-income tracts is adequate. In 2018, Regions Bank's small business lending in moderate-income tracts (21.5 percent) was above the percentage of businesses (20.3 percent) in these tracts. In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in moderate-income tracts (17.4 percent) was similar to the percentage of businesses (20.1 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in moderate-income tracts (21.5 percent) was slightly above the aggregate lending performance (19.2 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (21.3 percent) was slightly above the aggregate lending performance (18.2 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (16.3 percent) was slightly below the aggregate lending performance (18.5 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. In 2018, Regions Bank's home purchase lending to low-income borrowers (8.6 percent) was below the percentage of low-income families (23.5 percent). In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending to low-income borrowers (7.7 percent) was below the percentage of low-income families (23.1 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to low-income borrowers (8.6 percent) was above the aggregate lending performance (6.3 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (5.5 percent) was slightly

below the aggregate lending performance (6.4 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (9.4 percent) was above the aggregate lending performance (7.4 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is good. In 2018, Regions Bank's home purchase lending to moderate-income borrowers (19.8 percent) was above the percentage of moderate-income families (16.1 percent). In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending to moderate-income borrowers (28.7 percent) was above the percentage of moderate-income families (16.0 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to moderate-income borrowers (19.8 percent) was similar to the aggregate lending performance (20.7 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (25.4 percent) was slightly above the aggregate lending performance (21.2 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (31.4 percent) was above the aggregate lending performance (25.1 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. In 2018, Regions Bank's home refinance lending to low-income borrowers (10.1 percent) was below the percentage of low-income families (23.5 percent). In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending to low-income borrowers (5.9 percent) was below the percentage of low-income families (23.1 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to low-income borrowers (10.1 percent) was slightly above the aggregate lending performance (8.5 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (9.0 percent) was significantly above the aggregate lending performance (4.5 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (4.7 percent) was significantly above the aggregate lending performance (2.8 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is adequate. In 2018, Regions Bank's home refinance lending to moderate-income borrowers (14.7 percent) was similar to the percentage of moderate-income families (16.1 percent). In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending to moderate-income borrowers (12.7 percent) was similar to the percentage of moderate-income families (16.0 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to moderate-income borrowers (14.7 percent) was similar to the aggregate lending performance (14.8 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (14.9 percent) was above the aggregate lending performance (11.7 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (11.8 percent) was slightly above the aggregate lending performance (10.5 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is poor. In 2018, Regions Bank's home improvement lending to low-income borrowers (3.9 percent) was below the percentage of low-income families (23.5 percent). In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending to low-income borrowers (3.7 percent) was below the percentage of low-income families (23.1 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to low-income borrowers (3.9 percent) was below the aggregate lending performance (5.5 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (6.2 percent) was slightly above the aggregate lending performance (5.2 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (1.4 percent) was significantly below the aggregate lending performance (4.2 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is good. In 2018, Regions Bank's home improvement lending to moderate-income borrowers (15.6 percent) was similar to the percentage of moderate-income families (16.1 percent). In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending to moderate-income borrowers (11.9 percent) was similar to the percentage of moderate-income families (16.0 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to moderate-income borrowers (15.6 percent) was significantly above the aggregate lending performance (10.1 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (10.8 percent) was similar to the aggregate lending performance (10.1 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (12.9 percent) was above the aggregate lending performance (9.9 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is excellent. In 2018, 76.0 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. By comparison, 90.9 percent of the total businesses in the assessment area were classified as small businesses. In 2019, Assumption Parish was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, 58.2 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. During this period, 91.7 percent of the total businesses in the assessment area were classified as small businesses. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending (76.0 percent) was significantly above the aggregate's small business lending performance (34.4 percent). In 2019, the bank's small business lending to small businesses (70.6 percent) was significantly above the aggregate's small business lending performance (33.9 percent) to these businesses. In 2020, the bank's small business lending to small businesses (54.6 percent) was significantly above the aggregate's lending performance (31.8 percent) to these businesses. Lastly, 90.8 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank is a leader in making community development loans in the Baton Rouge assessment area. During the review period, the bank originated or renewed 41 community development loans totaling \$64.8 million and 58 community development PPP loans totaling \$16.9 million. Specifically, the bank originated or renewed \$54.1 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; \$24.6 million in affordable housing initiatives; \$2.2 million to support economic development; and \$800,000 towards community services benefiting LMI individuals and families.

Some of the most impactful loans directly benefiting the assessment area include:

- Eight loans totaling \$24.6 million for new construction of apartments using LIHTCs. The loans were originated as construction, bridge, and permanent financing in various phases of the LIHTC projects. The projects were designed to create 158 new units of affordable housing for low-income individuals and/or families throughout the assessment area.
- One line of credit to a nonprofit was renewed twice during the review period (\$800,000 total). The line of credit was specifically formed for the creation of workforce development and job placement programs for LMI individuals. This is noted as particularly responsive given high levels of poverty in this area.
- Three newly originated working capital loans for three small farms impacted by natural disasters. The loans totaled \$6.8 million to replenish sugarcane crops impacted by flooding and excessive freezing due to weather abnormalities in the area. These areas were part of a formally declared disaster area for crop replenishment by the USDA.

INVESTMENT TEST

Regions Bank's investment performance in the Baton Rouge assessment area is good. The bank made a significant level of investments and grants that demonstrated responsiveness to several credit and community development needs. The bank made investments and contributions totaling \$26.1 million in the assessment area. The bank's investments (excluding contributions) totaled \$25.7 million, of which \$15.8 million (61.6 percent) were new investments acquired during the review period. The bank made three investments totaling \$15.6 million during the review period in LIHTCs that financed 200 new units of housing affordable to LMI individuals. The remaining investments purchased during the review period were mortgage-backed securities secured by mortgages for low- and moderate-income individuals. The bank also held investments from prior review periods that included an investment in a bond that financed renovations for schools that primarily serve LMI students as well as mortgage-backed securities.

Regions Bank made \$415,300 in contributions in the Baton Rouge assessment area during the review period. Specifically, the bank provided \$400,000 to organizations that provide community services targeted to low- and moderate-income individuals, \$7,500 to support economic development, and \$7,500 for affordable housing. Overall, approximately \$80,000 in donations were responsive to the COVID-19 pandemic, providing support

for organizations providing emergency and recovery assistance to LMI individuals, small businesses, and nonprofits. Notably, the bank provided a \$10,000 grant to support a citywide initiative to assist frontline healthcare workers during the COVID-19 pandemic and provided in-kind support for a local food bank to advertise for food donations during the pandemic. The bank also provided several significant grants to organizations working to improve educational outcomes in the East Baton Rouge School District. Additionally, the bank provided support to a national financial education provider to underwrite a financial education program at 12 high schools in the bank's Baton Rouge assessment area.

The bank also made \$241,200 in donations that benefited all assessment areas in Louisiana, which positively impacted the bank's performance in Baton Rouge.

SERVICE TEST

Regions Bank's service test performance in the Baton Rouge assessment area is good.

Retail Services

Retail banking services are adequate in the Baton Rouge full-scope assessment area.

The distribution of 22 branch offices and 22 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The percentage of branches in low-income tracts was greater than the percentage of households and businesses in the same geography: 7.5 percent of households and 5.5 percent of businesses were located in low-income census tracts compared to 9.1 percent of the bank's branches. The proportion of the bank's branches in moderate-income tracts was similar to the percentage of households and greater than the percentage of businesses in the same geography: 22.7 percent of total branches were in moderate-income-tracts compared to 22.6 percent of households and 20.1 percent of businesses. Overall, the bank's retail delivery systems are reasonably accessible to the bank's geographies and individuals of different income levels in its assessment area.

During the review period, the bank neither opened nor closed any branch offices or full-service ATMs in low- or moderate-income census tracts. However, the bank closed two branch offices in middle-income tracts. In 2019, the census tract location for one branch was reclassified from a middle-income to an upper income-tract. Overall, the bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

Geographic Distribution of Branches & ATMS
 Assessment Area: LA Baton Rouge (2018)

Community Development Services

Regions Bank is considered a leader in providing community development services in the Baton Rouge assessment area. During the review period, employees engaged in 159 qualified service activities totaling 1,601 hours that were considered responsive to the community development needs of the assessment area. The bank's service activities benefited organizations that provide affordable housing, community services, economic development, and revitalization and stabilization activities for low- and moderate-income individuals, geographies, and small businesses in the Baton Rouge assessment area. Of the bank's total service hours, 861 hours were committed to adult and youth financial education, small business workshops, and homebuyer training through partnerships with numerous schools, businesses, and community organizations. Bank employees

committed 721 hours to board or committee member service to various qualified nonprofit organizations. Overall, the bank's activities demonstrated excellent responsiveness to identified community development needs in the Baton Rouge assessment area.

Highlighted below are examples of community development services considered responsive during the review period:

- A Regions employee served on the board of directors for an organization designed to offer technical support to small businesses in the area. In addition, the organization created a fund specifically designed to help small business owners affected by the abundance of flooding in recent years.
- Regions associates provided financial education classes and served on a committee of an organization that creates public-private partnerships between local and/or state government, financial institutions, and community-based organizations. The partnerships provide free or low-cost bank accounts and access to financial education to low-income residents.
- Regions supported United Way chapters in their work to provide financial stability and poverty-reduction opportunities to LMI clients. Bank staff assisted with Volunteer Income Tax Assistance (VITA), as well as provided financial education.
- Two Regions managers provided technical assistance to an organization that constructs affordable housing in several Gulf Coast states. The Regions managers assisted with drafting and submitting a Federal Home Loan Bank (FHLB) grant application as well as assisted with ensuring compliance with the grants for two affordable housing developments in the assessment area.

METROPOLITAN AREA FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE NEW ORLEANS, LOUISIANA ASSESSMENT AREA

Overview

The New Orleans assessment area includes Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles, St. James, St. John the Baptist, and St. Tammany parishes, which are the eight parishes that make up the New Orleans-Metairie, LA MSA. As of December 31, 2020, Regions Bank operated 28 branch offices in the assessment area. The bank's branch presence in the assessment area represents 30.4 percent of branches and 36.6 percent of deposits in Louisiana. In addition, the market represents the institution's largest concentration of combined HMDA-reportable and CRA small business lending in the state at 40.8 percent by dollar volume.

According to the FDIC Summary of Deposits Report dated June 30, 2020, there are 34 financial institutions operating 312 branch locations in the assessment area with \$42.3 billion in total deposits.⁷³⁰ Regions Bank is

⁷³⁰ "Offices and Deposits of All FDIC-Insured Institutions Deposit Market Share Report." *Federal Deposit Insurance Corporation*, 30 June 2020, <https://www7.fdic.gov/sod/sodMarketRpt.asp?barItem=&sCounty=all>. Accessed 16 Feb. 2022.

ranked 4th in the market with 7.4 percent of deposits (\$3.1 billion).⁷³¹ Capital One Bank had the largest deposit market share at 28.8 percent, followed by Hancock Whitney Bank with 20.1 percent, and JP Morgan Chase Bank with 16.7 percent.⁷³²

New Orleans is a very competitive banking market. Regions Bank originated or purchased 2.4 percent in loans during 2018. For that year, the bank ranked 12th out of 430 reporters. In 2019, Regions Bank originated or purchased 2.2 percent in loans. The bank ranked 13th out of 457 reporters for the year. Lastly, Regions Bank originated or purchased 2.0 percent in loans for the assessment area during 2020. For that year, Regions Bank ranked 14th out of 497 reporters. From 2018 through 2020, HMDA-reportable lending in the assessment area was primarily dominated by Well Fargo Bank, Hancock Whitney Bank, JPMorgan Chase Bank, and GMFS, LLC.

CRA small business lending is also competitive. For CRA small business and small farm lending, Regions Bank ranked 15th out of 132 reporters in 2018, with 1.1 percent of reported loans. In 2019, the bank ranked 15th out of 124 reporters, with 1.1 percent of reported loans. Furthermore, Regions Bank ranked 13th out of 166 reporters, with 2.7 percent of reported loans for 2020. From 2018 through 2020, lending in the assessment area was primarily dominated by American Express, Chase Bank, Lake Forest Bank & Trust, and Capital One Bank.

Population and Income Characteristics

The population in the assessment area was 1,271,845 in 2020, representing an increase of 6.4 percent since 2010.⁷³³ New Orleans, located in Orleans Parish, is the principal city within the assessment area, and it had a population of 383,997 in 2020, representing an increase of 11.7 percent since 2010.⁷³⁴ Furthermore, the most populous parish was Jefferson followed by Orleans and St. Tammany parishes. St. Bernard, Orleans, and St. Tammany parishes posted the largest population gains since 2010 while St. Charles, St. John the Baptist, and St. James parishes posted losses during the same period.⁷³⁵

According to 2020 FFIEC census data, the assessment area comprises of 405 census tracts: 65 tracts are low-income (16.1 percent), 101 tracts are moderate-income (24.9 percent), 115 tracts are middle-income (28.4 percent), 107 tracts are upper-income (26.4 percent), and 17 tracts have unknown income (4.2 percent).⁷³⁶

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the New Orleans-Metairie, LA MSA. The table below provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper). As shown, the median family income for the MSA increased from \$65,700 in 2018 to \$70,400 in 2020. Despite the increase in median family income for the MSA, U.S census data shows wide variation in the median income amongst the parishes. The median family income between 2015 and 2019 was highest in St. Charles Parish (\$69,019) and the lowest in Orleans Parish

Poverty is a concern in the assessment area. From 2015 through 2019, six out of the eight parishes in the assessment area had family poverty rates of greater than 10 percent.⁷³⁹ Specifically, these parishes included Jefferson, Orleans, Plaquemines, St. Bernard, St. James, and St. John the Baptist.⁷⁴⁰ Out of the six parishes with family poverty rates of greater than 10 percent, St. Bernard Parish and Orleans Parish had the highest rates with 18.2 and 16.8 percent, respectively.⁷⁴¹ In the assessment area, St. Tammany and St. Charles had family poverty rates less than 10 percent (8.5 percent and 8.3 percent, respectively).⁷⁴² In addition, a significant percentage of families in low- and moderate-income areas live below the poverty level. Specifically, 40.1 percent of families in low-income tracts live below the poverty level, and 23.6 percent of families in moderate-income tracts live below the poverty level.⁷⁴³

Economic Conditions

New Orleans has a diverse economy consisting of five main sectors: energy, advanced manufacturing, international trade, healthcare, and tourism.⁷⁴⁴ Out of those sectors, tourism is one of the largest and accounts for 9.1 billion in annual revenue and 62,000 jobs.⁷⁴⁵ Outside this sector, New Orleans is home to universities, hospitals, construction companies, energy firms, and many more industries. The largest companies in the area include Ochsner Health System, Tulane University, Woodward Design + Build, Entergy Corporation, Whitney Holding Corp, Boh Bros Construction, and Superior Energy Services.⁷⁴⁶

During the review period, New Orleans experienced industrial growth. From 2019 through 2020, the assessment area experienced this growth in the bio-innovation, food manufacturing, and technology industries.⁷⁴⁷ Specifically, during 2019, AxoSlim, Cadex Genomics, and Obatala Sciences biotech companies announced that they would be expanding their businesses and creating 135 new jobs over the next five years with a total combined annual payroll of \$9.1 million.⁷⁴⁸ Further, in late 2019 and early 2020, the New Orleans Business Alliance, the official economic development organization for the City of New Orleans, worked with 15 local companies to develop a nonprofit commercial kitchen operator to allow start-up food companies to have a physical place to produce food products.⁷⁴⁹ This addition to the area will allow food manufacturers to have access to production spaces, resources, talent, and potential investors. Lastly, in 2020, New Orleans saw growth in the technology sector with the announcement of over 300 jobs being added to the area's technology companies; these new job opportunities include both senior-level and entry-level positions.⁷⁵⁰

New Orleans has many different businesses that provide jobs in the area. In terms of employment, the top industries include full-service restaurants (17,520 total employment), college, universities, and professional schools (12,488 total employment), hotels and motels (10,545 total employment), and elementary and secondary schools (10,366 total employment).⁷⁵¹ The total number of hospitality-related jobs in New Orleans shows that tourism and tourism-related businesses are major contributors to the local economy.

Furthermore, small businesses are an anchor to the New Orleans economy. According to 2020 Dun & Bradstreet information, there were 70,471 businesses within the New Orleans assessment area, of which 92.3 percent had total annual revenues less than or equal to \$1 million.⁷⁵² Additionally, 19.1 percent of small businesses in the assessment area are in moderate-income tracts and 7.8 percent are in low-income tracts.⁷⁵³ According to CRA reportable data from all reporters in the assessment area, loan originations to small businesses posted growth from 2018 to 2019. During that time, there was an 18.3 percent increase in lending to small businesses. From 2019 to 2020, there was a decline in the percentage of loan originations to small businesses. During this period, loan volume decreased 7.1 percent.

The COVID-19 global pandemic represented a major event impacting the economy in the assessment area and nationwide. As the pandemic unfolded, many businesses in the assessment area had to reduce or close operations due to a statewide stay-at-home order that went into effect on March 13, 2020.⁷⁵⁴ Nonessential businesses, such as personal care and grooming businesses, malls, and others, were impacted by this order. To sustain the nation's economy, the United States' Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 25, 2020; this legislation established the Paycheck Protection Program, which was implemented

by the Small Business Administration (SBA), to provide loans to small businesses for payroll costs and certain other expenses.⁷⁵⁵ This program allowed businesses to access credit in order to help them sustain operations during the pandemic.

The assessment area experienced both a decline and rise in unemployment during the review period. In 2018, the assessment area’s unemployment rate was 4.6 percent. During this year, St. Tammany Parish had the lowest unemployment rate at 4.1 percent, and St. James Parish had the highest unemployment rate at 6.2 percent. In 2019, the assessment area’s unemployment rate decreased to 4.3 percent. During that year, Jefferson Parish and St. Tammany Parish had the lowest unemployment rates at 4.0 percent each. For 2019, St. James Parish had the highest unemployment rate at 5.8 percent. In 2020, unemployment rates in the assessment area, Louisiana, and the United States increased due to the negative impact that the COVID-19 global pandemic had on the economy.⁷⁵⁶ In the assessment area, the unemployment rate rose to 9.7 percent, which was greater than Louisiana’s unemployment rate of 8.3 percent. Within the assessment area, Orleans Parish and St. John the Baptist Parish had the highest unemployment rates of 12.2 percent and 11.2 percent, respectively. For the year, St. Tammany Parish and Plaquemines Parish had the lowest unemployment rates of 6.8 percent and 7.0 percent, respectively.

Unemployment Rates - LA New Orleans (2 of 2)

According to 2020 FFIEC census data, there were 552,061 housing units located in the assessment area, of which 52.9 percent were owner-occupied, 33.2 percent were rental units, and 13.9 percent were vacant.⁷⁵⁷ While most units were owner-occupied, a disproportionately higher percentage of housing units in low- and moderate-income tracts were rental units or vacant. In low-income census tracts, approximately 75.7 percent of all housing units were rentals or vacant; additionally, in moderate-income census tracts, 57.5 percent of units were rental or vacant.⁷⁵⁸ The median age of the housing stock in the assessment area was 47 years, though the median age of housing was older, 54 years, in low-income census tracts.⁷⁵⁹ These factors suggest that HMDA-reportable lending opportunities, particularly in low-income tracts, may be limited.

During the review period, home prices have been steadily increasing in the New Orleans-Metairie metropolitan area. In 2018, the median sales price of a single-family home was \$210,100.⁷⁶⁰ In 2019, the median sales price increased 5.7 percent to \$222,000.⁷⁶¹ During 2020, the median sales price of a single-family home rose 8.3 percent to \$240,500.⁷⁶²

As home prices increase, homeownership for low- and moderate-income families in the New Orleans-Metairie metropolitan area becomes less affordable. Using the assumption that a borrower can obtain a loan for approximately three times the borrower’s annual income and using 2020 FFIEC median family income figures for the assessment area, affordable homes would be priced at \$183,027 or below.⁷⁶³ As stated previously, the median home price in the New Orleans-Metairie metropolitan area was \$240,500 in 2020.

⁷⁶¹ Ibid.

⁷⁶² Ibid.

⁷⁶³ According to the 2020 FFIEC census data, the median family income for the assessment area was \$61,009.

Furthermore, New Orleans saw an increase in rental costs for a two-bedroom apartment during the review period. In January 2018, the median monthly rent for a two-bedroom apartment was \$1,293.⁷⁶⁴ By January 2019, the median monthly rent for a two-bedroom apartment was \$1,528, which was an 18.2 percent increase from the previous year.⁷⁶⁵ In January 2020, the median monthly rental cost for a two-bedroom apartment increased slightly to \$1,574.⁷⁶⁶ A market assessment performed by the Reinvestment Fund in 2021 indicated that 53 percent of households in New Orleans rented their homes.⁷⁶⁷ Based on this information, the rise in rent in conjunction with the percentage of households that pay rent indicate that rent affordability in New Orleans is a concern.

Demographic Characteristics by Census Tract

The following table presents key demographic and business information used to help develop a performance context for the assessment area. The data reflects the 2020 FFIEC census data and the 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the community and economic development landscapes, community development practitioners were contacted. These individuals discussed the various needs and opportunities across the region as well as how financial institutions can be responsive to local community development needs.

One contact engaged in affordable housing was interviewed. This person explained that a lot of the affordable housing in New Orleans consists of communities with homes built during the 1920s through the 1940s. The types of repair work needed for these homes is drastically more expensive in African American communities located in New Orleans due to poor or deferred maintenance, per the contact. This individual also mentioned that the condition of housing has gotten significantly worse over the last several years, and his organization is having to turn clients away because some homes are in such poor condition and repair costs are significant. Lastly, the contact said that there is a particular need for affordable housing in the 7th Ward, upper 9th Ward, Uptown, Central City, the Claiborne Corridor, and the remaining neighborhoods near the corridors of downtown New Orleans.

The contact further mentioned that a lot of low-income homeowners do not have bank accounts, and there is a huge percentage of social security recipients who receive their benefits on cards. The contact mentioned that there is a need for no cost checking and savings accounts. Also, it was explained that some low-income homeowners may not have access to online banking services, and they are being charged fees for bank statements, which is having an impact on the homeowners. Also, some low-income homeowners incur ATM transaction fees, and those fees are having an impact on the individuals, per the contact.

Moreover, the contact discussed reverse mortgages and provided his viewpoints on the negative impact that reverse mortgages are having on low-income homeowners. Specifically, the contact stated that low-income homeowners are getting reverse mortgages because there is not another credit option for them to use. The contact highlighted that HELOCs are expensive, and people are going with reverse mortgages because they cannot meet the HELOC underwriting guidelines needed from banks, such as a 30 percent debt-to-income ratios and the income needed to pay the debt. He mentioned that there is a need for some type of credit product that helps meet the gap for individuals who cannot qualify for credit products like HELOCs.

Two contacts working in an organization that focuses on entrepreneur and start-up business development were interviewed. The contacts explained that entrepreneurs have experienced challenges due to disparities in contracting and receipts. The contacts said that Black-owned businesses have issues with the number of receipts (sales) compared to the percentage of Black-owned businesses in New Orleans. The contacts also explained that there is a lack of supporting infrastructure in the area. It was mentioned that there is not enough available commercial kitchen space, and there is a shortage of both cold and dry food storage for early-stage food service businesses. Lastly, the contacts stated that food entrepreneurs are facing gaps in their industry due to the impact natural disasters have had on available spaces to operate.

Both contacts from this organization discussed the impact that the COVID-19 pandemic had on businesses in New Orleans. The contacts said that early in the pandemic, some businesses closed because they were not able to pay rent. Also, other businesses closed because the businesses comprised of one or two people, and those individuals became sick, which caused the business to close for weeks until the employees recovered.

Furthermore, the contacts discussed the impact that PPP lending had on entrepreneurs. Specifically, they said that the first round of PPP funds went mainly to larger businesses that had existing relationships with banks, while sole proprietors and single member LLCs had a tough time getting PPP loans. However, the second round of PPP funding was a little better, but there was a struggle for small businesses, per the contacts. They mentioned that small businesses experienced issues with the PPP loan process because they were unable to move quickly to obtain funds during the first round of loans as well as they had issues with kickbacks from applications. It was indicated that there were very specific things needed for the PPP loan applications, and one problem with the application was that business had mismatched EIN & SSNs. The contacts explained that before the pandemic and after the pandemic, businesses faced issues gaining access to credit because of credit score issues and not having their finances in order. Due to these issues, it was stated that some start-ups use credit cards and predatory lenders to gain access to credit. Lastly, the contacts mentioned that New Orleans has a lot of Community Development Financial Institutions (CDFIs), but there is difficulty for businesses to obtain funds, despite the number of CDFIs.

The contacts also mentioned that entrepreneurs struggle to get the first influx of capital needed for their businesses when that capital does not come from family and friends. Additionally, they said that some entrepreneurs want to scale operations and want to take on larger projects, but the entrepreneurs have difficulty obtaining capital for this endeavor. Also, the individuals said there are many lenders that do not want to work with businesses that are less than two to three years old. Per the contacts, the credit products that are most needed by small businesses in New Orleans include working capital loans as well as loans with deferred payments up to six months. It was mentioned that some businesses have distrust in the market for debt because businesses must immediately start paying back the principal and interest on their loans.

Additionally, the contacts stated that banks can be more responsive by providing information about the speed of their underwriting process. Some banks are transparent about their underwriting process and let the businesses know that it may take months to complete, while other banks indicate that they have a quick underwriting process, when that is not true, per the contacts. Also, it was mentioned that banks should provide more transparency of what is required for loans.

The contacts noted that there has been positive involvement from financial institutions in the area. This positive involvement includes:

- The number of lenders that have in-house technical assistance,
- Many financial institutions engaged in the entrepreneurial support community, and
- Some banks will reach out to other organizations to see if they can aid a business when the bank is unable to help.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE NEW ORLEANS,
LOUISIANA ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending performance in the New Orleans assessment area is adequate. The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a low level of community development loans in the New Orleans assessment area.

The analysis included 2,244 HMDA-reportable loans and 1,815 CRA small business loans reported by the bank in the New Orleans assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The New Orleans assessment area accounted for 43.4 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Louisiana and 32.1 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 38.6 percent of Regions Bank's Louisiana deposits are in the New Orleans assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 2,244 HMDA-reportable loans analyzed, 837 loans (37.3 percent) were home purchase loans. Of the total home purchase loans made, 51 loans (6.1 percent) were located in low-income tracts, and 147 loans (17.6 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's home purchase lending in low-income tracts (6.1 percent) was above the percentage of owner-occupied units (5.4 percent) in these tracts. In 2018, the bank's home purchase lending in low-income tracts (8.8 percent) was significantly above the aggregate lending performance (5.7 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (4.4 percent) was below the aggregate lending performance (6.6 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (4.6 percent) was slightly below the aggregate lending performance (6.0 percent) in these tracts.

Home purchase lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (17.6 percent) was similar to the percentage of owner-occupied units (19.9 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (18.3 percent) was similar to the aggregate lending performance (17.7 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (18.7 percent) was similar to the aggregate lending performance (18.0 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (15.7 percent) was similar to the aggregate lending performance (17.6 percent) in these tracts.

Home Refinance Loans

Regions Bank made 962 home refinance loans from 2018 through 2020, which represents 42.9 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, 13 loans (1.4 percent) were located in low-income tracts, and 155 loans (16.1 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home refinance lending in low-income tracts (1.4 percent) was below the percentage of owner-occupied units (5.4 percent) in these tracts. In 2018, the bank's home refinance lending in low-income tracts (1.1 percent) was significantly below the aggregate lending performance (5.6 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (0.4 percent) was significantly below the aggregate lending performance (5.1 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (1.9 percent) was below the aggregate lending performance (3.7 percent) in these tracts.

Home refinance lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (16.1 percent) was similar to the percentage of owner-occupied units (19.9 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (16.4 percent) was similar to the aggregate lending performance (16.0 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (19.0 percent) was above the aggregate lending performance (14.5 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (14.7 percent) was above the aggregate lending performance (11.4 percent) in these tracts.

Home Improvement Loans

Regions Bank made 445 home improvement loans from 2018 through 2020, which represents 19.8 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, 10 loans (2.2 percent) were located in low-income tracts, and 68 loans (15.3 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home improvement lending in low-income tracts (2.2 percent) was below the percentage of owner-occupied units (5.4 percent) in these tracts. In 2018, the bank's home improvement lending in low-income tracts (1.3 percent) was significantly below the aggregate lending performance (4.0 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (3.1 percent) was below the aggregate lending performance (4.8 percent) in these tracts. In 2020, the bank's home improvement lending in low-income tracts (2.3 percent) was below the aggregate lending performance (3.7 percent) in these tracts.

Home improvement lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (15.3 percent) was similar to the percentage of owner-occupied units (19.9 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income tracts (19.2 percent) was above the aggregate lending performance (13.3 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (13.6 percent) was similar to the aggregate lending performance (13.1 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (12.9 percent) was slightly above the aggregate lending performance (11.3 percent) in these tracts.

Small Business Loans

Regions Bank made 1,815 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 151 loans (8.3 percent) were located in low-income tracts, and 398 loans (21.9 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's small business lending in low-income tracts (8.3 percent) was above the percentage of businesses (7.9 percent) in these tracts. In 2018, the bank's small business lending in low-income tracts (10.9 percent) was above the aggregate lending performance (7.8 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (5.4 percent) was below the aggregate lending performance (7.8 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (8.4 percent) was similar to the aggregate lending performance (8.1 percent) in these tracts.

Small business lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (21.9 percent) was above the percentage of businesses (19.2 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (23.0 percent) was above the aggregate lending performance (17.8 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (27.1 percent) was significantly above the aggregate lending performance (17.7 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (19.8 percent) was similar to the aggregate lending performance (18.0 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (4.7 percent) was below the percentage of low-income families (24.9 percent). In 2018, the bank's home purchase lending to low-income borrowers (4.6 percent) was similar to the aggregate lending performance (4.2 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (2.4 percent) was below the aggregate lending performance (4.3 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (6.8 percent) was above the aggregate lending performance (5.2 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (17.6 percent) was above the percentage of moderate-income families (15.8 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (17.0 percent) was similar to the aggregate lending performance (16.7 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (19.5 percent) was slightly above the aggregate lending performance (17.0 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (16.4 percent) was similar to the aggregate lending performance (18.1 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (6.8 percent) was below the percentage of low-income families (24.9 percent). In 2018, the bank's home refinance lending to low-income borrowers (7.4 percent) was similar to the aggregate lending performance (7.1 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (9.7 percent) was significantly above the aggregate lending performance (5.1 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (5.2 percent) was significantly above the aggregate lending performance (2.7 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (15.0 percent) was similar to the percentage of moderate-income families (15.8 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (20.1 percent) was above the aggregate lending performance (13.9 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (16.0 percent) was above the aggregate lending performance (10.9 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (12.7 percent) was above the aggregate lending performance (9.7 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is poor. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (2.9 percent) was below the percentage of low-income families (24.9 percent). In 2018, the bank's home improvement lending to low-income borrowers (2.0 percent) was below the aggregate lending performance (3.2 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (3.1 percent) was below the aggregate lending performance (5.0 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (3.8 percent) was similar to the aggregate lending performance (3.8 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is excellent. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (16.6 percent) was above the percentage of moderate-income families (15.8 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (16.6 percent) was significantly above the aggregate lending performance (10.1 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (19.1 percent) was significantly above the aggregate lending performance (10.7 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (13.6 percent) was above the aggregate lending performance (9.4 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is excellent. From 2018 through 2020, 67.8 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 92.3 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (80.1 percent) was significantly above the aggregate lending performance (34.4 percent) to these businesses. In 2019, the bank's small business lending to small businesses (77.5 percent) was significantly above the aggregate lending performance (37.1 percent) to these businesses. In 2020, the bank's small business lending to small businesses (60.5 percent) was significantly above the aggregate lending performance (29.4 percent) to these businesses. Lastly, 93.9 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Given the bank's presence, community needs, and peer performance in this area, Regions Bank makes a low level of community development loans in the New Orleans assessment area. During the review period, the bank originated 13 community development loans totaling \$12.9 million and 61 community development PPP loans totaling \$10.3 million. Specifically, the bank originated \$7.6 million towards revitalization and stabilization efforts exclusively through the PPP; \$12.7 million to support economic development primarily through the PPP and renewing lines of credit to one small farm; and \$2.9 million in affordable housing initiatives.

The most impactful loans directly benefiting the assessment area included the bank's affordable housing initiatives—specifically, five newly originated lines of credit totaling \$1.4 million (and a subsequent renewal for \$600,000) to one nonprofit working to redevelop blighted and vacant lots into affordable housing. However, the

remaining loans in this assessment area were not overly responsive to the community needs noted by community contacts. Additionally, the number of loans and dollar volume of community development lending are below peer performance in this area.

INVESTMENT TEST

Regions Bank's investment performance in the New Orleans assessment area is good. The bank made a significant level of investments and contributions totaling \$40.9 million in the assessment area. The bank's investments (excluding contributions) totaled \$40.0 million, of which \$11.7 million (29.2 percent) were new investments acquired during the review period. The majority of current period investments provided financing for affordable housing, including mortgage-backed securities secured by loans for multifamily rental housing and mortgages for low- and moderate-income individuals. The bank also renewed investments totaling \$30,000 in a local CDFI. The bank also held investments from prior review periods that included an investment with a current book value of approximately \$20.0 million in a bond that financed renovations for schools that primarily serve LMI students in Jefferson Parish. The bank also had investments in mortgage-backed securities and LIHTC projects from prior review periods.

Regions Bank made \$884,300 in contributions that demonstrated responsiveness to credit and community development needs in the New Orleans assessment area. Specifically, the bank provided \$374,500 to organizations that provide community services targeted to low- and moderate-income individuals, \$340,000 to support affordable housing, \$169,000 for activities that promote economic development, and \$1,500 to support revitalization and stabilization of LMI communities. Overall, approximately \$173,000 in donations were responsive to the COVID-19 pandemic, providing support for organizations providing emergency and recovery assistance to LMI individuals, small businesses, and nonprofits. Examples of notable donations include:

- A \$300,000 grant to support a project developed by a local nonprofit organization that will combine affordable housing and healthcare services in an underserved community. The project includes multiple layers of funding from federal, state, and local government sources;
- A \$25,000 grant to support an economic development initiative focused on the economic recovery of the region in light of the COVID-19 pandemic;
- A total of \$250,000 in grants to assist people and businesses impacted by Hurricane Ida in 2021;
- A \$25,000 grant to support entrepreneurship training offered at a business incubator in New Orleans; and
- Grants totaling \$22,500 to a nonprofit organization focused on providing affordable homeownership opportunities for LMI families through the redevelopment of vacant and abandoned properties.

The bank also made \$241,200 in donations that benefited all assessment areas in Louisiana, which positively impacted the bank's performance in New Orleans.

SERVICE TEST

Regions Bank's service test performance in the New Orleans assessment area is good.

Retail Services

Retail banking services are adequate in the New Orleans full-scope assessment area.

The distribution of 28 branch offices and 30 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The percentage of branches in low-income tracts was significantly less than the percentage of households and businesses in the same geography: 10.5 percent of households and 7.9 percent of businesses were located in low-income census tracts compared to 3.6 percent of the bank's branches. The proportion of the bank's branches in moderate-income tracts was only slightly greater than the percentage of households and greater than the percentage of businesses in the same geography: 25.0 percent of total branches were in moderate-income-tracts compared to 24.0 percent of households and 19.2 percent of businesses. Overall, the bank's branch distribution relative to available demographic information may limit accessibility to portions of the bank's geographies and individuals of different income levels in the assessment area and may therefore be considered unreasonably inaccessible.

During the review period, the bank neither opened nor closed any branch offices or full-service ATMs in low- or moderate-income census tracts. However, the bank opened one branch office and four full-service ATMs in middle-income tracts. Additionally, four branch offices were closed in middle-income tracts and three were closed in upper-income tracts. The bank also closed four full-service ATMs in middle-income tracts and three in upper-income tracts. Overall, the bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

 SA = Stand Alone ATM is a subset of total ATMS

Community Development Services

Regions Bank is considered a leader in providing community development services in the New Orleans assessment area. During the review period, employees engaged in 110 qualified service activities totaling 1,933 hours that were considered responsive to the community development needs of the area. The bank’s service activities benefited organizations that provide affordable housing, community service, economic development, and revitalization and stabilization activities for low- and moderate-income individuals, geographies, and small businesses in the New Orleans assessment area. Of the bank’s total service hours, 543 hours were committed to adult and youth financial education, small business workshops, and homebuyer training through partnerships with numerous schools, businesses, and community organizations. Bank employees also provided over 90 hours of technical assistance to a variety of organizations that provide community services in low- and moderate-income geographies and for low- and moderate-income individuals. Notably, 1,241 hours were committed to board or committee member service to various qualified nonprofit organizations. Overall, the bank’s activities demonstrated excellent responsiveness to identified community development needs in the New Orleans assessment area.

Highlighted below are examples of community development services considered responsive during the review period:

- Regions employees conducted 98 hours of financial education classes at an organization that provides no-cost education and career technical training programs for youth and young adults.
- A Regions manager served on the board of directors for a foundation that focuses on providing homebuying education and homeownership resources to low- and moderate-income families who are making the transition from renting to homeownership.
- A Regions manager provided 240 hours serving as a board member for an organization that partners with government entities, local businesses, foundations, and neighborhood organizations to help revitalize and stabilize neighborhoods in the Greater New Orleans area. The organization provides repairs and home rehabilitation for low- and moderate-income homeowners.

- A Regions community development manager served on the board of directors of a CDFI that offers non-traditional loans and technical assistance to small businesses in the area.
- A Regions community development manager served on the Business Advisory Council of a historically Black college located in the New Orleans assessment area. The council is a part of the division of business, which is a program offered by the college that prepares graduates to take leadership roles in corporate America, nonprofits, small businesses, and entrepreneurship.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE LOUISIANA METROPOLITAN ASSESSMENT AREA

- *Alexandria Assessment Area (Rapides Parish)*
 - As of December 31, 2020, Regions Bank operated three branches in the assessment area, representing 3.3 percent of its branches in Louisiana.
 - As of June 30, 2020, the bank had \$155.0 million in deposits in this assessment area, representing a market share of 5.7 percent and 1.9 percent of Regions Bank's total deposits in Louisiana.
- *Hammond Assessment Area (Tangipahoa Parish)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 4.3 percent of its branches in Louisiana.
 - As of June 30, 2020, the bank had \$203.4 million in deposits in this assessment area, representing a market share of 8.9 percent and 2.5 percent of Regions Bank's total deposits in Louisiana.
- *Houma Assessment Area (Lafourche and Terrebonne parishes)*
 - As of December 31, 2020, Regions Bank operated six branches in the assessment area, representing 6.5 percent of its branches in Louisiana.
 - As of June 30, 2020, the bank had \$429.8 million in deposits in this assessment area, representing a market share of 8.2 percent and 5.3 percent of Regions Bank's total deposits in Louisiana.
- *Lafayette Assessment Area (Lafayette and Iberia parishes)*
 - As of December 31, 2020, Regions Bank operated five branches in the assessment area, representing 5.4 percent of its branches in Louisiana.
 - As of June 30, 2020, the bank had \$402.9 million in deposits in this assessment area, representing a market share of 3.7 percent and 5.0 percent of Regions Bank's total deposits in Louisiana.
- *Monroe Assessment Area (Ouachita and Morehouse (added in 2019) parishes)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 4.3 percent of its branches in Louisiana.
 - As of June 30, 2020, the bank had \$396.3 million in deposits in this assessment area, representing a market share of 10.2 percent and 4.9 percent of Regions Bank's total deposits in Louisiana.
- *Shreveport Assessment Area (Bossier, Caddo, and Webster (removed in 2019) parishes)*
 - As of December 31, 2020, Regions Bank operated 12 branches in the assessment area, representing 13.9 percent of its branches in Louisiana.

- As of June 30, 2020, the bank had \$1.2 billion in deposits in this assessment area, representing a market share of 13.9 percent and 14.2 percent of Regions Bank’s total deposits in Louisiana.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Alexandria	Consistent	Not Consistent (Below)	Consistent
Hammond	Not Consistent (Above)	Consistent	Not Consistent (Below)
Houma	Consistent	Not Consistent (Below)	Not Consistent (Below)
Lafayette	Not Consistent (Above)	Consistent	Not Consistent (Below)
Monroe	Not Consistent (Above)	Consistent	Consistent
Shreveport	Not Consistent (Above)	Not Consistent (Below)	Consistent

For the lending test, Regions Bank received a rating of low satisfactory for the State of Louisiana. Performance in four of the six metropolitan limited-scope assessment areas was above the statewide lending test performance, while performance in Alexandria and Houma was consistent with the statewide performance. For the geographic distribution of loans, lending levels were good in Hammond and adequate in five of the metropolitan limited-scope assessment areas. Performance for the borrower distribution of loans was good in five of the metropolitan limited-scope assessment areas and adequate in Hammond. Community development lending performance in limited-scope metropolitan assessment areas was as follows: the bank was a leader in Hammond (\$14.1 million), Lafayette (\$14.8 million), Monroe (\$38.2 million), and Shreveport (\$49.1 million); made a low level in Alexandria (\$1.7 million); and made few, if any, in Houma (\$138,000).

For the investment test, Regions Bank received a rating of outstanding for the State of Louisiana. Performance was consistent with the bank’s statewide investment test performance in the Hammond, Lafayette, and Monroe metropolitan limited-scope assessment areas, while performance was weaker in the Alexandria, Houma, and Shreveport metropolitan limited-scope assessment areas. The bank’s level of investments was excellent in the

Hammond, Lafayette, and Monroe assessment areas; significant in the Houma and Shreveport assessment areas; and poor in the Alexandria assessment area.

For the service test, Regions Bank received a rating of high satisfactory for the State of Louisiana. Performance in Alexandria, Monroe and Shreveport metropolitan limited-scope assessment areas were consistent with the statewide lending test performance. The performance in Hammond, Houma, and Lafayette were below the statewide performance due to adequate community development services. Additionally, while Hamond and Houma had good retail delivery performance, Lafayette's retail delivery services were adequate.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating.

NONMETROPOLITAN STATEWIDE AREAS LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE LOUISIANA NON-METROPOLITAN ASSESSMENT AREAS

- *Morehouse Assessment Area (Morehouse (REMOVED IN 2019) and West Carroll parishes)*
 - As of December 31, 2020, Regions Bank operated one branches in the assessment area, representing 1.1 percent of its branches in Louisiana.
 - As of June 30, 2020, the bank had \$77.2 million in deposits in this assessment area, representing a market share of 40.9 percent and 0.9 percent of Regions Bank's total deposits in Louisiana.
- *Northwest Louisiana Assessment Area (Lincoln and Webster (ADDED IN 2019) parishes)*
 - As of December 31, 2020, Regions Bank operated five branch in the assessment area, representing 5.4 percent of its branches in Louisiana.
 - As of June 30, 2020, the bank had \$180.8 million in deposits in this assessment area, representing a market share of 6.9 percent and 2.2 percent of Regions Bank's total deposits in Louisiana.
- *Southern Louisiana Assessment Area (St. Mary Parish)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 2.2 percent of its branches in Louisiana.
 - As of June 30, 2020, the bank had \$85.6 million in deposits in this assessment area, representing a market share of 7.0 percent and 1.1 percent of Regions Bank's total deposits in Louisiana.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Morehouse-West Carroll	Consistent	Not Consistent (Below)	Not Consistent (Below)
Northwest Louisiana	Consistent	Not Consistent (Below)	Not Consistent (Below)
Southern Louisiana	Not Consistent (Above)	Consistent	Not Consistent (Below)

For the lending test, Regions Bank received a rating of low satisfactory for the State of Louisiana. Performance in Morehouse-West Carroll and Northwest Louisiana was consistent with the statewide performance, and performance in Southern Louisiana was above the statewide lending test performance. For the geographic distribution of loans, lending levels were adequate in all three nonmetropolitan limited-scope assessment areas. Additionally, performance for the borrower distribution of loans was adequate in all three nonmetropolitan limited-scope assessment areas. Community development lending performance in limited-scope nonmetropolitan assessment areas was as follows: the bank was a leader in Southern Louisiana (\$14.9 million); made an adequate level in Northwest Louisiana (\$2.8 million); and made no community development loans in Morehouse-West Carroll.

For the investment test, Regions Bank received a rating of outstanding for the State of Louisiana. Performance was consistent with the bank’s statewide investment test performance in the Southern Louisiana nonmetropolitan limited-scope assessment area, while performance was below in the Morehouse-West Carroll and Northwest Louisiana nonmetropolitan limited-scope assessment areas. The bank’s level of investments was excellent in the Southern Louisiana assessment area, adequate in the Northwest Louisiana assessment area, and poor in the Morehouse-West Carroll assessment area.

For the service test, Regions Bank received a rating of high satisfactory for the State of Louisiana. Performance in all three of the nonmetropolitan assessment areas was weaker than the bank’s state performance. The Southern Louisiana assessment area had an adequate community development service performance while Morehouse’s performance was limited, and Northwest Louisiana’s provided few, if any, community development services. Additionally, all three had poor retail delivery services.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

Mississippi

CRA RATING FOR MISSISSIPPI: SATISFACTORY

The Lending Test is rated: **High Satisfactory**

The Investment Test is rated: **High Satisfactory**

The Service Test is rated: **High Satisfactory**

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects good penetration throughout the assessment areas, and the distribution of loans by borrower income reflects excellent penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes an adequate level of community development loans in its Mississippi assessment areas.
- The bank provides a significant level of qualified community development investments and grants that demonstrate responsiveness to community development needs of the Mississippi assessment areas.
- Retail banking services are good in the bank's Mississippi assessment areas.
- The bank provides a relatively high level of community development services that benefit low-and-moderate-income residents and small businesses in the Mississippi assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in Mississippi:

- Jackson

Limited-scope reviews were conducted for the remaining eight assessment areas:

- Adams
- Central Mississippi
- Gulfport
- Hattiesburg
- Northern Mississippi
- Northwest Mississippi
- Southern Mississippi
- Warren

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN MISSISSIPPI

As of June 30, 2020, Regions Bank had \$7.7 billion in deposits in Mississippi accounting for 6.4 percent of the bank's total deposits. Regions Bank operated 107 branch offices in Mississippi as of December 31, 2020, representing 7.8 percent of the bank’s total branches. HMDA-reportable lending in Mississippi accounted for 4.4 percent of total institutional HMDA-reportable lending by number of loans and 2.9 percent by dollar volume. CRA small business lending in Mississippi accounted for 3.9 percent of the bank’s total CRA small business lending by number of loans and 4.1 percent by dollar volume. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was less than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Statewide Summary of Lending Activity
Assessment Areas Located in
Mississippi

Loan Type	#	%	\$ (000s)	%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MISSISSIPPI

Lending Test

The lending test rating in the state of Mississippi is high satisfactory. Overall, performance in Mississippi with regard to the geographic distribution of loans reflects good penetration throughout the assessment areas. The distribution of loans by borrower income reflects excellent penetration among customers of different income levels and businesses of different sizes. Additionally, Regions makes an adequate level of community development loans in Mississippi.

During the review period, Regions Bank reported 5,974 HMDA-reportable loans and 3,412 small business loans in Mississippi. The rating for Mississippi is based on performance in the Jackson full-scope assessment area. Approximately 31.9 percent of the bank's HMDA-reportable and small business lending by number of loans in Mississippi occurred within this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is good, and the distribution of loans by borrower income and revenue size of businesses is excellent. As noted above, the rating for the state of Mississippi is derived from the Jackson full-scope assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

Regions Bank makes an adequate level of community development loans in the state of Mississippi. During the review period, the bank originated or renewed 230 qualifying community development loans totaling \$141.0 million within its Mississippi assessment areas; this includes 78 loans totaling \$23.9 million directly benefiting the Jackson full-scope assessment area, which was deemed adequate.

The total community development lending amount includes five loans totaling \$2.3 million with a P/M/F of serving a broader statewide area that includes all of the bank's assessment areas in the state. These loans were made to nonprofits and were used to fund children's homes and job placement programs for LMI children and youth anywhere in the state of Mississippi.

The bank was considered responsive to the credit and community development needs within the state of Mississippi. As a result, and in addition to the total community development lending previously noted, the bank received consideration for 16 community development loans totaling \$37.4 million that were outside any of the bank's assessment areas in the state. More information on community development loans can be found in the full-scope assessment area sections of this report.

Investment Test

The investment test rating for Mississippi is high satisfactory.

Regions Bank made a significant level of qualified investments and contributions totaling \$68.5 million in Mississippi. The bank had qualified investments of \$67.1 million in the Mississippi assessment areas, with approximately 37.2 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$1.4 million. Further, the bank made \$912,000 in contributions that benefit a broader statewide area that includes the Mississippi assessment areas. Notable statewide donations include the forgiveness of a \$500,000 investment in a CDFI, which in turn provided

additional equity to the organization. Additionally, the bank provided a \$225,000 donation to support expansion of a hospital that serves patients from across the state, with the majority of patients receiving Medicaid.

Jackson was the assessment area in the state reviewed using full-scope procedures. Approximately 53.9 percent of combined investment and contribution activity was in this assessment area, compared to 41.7 percent of deposits in the market as of June 30, 2021. Performance in the assessment area was good. Additional details regarding investments and contributions can be found in the full-scope assessment area section.

Service Test

The service test rating for Mississippi is high satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are accessible to the bank's geographies and individuals of different income levels in the assessment areas. Overall, banking services and hours of operations do not vary in a way that inconveniences the bank's assessment areas, including low- and moderate-income geographies and/or low- and moderate-income individuals. The record of opening and closing of branch offices has not adversely affected the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period, the bank opened one branch office in a moderate-income tract and one in an upper-income tract in Mississippi. The bank closed 14 branch offices throughout the state; of those closed, three were in low-income tracts, two in moderate-income tracts, eight in middle-income tracts, and one in an upper-income tract. Overall, the bank's retail service performance is considered good in Mississippi.

Community Development Services

Regions Bank provides a relatively high level of community development services that benefit low- and moderate-income residents and small businesses in Mississippi. Statewide, employees engaged in 500 qualified service activities totaling 3,942 hours during the review period. Performance in the Jackson full-scope assessment area was good. Additionally, bank employees engaged in 77 hours of qualified community development services that benefited a broader statewide or regional area, including the bank's assessment areas.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

METROPOLITAN AREA FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE JACKSON, MISSISSIPPI ASSESSMENT AREA

Overview

The Jackson assessment area includes five of the seven counties that make up the Jackson, MS MSA: Copiah, Hinds, Madison, Rankin, and Yazoo counties. In 2019, there was a change to the Jackson, MS MSA, and Holmes County was added. This addition to the MSA did not result in a change to the bank's

assessment area. As of December 31, 2020, Regions Bank operated 32 branch offices in the assessment area, which accounted for 43.6 percent of the bank's deposits in Mississippi. In addition, the market represents the bank's largest concentration of combined HMDA-reportable and CRA small business lending in the state at 31.6 percent by dollar volume.

Jackson has an active banking market. According to the FDIC Summary of Deposits Report dated June 30, 2020, there are 27 financial institutions operating 204 branch locations in the assessment area with \$16.1 billion in total deposits.⁷⁶⁸ Regions Bank ranks 2nd in the market with 21.0 percent of deposits (\$3.4 billion).⁷⁶⁹ Trustmark National Bank has the largest deposit market share at 34.3 percent.⁷⁷⁰ After Regions Bank, BankPlus and BancorpSouth Bank have the largest deposit market share at 13.4 percent and 7.9 percent, respectively, totaling \$3.4 billion in deposits.⁷⁷¹

HMDA-reportable lending in the assessment is competitive. Regions Bank originated or purchased 3.4 percent of HMDA-reportable loans during 2018. For that year, the bank ranked 8th out of 296 reporters. In 2019, Regions Bank originated or purchased 3.3 percent in loans. The bank ranked 8th out of 306 reporters for the year. Lastly, Regions Bank originated or purchased 2.8 percent in loans for the assessment area during 2020. For that year, Regions Bank ranked 10th out of 330 reporters. From 2018 through 2020, HMDA-reportable lending in the assessment area was primarily dominated by Trustmark National Bank, BancorpSouth Bank, BankPlus, and Wells Fargo Bank.

CRA small business lending is also competitive. For CRA small business and small farm lending, Regions Bank ranked 12th out of 100 reporters in 2018, with 2.6 percent of reported loans. In 2019, the bank ranked 11th out of 98 reporters, with 2.8 percent of reported loans. Further, Regions Bank ranked 7th out of 135 reporters, with 4.4 percent of reported loans in 2020. From 2018 through 2020, lending in the assessment area was primarily dominated by Trustmark National Bank, BankPlus, and American Express.

Population and Income Characteristics

According to 2020 census data, the population in the Jackson assessment area is estimated at approximately 549,029 people; Hinds County is the most populous followed by Rankin and then Madison counties.⁷⁷² Between 2010 and 2020, Madison County and Rankin County have posted positive population gains of 14.6 percent and 10.9 percent, respectively.⁷⁷³ In contrast, Hinds, Copiah, and Yazoo counties have posted population losses ranging from 3.7 percent to 7.2 percent.⁷⁷⁴

⁷⁷³ Ibid.

⁷⁷⁴ Ibid.

According to 2018 FFIEC census data, the assessment area was made up of 124 census tracts: 18 tracts were low-income (14.5 percent), 36 tracts were moderate-income (29.0 percent), 35 tracts were middle-income (28.2 percent), 34 tracts were upper-income (27.4 percent), and 1 tract had unknown income (0.8 percent).⁷⁷⁵ When Holmes County was added to the MSA in 2019, the census tract data for the Jackson assessment area changed. As a result, the 2020 FFIEC census data indicates that the assessment area is now made up of 124 census tracts: 18 tracts are low-income (14.5 percent), 35 tracts are moderate-income (28.2 percent), 33 tracts are middle-income (26.6 percent), 37 tracts are upper-income (29.8 percent), and 1 tract has unknown income (0.8 percent).⁷⁷⁶

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Jackson, MS MSA. The table below provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper). As shown, the median family income for the MSA increased from \$60,700 in 2018 to \$63,900 in 2020. Data shows that the median family income was highest in Madison County (\$78,349) and lowest in Yazoo County (\$36,694).⁷⁷⁷ According to 2018 FFIEC census data, 39.7 percent of families in the assessment area were low- to moderate-income.⁷⁷⁸ In 2020, after Holmes County was added to the MSA, 38.8 percent of families were considered low- to moderate-income, representing a slight decrease from 2018.⁷⁷⁹

**Borrower Income Levels
Jackson, MS MSA**

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2018	\$60,700	0 - \$30,349	\$30,350 - \$48,559	\$48,560 - \$72,839	\$72,840 - & above
2019	\$60,400	0 - \$30,199	\$30,200 - \$48,319	\$48,320 - \$72,479	\$72,480 - & above
2020	\$63,900	0 - \$31,949	\$31,950 - \$51,119	\$51,120 - \$76,679	\$76,680 - & above

Poverty is a concern in the assessment area. Between the period of 2015 through 2019, Yazoo County had the highest percentage of families living in poverty at 24.0 percent, followed by Copiah County at 19.2 percent, and Hinds County at 16.1 percent.⁷⁸⁰ For this period, the percentage of families living in poverty in Yazoo, Copiah, and Hinds County exceeded the statewide percentage of 15.5 percent.⁷⁸¹ Despite the high percentage of families living in poverty in those three counties, Madison County and Ranking County had the lowest percentages of families living in poverty at 7.0 percent and 5.5 percent, respectively.⁷⁸² According to 2018 FFIEC census data, 44.2 percent of families living in low-income census tracts and 26.4 percent of families living in moderate-income census tracts in the assessment were below the poverty level. After Holmes County was added to the MSA in 2019, the 2020 FFIEC census data showed little change because the percentage of families living in poverty in

low-income census tracts remained the same at 44.2 percent, and this percentage increased slightly to 26.9 percent for families living in moderate-income census tracts.

Economic Conditions

The Jackson assessment area is located in central Mississippi. Located within the assessment area is the city of Jackson, which is the state capital of Mississippi. Jackson has access to major interstates including Interstate 55, 20, and 59 as well as Highway 80 and 49.⁷⁸³ Due to the proximity of these roadways, Jackson is located within a three- to four-hour drive to major cities including Memphis, Tennessee, New Orleans, Louisiana, and Birmingham, Alabama.⁷⁸⁴ During the review period, the Jackson MSA's gross domestic product (GDP) experienced growth.⁷⁸⁵ In 2018, GDP in the MSA was \$27.7 billion and increased 1.8 percent to 28.2 billion in 2019.⁷⁸⁶ From 2019 to 2020, GDP in the MSA declined 0.3 percent to \$28.1 billion; despite this minor decrease, GDP in the MSA appeared to remain stable from 2019 to 2020.⁷⁸⁷

The Jackson MSA has a diverse economy that includes advanced manufacturing, health care, information technology, and food processing and distribution industries.⁷⁸⁸ The area has a presence of global companies that have chosen the region to make investments and create jobs; these companies include Nissan, Continental Tire, and International Paper.⁷⁸⁹ The top employers in the Jackson MSA include the University of Mississippi Medical Center (with more than 10,000 employees), followed by Jackson Public School and Nissan North America, Inc.^{790,791} Additionally, the top five occupational groups in the Jackson metropolitan area include office and administrative support, sales and related, transportation and material moving, healthcare practitioners and technical, and food preparation and serving related.⁷⁹² The highest hourly wages by occupation in the metropolitan area include management (\$45.52), followed by legal (\$38.41) and architecture and engineering (\$35.45).⁷⁹³ Overall, the area's hourly wages, at \$21.75 per hour, are 20 percent below the national average of \$27.07 per hour.⁷⁹⁴

The local economy is strengthened by Innovate Mississippi, which boosts the microenterprise eco-system by helping technology-entrepreneurs start their businesses.⁷⁹⁵ Innovate Mississippi assists entrepreneurs by working

with them to develop business strategies and connect them with the resources needed for business success.⁷⁹⁶ Furthermore, small businesses in the region can find additional resources with the Mississippi Development Authority's Minority and Small Business Development Division, which provides technical and financial assistance to minority- and women-owned businesses.⁷⁹⁷ The Mississippi Development Authority's Minority and Small Business Development Division also helps small businesses identify and compete for government contracting opportunities.⁷⁹⁸

In 2018, there were 24,375 businesses within the Jackson assessment area, 90.2 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses.⁷⁹⁹ For that year, 21.2 percent of small businesses in the assessment area were in moderate-income tracts, while there were far fewer in low-income tracts at 6.7 percent.⁸⁰⁰ In 2020, there were 24,287 businesses in the assessment area, 91.1 percent of which had total annual revenues less than or equal to \$1 million and were therefore considered to be small businesses.⁸⁰¹ For that year, 19.0 percent of small businesses were in moderate-income tracts, and 6.5 percent of small businesses were in low-income tracts.⁸⁰² The volume of loans made to small businesses in the assessment area increased year-over-year during the review period. According to an analysis of aggregate CRA loan data, there was a 3.2 percent increase in loans made to small businesses from 2018 to 2019. From 2019 to 2020, there was a 35.7 percent increase in the number of loans made to small businesses, which represents a significant increase in loan volume as compared to the period 2018 to 2019. The loan volume increase in 2020 is likely due to businesses receiving Paycheck Protection Program loans during the COVID-19 pandemic.

The COVID-19 pandemic was a significant event that brought many challenges to the economy in the assessment area and nationwide. To combat the spread of the coronavirus, shelter-in-place orders were issued in Mississippi that mandated for individuals to stay at home, except under certain circumstances; additionally, these orders caused non-essential businesses to stop business activities other than those necessary for minimum operations.⁸⁰³ As a result of these orders, some businesses in the assessment area were impacted and unable to operate at full capacity, which resulted in a decline in economic activity. In response to the decline in economic activity nationwide, the United States' Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 25, 2020; this legislation established the Paycheck Protection Program (PPP), which was implemented by the Small Business Administration (SBA), to provide loans to small businesses for payroll costs and certain other expenses.⁸⁰⁴ In the assessment area, there were 28,200 PPP loan approvals with an initial

approval amount of \$1.4 billion.⁸⁰⁵ Out of all counties in the assessment area, Hinds County had the most approvals with 12,821 loans totaling \$570.1 million.⁸⁰⁶

The assessment area experienced an increase in unemployment for each year during the review period. In 2018, the unemployment rate in the assessment area was 4.3 percent and rose to 4.9 percent in 2019. From 2018 to 2019, all counties in the assessment area had an increase in unemployment. Copeiah County had the highest level of unemployment during the period at 5.7 percent in 2018 and 6.8 percent in 2019. In 2020, unemployment in the assessment area, state of Mississippi, and nationwide collectively increased due to the impact the COVID-19 global pandemic had on the economy.⁸⁰⁷ For this year, the unemployment rate in the Jackson assessment area was 7.6 percent, which was less than the state’s unemployment rate of 8.1 percent. In 2020, Yazoo County had the highest unemployment rate at 9.7 percent, and Rankin County had the lowest unemployment rate at 5.3 percent.

Unemployment Rates - MS Jackson

*The MSA changed in 2019.

Not Seasonally Adjusted. Source: Bureau of Labor Statistics

According to 2020 census data, there were 224,361 housing units located in the assessment area, of which 58.9 percent were owner-occupied, 29.4 percent were rental units, and 11.7 percent were vacant.⁸⁰⁸ While most units were owner-occupied, a disproportionately higher percentage of housing units in low- and moderate-income tracts were rental or vacant. For 2018, before Holmes County was added to the MSA, 69.8 percent of all housing units in low-income census tracts were rental or vacant; in moderate-income census tracts, 55.5 percent of housing

units were rental or vacant.⁸⁰⁹ For 2020, when Homes County was added to the MSA, the percentage of rental and vacant housing units in low-income census tracts remained the same, but the percentage of rental and vacant housing units in moderate-income census tracts slightly decreased to 53.9 percent.⁸¹⁰ In 2018, the median age of the housing stock was 39 years, although the median age of housing was older in low-income census tracts at 54 years and 49 years in moderate-income tracts.⁸¹¹ For 2020, the median age of housing stock for low-income census tracts and the assessment area remained the same; however, the median age of housing stock in moderate-income census tracts increased to 50 years.⁸¹²

Home prices in the assessment area increased during the review period. In particular, the median sales price for residential properties in Hinds, Madison, and Rankin counties combined increased 17 percent from 2018 to 2020.⁸¹³ The median sales price for a residential property in those combined counties was \$188,000 in 2018.⁸¹⁴ In 2019, the median sales price for a residential property increased 3.2 percent to \$194,000.⁸¹⁵ During 2020, residential home prices increased again, and the median sales price for a residential property grew 13.4 percent to \$220,000.⁸¹⁶ For 2020, the strong housing activity in Hinds, Madison, and Rankin counties was driven by low mortgage interest rates and a need for many buyers to secure better housing.⁸¹⁷

Even though the housing market experienced growth during the review period, homeownership affordability is becoming a challenge in the assessment area. Using the assumption that a borrower can obtain a loan for approximately three times the borrower's annual income and using 2020 FFIEC median family income figures for the assessment area, affordable homes would be priced at \$173,697 or below.⁸¹⁸ As stated earlier, the median sales price for a residential property in Hinds, Madison, and Rankin counties (collectively) was \$220,000 in 2020.

Rent affordability is also a concern in the assessment area. According to census data, the median gross rent in the assessment area is \$799.⁸¹⁹ Out of all counties in the assessment area, Madison County has the highest median gross rent at \$898, followed by Rankin County at \$891 and Hinds County at \$771.⁸²⁰ Overall, 47.3 percent of renters in the assessment area pay greater than 30 percent of their income towards rent, which means that they are cost-burdened with rent expense.⁸²¹ Within the assessment area, 21.3 percent of households in low-income census tracts and 33.5 percent of households in moderate-income tracts are cost-burdened with rent.⁸²² Out of all counties in the assessment area, Hinds County has the largest percentage of renters who are cost-burdened at 54.4 percent, followed by Yazoo County at 41.9 percent and Madison County at 40.7 percent.⁸²³

Demographic Characteristics by Census Tract

The following tables present key demographic and business information used to help develop a performance context for the assessment area during the review period. One table reflects the 2018 FFIEC census and Dun & Bradstreet data, and the other table reflects the 2020 FFIEC census and Dun & Bradstreet data used to analyze the bank's CRA performance context. In 2019, the MSA boundary changed, and Holmes County was added to the MSA. This addition caused a minimal change in the families-by-families income distribution; as a result, this change is reflected in the Combined Demographic 2019-2020 table below. Certain components of the data in the tables are discussed in this evaluation as they apply to specific parts of the analysis.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development needs and economic landscape, individuals familiar with the community and with community development activities were contacted. These individuals discussed the various opportunities and challenges and how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

A community contact engaged in community development and affordable housing was interviewed. The contact stated that the COVID-19 pandemic negatively affected the Jackson Mississippi area, and the main challenge experienced was a shortage of workers for the service industry, like hotels and restaurants. This shortage has been caused by pandemic federal assistance that has been received by individuals who work in these industries, per the contact. Furthermore, he also explained that the housing stock in Jackson is very old and is in short supply, and there is an issue with a disruption of water flowing to these homes. The contact mentioned that the community has seen an increase in property insurance costs with homeowners incurring a 40 percent increase in the cost of homeowner insurance policies that are not related to flood insurance. Further, he explained that there is a shortage of funding for affordable housing and small business development statewide. For small businesses, start-ups are having difficulty seeking small business loans because banks think that these businesses are risky, and they are not interested in offering smaller-dollar amount loans to these businesses, per the contact. Lastly, he said that banks can be more responsive to the needs of the community by partnering with CDFIs and providing low-cost financing to these types of organizations.

A second community contact engaged in community service was interviewed. The contact stated that the COVID-19 pandemic, inflation, and job losses increased the food insecurity needs of residents in the community. Also, he stated that there is a need for more affordable housing in the South Jackson and West Jackson areas where there are a lot of low-income residents. Further, the contact explained that the population in the city is smaller than the metro area because people have moved out into the broader metropolitan areas; therefore, small businesses within the city face barriers in obtaining credit because there may not be enough people to patronize within the city. He further mentioned that there appears to be more funding for businesses going into the suburban areas because that is where a lot of new businesses are opening. He said banks have closed branches in some neighborhoods because they are becoming less desirable, and banks are opening branches in the suburban communities. Lastly, the contact noted that the public school system in Jackson is heavily underperforming, and bank can be more responsive to the community needs by providing educational support, job training programs, and financial literacy programs.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE JACKSON, MISSISSIPPI
ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending performance in the Jackson assessment area is good. The geographic distribution of loans reflects good penetration throughout the assessment area, and the distribution of loans reflects excellent penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes an adequate level of community development loans in the Jackson assessment area.

The analysis included 1,335 HMDA-reportable loans and 1,333 CRA small business loans reported by the bank in the Jackson assessment area during the review period. HMDA-reportable lending and CRA small business lending received equal weight in determining the bank's lending test rating in the assessment area. Within HMDA reportable lending, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Jackson assessment area accounted for 27.4 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Mississippi and 42.4 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 43.6 percent of Regions Bank's Mississippi deposits are in the Jackson assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects good penetration throughout the assessment area.

Home Purchase Loans

Of the 1,335 HMDA-reportable loans analyzed, 450 loans (33.7 percent) were home purchase loans. Of the total home purchase loans made, three loans (0.7 percent) were located in low-income tracts, and 25 loans (5.6 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is poor. In 2018, Regions Bank made no home purchase loans in low-income tracts (0.0 percent), while the percentage of owner-occupied units was 5.4 percent in these tracts. In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of owner-occupied units located in low-income tracts remained the same. For the period of 2019 through 2020, the bank's home purchase lending in low-income tracts (1.0 percent) was below the percentage of owner-occupied units (5.4 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank made no home purchase loans in low-income tracts (0.0 percent) and was significantly below the aggregate lending performance (0.5 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (0.8 percent) was below the aggregate lending performance (1.1 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (1.1 percent) was slightly above the aggregate lending performance (0.9 percent) in these tracts.

Home purchase lending in moderate-income tracts is adequate. In 2018, Regions Bank's home purchase lending in moderate-income tracts (6.7 percent) was below the percentage of owner-occupied units (18.4 percent) in these tracts. In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending in moderate-income tracts (5.1 percent) was below the percentage of owner-occupied units (18.1 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in moderate-income tracts (6.7 percent) was similar to the aggregate lending performance (6.5 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (5.5 percent) was slightly below the aggregate lending performance (6.9 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (4.8 percent) was slightly below the aggregate lending performance (5.6 percent) in these tracts.

Home Refinance Loans

Of the 1,335 HMDA-reportable loans analyzed, 593 loans (44.4 percent) were home refinance loans. Of the total home refinance loans made, 14 loans (2.4 percent) were located in low-income tracts, and 77 loans (13.0 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is excellent. In 2018, Regions Bank's home refinance lending in low-income tracts (2.1 percent) was below the percentage of owner-occupied units (5.4 percent) in these tracts. In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of owner-occupied units located in low-income tracts remained the same. For the period of 2019 through 2020, the bank's home refinance lending in low-income tracts (2.5 percent) was below the percentage of owner-occupied units (5.4 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in low-income tracts (2.1 percent)

was slightly above the aggregate lending performance (1.9 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (4.4 percent) was significantly above the aggregate lending performance (1.1 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (1.4 percent) was significantly above the aggregate lending performance (0.5 percent) in these tracts.

Home refinance lending in moderate-income tracts is excellent. In 2018, Regions Bank's home refinance lending in moderate-income tracts (18.5 percent) was above the percentage of owner-occupied units (18.4 percent) in these tracts. In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending in moderate-income tracts (11.2 percent) was below the percentage of owner-occupied units (18.1 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in moderate-income tracts (18.5 percent) was significantly above the aggregate lending performance (10.0 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (14.5 percent) was significantly above the aggregate lending performance (7.8 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (9.4 percent) was significantly above the aggregate lending performance (4.9 percent) in these tracts.

Home Improvement Loans

Of the 1,335 HMDA-reportable loans analyzed, 292 loans (21.9 percent) were home improvement loans. Of the total home improvement loans made, nine loans (3.1 percent) were located in low-income tracts, and 43 loans (14.7 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is poor. In 2018, Regions Bank's home improvement lending in low-income tracts (1.9 percent) was below the percentage of owner-occupied units (5.4 percent) in these tracts. In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of owner-occupied units located in low-income tracts remained the same. For the period of 2019 through 2020, the bank's home improvement lending in low-income tracts (3.7 percent) was below the percentage of owner-occupied units (5.4 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in low-income tracts (1.9 percent) was below the aggregate lending performance (3.4 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (3.5 percent) was slightly below the aggregate lending performance (4.4 percent) in these tracts. In 2020, the bank's home improvement lending in low-income tracts (4.1 percent) was slightly below the aggregate lending performance (5.5 percent) in these tracts.

Home improvement lending in moderate-income tracts is adequate. In 2018, Regions Bank's home improvement lending in moderate-income tracts (13.6 percent) was similar to the percentage of owner-occupied units (18.4 percent) in these tracts. In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending in moderate-income tracts (15.3 percent) was similar to the percentage of owner-occupied units (18.1 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in moderate-income tracts (13.6 percent) was slightly above the aggregate lending performance (11.9 percent) in these tracts. In 2019, Regions Bank's home

improvement lending in moderate-income tracts (14.8 percent) was similar to the aggregate lending performance (14.5 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (16.2 percent) was slightly below the aggregate lending performance (20.3 percent) in these tracts.

Small Business Loans

Regions Bank made 1,333 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 109 loans (8.2 percent) were located in low-income tracts, and 240 loans (18.0 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is excellent. In 2018, Regions Bank's small business lending in low-income tracts (10.8 percent) was above the percentage of businesses (6.8 percent) in these tracts. In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in low-income tracts (7.4 percent) was above the percentage of businesses (6.6 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in low-income tracts (10.8 percent) was significantly above the aggregate lending performance (5.4 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (6.3 percent) was slightly above the aggregate lending performance (5.5 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (7.9 percent) was significantly above the aggregate lending performance (5.0 percent) in these tracts.

Small business lending in moderate-income tracts is adequate. In 2018, Regions Bank's small business lending in moderate-income tracts (20.3 percent) was similar to the percentage of businesses (21.9 percent) in these tracts. In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in moderate-income tracts (17.4 percent) was similar to the percentage of businesses (19.5 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in moderate-income tracts (20.3 percent) was slightly above the aggregate lending performance (18.4 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (21.0 percent) was slightly above the aggregate lending performance (16.8 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (16.1 percent) was similar to the aggregate lending performance (16.1 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is excellent. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is good. In 2018, Regions Bank's home purchase lending to low-income borrowers (3.7 percent) was below the percentage of low-income families (23.1 percent). In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending to low-income borrowers (6.0 percent)

was below the percentage of low-income families (22.5 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to low-income borrowers (3.7 percent) was slightly below the aggregate lending performance (4.4 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (7.0 percent) was significantly above the aggregate lending performance (3.6 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (5.3 percent) was above the aggregate lending performance (4.2 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is excellent. In 2018, Regions Bank's home purchase lending to moderate-income borrowers (20.0 percent) was above the percentage of moderate-income families (16.6 percent). In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending to moderate-income borrowers (24.8 percent) was above the percentage of moderate-income families (16.3 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to moderate-income borrowers (20.0 percent) was slightly above the aggregate lending performance (17.2 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (20.3 percent) was above the aggregate lending performance (15.7 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (27.8 percent) was above the aggregate lending performance (19.0 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is excellent. In 2018, Regions Bank's home refinance lending to low-income borrowers (17.1 percent) was similar to the percentage of low-income families (23.1 percent). In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending to low-income borrowers (9.6 percent) was below the percentage of low-income families (22.5 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to low-income borrowers (17.1 percent) was significantly above the aggregate lending performance (6.6 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (10.7 percent) was significantly above the aggregate lending performance (4.1 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (9.0 percent) was significantly above the aggregate lending performance (2.2 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is excellent. In 2018, Regions Bank's home refinance lending to moderate-income borrowers (19.2 percent) was above the percentage of moderate-income families (16.6 percent). In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending to moderate-income borrowers (17.2 percent) was above the percentage of moderate-income families (16.3 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to moderate-income borrowers (19.2 percent) was significantly above the aggregate lending performance (11.5 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (22.6 percent) was significantly above the aggregate lending performance

(9.1 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (14.2 percent) was significantly above the aggregate lending performance (7.9 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is poor. In 2018, Regions Bank's home improvement lending to low-income borrowers (8.7 percent) was below the percentage of low-income families (23.1 percent). In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending to low-income borrowers (3.7 percent) was below the percentage of low-income families (22.5 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to low-income borrowers (8.7 percent) was similar to the aggregate lending performance (8.1 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (4.3 percent) was below the aggregate lending performance (8.0 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (2.7 percent) was below the aggregate lending performance (4.7 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is good. In 2018, Regions Bank's home improvement lending to moderate-income borrowers (19.4 percent) was above the percentage of moderate-income families (16.6 percent). In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending to moderate-income borrowers (20.6 percent) was above the percentage of moderate-income families (16.3 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to moderate-income borrowers (19.4 percent) was above the aggregate lending performance (13.5 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (20.9 percent) was above the aggregate lending performance (16.4 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (20.3 percent) was above the aggregate lending performance (14.2 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is excellent. In 2018, 71.7 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. By comparison, 90.2 percent of the total businesses in the assessment area were classified as small businesses. In 2019, Holmes County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, 57.9 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. During this period, 91.1 percent of the total businesses in the assessment area were classified as small businesses. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending (71.7 percent) was significantly above the aggregate's small business lending performance (41.6 percent). In 2019, the bank's small business lending to small businesses (66.8 percent) was significantly above the aggregate's small business lending performance (39.7 percent) to these businesses. In 2020, the bank's small business lending to small businesses (54.8 percent) was significantly above the aggregate's lending performance (35.3 percent) to these businesses. Lastly, 89.2 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes an adequate level of community development loans in the Jackson assessment area. During the review period, the bank originated or renewed 11 community development loans totaling \$12.3 million and 67 community development PPP loans totaling \$11.6 million. Specifically, the bank originated or renewed \$12.0 million in affordable housing initiatives; \$10.1 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; \$1.2 million to support economic development; and \$532,000 towards community services benefiting LMI individuals and families.

While the dollar volume of community development lending is below performance of peers in this area, many of the community development loans had qualitative features that were responsive to assessment area needs, including affordable housing and health care. These qualitative factors contributed to the overall adequate conclusion for this assessment area.

Some of the most impactful loans directly benefiting the assessment area include:

- Eight loans totaling \$10.6 million for new construction of apartments using LIHTCs. The loans were renewals of construction, bridge, and permanent financing in various phases of the LIHTC project. The project was designed to create 40 new units of affordable housing for low-income individuals and/or families throughout the assessment area.
- One line of credit totaling \$1.5 million was renewed for a local nonprofit. The renewal was used to allow the organization to construct new single-family homes in the assessment area.
- Two loans totaling \$251,000 were originated to a nonprofit for the purpose of creating working capital and subsequently creating mobile medical units in the assessment area. The mobile facilities are part of a network of Community Health Centers providing affordable health care options to primarily LMI individuals and families.
- One community development PPP loan was originated to a for-profit small business operating various facilities across several states in the south. Of the total loan amount, \$905,701 was allocated to the Jackson assessment area and helped retain 455 LMI workers in the area.
- Over 60 percent of the community development PPP loans in this assessment area were originated to nonprofits. This is particularly responsive given the needs of nonprofits and the unique challenges faced by nonprofits during the pandemic.

INVESTMENT TEST

Regions Bank's investment performance in the Jackson assessment area is good. The bank made a significant level of investments and contributions totaling \$36.9 million in the assessment area. The bank's investments (excluding contributions) totaled \$36.1 million, of which \$16.2 million (44.7 percent) were new investments acquired during the review period. The majority of current period investments provided financing for affordable housing through investments in LIHTC projects, which created approximately 135 units of affordable housing.

These projects were located in Holmes County, which is not in the bank's assessment area. However, Holmes County was added to the Jackson MSA during the review period, and nearly 40 percent of the county's residents commute to the Jackson assessment area for work. Therefore, these projects were determined to have a direct benefit to residents of the Jackson assessment area. The majority of investments held on the bank's balance sheet from prior review periods were also LIHTC investments. The bank also has one prior period investment in a CDFI based in Jackson that provides financial services to LMI individuals. The bank also made several investments in a regional CDFI that serves multiple states, including Mississippi, and benefited the Jackson assessment area.

Regions Bank made \$765,500 in contributions that demonstrated responsiveness to credit and community development needs in the Jackson assessment area. Specifically, the bank provided \$519,000 to organizations that provide community services targeted to low- and moderate-income individuals, \$237,000 to support affordable housing, and \$9,500 for activities that support the revitalization and stabilization of LMI communities. Overall, approximately \$102,000 in donations were responsive to the COVID-19 pandemic, providing support for organizations providing emergency and recovery assistance to LMI individuals, small businesses, and nonprofits. Notably, the bank donated \$200,000 to support a project developed by a local nonprofit organization that will combine affordable housing and healthcare services for seniors. Additionally, the bank forgave a \$100,000 investment in a local nonprofit organization, which provided additional equity to that organization. The bank also made \$912,000 in donations to organizations that benefited the entire state, including the Jackson assessment area.

SERVICE TEST

Regions Bank's service test performance in the Jackson assessment area is good.

Retail Services

Retail banking services are good in the Jackson full-scope assessment area.

The distribution of 32 branch offices and 33 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The percentage of branches in low-income tracts exceeded the percentage of households and businesses in the same geography: 9.4 percent of households and 6.6 percent of businesses were located in low-income census tracts compared to 12.5 percent of the bank's branches. The proportion of the bank's branches in moderate-income tracts also exceeded the percentage of households and businesses in the same geography: 28.1 percent of total branches were in moderate-income tracts compared to 21.9 percent of households and 19.5 percent of businesses. In 2019, Holmes County was added to the MSA; however, this change did not affect the bank's distribution of branch offices. Overall, the bank's retail delivery systems are accessible to the bank's geographies and individuals of different income levels in its assessment area.

During the review period, the bank did not open or close any branches or full-service ATMs in low- or moderate-income tracts; however, two branches and two full-service ATMs were closed in middle-income tracts. As a result, the bank's record of opening and closing of branches has not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

Community Development Services

Regions Bank provides a relatively high level of community development services in the Jackson assessment area. During the review period, Regions Bank employees engaged in 176 qualified service activities totaling 1,515 hours. The bank's service activities benefited organizations that provide affordable housing, community service, economic development, and revitalization and stabilization to low- and moderate-income individuals, geographies and small businesses in the Jackson assessment area. Of the bank's total service hours, 710 hours supported youth and adult financial education and homebuyer education at various schools and organizations. Bank employees

also provided 719 service hours serving on boards and committees of qualified organizations, as well as several hours of technical assistance to a variety of organizations that provide community services in low- and moderate-income geographies or for low- and moderate-income individuals.

Some highlighted activities in the assessment area include:

- A bank employee provided financial education to an adult class at an organization that works to disrupt poverty and empower inclusion for LMI youth and adults.
- Regions bank managers used their financial expertise to teach financial literacy to students at a historically Black university.
- A Regions Community Development Manager provided technical assistance while serving on the advisory committee of an organization dedicated to helping residents in Jackson access safe and affordable banking products and services.
- A Regions Affordable Housing Team Manager served on the board and provided technical assistance with an organization that promotes affordable housing development in the area. The organization consists of developers, bankers, and other entities that have an interest in affordable housing.

METROPOLITAN AREAS LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE MISSISSIPPI METROPOLITAN ASSESSMENT AREAS

- *Gulfport Assessment Area (Hancock, Harrison, and Jackson counties)*
 - As of December 31, 2020, Regions Bank operated nine branches in the assessment area, representing 8.4 percent of its branches in Mississippi.
 - As of June 30, 2020, the bank had \$324.2 million in deposits in this assessment area, representing a market share of 4.7 percent and 4.2 percent of Regions Bank's total deposits in Mississippi.
- *Hattiesburg Assessment Area (Forest, Lamar, and Covington (added in 2019) counties)*
 - As of December 31, 2020, Regions Bank operated eight branches in the assessment area, representing 7.5 percent of its branches in Mississippi.
 - As of June 30, 2020, the bank had \$476.7 million in deposits in this assessment area, representing a market share of 13.0 percent and 6.2 percent of Regions Bank's total deposits in Mississippi.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Gulfport	Not Consistent (Below)	Not Consistent (Below)	Consistent
Hattiesburg	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

For the lending test, Regions Bank received a rating of high satisfactory for the State of Mississippi. Performance in the both metropolitan limited-scope assessment areas was below the statewide lending test performance. For the geographic distribution of loans, lending levels were adequate in both assessment areas. Performance was good for the borrower distribution of loans in both metropolitan limited-scope assessment areas as well. Community development lending performance in limited-scope metropolitan assessment areas was as follows: the bank made a low level in Hattiesburg (\$3.1 million) and made few, if any, in Gulfport (\$256,000).

For the investment test, Regions Bank received a rating of high satisfactory for the State of Mississippi. Performance in both metropolitan limited-scope assessment areas was below the bank’s statewide investment test performance. The bank’s level of investments was poor in the two metropolitan limited-scope assessment areas.

For the service test, Regions Bank received a rating of high satisfactory for the State of Mississippi. Performance in Gulfport was consistent with the bank’s state performance while performance in the Hattiesburg assessment area was weaker than the bank’s state performance due to limited community development services and retail delivery services.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating.

**NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW**

The following assessment areas were reviewed using limited-scope examination procedures.

**DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE MISSISSIPPI NON-METROPOLITAN
ASSESSMENT AREAS**

- *Adams-Wilkinson Assessment Area (Adams County)*
 - As of December 31, 2020, Regions Bank operated three branches in the assessment area, representing 2.8 percent of its branches in Mississippi.
 - As of June 30, 2020, the bank had \$136.3 million in deposits in this assessment area, representing a market share of 20.3 percent and 1.8 percent of Regions Bank’s total deposits in Mississippi.

- *Central Mississippi Assessment Area (Atalla, Choctaw, Clay, Lauderdale, Lowndes, Montgomery, Neshoba, Newton, Oktibbeha, Webster and Winston counties)*
 - As of December 31, 2020, Regions Bank operated 20 branches in the assessment area, representing 18.7 percent of its branches in Mississippi.
 - As of June 30, 2020, the bank had \$892.3 million in deposits in this assessment area, representing a market share of 13.0 percent and 11.5 percent of Regions Bank’s total deposits in Mississippi.
- *Northern Mississippi Assessment Area (Alcorn, Benton (ADDED IN 2019), Calhoun, Chickasaw, Grenada, Lafayette, Lee, Panola, Pontotoc, Tippah, Union, and Yalobusha counties)*
 - As of December 31, 2020, Regions Bank operated 15 branches in the assessment area, representing 14.0 percent of its branches in Mississippi.
 - As of June 30, 2020, the bank had \$1.0 billion in deposits in this assessment area, representing a market share of 11.5 percent and 13.3 percent of Regions Bank’s total deposits in Mississippi.
- *Northwest Mississippi Assessment Area (Bolivar, Coahoma, Leflore, Tallahatchie, and Washington counties)*
 - As of December 31, 2020, Regions Bank operated nine branches in the assessment area, representing 8.4 percent of its branches in Mississippi.
 - As of June 30, 2020, the bank had \$556.4 million in deposits in this assessment area, representing a market share of 16.2 percent and 7.2 percent of Regions Bank’s total deposits in Mississippi.
- *Southern Mississippi Assessment Area (Jefferson Davis, Jones, Lawrence, Lincoln, Marion, Pearl River, and Pike counties)*
 - As of December 31, 2020, Regions Bank operated 10 branches in the assessment area, representing 9.3 percent of its branches in Mississippi.
 - As of June 30, 2020, the bank had \$686.6 million in deposits in this assessment area, representing a market share of 14.5 percent and 8.9 percent of Regions Bank’s total deposits in Mississippi.
- *Warren Assessment Area (Warren County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 0.9 percent of its branches in Mississippi.
 - As of June 30, 2020, the bank had \$ 262.6 million in deposits in this assessment area, representing a market share of 24.8 percent and 3.4 percent of Regions Bank’s total deposits in Mississippi.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Adams	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Central Mississippi	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Northern Mississippi	Consistent	Not Consistent (Below)	Not Consistent (Below)
Northwest Mississippi	Consistent	Consistent	Consistent
Southern Mississippi	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Warren	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Above)

For the lending test, Regions Bank received a rating of high satisfactory for the State of Mississippi. Performance in two nonmetropolitan limited-scope assessment areas was consistent with the statewide lending test performance, while performance in the remaining four nonmetropolitan limited-scope assessment areas was below the statewide performance. For the geographic distribution of loans, lending levels were good in Northern Mississippi; adequate in Central Mississippi, Northwest Mississippi, and Southern Mississippi; and poor in Adams and Warren. Performance was good for the borrower distribution of loans in five nonmetropolitan limited-scope assessment areas and adequate in Warren. Community development lending performance in limited-scope nonmetropolitan assessment areas was as follows: the bank was a leader in Northwest Mississippi (\$69.1 million) and Warren (\$15.0 million); made a relatively high level in Northern Mississippi (\$22.6 million); made a low level in Central Mississippi (\$3.2 million) and Southern Mississippi (\$1.6 million); and made few, if any, in Adams (\$37,000).

For the investment test, Regions Bank received a rating of high satisfactory for the State of Mississippi. Performance in the Northwest Mississippi nonmetropolitan assessment area was consistent with the bank's statewide investment test performance, while performance was below the statewide investment test performance in the remaining five nonmetropolitan limited scope assessment areas. The bank's level of investments was significant in the Northwest Mississippi assessment area; adequate in the Central Mississippi, Southern Mississippi, and Warren assessment areas; and poor in the Adams and Northern Mississippi assessment areas.

For the service test, Regions Bank received a rating of high satisfactory for the State of Mississippi. Performance in the Northwest Mississippi nonmetropolitan assessment area was consistent with the bank's state performance while performance in Warren was above statewide performance; performance in the Adams, Central Mississippi, Northern Mississippi, and Southern Mississippi assessment areas were weaker than the bank's state performance. Adams and Central Mississippi had limited community development services while Northern Mississippi and

Southern Mississippi had adequate community development performance. Northwest Mississippi and Warren had excellent community development service performance. Retail service performance was as follows: good in Adams, Northern Mississippi, and Warren; adequate in Central Mississippi and Southern Mississippi; and poor in Northwest Mississippi.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

Missouri

CRA RATING FOR MISSOURI: SATISFACTORY

The Lending Test is rated: Low Satisfactory

The Investment Test is rated: High Satisfactory

The Service Test is rated: Low Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes few, if any, community development loans in its Missouri assessment areas.
- The bank provides a significant level of qualified community development investments and grants in the Missouri assessment areas.
- Retail banking services are good in the bank's Missouri assessment areas.
- The bank provides an adequate level of community development services throughout the Missouri assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in Missouri:

- Springfield

Limited-scope reviews were conducted for the remaining eight assessment areas:

- Cape Girardeau
- Columbia
- Gasconade
- Jefferson City
- Lawrence
- Southeast Missouri
- St. Genevieve-Perry
- Taney

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN MISSOURI

As of June 30, 2020, Regions Bank had \$907.1 million in deposits in Missouri accounting for 0.8 percent of the bank's total deposits. Regions Bank operated 16 branch offices in Missouri as of December 31, 2020, representing 1.2 percent of the bank’s total branches. HMDA-reportable lending in Missouri accounted for 1.2 percent of total institutional HMDA-reportable lending by number of loans and 0.6 percent by dollar volume. CRA small business lending in Missouri accounted for 0.3 percent of the bank’s total CRA small business lending by number of loans and 0.2 percent by dollar volume. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was similar to the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Statewide Summary of Lending Activity
Assessment Areas Located in
Missouri

Loan Type	#	%	\$ (000s)	%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MISSOURI

Lending Test

The lending test rating in the state of Missouri is low satisfactory. Overall, performance in Missouri with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, Regions Bank makes few, if any, community development loans in Missouri.

During the review period, Regions Bank reported 1,560 HMDA-reportable loans and 269 small business loans in Missouri. The rating for Missouri is based on performance in the Springfield full-scope assessment area.

Approximately 21.6 percent of the bank's HMDA-reportable and small business lending by number of loans in Missouri occurred within this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of Missouri is derived from the Springfield full-scope assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

Regions Bank makes few, if any, community development loans in the state of Missouri. During the review period, the bank originated 12 qualifying community development loans totaling \$6.6 million benefiting its Missouri assessment areas. Most of the community development dollars were attributed to the Columbia limited-scope assessment area while performance was very poor in the Springfield full-scope assessment area, which was the primary driver in determining the state rating. Additionally, all of the community development loans made in Missouri were PPP loans, and while PPP loans were a need for part of the review period, they were not the only need. Because the bank was not considered responsive to the needs of its Missouri assessment areas, the bank's community development lending activities that occurred outside of its Missouri assessment areas were not given consideration for this evaluation. More information on community development loans can be found in the full-scope assessment area section of this report.

Investment Test

The investment test rating for Missouri is high satisfactory.

Regions Bank made a significant level of qualified investments and contributions totaling over \$14.4 million in Missouri. The bank had qualified investments of almost \$14.3 million in the Missouri assessment areas, with approximately 94.1 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$85,000. Further, the bank made \$95,000 in contributions that benefit a broader statewide area that includes the Missouri assessment areas. The donations provided support for statewide organizations providing workforce development, small business technical assistance, and community services for LMI individuals.

Springfield was the assessment area in the state reviewed using full-scope procedures. Approximately 89.1 percent of combined investment and contribution activity was in this assessment area, compared to 31.9 percent of deposits in the market as of June 30, 2021. Performance in the assessment area was good. Additional details regarding investments and contributions can be found in the full-scope assessment area section.

Service Test

The service test rating for Missouri is low satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are accessible to the bank's geographies and individuals of different income levels in the assessment areas. Overall, banking services and hours of operations do not vary in a way that inconveniences the bank's assessment areas, including low- and moderate- income geographies and/or low- and moderate-income individuals. The record of opening and closing of branch offices has generally not adversely affected the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period, the bank did not open any branch offices in Missouri. The bank closed seven branch offices throughout the state; of those closed, two were in moderate-income tracts, four in middle-income tracts, and one in an upper-income tract. Overall, the bank's retail service performance is considered good in Missouri.

Community Development Services

Regions Bank provides an adequate level of community development services that benefit low- and moderate-income residents and small businesses in Missouri. During the examination period, employees engaged in 52 qualified service activities totaling 729 hours in the Missouri assessment areas. Regions Bank provided adequate activities and service hours in the Springfield full-scope assessment area. Employees engaged in 643 hours in limited-scope assessment areas.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

METROPOLITAN AREA FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE SPRINGFIELD, MISSOURI ASSESSMENT AREA

Overview

The Springfield assessment area includes Christian and Greene counties, which are two of the five counties that make up the Springfield, MO MSA. As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 25.0 percent of the bank's total branches in the state. The Springfield assessment area accounts for 35.4 percent of the institution's total deposits statewide and 28.0 percent of the bank's total statewide HMDA-reportable and CRA small business loans (by dollar).

The Springfield assessment area is an active banking market with the presence of national, regional, and local banks. According to the FDIC Summary of Deposits Report dated June 30, 2020, Regions Bank ranked 12th out of 33 institutions in the assessment area with 2.7 percent deposit market share and \$321.2 million in deposits.⁸²⁴

⁸²⁴ "Offices and Deposits of All FDIC-Insured Institutions Deposit Market Share Report." *Federal Deposit Insurance Corporation*, 30 June 2020, <https://www7.fdic.gov/sod/sodMarketBank.asp?barItem=2>. Accessed 29 Mar. 2022.

The top financial institutions in the assessment area by deposit market share were Great Southern Bank, Commerce Bank, and Central Bank of The Ozarks.⁸²⁵

Regions Bank’s loan production accounted for less than 1.0 percent of the total CRA-reportable and HMDA-reportable lending activity in the assessment area from 2018 through 2020. During this period, HMDA-reportable lending activity in the assessment area was generally dominated by Wells Fargo Bank, U.S. Bank National Association, and Oakstar Bank. Additionally, CRA-reportable lending activity in the assessment area was generally dominated by American Express, U.S. Bank, and Chase Bank.

Population and Income Characteristics

The Springfield assessment area has seen growth since the last decennial census. According to U.S. census data, the population of the assessment area was 387,757, which is a 10.0 percent increase from the 2010 census.⁸²⁶ Both counties in the assessment area experienced population increases with Christian County having the largest percentage increase in population of 14.8 percent, followed by Greene County with an 8.6 percent increase in population.⁸²⁷ Greene County is the most populous county in the assessment area with 298,915 people.⁸²⁸ Its county seat is the city of Springfield, which has a population of 169,176.⁸²⁹ From April 1, 2010 to April 1, 2020, the city of Springfield saw a population increase of 6.1 percent,⁸³⁰ which indicates that the city is growing.

According to 2020 FFIEC census data, the assessment area contains 76 census tracts: 5 low-income tracts (6.6 percent), 19 moderate-income tracts (25.0 percent), 38 middle-income tracts (50.0 percent), 13 upper-income tracts (17.1 percent), and 1 tract with unknown income.

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper). As shown, the median family income for the Springfield, MO MSA increased from \$59,500 in 2018 to \$64,800 in 2020. Both counties in the assessment area have similar median family incomes. According to 2020 FFIEC census data, the median family income in Christian County is \$60,435, and the median family income in Greene County is \$54,576.

**Borrower Income Levels
Springfield, MO MSA**

FFIEC Estimated Median Family Income		Low 0 - 49.99%		Moderate 50% - 79.99%		Middle 80% - 119.99%		Upper 120% - & above	
2018	\$59,500	0	\$29,749	\$29,750	\$47,599	\$47,600	\$71,399	\$71,400	& above
2019	\$61,800	0	\$30,899	\$30,900	\$49,439	\$49,440	\$74,159	\$74,160	& above
2020	\$64,800	0	\$32,399	\$32,400	\$51,839	\$51,840	\$77,759	\$77,760	& above

Concerning poverty, 11.6 percent of families live below the poverty level in the assessment area.⁸³¹ Greene County has the highest percentage of families living below the poverty level at 13.0 percent, and Christian County has the lowest percentage of families living below the poverty level at 7.5 percent.⁸³² Overall, the percentage of families living in poverty in the assessment area is comparable to the statewide percentage of families living in poverty, which is 11.1 percent.⁸³³ A significant percentage of families living in low- and moderate-income census tracts are below the poverty level. Specifically, 37.8 percent of families living in low-income census tracts and 22.6 percent of families living in moderate-income census tracts are below the poverty level.⁸³⁴ The concentration of families living below the poverty level in low- and moderate-income census tracts may create challenges for lending in those tracts.

Economic Conditions

The assessment area is located in the southwestern region of Missouri and is home to the city of Springfield, which is the third largest city and metro area in the state.⁸³⁵ Springfield is known as the stainless-steel capital of the world because most of the stainless-steel tanks used in the food production and processing industry are manufactured in the area.⁸³⁶ Additionally, Springfield is known as the original birthplace of Route 66.⁸³⁷ Through the years and as traffic along Route 66 increased overtime, it eventually led to the demise of the highway, and it was replaced in 1972 by Interstate 44.⁸³⁸ In addition to Interstate 44, other current major transportation routes in the Springfield area include U.S. Routes 60, 65, and 160 as well as Missouri State Highway 13. Springfield is home to key industries including distribution and logistics, technology and innovation, corporate offices, and data centers.⁸³⁹

The Springfield region is home to several well-known companies that have a large operation presence in the area. These well-known companies include Kraft Foods, 3M, Chase Card Services, Expedia, Inc., T-Mobile, BNSF Railway, and AT&T.⁸⁴⁰ Additionally, there are other well-known companies who are headquartered in the region; these headquartered companies include Bass Pro Shops, O'Reilly Auto Parts, BKD, LLP., Springfield ReManufacturing Corp., and Jack Henry & Associates.⁸⁴¹ As of Spring 2021, the top five employers in the Springfield, Missouri region include CoxHealth (12,164 employees), Mercy Hospital Springfield (8,202 employees), Walmart, Inc. (5,381 employees), Springfield Public Schools (3,694 employees), and Bass Pro Shops (3,127 employees).⁸⁴²

According to 2020 Dun & Bradstreet information, there were 16,656 businesses in the Springfield assessment area, 91.0 percent had gross annual revenues of less than or equal to \$1 million and were therefore considered to be small businesses. In the assessment area, 24.4 percent of small businesses were located in moderate-income census tracts, while there were far fewer small businesses located in low-income census tracts at 2.6 percent.⁸⁴³ According to an analysis of CRA loan data from all reporters in the assessment area, the volume of small business loans made to small businesses has both increased and decreased during the review period. Specifically, from 2018 to 2019, loans made to small businesses increased 3.1 percent. From 2019 to 2020, the number of loans made to small businesses decreased 8.9 percent.

The COVID-19 pandemic brought challenges to the economy in the assessment area and nationwide. As the pandemic unfolded, many businesses were impacted by stay-at-home orders, which mandated that individuals should only leave their residence for essential activities. To prevent the spread of the virus, the Greene County Commission issued a stay-at-home order on March 24, 2020, which mandated that non-essential businesses and other non-essential operations cease except for operations that could be performed at employees, contractors, or agent's residences or places of rest.⁸⁴⁴ This order also defined the types of businesses considered essential that could continue to operate during the stay-at-home order.⁸⁴⁵ In response to the decline in economic activity, the United States' Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 25, 2020; this legislation established the Paycheck Protection Program (PPP), which was implemented by the Small Business Administration (SBA), to provide loans to small businesses nationwide for payroll costs and certain other expenses.⁸⁴⁶ In Greene County, there were 10,566 PPP loan approvals with an initial approval amount of \$769.1 million.⁸⁴⁷ For Christian County, there were 3,501 PPP loan approvals with an initial approval amount of \$127.5 million.⁸⁴⁸

The assessment area experienced a rise in unemployment during the review period. For 2018 and 2019, the unemployment rate in the assessment area was 2.6 and 2.7 percent, respectively. Both Greene County and Christian County had the same unemployment rates for 2018 and 2019. In 2020, unemployment in the assessment area and the state increased due to the impact that the COVID-19 pandemic had on the United States economy.⁸⁴⁹ In the assessment area, the unemployment rate for 2020 rose to 5.4 percent for Greene County and 4.9 percent for Christian County. During this year, both counties had lower unemployment rates than the state overall (6.1 percent).

Unemployment Rates - MO Springfield

According to 2020 FFIEC census data, there were approximately 160,506 housing units in the assessment area, of which 56.5 percent were owner-occupied, 35.4 percent were rental units, and 8.0 percent were vacant. Many of the housing units in low- and moderate-income tracts were either rental or vacant. Specifically, in low-income tracts, 59.2 percent of units were rental, and 12.2 percent of units were vacant.⁸⁵⁰ In moderate-income tracts, 55.0 percent of units were rental, and 11.3 percent of units were vacant.⁸⁵¹ The high percentage of rental and vacant units in low- and moderate-income tracts suggests that home purchase lending opportunities may be limited in those tracts. The median age of housing stock in the assessment area was 37 years; however, the median age of housing stock in low- and moderate-income tracts was much older at 57 years and 50 years, respectively.⁸⁵² The older housing stock in low- and moderate-income tracts indicate that there may be more lending opportunities for home refinance and home improvement in those tracts.

Housing prices in the assessment area have increased during the review period. For Greene County, the median sales price for a single-family home in 2018 was \$137,649.⁸⁵³ In 2019, the median sales price for a single-family home increased 7.2 percent to \$147,547.⁸⁵⁴ By 2020, the median sales price for a single-family home increased 11.7 percent to \$164,758.⁸⁵⁵ For Christian County, the median sales price for a single-family home also increased during the review period. In 2018, the median sales price for a single-family home was \$164,699.⁸⁵⁶ By 2019, the median sales price for a single-family home increased 7.7 percent to \$177,350.⁸⁵⁷ For 2020, the median sales price for a single-family home rose 11.1 percent to \$197,178.⁸⁵⁸

⁸⁵⁷ Ibid.

⁸⁵⁸ Ibid.

The rise in home prices in the assessment area creates affordability challenges for low- and moderate-income families. Using the assumption that a borrower can obtain a loan for approximately three times the borrower's annual income and using 2020 FFIEC median family income for Greene and Christian counties, affordable homes would be priced at \$163,728 for Greene County and \$181,305 for Christian County.⁸⁵⁹ As mentioned earlier the median sales price for a single-family home in Greene County and Christian County in 2020 was \$164,758 and \$197,178, respectively. This information indicates that home affordability in Christian County is more problematic for families living as compared to Greene County. However, the overall upward trend in home prices is a concern for home affordability in the assessment area, especially for low- and moderate-income families.

Demographic Characteristics by Census Tract

The following table presents key demographic and business information used to help develop a performance context for the assessment area. The data reflects the 2020 FFIEC census data and the 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

⁸⁵⁹ Accord to 2020 FFIEC census data, the median family income for Greene County is \$54,576, and the median family income for Christian County is \$60,435.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the community development and economic landscapes, community development professionals were contacted. These individuals discussed the various needs and opportunities across the region as well as how financial institutions can be responsive to local community development needs.

A contact involved in small business development indicated that the COVID-19 pandemic had a major impact on many businesses. The contact stated that businesses had to close during the peak of the coronavirus pandemic and are beginning to resume operations. Per the contact, businesses during the pandemic had the opportunity to apply for Paycheck Protection Program and Economic Injury Disaster Loans, and many businesses did not meet the criteria to apply for those loans; however, for the businesses that met the criteria, they needed financial assistance for business expenditures other than for payroll and utilities. Further, the contact stated that even though there are several financial institutions in the community, businesses are not getting funding needed to hire new employees and purchase inventory. These funding issues come from banks that are showing lower tolerances to lending risk due to the pandemic and are not confident in making loans due to possible inability of the business owner to repay the loan. Also, the contact mentioned that banks are less willing to make as many SBA loans, and, in many cases, banks are not funding the full loan request because of lower risk tolerances for lending and the possible inability of the business to repay the loan.

Furthermore, the contact provided information regarding the challenges small businesses are facing in the area. Specifically, the contact indicated that the largest non-financial challenges that small businesses owners face include finding employees who are willing to work, especially with school-age children (many parents are needed at home with their children because schools are virtual); being able to get applicants to accept open positions at businesses; and changing business models to reopen. The largest financial barriers facing small businesses include finding funding when banks are being risk adverse; having well documented financial and business plans; and having funds for down payment. The contact mentioned that there are opportunities for banks to assist small businesses, which include easing underwriting standards in order to be willing to take more lending risk and developing specialized small business products; building relationships and becoming a partner and a referral source with the area's nonprofits that assist small businesses; partnering with microloan intermediaries; and providing more education to low- and moderate-income business owners.

Another contact engaged in affordable housing initiatives in the Springfield area was interviewed. This contact stated that there are numerous banks in Springfield; however, there are fewer bank branches in the northside section of Springfield, which is where many low- and moderate-income individuals and families reside. Also, the contact mentioned that the lack of branches coupled with limited public and private transportation options are limiting banking access to those residents. Furthermore, the contact indicated that home mortgages, consumer loans, and small business loans were all important, but low interest and small dollar consumer loans are important to low- and moderate-income individuals because they are a viable replacement for high-cost alternatives, like payday lenders and title loans. The contact stated that there is a need for more affordable consumer loans to help low- and moderate-income homeowners maintain their properties.

Furthermore, the contact mentioned that there is a need for more affordable housing in the community. The contact stated that the city of Springfield is starting to have conversations about how to address the lack of

affordable housing. This current lack of affordable housing in the city is due to a high percentage of renters as compared to the percentage of homeowners, per the contact. During the interview, it was mentioned that the most common challenges that keep low- to moderate-income renters from becoming homeowners include past evictions, lack of personal funds to pay down payments, and up-front loan fees, negative credit histories that cause low credit scores, and student loan debt. Lastly, the contact indicated that many individuals who own their homes are not financially able to maintain the homes due to upkeep and repair costs.

The contact provided information about the opportunities for financial institutions in the area. The contact stated that there are ample nonprofit organizations in Springfield that banks can support in meeting the affordable housing needs of the community. The contacted mentioned that some of these organizations include Catholic Charities Housing Assistance Programs, the Springfield Community Land Trust, and the Community Foundation of the Ozarks. Also, the contact suggested that to help create more affordable housing stock, banks could donate foreclosed properties or raze the structures on the properties and donate the land to help create more affordable housing stock.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE SPRINGFIELD, MISSOURI ASSESSMENT AREA

LENDING TEST

Regions Bank's lending performance in the Springfield assessment area is adequate. The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes few, if any, community development loans in the Springfield assessment area.

The analysis included 279 HMDA-reportable loans and 67 CRA small business loans reported by the bank in the Springfield assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Springfield assessment area accounted for 27.5 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Missouri and 33.4 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 35.4 percent of Regions Bank's Missouri deposits are in the Springfield assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 279 HMDA-reportable loans analyzed, 105 loans (37.6 percent) were home purchase loans. Of the total home purchase loans made, two loans (1.9 percent) were located in low-income tracts, and 13 loans (12.4 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home purchase lending in low-income tracts (1.9 percent) was similar to the percentage of owner-occupied units (2.7 percent) in these tracts. In 2018, the bank's home purchase lending in low-income tracts (3.7 percent) was significantly above the aggregate lending performance (2.4 percent) in these tracts. In 2019, Regions Bank made no home purchase loans in low-income tracts (0.0 percent) and was significantly below the aggregate lending performance (2.8 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (1.9 percent) was below the aggregate lending performance (2.7 percent) in these tracts.

Home purchase lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (12.4 percent) was similar to the percentage of owner-occupied units (12.8 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (7.4 percent) was below the aggregate lending performance (11.9 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (7.7 percent) was below the aggregate lending performance (12.0 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (17.3 percent) was significantly above the aggregate lending performance (11.1 percent) in these tracts.

Home Refinance Loans

Regions Bank made 147 home refinance loans from 2018 through 2020, which represents 52.7 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, four loans (2.7 percent) were located in low-income tracts, and five loans (3.4 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's home refinance lending in low-income tracts (2.7 percent) was similar to the percentage of owner-occupied units (2.7 percent) in these tracts. In 2018, the bank's home refinance lending in low-income tracts (3.3 percent) was slightly above the aggregate lending performance (2.8 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (4.3 percent) was significantly above the aggregate lending performance (1.6 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (1.4 percent) was above the aggregate lending performance (1.0 percent) in these tracts.

Home refinance lending in moderate-income tracts is poor. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (3.4 percent) was below the percentage of owner-occupied units (12.8 percent) in these tracts. In 2018, the bank made no home refinance loans in moderate-income tracts (0.0 percent) and was significantly below the aggregate lending performance (12.2 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (2.2 percent) was significantly below the aggregate lending performance (8.2 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (5.6 percent) was similar to the aggregate lending performance (6.1 percent) in these tracts.

Home Improvement Loans

Regions Bank made 27 home improvement loans from 2018 through 2020, which represents 9.7 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, none were located in low-income tracts; however, four loans (14.8 percent) were located in moderate-income tracts.

The bank did not make any home improvement loans in low-income tracts during the period of 2018 through 2020. Additionally, the bank had only five low-income census tracts in which to find opportunities for home improvement lending. Together with the bank's overall low volume of home improvement loans during this three-year review period, home improvement lending in low-income tracts was not rated.

Home improvement lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (14.8 percent) was above the percentage of owner-occupied units (12.8 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income tracts (23.1 percent) was significantly above the aggregate lending performance (9.4 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (12.5 percent) was similar to the aggregate lending performance (13.0 percent) in these tracts. In 2020, the bank made no home improvement loans in moderate-income tracts (0.0 percent) and was significantly below the aggregate lending performance (12.5 percent) in these tracts.

Small Business Loans

Regions Bank made 67 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, one loan (1.5 percent) was located in a low-income tract, and 13 loans (19.4 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is adequate. From 2018 through 2020, Regions Bank's small business lending in low-income tracts (1.5 percent) was below the percentage of businesses (2.6 percent) in these tracts. In 2018, the bank's small business lending in low-income tracts (5.0 percent) was significantly above the aggregate lending performance (2.1 percent) in these tracts. In 2019, Regions Bank made no small business loans in low-income tracts (0.0 percent) and was significantly below the aggregate lending performance (1.9 percent) in these tracts. In 2020, the bank made no small business loans in low-income tracts (0.0 percent) and was significantly below the aggregate lending performance (2.1 percent) in these tracts.

Small business lending in moderate-income tracts is poor. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (19.4 percent) was similar to the percentage of businesses (25.8

percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (20.0 percent) was slightly below the aggregate lending performance (25.0 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (25.0 percent) was similar to the aggregate lending performance (24.6 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (14.8 percent) was below the aggregate lending performance (24.9 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (9.5 percent) was below the percentage of low-income families (19.6 percent). In 2018, the bank's home purchase lending to low-income borrowers (11.1 percent) was significantly above the aggregate lending performance (6.3 percent) to these borrowers. In 2019, Regions Bank made no home purchase loans to low-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (6.4 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (13.5 percent) was significantly above the aggregate lending performance (7.6 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is excellent. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (34.3 percent) was above the percentage of moderate-income families (18.3 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (29.6 percent) was significantly above the aggregate lending performance (17.2 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (42.3 percent) was significantly above the aggregate lending performance (18.9 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (32.7 percent) was significantly above the aggregate lending performance (21.0 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (6.8 percent) was below the percentage of low-income families (19.6 percent). In 2018, the bank's home refinance lending to low-income borrowers (6.7 percent) was slightly below the aggregate lending performance (7.8 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (8.7 percent) was above the aggregate lending performance (6.2 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (5.6 percent) was slightly above the aggregate lending performance (4.6 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (17.0 percent) was similar to the percentage of moderate-income families (18.3 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (10.0

percent) was below the aggregate lending performance (16.5 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (21.7 percent) was significantly above the aggregate lending performance (13.8 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (16.9 percent) was above the aggregate lending performance (12.7 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (7.4 percent) was below the percentage of low-income families (19.6 percent). In 2018, the bank made no home improvement loans to low-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (7.5 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (12.5 percent) was significantly above the aggregate lending performance (6.3 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (16.7 percent) was significantly above the aggregate lending performance (7.2 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (14.8 percent) was similar to the percentage of moderate-income families (18.3 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (7.7 percent) was below the aggregate lending performance (14.4 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (25.0 percent) was significantly above the aggregate lending performance (13.5 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (16.7 percent) was slightly above the aggregate lending performance (13.4 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is excellent. From 2018 through 2020, 76.1 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 91.0 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (85.0 percent) was significantly above the aggregate lending performance (46.6 percent) to these businesses. In 2019, the bank's small business lending to small businesses (85.0 percent) was significantly above the aggregate lending performance (46.1 percent) to these businesses. In 2020, the bank's small business lending to small businesses (63.0 percent) was significantly above the aggregate lending performance (34.5 percent) to these businesses. Lastly, 94.1 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes few, if any, community development loans in the Springfield assessment area. During the review period, the bank originated five community development PPP loans totaling \$270,000 solely to support economic development. While the bank's presence is limited in this area, opportunities are plentiful in this market. Additionally, Regions Bank's performance falls significantly behind performance of peers in this area.

INVESTMENT TEST

Regions Bank's investment performance in the Springfield assessment area is good. The bank made a significant level of investments and grants relative to the bank's presence in the assessment area. The bank's investments demonstrated adequate responsiveness to credit and community development needs. The bank's investments and contributions totaled \$12.8 million in the assessment area. The bank made \$12.7 million in investments (excluding contributions), of which \$12.4 million were acquired during the review period. All of the bank's investments were mortgage-backed securities that financed both affordable multifamily housing and affordable mortgages for low- and moderate-income individuals.

During the review period, the bank made contributions totaling \$52,700. Regions donated about \$26,000 in advertising to a local food bank to help solicit food donations to meet the increased need during the pandemic. The remaining donations provided support for affordable housing and community services to LMI individuals. Additionally, the bank made \$95,000 in donations to statewide organizations that benefited all of the bank's assessment areas in the state, including Springfield.

SERVICE TEST

Regions Bank's service test performance in the Springfield assessment area is adequate.

Retail Services

Retail banking services are good in the Springfield full-scope assessment area.

The distribution of four branch offices and four full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank did not have any branches in low-income tracts, compared to 5.2 percent households and 2.6 percent of businesses. However, the percentage of branches in moderate-income tracts exceeded the percentage of households and businesses in the same geography: 20.7 percent of households and 25.8 percent of businesses were located in moderate-income census tracts compared to 50.0 percent of the bank's branches. Overall, the bank's retail delivery systems are accessible to the bank's geographies and individuals of different income levels in its assessment area.

During the review period, the bank did not open or close any branch offices or full-service ATMs in low- or moderate-income census tracts. As a result, the bank's record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

2020 FFIEC Census Data, 2020 D&B Info, and 2015 ACS Data
 Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
 DTP - Drive thru only is a subset of total branches
 SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

Regions Bank provides an adequate level of community development services in the Springfield assessment area. The bank's service activities in Springfield benefited organizations that provide affordable housing and community services to low- and moderate-income individuals and communities. Of the total 8 qualified service activities, one activity was committed to financial education through partnerships with a correctional center. Of the 86 total hours, bank employees provided 34 hours of board and committee service to qualified organizations.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE MISSOURI METROPOLITAN ASSESSMENT AREAS

- *Cape Girardeau Assessment Area (Cape Girardeau County)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 12.5 percent of its branches in Missouri.
 - As of June 30, 2020, the bank had \$142.2 million in deposits in this assessment area, representing a market share of 5.7 percent and 15.7 percent of Regions Bank’s total deposits in Missouri.
- *Columbia Assessment Area (Boone County)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 12.5 percent of its branches in Missouri.
 - As of June 30, 2020, the bank had \$87.3 million in deposits in this assessment area, representing a market share of 1.8 percent and 9.6 percent of Regions Bank’s total deposits in Missouri.
- *Jefferson City Assessment Area (Callaway (REMOVED IN 20200 and Cole counties)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 6.3 percent of its branches in Missouri.
 - As of June 30, 2020, the bank had \$32.9 million in deposits in this assessment area, representing a market share of 0.8 percent and 3.6 percent of Regions Bank’s total deposits in Missouri.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Cape Girardeau	Consistent	Not Consistent (Below)	Consistent
Columbia	Consistent	Not Consistent (Below)	Not Consistent (Above)
Jefferson City	Consistent	Not Consistent (Below)	Not Consistent (Above)

For the lending test, Regions Bank received a rating of low satisfactory for the State of Missouri. Performance in all three metropolitan limited-scope assessment areas was consistent with the statewide lending test performance. For the geographic distribution of loans, lending levels were adequate in Cape Girardeau and Columbia, while performance was poor in Jefferson City. Performance was good for the borrower distribution of loans in Cape Girardeau and Jefferson City, while performance was adequate in Columbia. Community development lending performance in limited-scope metropolitan assessment areas was as follows: the bank made an adequate level in Columbia (\$5.8 million) and made few, if any, in Cape Girardeau (\$75,000) and Jefferson City (\$23,000).

For the investment test, Regions Bank received a rating of high satisfactory for the State of Missouri. The bank had a poor level of investments in all three metropolitan limited scope assessment areas, and performance was below the statewide investment test performance.

For the service test, Regions Bank received a rating of low satisfactory for the State of Missouri. Performance in the Cape Girardeau assessment area was comparable to the state while Jefferson City and Columbia were stronger than the bank's state performance primarily due to excellent community development services in Jefferson City and Columbia and good community development services Cape Girardeau. Cape Girardeau had poor retail delivery services, while retail delivery performance was good in Columbia and excellent in Jefferson City.

NONMETROPOLITAN STATEWIDE AREAS LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE MISSOURI NON-METROPOLITAN ASSESSMENT AREAS

- *Gasconade Assessment Area (Gasconade County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 6.3 percent of its branches in Missouri.
 - As of June 30, 2020, the bank had \$21.2 million in deposits in this assessment area, representing a market share of 5.4 percent and 2.3 percent of Regions Bank's total deposits in Missouri.
- *Lawrence Assessment Area (Lawrence County)*
 - As of December 31, 2020, Regions Bank operated no branches in the assessment area. One branch was closed in 2019; the last remaining branch was closed in 2020.
 - As of June 30, 2019, the bank had \$84.5 million in deposits in this assessment area, representing a market share of 16.5 percent and 9.3 percent of Regions Bank's total deposits in Missouri.
- *Southeast Assessment Area (New Madrid (REMOVED IN 2020), Scott, and Stoddard counties)*
 - As of December 31, 2020, Regions Bank operated three branches in the assessment area, representing 18.8 percent of its branches in Missouri.
 - As of June 30, 2020, the bank had \$112.2 million in deposits in this assessment area, representing a market share of 6.4 percent and 12.4 percent of Regions Bank's total deposits in Missouri.

- *St. Genevieve Perry Assessment Area (St. Genevieve and Perry counties)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 12.5 percent of its branches in Missouri.
 - As of June 30, 2020, the bank had \$66.1 million in deposits in this assessment area, representing a market share of 5.7 percent and 7.3 percent of Regions Bank’s total deposits in Missouri.
- *Taney Assessment Area (Taney County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 6.3 percent of its branches in Missouri.
 - As of June 30, 2020, the bank had \$39.6 million in deposits in this assessment area, representing a market share of 3.4 percent and 4.4 percent of Regions Bank’s total deposits in Missouri.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Gasconade	Consistent	Not Consistent (Below)	Not Consistent (Below)
Lawrence	Consistent	Not Consistent (Below)	Not Consistent (Below)
Southeast Missouri	Consistent	Not Consistent (Below)	Not Consistent (Below)
St. Genevieve Perry	Consistent	Not Consistent (Below)	Not Consistent (Below)
Taney	Consistent	Not Consistent (Below)	Not Consistent (Below)

For the lending test, Regions Bank received a rating of low satisfactory for the State of Missouri. Performance in all five nonmetropolitan limited-scope assessment areas was consistent the statewide lending test performance. For the geographic distribution of loans, lending levels were adequate in Southeast Missouri and Taney, while the performance was not rated in the other three nonmetropolitan limited-scope assessment areas due to a lack of low- or moderate-income tracts. Performance was good for the borrower distribution of loans in Southeast Missouri and St. Genevieve Perry, and the performance was adequate in the remaining three nonmetropolitan limited-scope assessment areas. Community development lending performance in limited-scope nonmetropolitan assessment areas was as follows: the bank made a low level in Taney (\$459,000) and made few, if any, in all

remaining nonmetropolitan areas including Gasconade (\$0), Lawrence (\$0), Southeast Missouri (\$3,000), and St. Genevieve-Perry (\$3,000).

For the investment test, Regions Bank received a rating of high satisfactory for the State of Missouri. Performance was below the bank's statewide investment test performance in all five nonmetropolitan limited-scope assessment areas. The level of investments was poor in Lawrence, St. Genevieve Perry, and Taney, while the bank made few, if any, investments in Southeast Missouri. For the Gasconade assessment area, the bank had a very poor level of investments due to no qualified investments or contributions reported during the review period.

For the service test, Regions Bank received a rating of low satisfactory for the State of Missouri. Performance in all five nonmetropolitan assessment areas were weaker than the bank's state performance. Lawrence, Southeast Missouri, and Taney had a limited level of community development services while the performance in Gasconade was very poor and adequate in St. Genevieve. Retail delivery services performance for the Southeast Missouri and Taney assessment areas was adequate. Due to a lack of low- and moderate-income tracts in St. Genevieve Perry, Lawrence, and Gasconade, retail delivery services were not rated.

North Carolina

CRA RATING FOR NORTH CAROLINA: SATISFACTORY

The Lending Test is rated: Low Satisfactory

The Investment Test is rated: Outstanding

The Service Test is rated: High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects poor penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes a relatively high level of community development loans in its North Carolina assessment areas.
- The bank provides an excellent level of qualified community development investments and grants that demonstrate responsiveness to community development needs of the North Carolina assessment areas.
- Retail banking services are unreasonably inaccessible to portions of the bank's North Carolina assessment areas.
- The bank provides an excellent level of community development services that benefit low- and moderate-income residents and small businesses in the North Carolina assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in North Carolina:

- Charlotte

Limited-scope reviews were conducted for the remaining two assessment areas:

- Macon
- Raleigh

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN NORTH CAROLINA

As of June 30, 2020, Regions Bank had \$761.9 million in deposits in North Carolina accounting for 0.6 percent of the bank's total deposits. Regions Bank operated seven branch offices in North Carolina as of December 31, 2020, representing 0.5 percent of the bank’s total branches. HMDA-reportable lending in North Carolina accounted for 1.0 percent of total institutional HMDA-reportable lending by number of loans and 2.3 percent by dollar volume. CRA small business lending in North Carolina accounted for 0.4 percent of the bank’s total CRA small business lending by number of loans and 0.9 percent by dollar volume. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was greater than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Statewide Summary of Lending Activity
Assessment Areas Located in
North Carolina

Loan Type	#	%	\$ (000s)	%
HMDA Home Purchase	628	37.5%	\$306,506	45.4%
HMDA Refinance	571	34.1%	\$276,217	40.9%
HMDA Home Improvement	56	3.3%	\$6,522	1.0%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NORTH CAROLINA

Lending Test

The lending test rating in the state of North Carolina is low satisfactory. Overall, performance in North Carolina with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income reflects poor penetration among customers of different income levels and businesses of different sizes. Additionally, Regions makes a relatively high level of community development loans in North Carolina.

During the review period, Regions Bank reported 1,332 HMDA-reportable loans and 342 small business loans in North Carolina. The rating for North Carolina is based on performance in the Charlotte full-scope assessment area. Approximately 62.5 percent of the bank's HMDA-reportable and small business lending by number of loans in North Carolina occurred within this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is poor. As noted above, the rating for the state of North Carolina is derived from the Charlotte full-scope assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

Regions Bank makes a relatively high level of community development loans in the state of North Carolina. During the review period, the bank originated or renewed 26 qualifying community development loans totaling \$31.3 million benefiting North Carolina assessment areas, with almost all directly benefiting the Charlotte full-scope assessment area.

The total community development lending includes one loan for \$2.0 million with a P/M/F of serving a broader statewide area that includes all the bank's assessment areas in the state. The loan was made to a business that was contracted to oversee housing recovery efforts in communities across the state impacted by Hurricane Matthew. Because the disaster declaration area overlapped with most of the bank's assessment areas in the state, the bank received positive consideration for this loan.

The bank was considered responsive to the credit and community development needs within the state of North Carolina. As a result, and in addition to the total community development lending previously noted, the bank received consideration for 31 community development loans totaling \$73.5 million that were outside any of the bank's assessment areas in the state. The most impactful of these loans included \$28.5 million for construction of affordable housing using LIHTCs. The projects were designed to create 362 new units of affordable housing for LMI individuals and/or families in Coats, Creedmoor, Hudson, La Grange, Hendersonville, and Wilmington. More information on community development loans can be found in the full-scope assessment area section of this report.

Investment Test

The investment test rating for North Carolina is outstanding.

Regions Bank made an excellent level of qualified investments and donations totaling \$20.9 million in the North Carolina assessment areas. The bank had qualified investments of \$20.5 million in the North Carolina assessment areas with approximately 48.9 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$406,800.

Charlotte was the assessment area in the state reviewed using full-scope procedures. Approximately 66.0 percent of combined investment and contribution activity was in the assessment area, compared to 68.5 percent of deposits in the market as of June 30, 2021. Performance in the assessment area was excellent.

The bank was considered responsive to community credit needs in the state. Therefore, positive consideration was given for investments that benefit a broader statewide area, without a purpose, mandate, or function of serving North Carolina's assessment areas. Specifically, the bank received consideration for investments totaling in \$40.9 million in LIHTC projects, including \$21.6 million invested during the review period. The bank also received consideration for \$4.3 million invested in mortgage-backed securities.

Additional details regarding investments and contributions can be found in the full-scope assessment area section.

Service Test

The service test rating for North Carolina is high satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are unreasonably inaccessible to portions of the bank's geographies and individuals of different income levels in the assessment areas. This evaluation was driven primarily by performance in the Charlotte full-scope assessment area. Of the total seven branches in the state, four are in the Charlotte full-scope assessment area. Of those four branches, none are located in low- or moderate-income tracts. The reasonableness of business hours and services was not rated given the lack of branches in low- and moderate-income tracts in the full-scope assessment area. During the review period, the bank opened one branch in an upper-income tract in the Charlotte assessment area and did not close any branch offices in North Carolina. The record of opening and closing of branch offices has generally not adversely affected the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. Although the bank has very few branches located in low- or moderate-income tracts, the overall retail service performance is considered adequate in North Carolina primarily due to limited presence and capacity in the state.

Community Development Services

Regions Bank provides an excellent level of community development services that benefit low- and moderate-income residents and small businesses in North Carolina. During the examination period, employees engaged in 79 qualified service activities totaling 620 hours in the North Carolina assessment areas. Performance in the Charlotte full-scope assessment area was excellent. Employees engaged in 58 qualified service hours in limited-scope assessment areas.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

**METROPOLITAN AREA
FULL-SCOPE REVIEW**

**DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE CHARLOTTE, NORTH CAROLINA
ASSESSMENT AREA**

Overview

The Charlotte assessment area consists of Mecklenburg County, one of the eleven counties that make up the Charlotte-Concord-Gastonia, NC-SC MSA. As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 57.1 percent of institution branches and 73 percent of institution deposits statewide. The assessment area accounts for 72.9 percent of the bank's combined HMDA and small business loan originations (by dollar) in North Carolina.

Regions operates in a highly competitive environment in the Charlotte assessment area with a small presence in the area. According to the June 30, 2020 FDIC Summary of Deposits Report, there were 31 financial institutions operating 232 branch locations in Mecklenburg County (the assessment area).⁸⁶⁰ Bank of America was the overwhelming leader in the Charlotte assessment area with 63.4 percent of total deposits, while Truist Bank ranked 2nd with 23.6 percent. Regions Bank ranked 10th with a deposit market share of 0.2 percent.⁸⁶¹

Regions Bank's loan production accounted for less than 1.0 percent of total CRA-reportable and HMDA-reportable lending activity in the assessment area from 2018 through 2020. Assessment area lending was dominated by a few large volume lenders, primarily Wells Fargo, Bank of America, Quicken Loans, American Express, and Truist Bank.

Population and Income Characteristics

Mecklenburg County has grown rapidly in the past several years. Population in the assessment area was approximately 1.1 million as of the 2020 census, representing an increase of 21.3 percent since 2010, which is significantly above the state (9.5 percent) and national (7.4 percent) growth levels in the same timeframe. Charlotte is the principal city for the area with a population of 874,579 and has been a significant contributor to the growth in Mecklenburg County.⁸⁶²

According to 2020 FFIEC census data, the assessment area contains 233 census tracts: 29 (12.4 percent) low-income census tracts, 50 (21.5 percent) moderate-income tracts, 52 (22.3 percent) middle-income tracts, 98 (42.1 percent) upper-income tracts, and 4 (1.7 percent) unknown-income tracts.⁸⁶³ In 2018, the assessment area's census tract income distribution was slightly different: 29 (12.4 percent) low-income tracts, 53 (22.7 percent)

⁸⁶³ FRB Atlanta calculations of 2020 FFIEC Data

moderate-income tracts, 51 (21.9 percent) middle-income tracts, 96 (41.2 percent) upper-income tracts, and 4 (1.7 percent) unknown-income tracts. For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Charlotte-Concord-Gastonia, NC-SC MSA. Note that this MSA experienced a change in 2019 with the addition of Anson County. Because Anson County has a median household income of \$39,799, its addition caused a slight reduction in the median family income for the MSA.⁸⁶⁴ As a result, the median income by which census tracts in the assessment area were classified decreased, causing some tracts to be reclassified to a higher income category. The table below provides a breakdown of the estimated median family income which qualifies for each income category (low, moderate, middle, and upper) in the MSA. Between 2018 and 2020, the FFIEC Estimated Median Family Income increased from \$71,300 to \$74,200.⁸⁶⁵

Borrower Income Levels
Charlotte-Concord-Gastonia, NC MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%		Moderate 50% - 79.99%		Middle 80% - 119.99%		Upper 120% - & above	
2018	\$71,300	0	- \$35,649	\$35,650	- \$57,039	\$57,040	- \$85,559	\$85,560	- & above
2019	\$70,700	0	- \$35,349	\$35,350	- \$56,559	\$56,560	- \$84,839	\$84,840	- & above
2020	\$74,200	0	- \$37,099	\$37,100	- \$59,359	\$59,360	- \$89,039	\$89,040	- & above

Within the assessment area, 36.6 percent of families are considered low- to moderate-income (LMI).⁸⁶⁶ Furthermore, 36.2 percent of families living in low-income tracts and 21.7 percent of families in moderate-income tracts have incomes below the poverty level, which may limit lending opportunities in these areas.⁸⁶⁷

Economic Conditions

Charlotte is recognized as the second largest banking center in the nation.⁸⁶⁸ Other leading industries in the area include professional/business services, government, logistics, utilities, and healthcare.⁸⁶⁹ The area has experienced relatively strong job growth in the last several years. Between January 2018 and December 2020, total nonfarm payrolls in the Charlotte MSA increased slightly from 1.192 million to 1.226 million,⁸⁷⁰ while total nonfarm payrolls in the United States (as a whole) decreased from 147.662 million to 142.497 million due to the COVID-19 pandemic.⁸⁷¹ Atrium Health, Wells Fargo, Charlotte-Mecklenburg Schools, Wal-Mart, Bank of America, Novant Health, American Airlines, Food Lion, Harris Teeter, Duke Energy, and Lowe’s are among the top

employers in the region.⁸⁷² As of 2021, the Charlotte area served as the headquarters for eight Fortune 500 companies, including Bank of America, Lowe's, Honeywell, Truist, Duke Energy, Nucor, Sonic Automotive, and Brighthouse Financial.⁸⁷³

Small businesses play an important role in the Charlotte metro economy. According to 2020 Dun & Bradstreet data, there were 57,758 businesses within the Charlotte assessment area, which represented a 3.7 percent increase compared to 2018.⁸⁷⁴ Of the total businesses in the assessment area, 91.3 percent had total annual revenues less than or equal to \$1 million and were therefore considered small businesses. Additionally, 15.6 percent of small businesses in the assessment area were in moderate-income tracts, while there were fewer in low-income tracts at 8.6 percent. It is worth noting that 51.9 percent of all small businesses were in upper-income census tracts.⁸⁷⁵ This distribution may present limited opportunities for lending to small businesses in LMI geographies.

Total lending to small businesses posted robust growth over the past few years in the assessment area. According to an analysis of CRA loan data, the total number of small business loans (loans less than \$1 million in principal) in the assessment area increased by 33.5 percent between 2018 and 2020, with 35,262 loans made in 2020. 42.2 percent of these loans in 2020 were made to small businesses (less than \$1 million in annual revenue), which represented a 5.8 percent decrease from 48.0 percent of such loans in 2018.

The early stages of the COVID-19 pandemic had a devastating short-term effect on the economy in the Charlotte area. On March 13, 2020, the city of Charlotte and Mecklenburg County jointly declared a state of emergency which restricted public mass gatherings and non-essential travel.⁸⁷⁶ On March 24, 2020, Mecklenburg County announced a stay-at-home order,⁸⁷⁷ and Governor Roy Cooper followed by announcing a statewide stay-at-home order on March 30, 2020.⁸⁷⁸ The state gradually began re-opening in May 2020, but the restrictions had resulted in a significant decline in economic activity and a spike in unemployment.⁸⁷⁹ In an effort to counteract these effects across the nation, the United States Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 25, 2020. This legislation established the Paycheck Protection Program (PPP), which provided fully forgivable loans to small businesses to cover payroll costs.⁸⁸⁰ In Mecklenburg County, 45,176 total

PPP loans were approved for a sum of \$3.2 billion.⁸⁸¹ Although job losses were still severe, this allowed many small businesses to keep their doors open and their workers on the payroll until economic activity picked up again.

As shown in the following chart, the unemployment rate in the assessment area improved from 2018 to 2019 but spiked in 2020 due to the economic ramifications of the COVID-19 pandemic. From 2018 to 2019, the unemployment rate for the Charlotte assessment area decreased from 3.9 percent to 3.6 percent before increasing to 7.8 percent in 2020. The unemployment rate in the assessment area was roughly at the same level as the MSA and state for 2018 and 2019 but was 0.5 percent higher than both in 2020. The urban assessment area experienced higher unemployment in 2020 because of the prevalence of the hospitality and leisure industry, which was the single industry most negatively affected by the COVID-19 pandemic.⁸⁸²

According to 2020 FFIEC census data, there were 412,598 housing units in the assessment area, 52.9 percent of which were owner-occupied, 39.1 percent of which were rental units, and 8.0 percent of which were vacant. Rental units represented a disproportionate share of housing in LMI tracts. In low-income census tracts, only 21.3 percent of housing units were owner-occupied, while 41.3 percent were owner-occupied in moderate-income tracts. This could indicate limited lending opportunities in these areas, particularly low-income tracts. The median age of the housing stock across the assessment area was 30 years, while the median age was 46 years in low-income census tracts and 40 years in moderate-income tracts.⁸⁸³

Accessed 15 March 2022.

⁸⁸³ FRB Atlanta calculations of 2020 FFIEC Data

The area's job opportunities, population growth, and record-low interest rates have contributed to a tight housing market. As of December 2020, housing inventory in Mecklenburg County (the assessment area) stood at 1,536, which was a 33.5 percent decrease from 2,309 available in January 2018.⁸⁸⁴ Meanwhile, the median days on the market for a house available for sale in Mecklenburg County decreased from 75.5 in January 2018 to 53.0 in December 2020.⁸⁸⁵ During the same time period, the median listing price in Mecklenburg County increased 7.0 percent from \$392,495 to \$419,950.⁸⁸⁶ Although inventory of existing homes available for sale has been limited, the Charlotte metro ranks 9th in the nation among metro areas for the most new residential construction activity.⁸⁸⁷

First-time homebuyers and LMI families may find it challenging to purchase homes at these prices. Under the assumption that a borrower can obtain a loan for approximately three times their annual income, affordable homes would be priced at \$222,600 or lower for the median household (using the 2020 FFIEC Estimated Median Family Income of \$74,200 as previously mentioned). The median listing price in Mecklenburg County was almost twice that level in December 2020, at \$419,950.⁸⁸⁸ These high housing prices may present a barrier to homeownership in the assessment area, especially in LMI tracts and LMI borrowers.

The rental market in the assessment area has continued to experience strong demand. Median monthly gross residential rent in Mecklenburg County stood at \$1,191 in 2019, while the average gross rent was \$1,220.⁸⁸⁹ Rents vary widely based on location, with the most expensive areas, including Eastover, Uptown Charlotte, and South End seeing average rents over \$2,000 per month.⁸⁹⁰ The rental vacancy rate stood at 7.86 percent in 2019, which was slightly higher than the state rate of 6.60 percent and the national rate of 5.97 percent.⁸⁹¹ Despite this relatively high vacancy rate, developers have continued to construct new apartment units at a rapid rate in anticipation of continued population inflows to the Charlotte area.⁸⁹²

Demographic Characteristics by Census Tract

The following tables present key demographic and business information used to help develop a performance context for the assessment area for the years 2018 - 2020. The data reflects the 2018 - 2020 FFIEC census data and 2018 - 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development and economic landscapes, individuals familiar with the community and with community development activities were contacted. These individuals discussed the various opportunities and challenges and how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

One contact engaged in economic development within the Charlotte area was interviewed. The contact mentioned that prior to the COVID-19 pandemic, Charlotte had rapid growth, which was primarily organic due to large tax incentives to attract businesses and to expand existing businesses. Per the contact, the effects of the economic expansion included:

- Increase number of larger businesses,
- Shortage of housing within the city of Charlotte,
- Increase in new construction of high-rise apartments and condominiums,
- Rise in real estate values as most properties are now selling at a premium,
- Growth of small businesses that supply services to larger companies, and
- Growth of entertainment and accommodation businesses.

The contact noted that the population and economic growth is most apparent in downtown Charlotte; however, this growth has also occurred in surrounding counties. It was highlighted that e-commerce has also been a significant driver of growth due to Amazon building its fourth largest distribution center that is located north of the Charlotte International Airport. Additionally, e-commerce activity has especially benefited the northern counties in the MSA, which has seen an increase in the development of industrial parks, per the contact.

Furthermore, the contact talked about the general banking and credit needs of the area. It was noted that there is a strong and competitive banking environment in Charlotte. The contact mentioned that there are nearly 500 bank branches in the MSA.

For small businesses, the contact discussed the challenges and needs facing those firms in the area. The contact stated that there is difficulty for businesses to start operations in the current environment because rent space is expensive. It was mentioned that landlords will not approve new business owners for leases unless the businesses owners have been approved for a loan; also, lenders will not approve loans to small businesses without seeing a commitment for business space, per the contact. The interviewee said that many small business owners are starting their businesses within their homes. Further, the contact explained that the largest barriers facing small businesses when applying for credit is the lack of personal capital to invest into the business and credit blemishes related to payment histories; it was also stated that most entrepreneurs do not understand the lending process, especially debt service ratios that lenders use when looking at financials. Lastly, he mentioned that the largest credit needs for most small businesses include small dollar business loans and better access to revolving credit.

The contact talked about the opportunities for participation by local financial institutions. It was indicated that the following opportunities are available:

- Offering SBA loan products,
- Developing in-house revolving loan products with reasonable lending caps that are raised as the business

grows, to discourage new businesses from overextending lines of credit,

- Partnering with organizations to educate new and existing businesses on how to prepare for seeking credit, and
- Making investments and donations in the area's small business loan pools and CDFIs.

A second community contact engaged in affordable housing was interviewed. In discussing the economic conditions of Charlotte, the contact said that Charlotte is a hot market and growing. She said that she has heard that around 100 net people are moving to the area each day, and there is not enough housing for this growth. Most recently, the housing inventory decreased to around two weeks, and home prices have been escalating due to this shortage of inventory, per the contact. It was stated that properties priced at \$400,000 and below are being purchased by investors, and over 30 percent of all property sales in Charlotte are being sold to investors. The contact highlighted that the percentage of property sales being purchased by investors is even higher for property prices below \$400,000. The contact stated that this is occurring a lot in African American communities, which has caused gentrification to occur.

The contact indicated that gentrification has occurred in the Charlotte area, particularly in Uptown and Crescent, which goes around most parts of the city and is where the population consists primarily of African Americans. The contact mentioned that people in these areas are getting flyers each day asking if they would like to sell their homes. Per the contact, the areas that have already gone through gentrification in Charlotte include Westover, Wesley Heights, and Hoskins.

The contact said that there were a lot of unstable renters during the pandemic. It was mentioned that she has seen issues with the government rental assistance program during the pandemic because it only lasts for 15 months, but there is still a need for rental assistance after that time. Also, the contact explained that investors have started to purchase the affordable housing stock in the area, which has caused an issue with the availability of affordable housing.

The contact stated that people are being forced to move outside of Charlotte due to the costs of housing and rent. According to the contact, "naturally occurring affordable housing" with rents below \$1,000 per month is gone in the Charlotte metro area. Lastly, the contact explained that there are mass evictions where people's rental units are being sold to investors, and those homes are being demolished for other construction.

Regarding how financial institutions can be more responsive to the affordable housing needs in Charlotte, the contact said that institutions could make larger investments in organizations similar to her firm and in programs like homeowner counseling and down payment assistance. The contact explained that one obstacle preventing greater involvement from financial institutions in meeting local credit needs is the absence of branches in African American communities. The contact noted that bank branches are being closed in areas of the city, and banks are concentrated in south Charlotte and Uptown.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE CHARLOTTE, NORTH
CAROLINA ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending performance in the Charlotte assessment area is adequate. The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans reflects poor penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes a relatively high level of community development loans in the Charlotte assessment area.

The analysis included 756 HMDA-reportable loans and 246 CRA small business loans reported by the bank in the Charlotte assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Charlotte assessment area accounted for 71.8 percent of Regions Bank's total HMDA-reportable lending by dollar volume in North Carolina and 84.1 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 73.0 percent of Regions Bank's North Carolina deposits are in the Charlotte assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 756 HMDA-reportable loans analyzed, 362 loans (47.9 percent) were home purchase loans. Of the total home purchase loans made, 22 loans (6.1 percent) were located in low-income tracts, and 35 loans (9.7 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is excellent. In 2018, Regions Bank's home purchase lending in low-income tracts (7.3 percent) was above the percentage of owner-occupied units (4.3 percent) in these tracts. In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of owner-occupied units located in low-income tracts remained the same. For the period of 2019 through 2020, the bank's home purchase lending in low-income tracts (5.6 percent) was above the percentage of owner-occupied units (4.3 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in low-income tracts (7.3 percent) was significantly above the aggregate lending performance (4.3 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (2.8 percent) was below the aggregate lending performance (4.8 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (7.6 percent) was significantly above the aggregate lending performance (4.6 percent) in these tracts.

Home purchase lending in moderate-income tracts is poor. In 2018, Regions Bank's home purchase lending in moderate-income tracts (8.3 percent) was below the percentage of owner-occupied units (17.2 percent) in these tracts. In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending in moderate-income tracts (10.2 percent) was below the percentage of owner-occupied units (16.1 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in moderate-income tracts (8.3 percent) was below the aggregate lending performance (16.3 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (11.9 percent) was slightly below the aggregate lending performance (15.5 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (8.9 percent) was below the aggregate lending performance (15.7 percent) in these tracts.

Home Refinance Loans

Of the 756 HMDA-reportable loans analyzed, 369 loans (48.8 percent) were home refinance loans. Of the total home refinance loans made, nine loans (2.4 percent) were located in low-income tracts, and 31 loans (8.4 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is poor. In 2018, Regions Bank made no home refinance loans in low-income tracts (0.0 percent), while the percentage of owner-occupied units was 4.3 percent in these tracts. In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of owner-occupied units located in low-income tracts remained the same. For the period of 2019 through 2020, the bank's home refinance lending in low-income tracts (2.6 percent) was below the percentage of owner-occupied units (4.3 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank made no home refinance loans in low-income tracts (0.0 percent) and was significantly below the aggregate lending performance (3.6 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (4.2 percent) was slightly above the aggregate lending performance (3.5 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (2.2 percent) was below the aggregate lending performance (3.1 percent) in these tracts.

Home refinance lending in moderate-income tracts is poor. In 2018, Regions Bank's home refinance lending in moderate-income tracts (7.4 percent) was below the percentage of owner-occupied units (17.2 percent) in these tracts. In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending in moderate-income tracts (8.5 percent) was below the percentage of owner-occupied units (16.1 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in moderate-income tracts (7.4 percent) was significantly below the aggregate lending performance (15.8 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (15.5 percent) was slightly above the aggregate lending performance (12.8 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (6.6 percent) was below the aggregate lending performance (11.3 percent) in these tracts.

Home Improvement Loans

Of the 756 HMDA-reportable loans analyzed, 25 loans (3.3 percent) were home improvement loans. Of the total home improvement loans made, one loan (4.0 percent) was located in a low-income tract, and one loan (4.0 percent) was located in a moderate-income tract.

Home improvement lending in low-income tracts is adequate. In 2018, Regions Bank made no home improvement loans in low-income tracts (0.0 percent), while the percentage of owner-occupied units was 4.3 percent in these tracts. In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of owner-occupied units located in low-income tracts remained the same. For the period of 2019 through 2020, the bank's home improvement lending in low-income tracts (5.9 percent) was above the percentage of owner-occupied units (4.3 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank made no home improvement loans in low-income tracts (0.0 percent) and was significantly below the aggregate lending performance (3.0 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (12.5 percent) was significantly above the aggregate lending performance (3.4 percent) in these tracts. In 2020, the bank made no home improvement loans in low-income tracts (0.0 percent) and was significantly below the aggregate lending performance (2.9 percent) in these tracts.

Home improvement lending in moderate-income tracts is poor. In 2018, Regions Bank's home improvement lending in moderate-income tracts (12.5 percent) was similar to the percentage of owner-occupied units (17.2 percent) in these tracts. In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank made no home improvement loans in moderate-income tracts (0.0 percent), while the percentage of owner-occupied units was 16.1 percent in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in moderate-income tracts (12.5 percent) was similar to the aggregate lending performance (12.9 percent) in these tracts. In 2019, Regions Bank made no home improvement loans in moderate-income tracts (0.0 percent) and was significantly below the aggregate lending performance (11.7 percent) in these tracts. In 2020, the bank made no home improvement loans in moderate-income tracts (0.0 percent) and was significantly below the aggregate lending performance (10.4 percent) in these tracts.

Small Business Loans

Regions Bank made 246 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 42 loans (17.1 percent) were located in low-income tracts, and 36 loans (14.6 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is excellent. In 2018, Regions Bank's small business lending in low-income tracts (26.3 percent) was above the percentage of businesses (8.8 percent) in these tracts. In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in low-income tracts (14.3 percent) was above the percentage of businesses (9.0 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in low-income tracts (26.3 percent) was significantly above the aggregate lending performance (9.1 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (11.8 percent) was above the aggregate lending performance (8.7 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (14.8 percent) was significantly above the aggregate lending performance (9.0 percent) in these tracts.

Small business lending in moderate-income tracts is adequate. In 2018, Regions Bank's small business lending in moderate-income tracts (10.5 percent) was below the percentage of businesses (18.1 percent) in these tracts. In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in moderate-income tracts (15.9 percent) was above the percentage of businesses (15.7 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in moderate-income tracts (10.5 percent) was below the aggregate lending performance (16.7 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (17.6 percent) was slightly above the aggregate lending performance (14.3 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (15.5 percent) was similar to the aggregate lending performance (15.0 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is poor. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is very poor. In 2018, Regions Bank made no home purchase loans to low-income borrowers (0.0 percent), yet the percentage of low-income families was 21.9 percent. In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank also made no home purchase loans to low-income borrowers (0.0 percent), yet the percentage of low-income families was 21.5 percent. Even though Regions Bank did not make any home purchase loans to low-income borrowers from 2018 through 2020, the aggregate lenders in the assessment area were able to make home purchase loans to those borrowers during that time. Specifically, the

aggregate lending performance for home purchase loans made to low-income borrowers was 4.6 percent in 2018, 3.6 percent in 2019, and 3.8 percent in 2020.

Home purchase lending to moderate-income borrowers is poor. In 2018, Regions Bank's home purchase lending to moderate-income borrowers (5.2 percent) was below the percentage of moderate-income families (15.2 percent). In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending to moderate-income borrowers (4.1 percent) was below the percentage of moderate-income families (15.1 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to moderate-income borrowers (5.2 percent) was significantly below the aggregate lending performance (16.2 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (3.7 percent) was significantly below the aggregate lending performance (15.1 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (4.5 percent) was significantly below the aggregate lending performance (15.8 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is poor. In 2018, Regions Bank made no home refinance loans to low-income borrowers (0.0 percent), yet the percentage of low-income families was 21.9 percent. In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending to low-income borrowers (0.6 percent) was below the percentage of low-income families (21.5 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank made no home refinance loans to low-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (7.9 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (1.4 percent) was significantly below the aggregate lending performance (4.3 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (0.4 percent) was significantly below the aggregate lending performance (2.8 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is poor. In 2018, Regions Bank's home refinance lending to moderate-income borrowers (3.7 percent) was below the percentage of moderate-income families (15.2 percent). In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending to moderate-income borrowers (3.2 percent) was below the percentage of moderate-income families (15.1 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to moderate-income borrowers (3.7 percent) was significantly below the aggregate lending performance (15.9 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (4.2 percent) was significantly below the aggregate lending performance (11.0 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (3.0 percent) was significantly below the aggregate lending performance (9.2 percent) to these borrowers.

Home Improvement Loans

The bank did not make any home improvement loans in low-income tracts during the period of 2018 through 2020. Together with the bank's overall low volume of home improvement loans during this three-year review period, home improvement lending in low-income tracts was not rated

Home improvement lending to moderate-income borrowers is poor. In 2018, Regions Bank's home improvement lending to moderate-income borrowers (12.5 percent) was similar to the percentage of moderate-income families (15.2 percent). In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending to moderate-income borrowers (5.9 percent) was below the percentage of moderate-income families (15.1 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to moderate-income borrowers (12.5 percent) was above the aggregate lending performance (9.5 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (12.5 percent) was slightly above the aggregate lending performance (10.8 percent) to these borrowers. In 2020, the bank made no home improvement loans to moderate-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (9.2 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate. In 2018, 43.9 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. By comparison, 90.3 percent of the total businesses in the assessment area were classified as small businesses. In 2019, Anson County was added to the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, 47.1 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. During this period, 91.3 percent of the total businesses in the assessment area were classified as small businesses. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending (43.9 percent) was similar to the aggregate's small business lending performance (46.1 percent). In 2019, the bank's small business lending to small businesses (55.9 percent) was slightly above the aggregate's small business lending performance (47.5 percent) to these businesses. In 2020, the bank's small business lending to small businesses (45.2 percent) was slightly above the aggregate's lending performance (40.8 percent) to these businesses. Lastly, 69.9 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes a relatively high level of community development loans in the Charlotte assessment area. During the review period, the bank originated or renewed six community development loans totaling \$13.5 million and ten community development PPP loans totaling \$7.5 million. Specifically, the bank originated or renewed \$11.1 million to support economic development, primarily through the SBA 504 program; \$5.8 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; and \$4.1 million in affordable housing initiatives.

The bank's performance by number and dollar of loans is similar to peer performance in this area, given the bank's limited presence and high level of competition. The most impactful loans include:

- One loan for \$4.1 million for new construction of apartments using LIHTCs. The project was designed to create 151 new units of affordable housing for low-income individuals and/or families throughout the assessment area.
- Two community development PPP loans totaling \$19,000 to a nonprofit supporting crisis management, mental health, and training to frontline essential staff, including police, fire, and healthcare workers. Given the unique challenges of the pandemic on frontline staff, continued support to organizations serving them was particularly responsive.

INVESTMENT TEST

Regions Bank's investment performance in the Charlotte assessment area is excellent. The bank made an excellent level of investments and grants relative to its presence and the level of competition in the assessment area. The bank's investments demonstrated responsiveness to several credit and community development needs. Combined investment and contribution activity inside the assessment area totaled \$13.8 million of which approximately 65 percent was obtained during the review period. During the review period, the bank made one investment in a LIHTC project for \$7.4 million that provided 150 units of affordable housing. The bank's remaining current period investments and the majority of prior period investments were mortgage-backed securities that financed affordable multifamily housing and affordable mortgages for LMI homeowners.

During the review period, the bank made contributions totaling \$311,500. Specifically, the bank provided \$271,000 to organizations that provide community services targeted to low- and moderate-income individuals, \$40,000 for affordable housing, and \$500 for economic development. Overall, approximately \$80,000 in donations were responsive to the COVID-19 pandemic, providing support for organizations offering emergency and recovery assistance to LMI individuals, small businesses, and nonprofits. Notably, the bank provided financial support to an HBCU that serves a majority of students receiving Pell grants, to help facilitate remote learning for students during the COVID pandemic. The bank also provided support to several organizations focused on workforce development for LMI individuals, as well as organizations working to address food insecurity and to provide access to affordable childcare.

SERVICE TEST

Regions Bank's service test performance in the Charlotte full-scope assessment area is good.

Retail Services

Overall, Regions Bank's retail banking services are poor in the Charlotte full-scope assessment area.

The bank had no branches or full-service ATMs in low- or moderate-income tracts as of December 31, 2020. With only four branches in this highly competitive assessment area, the bank does not have a large presence in

Charlotte. In 2018, two of the branch offices were in middle-income tracts and two were in upper income-tracts. The addition of Anson County to the MSA in 2019 affected income statistics and classifications for the MSA. Consequently, a census tract containing one of the bank’s branch offices was reclassified from a middle-income tract to an upper-income tract. The bank’s branch distribution relative to available demographic information may limit accessibility to portions of the bank’s geographies and individuals of different income levels and may therefore be considered unreasonably inaccessible. The reasonableness of business hours and services was not evaluated due to the limited number of branches in low- and moderate-income tracts.

During the review period, Regions Bank opened one branch and full-service ATM in an upper-income tract in the assessment area. Overall, the bank’s record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area.

Community Development Services

Regions Bank provides an excellent level of community development services in the Charlotte assessment area. During the review period, Regions Bank employees engaged in 73 qualified service activities totaling 562 hours. The bank’s service activities benefited organizations that provide affordable housing, community services, and economic development to low- and moderate-income individuals, geographies, and small businesses in the Charlotte assessment area. Of the bank’s total service hours, 67 hours supported financial education and homebuyer classes for LMI adults and youth through partnerships with a variety of schools and businesses. The bank also demonstrated community leadership and engagement by providing 318 hours (56.6 percent of total service hours) on boards and committees for various qualified nonprofit organizations.

Highlighted below are examples of community development activities undertaken during the review period:

- Regions associates provided technical assistance and financial education classes to students at a historically Black university, where the majority of students have low or moderate incomes. Classes included workforce development content and financial literacy.
- Several Regions employees provided technical assistance and other services to the United Way of Central Carolinas, Inc. A Regions capital relationships manager served on the board of directors for an organization that provides preventive healthcare services for uninsured low- to moderate-income persons.
- Regions associates provided 71 hours of technical assistance with an organization that addresses hunger needs and food insecurity for local residents.

Given the bank’s capacity and branch network in the assessment area, the bank demonstrated excellent responsiveness to community development needs in the Charlotte assessment area.

**METROPOLITAN AREA
LIMITED-SCOPE REVIEW**

The following assessment area was reviewed using limited-scope examination procedures.

**DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE NORTH CAROLINA
METROPOLITAN ASSESSMENT AREA**

- *Raleigh Assessment Area (Wake County)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 28.6 percent of its branches in North Carolina.
 - As of June 30, 2020, the bank had \$145.3 million in deposits in this assessment area, representing a market share of 0.5 percent and 19.1 percent of Regions Bank’s total deposits in North Carolina.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, the assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding this area.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Raleigh	Consistent	Consistent	Not Consistent (Below)

For the lending test, Regions Bank received a rating of low satisfactory for the State of North Carolina. Performance in Raleigh, the lone metropolitan limited-scope assessment area, was consistent with the statewide lending test performance. For the geographic distribution of loans, lending levels were adequate, and performance was poor for the borrower distribution of loans. The bank was a leader in making community development loans in the limited-scope metropolitan area. During the review period, the bank made \$8.4 million in community development loans within the Raleigh assessment area.

For the investment test, Regions Bank received a rating of outstanding for the State of North Carolina. The bank had an excellent level of investments in the Raleigh metropolitan limited-scope assessment area, and performance was consistent with the statewide investment test performance.

For the service test, Regions Bank received a rating of high satisfactory for the State of North Carolina. Performance in the Raleigh metropolitan assessment area was weaker than the bank's state performance due to a limited level of community development services.

The performance in the metropolitan limited-scope assessment area did not affect the overall state rating.

**NONMETROPOLITAN STATEWIDE AREAS
 LIMITED-SCOPE REVIEW**

The following assessment area was reviewed using limited-scope examination procedures

DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE NORTH CAROLINA NON-METROPOLITAN ASSESSMENT AREA

- *Macon Assessment Area (Macon County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 14.3 percent of its branches in North Carolina.
 - As of June 30, 2020, the bank had \$60.7 million in deposits in this assessment area, representing a market share of 2.8 percent and 8.0 percent of Regions Bank’s total deposits in North Carolina.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TEST

Through the use of available facts and data, including performance and demographic information, the assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding this area.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Macon	Consistent	Not Consistent (Below)	Not Consistent (Below)

For the lending test, Regions Bank received a rating of low satisfactory for the State of North Carolina. Performance in Macon, the lone nonmetropolitan limited-scope assessment area, was consistent with the statewide lending test performance. For the geographic distribution of loans, lending levels were not rated due to lack of low- and moderate-income tracts in the assessment area; however, performance was adequate for the borrower distribution of loans. The bank made no community development loans in the limited-scope nonmetropolitan area.

For the investment test, Regions Bank received a rating of outstanding for the State of North Carolina. The bank had a poor level of investments in the Macon nonmetropolitan limited-scope assessment area, and performance was weaker than the statewide investment test performance.

For the service test, Regions Bank received a rating of high satisfactory for the State of North Carolina. Performance in the Macon nonmetropolitan assessment area was weaker than the bank's state performance because the bank provided few, if any, community development services. The Macon nonmetropolitan assessment area does not have any low- or moderate-income tracts; therefore, the retail delivery performance was not rated for this assessment area. The performance in the nonmetropolitan limited-scope assessment area did not affect the overall state rating.

South Carolina

CRA RATING FOR SOUTH CAROLINA: SATISFACTORY

The Lending Test is rated: **High Satisfactory**

The Investment Test is rated: **Outstanding**

The Service Test is rated: **Needs to Improve**

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects excellent penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank makes an adequate level of community development loans in its South Carolina assessment areas.
- The bank provides an excellent level of qualified community development investments and grants that demonstrate responsiveness to community development needs of the South Carolina assessment areas.
- Retail banking services are adequate in the bank's South Carolina assessment areas.
- The bank provides a limited level of community development services that benefit residents and small businesses in the South Carolina assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in South Carolina:

- Hilton Head Island-Bluffton-Beaufort

Limited-scope reviews were conducted for the remaining six assessment areas:

- Barnwell
- Charleston
- Columbia
- Greenville
- Hampton
- Spartanburg

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN SOUTH CAROLINA

As of June 30, 2020, Regions Bank had \$829.0 million in deposits in South Carolina accounting for 0.7 percent of the bank's total deposits. Regions Bank operated 17 branch offices in South Carolina as of December 31, 2020, representing 1.2 percent of the bank’s total branches. HMDA-reportable lending in South Carolina accounted for 1.8 percent of total institutional HMDA-reportable lending by number of loans and 2.6 percent by dollar volume. CRA small business lending in South Carolina accounted for 1.1 percent of the bank’s total CRA small business lending by number of loans and 1.5 percent by dollar volume. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was greater than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Statewide Summary of Lending Activity

**Assessment Areas Located in
South Carolina**

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN SOUTH CAROLINA

Lending Test

The lending test rating in the state of South Carolina is high satisfactory. Overall, performance in South Carolina with regard to the geographic distribution of loans reflects excellent penetration throughout the assessment areas. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, the bank makes an adequate level of community development loans in South Carolina.

During the review period, Regions Bank reported 2,462 HMDA-reportable loans and 1,009 small business loans in South Carolina. The rating for South Carolina is based on performance in the Hilton Head Island-Bluffton-Beaufort full-scope assessment area. Approximately 15.4 percent of the bank's HMDA-reportable and small business lending by number of loans in South Carolina occurred within this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is excellent, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of South Carolina is derived from the Hilton Head Island-Bluffton-Beaufort full-scope assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

Regions Bank makes an adequate level of community development loans in the state of South Carolina. During the review period, the bank originated or renewed 53 qualifying community development loans totaling \$55.2 million benefiting its South Carolina assessment areas. Performance in the Hilton Head full-scope assessment area was adequate, which was the key driver for determining the state rating.

The total community development lending includes four loans totaling \$5.3 million with a P/M/F of serving a broader statewide area that includes all of the bank's assessment areas in the state. All of these were impactful loans, as noted below:

- A \$2.0 million loan made to a business that was contracted to oversee housing recovery efforts in communities across the state impacted by Hurricane Matthew. Because the disaster declaration area overlapped with most of the bank's assessment areas in the state, the bank received positive consideration for this loan.
- Three loans totaling \$3.3 million to statewide CDFIs focused on small businesses. The loans were originated in an effort to provide loans, create new jobs, and retain payroll for small businesses throughout the state.

The bank was considered responsive to the credit and community development needs within the state of South Carolina. As a result, and in addition to the total community development lending previously noted, the bank received positive consideration for 11 community development loans totaling \$10.6 million that were outside any of the bank's assessment areas in the state. More information on community development loans can be found in the full-scope assessment area section of this report.

Investment Test

The investment test rating for South Carolina is outstanding.

Regions Bank made an excellent level of qualified investments and donations totaling nearly \$64.0 million in the South Carolina assessment areas. The bank had qualified investments of \$63.7 million in the South Carolina assessment areas with approximately 86.4 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$231,300. Further, the bank made \$17,500 in contributions that benefit a broader statewide area, including all of the South Carolina assessment areas.

Hilton Head was the assessment area in the state reviewed using full-scope procedures. Approximately 34.8 percent of combined investment and contribution activity was in this assessment area, compared to 25.6 percent of deposits in the market as of June 30, 2021. Performance in the assessment area was excellent.

The bank was considered responsive to community credit needs in the state. Therefore, the bank also received positive consideration for a \$26,000 contribution to a food bank in South Carolina that did not have a purpose, mandate, or function of serving the South Carolina assessment areas.

Additional details regarding investments and contributions can be found in the full-scope assessment area section.

Service Test

The service test rating for South Carolina is needs to improve.

Retail Services

Delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas. This evaluation was driven primarily by performance in the Hilton Head Island full-scope assessment area. Overall, banking services and hours of operations do not vary in a way that inconveniences the bank's assessment areas, including low- and moderate-income geographies or low- and moderate-income individuals. The record of opening and closing of branch offices has generally not adversely affected the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period, the bank did not open any branch offices in South Carolina. The bank closed two branch offices throughout the state: one in a middle-income tract and one in an upper-income tract. Overall, the bank's retail service performance is considered adequate in South Carolina.

Community Development Services

Regions Bank provides a limited level of community development services that benefit residents and small businesses in South Carolina. As noted, this evaluation was driven primarily by performance in the Hilton Head Island full-scope assessment area. The bank's community development performance in the Hilton Head full-scope assessment area was poor. During the examination period, employees engaged in 38 qualified service activities

totaling 312 hours in the South Carolina assessment areas. Of the 312 hours, 275 were in the limited-scope assessment areas.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

METROPOLITAN AREA FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE HILTON HEAD, SOUTH CAROLINA ASSESSMENT AREA

Overview

The Hilton Head Island-Bluffton-Beaufort assessment area consists of Beaufort County and Jasper County, which are the two counties that comprise the Hilton Head Island-Bluffton-Beaufort, SC MSA. As of December 31, 2020, Regions Bank operated five branches in the assessment area, representing 29.4 percent of institution branches and 23.5 percent of institution deposits statewide. The assessment area accounts for 9.6 percent of the bank's combined HMDA and small business loan originations (by dollar) in South Carolina.

Regions operates in a highly competitive environment in the Hilton Head Island assessment area. According to the June 30, 2020 FDIC Summary of Deposits Report, there were 20 financial institutions operating 61 total branch locations in the assessment area.⁸⁹³ Wells Fargo Bank was the leader in the assessment area with 16.4 percent of total deposits, while South State Bank ranked 2nd with 15.1 percent. Regions Bank ranked 8th with a deposit market share of 3.7 percent.⁸⁹⁴

Regions Bank's loan production accounted for less than 2.0 percent of total CRA-reportable lending activity and less than 1.0 percent of HMDA-reportable lending activity in the assessment area from 2018 through 2020. The bank's HMDA market share was 0.9 percent in 2018, 0.7 percent in 2019, and 0.6 percent in 2020. The bank's CRA market share was 1.2 percent in 2018, 0.8 percent in 2019, and 2.4 percent in 2020. Leading CRA lenders in the assessment area included American Express, Wells Fargo Bank, and Bank of America, while leading HMDA lenders included Wells Fargo Bank, Mortgage Network, and Quicken Loans.

Population and Income Characteristics

The assessment area has experienced significant population growth in the past several years. Population in the assessment area was approximately 216,000 as of the 2020 Census, representing an increase of 15.5 percent since 2010, which was significantly above the state (10.7 percent) and national (7.4 percent) growth levels in

⁸⁹³ "Offices and Deposits of All FDIC-Insured Institutions Deposit Market Share Report." *Federal Deposit Insurance Corporation*, 30 June 2020, <https://www7.fdic.gov/sod/sodMarketRpt.asp?barItem=2>. Accessed 1 April 2022.

⁸⁹⁴ Ibid.

the same timeframe.⁸⁹⁵ Beaufort County comprised 86.7 percent of the assessment area’s population as of 2020, while Jasper County comprised the other 13.3 percent.⁸⁹⁶

According to 2020 FFIEC census data, the assessment area contains 46 census tracts: 0 (0.0 percent) low- income tracts, 15 (32.6 percent) moderate-income tracts, 16 (34.8 percent) middle-income tracts, 13 (28.3 percent) upper-income tracts, and 2 (4.3 percent) unknown-income tracts.⁸⁹⁷ For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Hilton Head Island-Bluffton-Beaufort, SC MSA. The table below provides a breakdown of the estimated median family income which qualifies for each income category (low, moderate, middle, and upper) in the MSA. Between 2018 and 2020, the FFIEC Estimated Median Family Income increased from \$70,600 to \$74,700.⁸⁹⁸

Borrower Income Levels
Hilton Head Island-Bluffton-Beaufort, SC MSA

FFIEC Estimated Median Family Income		Low		Moderate		Middle		Upper	
		0	- 49.99%	50%	- 79.99%	80%	- 119.99%	120%	- & above
2018	\$70,600	0	- \$35,299	\$35,300	- \$56,479	\$56,480	- \$84,719	\$84,720	- & above
2019	\$78,000	0	- \$38,999	\$39,000	- \$62,399	\$62,400	- \$93,599	\$93,600	- & above
2020	\$74,700	0	- \$37,349	\$37,350	- \$59,759	\$59,760	- \$89,639	\$89,640	- & above

Within the assessment area, 39.6 percent of families are considered low- to moderate-income (LMI).⁸⁹⁹ While there are no low-income census tracts in the assessment area, 17.9 percent of families living in moderate-income census tracts have incomes below the poverty level.⁹⁰⁰ In fact, 56.6 percent of families in the assessment area with incomes below poverty level live in moderate-income census tracts, even though moderate-income tracts comprise only 32.6 percent of total census tracts. This prevalence of poverty l in moderate-income tracts may limit lending opportunities in these tracts.

Economic Conditions

The assessment area is a popular vacation destination and hosts approximately 2.5 million tourists per year.⁹⁰¹ As such, the leading industries for employment in the assessment area are accommodation/food services and retail trade, both of which serve the vast number of tourists visiting the area.⁹⁰² The assessment area experienced modest job growth during the review period, with total nonfarm payrolls increasing from 78.7 thousand to 80.8 thousand

between January 2018 and December 2020.⁹⁰³ For context, total nonfarm payrolls in the United States (as a whole) decreased from 147.662 million to 142.497 million in the same timeframe.⁹⁰⁴ The largest employers in the assessment area include the Beaufort County School District, Beaufort Memorial Hospital, CareCore National Group LLC, Charles Lea Center Leasing Company, and Coastal States Automotive Group.⁹⁰⁵

Small businesses play an important role in the Hilton Head Island-Bluffton-Beaufort assessment area. According to 2020 Dun & Bradstreet data, there were 11,788 businesses within the assessment area.⁹⁰⁶ Of the total businesses in the assessment area, 92.9 percent had total annual revenues less than or equal to \$1 million and were therefore considered small businesses. 24.8 percent of the small businesses were in moderate-income census tracts, 49.5 percent of the small businesses were in middle-income census tracts, and 25.7 percent of the small businesses were in upper-income census tracts.⁹⁰⁷ As previously mentioned, the assessment area has no low-income census tracts. This distribution may present limited opportunities for lending to small businesses in moderate-income geographies.

Total lending to small businesses posted strong growth over the past few years in the assessment area. According to an analysis of CRA loan data, the total number of small business loans (loans less than \$1 million in principal) originated in the assessment area increased by 20.1 percent between 2018 and 2020, with 6,047 loans made in 2020. 42.8 percent of these loans in 2020 were made to small businesses (less than \$1 million in annual revenue), which represented a 5.5 percent decrease from 48.3 percent of such loans in 2018.

The early stages of the COVID-19 pandemic resulted in an economic slowdown across the state of South Carolina, including the assessment area. On March 17, 2020, Governor Henry McMaster issued an executive order shutting down dine-in services at restaurants and bars in the state of South Carolina.⁹⁰⁸ On April 3, 2020, Governor McMaster ordered that all non-essential businesses be temporarily closed.⁹⁰⁹ On April 6, 2020, Governor McMaster issued a statewide “home or work” order that mandated South Carolinians to stay at home except when commuting to work or accessing essential services.⁹¹⁰ In early May 2020, Governor McMaster lifted the “home

Accessed 5 April 2022.

or work” order and began the phased re-opening of non-essential businesses.⁹¹¹ To counteract the effects of the pandemic and resulting restrictions on economic activity across the nation, the United States Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act on March 25, 2020. This legislation established the Paycheck Protection Program (PPP), which provided fully forgivable loans to small businesses to cover payroll costs.⁹¹² In the assessment area, 7,097 total PPP loans were approved for a sum of \$436.9 million.⁹¹³

As shown in the following chart, the unemployment rate in the assessment area decreased from 2018 to 2019 but increased in 2020 due to the economic ramifications of the COVID-19 pandemic. From 2018 to 2019, the unemployment rate for the assessment area decreased from 3.2 percent to 2.6 percent before increasing to 5.4 percent in 2020. The unemployment rate for the assessment area compared favorably to the state of South Carolina throughout the entire review period of 2018 to 2020. Although the COVID-19 pandemic increased the unemployment rate in the assessment area, the effect was not as extreme as seen in many other MSAs, especially other MSAs with tourism-centric economies. This was because during the pandemic, many Americans continued to vacation. However, to make their travel as safe as possible, they increasingly took outdoor-focused vacations in less crowded areas.⁹¹⁴ The assessment area, with its beaches and low-density accommodations, fit this bill perfectly. Thus, the assessment area continued to experience relatively strong travel demand throughout the pandemic, resulting in a comparatively strong labor market.

According to 2020 FFIEC Census data, there were 104,587 housing units in the assessment area, 50.3 percent of which were owner-occupied, 21.5 percent of which were rental units, and 28.2 percent of which were vacant. Note that the assessment area (Hilton Head Island in particular) is a popular vacation home location, which explains the high vacancy rate, as owners may only be in their vacation home several weeks during the year.⁹¹⁵ The assessment area has no low-income census tracts, but in moderate-income census tracts, only 30.5 percent of housing units were rental, while the rest were owner-occupied or vacant. As a result, mortgage lending opportunities in LMI geographies within the assessment area exist.

Population growth, low interest rates, and demand from affluent individuals looking for vacation homes have contributed to a tight housing market in the assessment area. Between January 2018 and December 2020, median days on the market decreased from 125 days to 73 days.⁹¹⁶ Meanwhile, active listings on the market decreased 54.2 percent, from 2,755 to 1,262.⁹¹⁷ In the same timeframe, the median listing price in the assessment area increased 4.2 percent, from \$399,000 to \$415,750.⁹¹⁸

In this environment, first-time homebuyers and low- and moderate-income (LMI) income families may find it difficult to purchase homes. Using the assumption that a borrower can obtain a loan for approximately three times their annual income, affordable homes would be priced at \$179,277 or below for moderate-income families and \$112,047 for low-income families in the assessment area in 2020. The median listing price in the assessment area was far above those levels in December 2020, at \$415,750.⁹¹⁹ Current housing prices and conditions may present barriers to homeownership in the assessment area, especially among LMI borrowers.

Demographic Characteristics by Census Tract

The following table presents key demographic and business information used to help develop a performance context for the assessment area. The data reflects the 2020 FFIEC census data and 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development and economic landscapes, individuals familiar with the community and with community development activities were contacted. These individuals discussed the various opportunities and challenges in the region and how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

According to a community contact involved in small business development, the Hilton Head assessment area is experiencing rapid growth. There have been significant population inflows, with new residents being on average older and more affluent. The resulting strong demand for goods and services has been a boon for small businesses in the area. The contact mentioned that the early days of the pandemic were a challenge for the small business community. However, most businesses in the area survived and are now doing quite well. The contact mentioned that financial institutions appear to be meeting the credit needs of the businesses in the area. In order to enhance responsiveness, the contact encouraged banks to focus on relationships, community involvement, and not losing the “hometown feel.”

A second community contact involved in affordable housing also highlighted the rapid growth in the assessment area. The inflow of more affluent individuals has drastically driven up the price for housing in the area. As a result, many low- and moderate-income residents have been displaced. The contact mentioned that there are several local affordable housing construction projects in the works, which should present opportunity for financial institution involvement. Finally, the contact mentioned that banks could be more responsive to the needs of low- and moderate-income individuals by making affordable housing construction loans on favorable terms and by financing Section 8 Homeownership Voucher loans for low- and moderate-income homebuyers.

Based on information shared by the community contacts, there are opportunities in the assessment area for banks to support small businesses and affordable housing needs through lending, investments, and services.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE HILTON HEAD, SOUTH CAROLINA ASSESSMENT AREA

LENDING TEST

Regions Bank's lending performance in the Hilton Head Island-Bluffton-Beaufort assessment area is good. The geographic distribution of loans reflects excellent penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank makes an adequate level of community development loans in the Hilton Head assessment area.

The analysis included 261 CRA small business loans and 227 HMDA-reportable loans reported by the bank in the Hilton Head Island-Bluffton-Beaufort assessment area during the review period. Therefore, CRA small business lending received slightly greater weight in determining the bank's lending test rating in the assessment area. Within HMDA-reportable lending, greater weight was assigned to home purchase loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Hilton Head Island-Bluffton-Beaufort assessment area accounted for 9.1 percent of Regions Bank's total HMDA-reportable lending by dollar volume in South Carolina and 12.3 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 23.5 percent of Regions Bank's South Carolina deposits are in the Hilton Head Island-Bluffton-Beaufort assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance.

For this assessment area, there were no low-income tracts during the period 2018 through 2020. As a result, examiners did not rate performance in low-income tracts for each product but instead evaluated the bank's performance in moderate-income tracts. Considering all of these factors, Regions Bank's geographic distribution of loans reflects excellent penetration throughout the assessment area.

Home Purchase Loans

Of the 227 HMDA-reportable loans analyzed, 94 loans (41.4 percent) were home purchase loans. Of the total home purchase loans made, 18 loans (19.1 percent) were located in moderate-income tracts.

Home purchase lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (19.1 percent) was similar to the percentage of owner-occupied units (27.1 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (17.1 percent) was similar to the aggregate lending performance (18.0 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (17.2 percent) was slightly below the aggregate lending performance (20.2 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (23.3 percent) was slightly above the aggregate lending performance (20.0 percent) in these tracts.

Home Refinance Loans

Regions Bank made 87 home refinance loans from 2018 through 2020, which represents 38.3 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, 24 loans (27.6 percent) were located in moderate-income tracts.

Home refinance lending in moderate-income tracts is excellent. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (27.6 percent) was above the percentage of owner-occupied units (27.1 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (35.3 percent) was significantly above the aggregate lending performance (16.0 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (37.5 percent) was significantly above the aggregate lending performance (15.2 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (22.2 percent) was significantly above the aggregate lending performance (14.6 percent) in these tracts.

Home Improvement Loans

Regions Bank made 46 home improvement loans from 2018 through 2020, which represents 20.3 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, 10 loans (21.7 percent) were located in moderate-income tracts.

Home improvement lending in moderate-income tracts is good. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (21.7 percent) was similar to the percentage of owner-occupied units (27.1 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income tracts (21.4 percent) was significantly above the aggregate lending performance (12.6 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (22.7 percent) was significantly above the aggregate lending performance (12.1 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (20.0 percent) was above the aggregate lending performance (13.7 percent) in these tracts.

Small Business Loans

Regions Bank made 261 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 100 loans (38.3 percent) were located in moderate-income tracts.

Small business lending in moderate-income tracts is excellent. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (38.8 percent) was above the percentage of businesses (25.2 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (54.1 percent) was significantly above the aggregate lending performance (24.5 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (28.6 percent) was slightly above the aggregate lending performance (24.5 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (35.1 percent) was above the aggregate lending performance (26.7 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (4.3 percent) was below the percentage of low-income families (20.1 percent). In 2018, the bank's home purchase lending to low-income borrowers (8.6 percent) was significantly above the aggregate lending performance (3.2 percent) to these borrowers. In 2019, Regions Bank made no home purchase loans to low-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (4.3 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (3.3 percent) was similar to the aggregate lending performance (3.3 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (14.9 percent) was similar to the percentage of moderate-income families (19.5 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (22.9 percent) was significantly above the aggregate lending performance (13.0 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (17.2 percent) was similar to the aggregate lending performance (18.0 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (3.3 percent) was significantly below the aggregate lending performance (13.3 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is poor. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (3.4 percent) was below the percentage of low-income families (20.1 percent). In 2018, the bank's home refinance lending to low-income borrowers (5.9 percent) was similar to the aggregate lending performance (6.2 percent) to these borrowers. In 2019, Regions Bank made no home refinance

loans to low-income borrowers (0.0 percent) and was significantly above the aggregate lending performance (4.4 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (3.7 percent) was above the aggregate lending performance (2.7 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (16.1 percent) was similar to the percentage of moderate-income families (19.5 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (11.8 percent) was slightly below the aggregate lending performance (13.3 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (25.0 percent) was significantly above the aggregate lending performance (13.3 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (14.8 percent) was significantly above the aggregate lending performance (9.8 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (6.5 percent) was below the percentage of low-income families (20.1 percent). In 2018, the bank's home improvement lending to low-income borrowers (7.1 percent) was above the aggregate lending performance (4.9 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (9.1 percent) was significantly above the aggregate lending performance (5.3 percent) to these borrowers. In 2020, the bank made no home improvement loans to low-income borrowers (0.0 percent) and was significantly below the aggregate lending performance (2.2 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is adequate. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (10.9 percent) was below the percentage of moderate-income families (19.5 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (21.4 percent) was significantly above the aggregate lending performance (12.3 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (4.5 percent) was significantly below the aggregate lending performance (14.6 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (10.0 percent) was slightly below the aggregate lending performance (12.7 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. From 2018 through 2020, 67.4 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 92.9 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (86.9 percent) was significantly above the aggregate lending performance (45.9 percent) to these businesses. In 2019, the bank's small business lending to small businesses (85.7 percent) was significantly above the aggregate lending performance (42.1 percent) to these businesses. In 2020, the bank's small business lending to small businesses (53.6 percent) was above the aggregate lending performance (40.8 percent) to these businesses. Lastly, 96.1 percent of small business loans were originated in

amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank makes an adequate level of community development loans in the Hilton Head assessment area. During the review period, the bank originated two community development loans totaling \$2.0 million and eight community development PPP loans totaling \$167,000. Specifically, the bank originated \$2.1 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; \$46,000 to support economic development; and \$23,000 towards community services benefiting LMI individuals and families.

The bank's performance by number and dollar of loans is similar to peer performance in this area, and all the community development loans were new originations. In addition, the bank's current performance exceeds its performance from previous examinations, particularly in areas outside of the PPP. The most impactful loans include:

- One loan for \$23,000 made to a nonprofit serving Jasper County for expansion of its building and programs. The nonprofit serves only low-income individuals in the area and has a mission to help low-income families transition into a better quality of life through a variety of its services and programs, including training and education programs. Given the high level of poverty and volume of low-income families in Jasper County, this is particularly noteworthy.
- Approximately 75 percent of the community development PPP loans in this assessment area were originated to nonprofits. This is particularly responsive given the needs of nonprofits and the unique challenges faced by nonprofits during the pandemic.

INVESTMENT TEST

Regions Bank's investment performance in the Hilton Head assessment area is excellent. The bank made an excellent level of investments and grants relative to its presence in the assessment area and demonstrated responsiveness to several credit and community development needs. Combined investment and contribution activity inside the assessment area totaled \$22.2 million, and nearly all investments were obtained during the review period. The bank made one investment in a LIHTC project for \$21.6 million that provided 288 units of affordable housing. The bank's remaining current period and prior period investments were mortgage-backed securities.

During the review period, the bank made contributions totaling \$31,360. Regions donated about \$26,000 in advertising to a local food bank to help solicit food donations to meet the increased need during the pandemic. The remaining donations were to organizations providing community services to LMI individuals. Additionally, the bank made contributions totaling \$17,500 to statewide organizations that benefit all of the bank's assessment areas in South Carolina, including Hilton Head.

SERVICE TEST

Regions Bank’s service test performance in the Hilton Head assessment area is poor.

Retail Services

Retail banking services are adequate in the Hilton Head full-scope assessment area.

The distribution of five branch offices and five full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The Hilton Head assessment area does not contain any low-income tracts. The percentage of branches in moderate-income tracts was less than the percentage of households and businesses in the same geography: 31.6 percent of households and 25.2 percent of businesses were located in moderate-income census tracts compared to 20.0 percent of the bank’s branches. Overall, the bank’s retail delivery systems are reasonably accessible to the bank’s geographies and individuals of different income levels in its assessment area.

During the review period, the bank did not open or close any branch offices or full-service ATMs in low- or moderate-income census tracts. As a result, the bank’s record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

 DTO - Drive thru only is a subset of total branches
 SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

Regions Bank provides a limited level of community development services in the Hilton Head assessment area. During the review period, Regions Bank employees engaged in four qualified service activities totaling 37 hours. All four of the bank's service activities benefited two organizations that provide community service activities for low- and moderate-income individuals. One Regions employee served on the board of directors and provided technical assistance for an organization that assists veterans. Another employee conducted a financial education class for an organization that works to eliminate poverty at the neighborhood level by creating a network of families, schools, libraries, health providers, and other nonprofit organizations to provide resources to low- and moderate-income families.

Despite the bank's size and scope in the assessment area, the bank's activities demonstrated a limited level of engagement in community services in the Hilton Head assessment area.

**METROPOLITAN AREAS
LIMITED-SCOPE REVIEW**

The following assessment areas were reviewed using limited-scope examination procedures.

**DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE SOUTH CAROLINA
METROPOLITAN ASSESSMENT AREAS**

- *Charleston Assessment Area (Charleston and Dorchester counties)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 23.5 percent of its branches in South Carolina.
 - As of June 30, 2020, the bank had \$231.8 million in deposits in this assessment area, representing a market share of 1.5 percent and 28.0 percent of Regions Bank's total deposits in South Carolina.
- *Columbia Assessment Area (Lexington and Richland counties)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 5.9 percent of its branches in South Carolina.
 - As of June 30, 2020, the bank had \$116.6 million in deposits in this assessment area, representing a market share of 0.5 percent and 14.1 percent of Regions Bank's total deposits in South Carolina.
- *Greenville Assessment Area (Anderson and Greenville counties)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 23.5 percent of its branches in South Carolina.
 - As of June 30, 2020, the bank had \$153.0 million in deposits in this assessment area, representing a market share of 0.9 percent and 18.5 percent of Regions Bank's total deposits in South Carolina.
- *Spartanburg Assessment Area (Spartanburg County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 5.9 percent of its branches in South Carolina.
 - As of June 30, 2020, the bank had \$51.3 million in deposits in this assessment area, representing a market share of 0.9 percent and 6.2 percent of Regions Bank's total deposits in South Carolina.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Charleston	Not Consistent (Below)	Consistent	Consistent
Columbia	Not Consistent (Below)	Consistent	Consistent
Greenville	Not Consistent (Below)	Consistent	Not Consistent (Above)
Spartanburg	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Above)

For the lending test, Regions Bank received a rating of high satisfactory for the State of South Carolina. Performance in all four metropolitan limited-scope assessment areas was below the statewide lending test performance. For the geographic distribution of loans, lending levels were adequate in Greenville and Spartanburg, while lending levels were poor in Charleston and Columbia. Performance was adequate for the borrower distribution of loans in all four metropolitan limited-scope assessment areas. Community development lending performance in limited-scope metropolitan assessment areas was as follows: the bank was a leader in Charleston (\$29.4 million) and Greenville (\$13.8 million) and made a relatively high level in Columbia (\$3.3 million) and Spartanburg (\$1.3 million).

For the investments test, the bank received a rating of outstanding for the State of South Carolina. The bank’s performance was consistent with the statewide investment test performance in three of the metropolitan limited-scope assessment areas, and performance was weaker than the statewide investment test performance in the Spartanburg assessment area. The bank’s level of investments was excellent in Charleston, Columbia, and Greenville, while adequate in Spartanburg.

For the service test, Regions Bank received a rating of needs to improve for the State of South Carolina. Performance in the Charleston and Columbia metropolitan assessment areas was consistent with the bank’s state performance while performance in the Greensville and Spartanburg assessment areas was stronger than the bank’s state performance with adequate service test performance. The bank provided an adequate level of community

development services in Greenville and Spartanburg but a limited level in Charleston and Columbia. Additionally, Spartanburg had poor retail delivery performance while the remaining assessment areas were adequate.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating.

NONMETROPOLITAN STATEWIDE AREAS LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE SOUTH CAROLINA NON-METROPOLITAN ASSESSMENT AREAS

- *Barnwell Assessment Area (Barnwell County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 5.9 percent of its branches in South Carolina.
 - As of June 30, 2020, the bank had \$43.2 million in deposits in this assessment area, representing a market share of 15.7 percent and 5.2 percent of Regions Bank's total deposits in South Carolina.
- *Hampton Assessment Area (Hampton County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 5.9 percent of its branches in South Carolina.
 - As of June 30, 2020, the bank had \$38.3 million in deposits in this assessment area, representing a market share of 10.5 percent and 4.6 percent of Regions Bank's total deposits in South Carolina.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with the bank's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Barnwell	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Above)
Hampton	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Above)

For the lending test, Regions Bank received a rating of high satisfactory for the State of South Carolina. Performance in both nonmetropolitan limited-scope assessment areas was below the statewide lending test performance. For the geographic distribution of loans, lending levels were good in Barnwell, while lending levels were not rated in Hampton because the assessment area had no low-income tracts and only one moderate-income tract. Performance was good for the borrower distribution of loans in Hampton and adequate in Barnwell. The bank made few, if any, community development loans in both limited-scope nonmetropolitan assessment areas. During the review period, the bank made no community development loans in Hampton and made \$12,000 in community development loans in Barnwell.

For the investment test, Regions Bank received a rating of outstanding for the State of South Carolina. Performance was below the bank’s statewide investment performance for both nonmetropolitan limited-scope assessment areas. The level of investments was poor in Hampton, and the bank made few, if any, investments in Barnwell.

For the service test, Regions Bank received a rating of needs to improve for the State of South Carolina. Performance in both nonmetropolitan limited-scope assessment area assessment areas were stronger than the bank’s state performance. The Barnwell assessment area had a stronger performance due to good retail delivery services and a relatively high level of community development services. Overall service test performance in the Hampton nonmetropolitan assessment area was considered adequate, with adequate retail delivery services and an adequate level of community development services.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

Tennessee

CRA RATING FOR TENNESSEE: SATISFACTORY

The Lending Test is rated: High Satisfactory

The Investment Test is rated: Outstanding

The Service Test is rated: High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank is a leader in making community development loans in its Tennessee assessment areas.
- The bank provides an excellent level of qualified community development investments and grants that demonstrate responsiveness to community development needs of the Tennessee assessment areas.
- Retail banking services are adequate in the bank's Tennessee assessment areas.
- The bank provides a relatively high level of community development services throughout the Tennessee assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in Tennessee:

- Nashville

Limited-scope reviews were conducted for the remaining ten assessment areas:

- Clarksville
- Cleveland
- Eastern Tennessee
- Jackson
- Johnson City
- Kingsport
- Knoxville
- Middle Tennessee
- Morristown
- Western Tennessee

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN TENNESSEE

As of June 30, 2020, Regions Bank had \$16.3 billion in deposits in Tennessee accounting for 13.5 percent of the bank's total deposits. Regions Bank operated 156 branch offices in Tennessee as of December 31, 2020, representing 11.4 percent of the bank’s total branches. HMDA-reportable lending in Tennessee accounted for 15.3 percent of total institutional HMDA-reportable lending by number of loans and 13.3 percent by dollar volume. CRA small business lending in Tennessee accounted for 9.3 percent of the bank’s total CRA small business lending by number of loans and 8.9 percent by dollar volume. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was less than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Statewide Summary of Lending Activity
Assessment Areas Located in
Tennessee

Loan Type	#	%	\$ (000s)	%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN TENNESSEE

Lending Test

The lending test rating in the state of Tennessee is high satisfactory. Overall, performance in Tennessee with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, the bank is a leader in making community development loans in Tennessee.

During the review period, Regions Bank reported 20,786 HMDA-reportable loans and 8,207 small business loans in Tennessee. The rating for Tennessee is based on performance in the Nashville full-scope assessment area. Approximately 52.7 percent of the bank's HMDA-reportable and small business lending by number of loans in Tennessee occurred within this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of Tennessee is derived from the Nashville full-scope assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

Regions Bank is a leader in making community development loans in the state of Tennessee. During the review period, the bank originated or renewed 445 qualifying community development loans totaling \$336.4 million benefiting its Tennessee assessment areas, including 207 loans totaling \$206.4 million directly benefiting the Nashville full-scope assessment area.

The total community development lending amount includes ten loans totaling \$16.1 million with a P/M/F of serving a broader statewide or regional area that includes more than one of the bank's assessment areas in the state. Most of these were responsive loans with a wide range of impact across multiple assessment areas throughout Tennessee. Therefore, performance in all assessment areas of Tennessee was positively enhanced by these loans. Examples include:

- Three loans totaling \$6.9 million to a statewide CDFI for small business development. The loans were originated to support the CDFI in its creation of local opportunity funds across the state, including a rural opportunity fund specifically for small businesses in rural communities and a small business job opportunity fund for small businesses that are unable to qualify for traditional bank financing.
- Three loans totaling \$5.0 million to support a food bank serving five of the bank's Tennessee assessment areas.
- A \$950,000 loan to a nonprofit community service center serving all assessment areas in Tennessee. The nonprofit offers a wide variety of services for LMI children, youth, and adults impacted by drug and alcohol addiction. Services include drug and alcohol addiction treatment, outpatient recovery services, family and children's programs, long-term adolescent programs, housing, clinical therapy, and academic programs.

The bank was considered responsive to the credit and community development needs within the state of Tennessee. As a result, and in addition to the total community development lending previously noted, the bank received consideration for five community development loans totaling \$3.2 million that were outside any of the bank's assessment areas in the state. More information on community development loans can be found in the full-scope assessment area section of this report.

Investment Test

The investment test rating for Tennessee is outstanding.

Regions Bank made an excellent level of qualified investments and contributions totaling \$246.3 million in Tennessee. The bank had qualified investments of \$242.7 million in the Tennessee assessment areas, with approximately 65.5 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$3.6 million. Further, the bank made \$3.4 million in contributions that benefit a broader statewide area that includes the Tennessee assessment areas. Notable statewide donations include a \$150,000 donation to a CDFI to help capitalize a loan fund to help businesses navigating through the COVID-19 pandemic. Additionally, the bank supported a CDFI that provides small business lending across the state. The bank has provided several loans to the CDFI over the last 10 years, and each year, the bank forgives 10 percent of the loans as a contribution to the CDFI to further its small business lending programs. Over the review period, these contributions totaled \$3.1 million. The remaining donations benefited statewide housing organizations, civil rights groups, and other organizations focused on small businesses.

Nashville was the assessment area in the state reviewed using full-scope procedures. Approximately 65.2 percent of combined investment and contribution activity was in this assessment area, compared to 58.9 percent of deposits in the market as of June 30, 2021. Performance in the assessment area was excellent. The bank was considered responsive to community credit needs in the state. Therefore, positive consideration was given for \$2.1 million in investments that benefit a broader statewide area, without a purpose, mandate, or function of serving Tennessee assessment areas. All of the investments are in LIHTC projects that provide affordable housing.

Additional details regarding investments and contributions can be found in the full-scope assessment area section.

Service Test

The service test rating for Tennessee is high satisfactory.

Retail Services

Delivery systems, including ATMs and branch office locations, are reasonably accessible to the bank's geographies and individuals of different income levels in the assessment areas. Overall, banking services and hours of operations do not vary in a way that inconveniences the bank's assessment areas, including low- and moderate-income geographies or low- and moderate-income individuals. The record of opening and closing of branch offices has generally not adversely affected the accessibility of the bank's delivery systems, particularly

for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period, the bank opened nine branch offices: three in moderate-income tracts, two in middle-income tracts, and four in upper-income tracts in Tennessee. The bank closed 19 branch offices throughout the state; of those closed, one was in a low-income tract, six in moderate-income tracts, seven in middle-income tracts, and five in upper-income tracts. Overall, the bank's retail service performance is considered adequate in Tennessee.

Community Development Services

Regions Bank provides a relatively high level of community development services that benefit residents and small businesses in Tennessee. During the examination period, employees engaged in 566 qualified services totaling 5,686 hours in the Tennessee assessment areas. The majority of community development services were provided in the Nashville full-scope assessment area, where performance was good. Employees engaged in 2,855 service hours in limited-scope assessment areas. Although six of the ten limited-scope assessment areas exhibited poor or very poor performance, this did not adversely affect the overall state performance. Finally, bank employees engaged in 249 qualified community development service hours that benefited a broader statewide or regional area, including the bank's assessment areas.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

METROPOLITAN AREA FULL-SCOPE REVIEW

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE NASHVILLE, TENNESSEE ASSESSMENT AREA

Overview

The Nashville assessment area consists of Cannon, Cheatham, Davidson, Dickson, Maury, Robertson, Rutherford, Sumner, Williamson, and Wilson counties, which are part of the 14-county Nashville-Davidson-Murfreesboro-Franklin MSA. However, in 2019, Hickman County was removed from the MSA. As of December 31, 2020, Regions Bank operated 64 branch offices in the assessment area, representing 41.0 percent of the bank's branches in the state, 59.3 percent of the bank's deposits statewide and 62.5 percent of the bank's total statewide HMDA-reportable and CRA small business loans (by dollar).

Nashville has a competitive banking market where national and regional banks have a significant presence, but there are also a number of local community banks. According to the June 30, 2020 FDIC Summary of Deposits Report, there were 62 financial institutions operating 553 branch locations across the assessment area with \$79.6 billion in total deposits.⁹²⁰ Regions Bank ranked 3rd in deposit market share with \$9.7 billion or 12.2 percent of total deposits. Pinnacle Bank and Bank of America held the largest deposit market share, with 17.2 percent and 16.9 percent respectively.⁹²¹

⁹²⁰ "Office and Deposits of all FDIC-Insured Institutions: Deposit Market Share Report." *Federal Deposit Insurance Corporation*, <https://www7.fdic.gov/sod/sodMarketRpt.asp?barItem=2>. Accessed 22 Mar 2022.

⁹²¹ Ibid.

HMDA-reportable lending and CRA small business lending are similarly competitive. The bank ranked 2nd out of 756 lenders in 2018 with 3.5 percent of total HMDA-reportable loans, while its market share in 2020 slipped to 4th out of 873 lenders with 2.9 percent of total HMDA-reportable loans. Other leading HMDA reporters in the assessment area included Quicken Loans, Pinnacle Bank, Wells Fargo Bank, U.S. Bank, and AmeriHome Mortgage.

For CRA lending, Regions ranked 11th in 2018 with 2.1 percent of total CRA loans. In 2020, the bank jumped to 5th in market share, with 5.9 percent of total CRA loans. Leading CRA lenders in the market included American Express, JP Morgan Chase, Bank of America, and Pinnacle Bank.

Population and Income Characteristics

The Nashville assessment area has grown rapidly in the past several years. Population in the assessment area was approximately 1.9 million as of the 2020 Census, representing an increase of 21.0 percent since 2010.⁹²² For context, the state of Tennessee and the United States grew at 8.9 percent and 7.4 percent over the same time frame, respectively.⁹²³ Davidson County, which the city of Nashville is part of, is the largest county in the assessment area with a 2020 population of 715,884. Other large counties (and their principal cities) in the assessment area include Rutherford County (Murfreesboro) with a population of 341,486, Williamson County (Franklin) with a population of 247,726, and Sumner County (Hendersonville) with a population of 196,281.⁹²⁴ The highest population growth rates in the assessment area have been in the suburban counties; between 2010 and 2020, population increased by 35.2 percent in Williamson County, 30.0 percent in Rutherford County, and 29.6 percent in Wilson County.⁹²⁵

According to 2020 FFIEC census data, the assessment area contains 363 census tracts: 34 low-income tracts (9.4 percent), 87 moderate-income tracts (24.0 percent), 140 middle-income tracts (38.6 percent), 97 upper-income tracts (26.7 percent), and 5 unknown-income tracts (1.4 percent).

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income for the Nashville-Davidson-Murfreesboro-Franklin MSA. As shown, the median family income increased from \$73,200 in 2018 to \$76,500 in 2020. As previously mentioned, Hickman County was removed from the MSA in 2019, which may slightly skew these income statistics. Hickman County's median family income was lower than the MSA median at \$52,635,⁹²⁶ but with a total population of less than 25,000, the county's effect on MSA data was minimal.⁹²⁷

Borrower Income Levels
Nashville-Murfreesboro-Franklin, TN MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2018	\$73,200	0 - \$36,599	\$36,600 - \$58,559	\$58,560 - \$87,839	\$87,840 - & above
2019	\$73,100	0 - \$36,549	\$36,550 - \$58,479	\$58,480 - \$87,719	\$87,720 - & above
2020	\$76,500	0 - \$38,249	\$38,250 - \$61,199	\$61,200 - \$91,799	\$91,800 - & above

There is substantial variation in the median family income throughout the assessment area. Williamson County is one of the wealthiest counties in the country with an estimated median family income of \$111,196 between 2016 and 2020, while the median family income in Cannon County was the lowest in the assessment area at \$52,518.⁹²⁸ Meanwhile, the percentage of families in poverty between 2015 and 2019 was 2.8 percent in Williamson County, while it was 11.2 percent in Cannon County.⁹²⁹

Throughout the assessment area, 38.0 percent of families were considered low- to moderate-income based on 2020 FFIEC census data.⁹³⁰ Additionally, 35.5 percent of families in low-income tracts and 17.4 percent of families in moderate-income tracts have incomes below the poverty level.⁹³¹ The high poverty rates and the concentration of families living below the poverty level in low- and moderate-income tracts may present challenges to lending in these tracts.

Economic Conditions

The Nashville MSA has seen strong population and job growth in the past few years and is also a leading national health care hub and a thriving tourism center. Between January 2018 and December 2020, total nonfarm payrolls grew 3.1 percent in the MSA,⁹³² while total nonfarm payrolls in the United States decreased 3.5 percent.⁹³³ The industries with the fastest job growth in this same period included construction, transportation/logistics, and professional/business services.⁹³⁴ Meanwhile, the manufacturing and leisure/hospitality industries saw decreases in total jobs during the same period.⁹³⁵ The largest employment concentrations are in the transportation/logistics, professional/business services, government, education/health services, and leisure/hospitality industries.⁹³⁶ Apart from state government, the leading private sector employers are Vanderbilt University Medical Center, Nissan

Small businesses play an important role in the Nashville economy. According to 2020 Dun & Bradstreet data, there were 83,726 businesses in the Nashville assessment area, which is a 4.5 percent increase from 2018 data.⁹³⁸ Of the total businesses in the assessment area, 91.5 percent had total annual revenues less than or equal to \$1 million and were therefore considered small businesses.⁹³⁹ Additionally, 20.7 percent of small businesses in the assessment area were located in moderate-income tracts, while there were fewer in low-income tracts at 7.5 percent.⁹⁴⁰

Lending to small businesses posted gradual growth over the past few years in this market. According to an analysis of CRA loan data, the number of small business loans (loans under \$1 million in principal) in the assessment area increased by 41.4 percent between 2018 and 2020 with 51,212 loans made in 2020. 42.4 percent of these loans were made to small businesses (less than \$1 million in annual revenue) in 2020, while 48.0 percent of these loans were made to small businesses in 2018.

The early stages of the COVID-19 had a crippling effect on economic activity in the Nashville assessment area, especially in Davidson County, which is home to Nashville's famous entertainment, music, and food industry. On March 16, 2020, Mayor John Cooper closed Davidson County's bars and limited restaurants to 50 percent capacity in response to the onset of COVID-19 cases in the state of Tennessee.⁹⁴¹ On April 2, 2020 Tennessee Governor Bill Lee issued a statewide stay-at-home order,⁹⁴² which was later extended through the end of April 2020.⁹⁴³ Most of the state began re-opening on May 1, 2020,⁹⁴⁴ and Davidson County began their own reopening process on May 11, 2020.⁹⁴⁵ However, COVID-19 contraction risk and case counts continued to stunt consumer demand for certain services, especially those in the travel, leisure, entertainment, and food industries. To help keep the nation's economy afloat during the crisis, the U.S. Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act. The CARES Act established the Paycheck Protection Act (PPP), which

provided fully forgivable loans to small businesses to cover payroll costs.⁹⁴⁶ In the Nashville assessment area alone, 71,451 total PPP loans were approved for a sum of \$4.7 billion, which helped small businesses keep their doors open and workers on payroll through the unprecedented drop in consumer demand.⁹⁴⁷

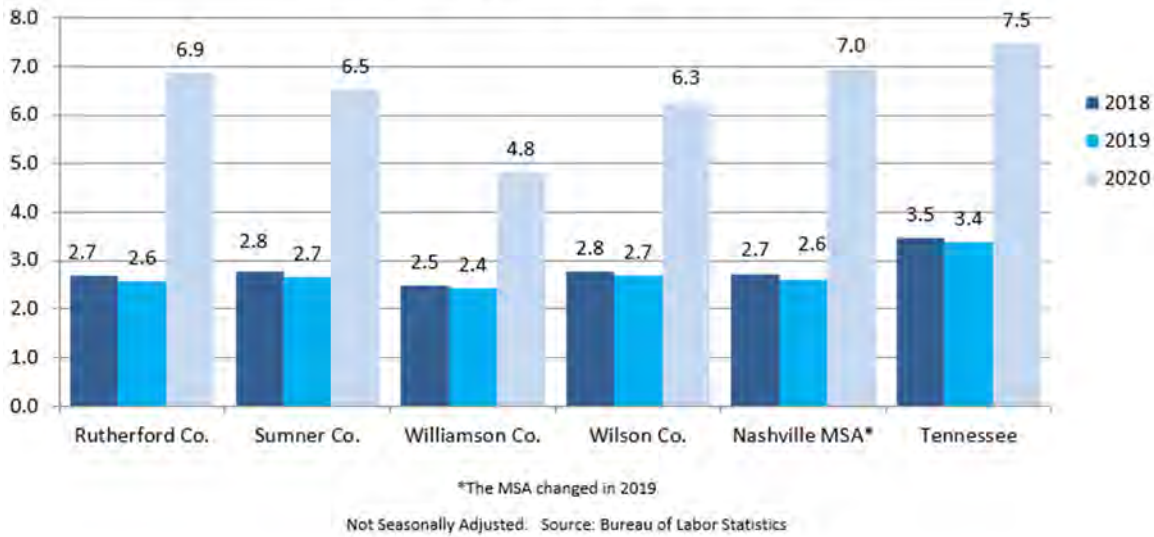

As displayed in the following charts, all counties in the assessment area had an unemployment rate of 3.2 percent or lower in 2018 and 2019. The unemployment rate also improved slightly for most counties in the assessment area during this timeframe. However, the unemployment rate increased (to varying degrees) in all assessment area counties in 2020; Maury County had the highest unemployment rate at 8.1 percent and Williamson County had the lowest at 4.8 percent. Despite the increase in unemployment due to the pandemic, the unemployment rate in the MSA (7.0 percent) continued to compare favorably to the state of Tennessee (at 7.5 percent).

Unemployment Rates - TN Nashville (2 of 2)

According to 2020 FFIEC census data, there were 690,972 housing units located in the assessment area, 60.1 percent of which were owner-occupied, 32.0 percent of which were rental units, and 7.8 percent were vacant.⁹⁴⁸ In low-income census tracts, 28.5 percent of housing units were owner-occupied, while 44.6 percent were owner-occupied in moderate-income tracts.⁹⁴⁹ The median age of the housing stock across the assessment area was 35 years, while the median was 53 years in low-income census tracts and 43 years in moderate-income tracts.⁹⁵⁰

Population and employment growth is driving a hot real estate market in the Nashville MSA. The Housing Price Index in the MSA increased from 257.2 in Q1 2018 to 304.8 in Q4 2020, representing an 18.5 percent increase.⁹⁵¹ However, home prices vary widely throughout the assessment area. In 2020, Williamson County had the highest median home sales price at \$532,456 while Dickson County had the lowest, at \$201,610.⁹⁵² Active home listings in the MSA decreased 38.7 percent from January 2018 to December 2020, indicating an increasingly tight market.⁹⁵³ In terms of homeownership, the rate varies, from a low of 54.3 percent in Davidson County to a high of 80.6 percent in Williamson County, compared to 66.3 percent for the state.⁹⁵⁴

Homeownership for low- and moderate-income families in the Nashville area is becoming less affordable. Using the assumption that a borrower can obtain a loan for approximately three times their annual income, and using 2020 FFIEC median family income figures, affordable homes would be priced at \$114,747 or below for low-

income families and \$183,597 or below for moderate-income families. As stated previously, all counties in the assessment area had median home prices above \$200,000 in 2020 (Williamson County had the highest median home sales price at \$532,456 while Dickson County had the lowest, at \$201,610).⁹⁵⁵

Demographic Characteristics by Census Tract

The following tables present key demographic and business information used to help develop a performance context for the assessment area for the years 2018 through 2020. The data reflects the 2018 and 2020 FFIEC census data and Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the local community development and economic landscapes, individuals familiar with the Nashville area community and with local community development activities were contacted. These individuals discussed the various opportunities and challenges in the region and how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities. According to these contacts, affordable housing and small business assistance, and the number of underbanked/unbanked LMI residents are significant concerns for the area.

Contacts indicated that the Nashville area's community development environment is strong, with numerous organizations working to provide affordable housing, financial education, and small business aid (in the form of advice and funding). Contacts also indicated that most banks in the area have been proactive in seeking out community development projects and in lending to low-and-moderate income communities and individuals both directly and indirectly. While the economy in the Nashville area is strong overall, some urban areas immediately surrounding the central business district, as well as suburban/rural areas like Maury County, continue to suffer with relatively high poverty rates.⁹⁵⁶

Furthermore, contacts discussed the impact of the COVID-19 pandemic on the area. One contact indicated that economic growth slowed during the pandemic, but the economy remained strong. The other contact mentioned that low- to moderate-income residents employed in seasonal jobs as well as in the food and accommodation industry were greatly impacted during the pandemic. Some of the impacts included having difficulty paying rent due to a decrease in people's working hours or job losses. Additionally, the individual mentioned that the pandemic caused many low- to moderate-income people who were transitioning to homeownership to deplete their savings towards their first home and cause an increase in debt to survive during the temporary and permanent business shutdowns. Lastly, a contact indicated that most banks did well with working with customers of all incomes and revenues by offering credit lines, workouts, and loan modifications during the pandemic. However, the person stated that most of a bank's willingness to work with a customer was based upon the customer's relationship history, which caused some less emphasis on assisting newer customers.

According to the community contact involved in affordable housing initiatives, there is minimal affordable housing availability in and around downtown Nashville. Nonprofit organizations have been active in bidding on land and property for affordable housing initiatives, but competition from real estate investors and private equity groups has resulted in inability to compete at current market prices. Most of the affordable housing stock is older, and many of these homes and rentals need repairs and updates. Downtown Nashville has almost no available affordable housing stock; starter home prices are out of reach and young urban workers have been pushed outside of city limits in search of housing. The resulting gentrification has displaced many low-and-moderate income individuals and families who previously lived on the outskirts of Nashville. The contact suggested that banks could help mitigate affordable housing challenges by investing in or lending to CDFIs, lending to organizations helping to preserve and provide affordable housing and expanding down payment assistance programs for low-and-moderate income borrowers.

⁹⁵⁶ "Nashville Promise Zone." *U.S. Department of Housing and Urban Development*, June 2016, https://www.hud.gov/sites/documents/NASHVILLE_ZONE_3RD.PDF. Accessed 24 March 2022.

A report by the Affordable Housing Task Force in Nashville/Davidson County confirmed that housing affordability is also a problem for renters in Nashville. According to the study, 44 percent of Nashville / Davidson County rental households were cost-burdened by housing, meaning that they spent more than 30 percent of their incomes on housing.⁹⁵⁷

A community contact who works with local small businesses indicated that access to capital is a barrier to launching and growing new businesses. Many small business owners in the area do not have the collateral or the personal net worth that would allow commercial banks to lend to them. The contact added that many local banks do not extend commercial loans in amounts under \$75,000. In response, many local small businesses increasingly rely on fintech firms for their credit needs. The contact added that some of these fintech firms have predatory practices that result in crushing interest rates and fees being charged to the small businesses. The contact encouraged banks to provide educational services to small businesses and to be more flexible on collateral standards and debt-service coverage ratios with small business lending.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE NASHVILLE, TENNESSEE ASSESSMENT AREA

LENDING TEST

Regions Bank's lending performance in the Nashville assessment area is good. The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making community development loans in the Nashville assessment area.

The analysis included 8,722 HMDA-reportable loans and 4,630 CRA small business loans reported by the bank in the Nashville assessment area during the review period. Therefore, HMDA-reportable lending received greater weight in determining the bank's lending test rating in the assessment area. Additionally, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Nashville assessment area accounted for 63.5 percent of Regions Bank's total HMDA-reportable lending by dollar amount in Tennessee and 57.1 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 59.3 percent of Regions Bank's Tennessee deposits are in the Nashville assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

⁹⁵⁷ "Affordable Housing Task Force Report." *Metropolitan Government of Nashville and Davidson County*, 8 June 2021, <https://www.nashville.gov/sites/default/files/2021-06/Affordable-Housing-Task-Force-Report-2021.pdf>. 24 March 2022.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 8,722 HMDA-reportable loans analyzed, 2,078 loans (23.8 percent) were home purchase loans. Of the total home purchase loans made, 90 loans (4.3 percent) were located in low-income tracts, and 320 loans (15.4 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is adequate. In 2018, Regions Bank's home purchase lending in low-income tracts (3.1 percent) was similar to the percentage of owner-occupied units (3.5 percent) in these tracts. In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of owner-occupied units located in low-income tracts remained the same. For the period of 2019 through 2020, the bank's home purchase lending in low-income tracts (5.0 percent) was above the percentage of owner-occupied units (3.5 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in low-income tracts (3.1 percent) was below the aggregate lending performance (4.8 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (3.3 percent) was below the aggregate lending performance (5.3 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (6.4 percent) was slightly above the aggregate lending performance (5.3 percent) in these tracts.

Home purchase lending in moderate-income tracts is adequate. In 2018, Regions Bank's home purchase lending in moderate-income tracts (15.3 percent) was similar to the percentage of owner-occupied units (18.1 percent) in these tracts. In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home purchase lending in moderate-income tracts (15.5 percent) was similar the percentage of owner-occupied units (18.3 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending in moderate-income tracts (15.3 percent) was similar to the aggregate lending performance (16.4 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (17.0 percent) was similar to the aggregate lending performance (16.9 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (14.1 percent) was slightly below the aggregate lending performance (16.3 percent) in these tracts.

Home Refinance Loans

Of the 8,722 HMDA-reportable loans analyzed, 4,298 loans (49.3 percent) were home refinance loans. Of the total home refinance loans made, 140 loans (3.3 percent) were located in low-income tracts, and 564 loans (13.1 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is adequate. In 2018, Regions Bank's home refinance lending in low-income tracts (4.5 percent) was above the percentage of owner-occupied units (3.5 percent) in these tracts. In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of owner-occupied units located in low-income tracts remained the same. For the period of 2019 through 2020, the bank's home refinance lending in low-income tracts (3.0 percent) was similar to the percentage of owner-occupied units (3.5 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in low-income tracts (4.5 percent) was slightly above the aggregate lending performance (4.0 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (2.8 percent) was slightly below the aggregate lending performance (3.6 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (3.1 percent) was slightly below the aggregate lending performance (3.5 percent) in these tracts.

Home refinance lending in moderate-income tracts is adequate. In 2018, Regions Bank's home refinance lending in moderate-income tracts (15.5 percent) was similar to the percentage of owner-occupied units (18.1 percent) in these tracts. In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home refinance lending in moderate-income tracts (12.6 percent) was below the percentage of owner-occupied units (18.3 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home refinance lending in moderate-income tracts (15.5 percent) was similar to the aggregate lending performance (16.6 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (14.2 percent) was similar to the aggregate lending performance (14.4 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (11.7 percent) was similar to the aggregate lending performance (12.2 percent) in these tracts.

Home Improvement Loans

Of the 8,722 HMDA-reportable loans analyzed, 2,346 loans (26.9 percent) were home improvement loans. Of the total home improvement loans made, 53 loans (2.3 percent) were located in low-income tracts, and 350 loans (14.9 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is poor. In 2018, Regions Bank's home improvement lending in low-income tracts (2.5 percent) was similar to the percentage of owner-occupied units (3.5 percent) in these tracts. In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of owner-occupied units located in low-income tracts remained the same. For the period of 2019 through 2020, the bank's home improvement lending in low-income tracts (2.2 percent) was below the percentage of owner-occupied units (3.5 percent) in these tracts. Concerning the bank's lending performance compared to the

aggregate's lending performance, in 2018, the bank's home improvement lending in low-income tracts (2.5 percent) was slightly below the aggregate lending performance (3.1 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (2.6 percent) was slightly below the aggregate lending performance (3.3 percent) in these tracts. In 2020, the bank's home improvement lending in low-income tracts (1.6 percent) was below the aggregate lending performance (2.7 percent) in these tracts.

Home improvement lending in moderate-income tracts is adequate. In 2018, Regions Bank's home improvement lending in moderate-income tracts (15.9 percent) was similar to the percentage of owner-occupied units (18.1 percent) in these tracts. In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's home improvement lending in moderate-income tracts (14.5 percent) was similar to the percentage of owner-occupied units (18.3 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending in moderate-income tracts (15.9 percent) was slightly above the aggregate lending performance (13.9 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (16.8 percent) was slightly above the aggregate lending performance (14.3 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (11.4 percent) was similar to the aggregate lending performance (11.8 percent) in these tracts.

Small Business Loans

Regions Bank made 4,630 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 408 loans (8.8 percent) were located in low-income tracts, and 956 loans (20.6 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is good. In 2018, Regions Bank's small business lending in low-income tracts (10.4 percent) was above the percentage of businesses (7.8 percent) in these tracts. In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in low-income tracts (8.5 percent) was above the percentage of businesses (7.9 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in low-income tracts (10.4 percent) was above the aggregate lending performance (8.1 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (12.9 percent) was significantly above the aggregate lending performance (8.4 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (7.5 percent) was similar to the aggregate lending performance (8.1 percent) in these tracts.

Small business lending in moderate-income tracts is good. In 2018, Regions Bank's small business lending in moderate-income tracts (21.0 percent) was similar to the percentage of businesses (21.1 percent) in these tracts. In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, the bank's small business lending in moderate-income tracts (20.6 percent) was similar to the percentage of businesses (20.9 percent) in these tracts. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending in moderate-income tracts (21.0 percent) was similar to the aggregate lending performance (19.1 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (21.9 percent) was

slightly above the aggregate lending performance (18.9 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (20.3 percent) was similar to the aggregate lending performance (18.7 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is good. In 2018, Regions Bank's home purchase lending to low-income borrowers (5.5 percent) was below the percentage of low-income families (20.4 percent). In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of low-income families in the assessment area remained the same. For the period of 2019 through 2020, the bank's home purchase lending to low-income borrowers (6.2 percent) was below the percentage of low-income families (20.4 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to low-income borrowers (5.5 percent) was slightly above the aggregate lending performance (4.8 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (4.3 percent) was similar to the aggregate lending performance (4.1 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (7.9 percent) was significantly above the aggregate lending performance (5.0 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is adequate. In 2018, Regions Bank's home purchase lending to moderate-income borrowers (19.2 percent) was above the percentage of moderate-income families (17.5 percent). In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of moderate-income families in the assessment area remained the same. For the period of 2019 through 2020, the bank's home purchase lending to moderate-income borrowers (20.8 percent) was above the percentage of moderate-income families (17.5 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home purchase lending to moderate-income borrowers (19.2 percent) was similar to the aggregate lending performance (18.6 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (19.6 percent) was similar to the aggregate lending performance (18.4 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (22.0 percent) was similar to the aggregate lending performance (20.3 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. In 2018, Regions Bank's home refinance lending to low-income borrowers (10.3 percent) was below the percentage of low-income families (20.4 percent). In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of low-income families in the assessment area remained the same. For the period of 2019 through 2020, the bank's home refinance lending to low-income borrowers (8.3 percent) was below the percentage of low-income families (20.4 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to low-income borrowers (10.3 percent) was slightly above the aggregate lending performance (9.2 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (9.7 percent) was significantly above the aggregate lending performance (5.9 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (7.7 percent) was significantly above the aggregate lending performance (4.2 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is adequate. In 2018, Regions Bank's home refinance lending to moderate-income borrowers (21.7 percent) was above the percentage of moderate-income families (17.5 percent). In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of moderate-income families in the assessment area remained the same. For the period of 2019 through 2020, the bank's home refinance lending to moderate-income borrowers (15.9 percent) was similar to the percentage of moderate-income families (17.5 percent). Concerning the bank's lending performance as compared to the aggregate's lending performance, in 2018, the bank's home refinance lending to moderate-income borrowers (21.7 percent) was slightly above the aggregate lending performance (19.7 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (16.7 percent) was similar to the aggregate lending performance (15.3 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (15.5 percent) was slightly above the aggregate lending performance (13.6 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is good. In 2018, Regions Bank's home improvement lending to low-income borrowers (5.2 percent) was below the percentage of low-income families (20.4 percent). In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of low-income families in the assessment area remained the same. For the period of 2019 through 2020, the bank's home improvement lending to low-income borrowers (7.2 percent) was below the percentage of low-income families (20.4 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to low-income borrowers (5.2 percent) was similar to the aggregate lending performance (5.1 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (7.6 percent) was significantly above the aggregate lending performance (5.0 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (6.6 percent) was above the aggregate lending performance (4.7 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is good. In 2018, Regions Bank's home improvement lending to moderate-income borrowers (17.1 percent) was similar to the percentage of moderate-income families (17.5 percent). In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area; even though a change in the demographic data occurred, the overall statistical percentage rate of moderate-income families in the assessment area remained the same. For the period of 2019 through 2020, the bank's home improvement lending to moderate-income borrowers (16.5 percent) was similar to the percentage of moderate-income families (17.5 percent). Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's home improvement lending to moderate-income borrowers (17.1 percent) was slightly above the aggregate lending performance (14.6 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (16.1 percent) was slightly above the aggregate lending performance (14.3 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (17.0 percent) was above the aggregate lending performance (13.3 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. In 2018, 66.8 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. By comparison, 90.7 percent of the total businesses in the assessment area were classified as small businesses. In 2019, Hickman County was removed from the MSA, which caused a change in the demographic data for the assessment area. For the period of 2019 through 2020, 59.1 percent of the bank's loans were originated to businesses with revenues of \$1 million or less. During this period, 91.5 percent of the total businesses in the assessment area were classified as small businesses. Concerning the bank's lending performance compared to the aggregate's lending performance, in 2018, the bank's small business lending (66.8 percent) was above the aggregate's small business lending performance (45.9 percent). In 2019, the bank's small business lending to small businesses (67.3 percent) was above the aggregate's small business lending performance (48.9 percent) to these businesses. In 2020, the bank's small business lending to small businesses (57.2 percent) was above the aggregate's lending performance (41.5 percent) to these businesses. Lastly, 92.3 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank is a leader in making community development loans in the Nashville assessment area. During the review period, the bank originated or renewed 37 community development loans totaling \$162.2 million and 170 community development PPP loans totaling \$44.2 million. Specifically, the bank originated or renewed \$106.9 million in affordable housing initiatives; \$55.0 million to support economic development; \$31.5 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; and \$13.0 million towards community services benefiting LMI individuals and families.

Most of the qualified loans were impactful and responsive to assessment area needs, with some loans being the result of innovative ways to address specific community needs. Additionally, the bank's current lending by number of loans and dollar volume exceeds peer performance in this area. Some of the most impactful loans directly benefiting the assessment area include:

- Three loans totaling \$39.8 million used to fund two new LIHTC projects. One project was new construction and subsequent bridge financing of apartments, and the second project was the conversion of commercial real estate property to multifamily. The projects were designed to create 314 new units of affordable housing for low-income individuals and/or families throughout the assessment area.
- Five loans totaling \$19.9 million to housing nonprofits to address affordable housing challenges specifically noted throughout the area. The loans were the result of the bank's existing and newly formed partnerships and included some innovative ways to address housing needs in the area. Examples include partnering with a nonprofit to convert unusable land to zoned residential land for tiny homes for LMI families; providing individual, smaller dollar lines of credit to a CDC for home construction for LMI families; and partnering with RCDC and one of the area's largest nonprofit providers of affordable housing to fund its mission of ensuring housing remains affordable for LMI families in areas of gentrification.
- A line of credit for \$100,000 to a nonprofit offering tutoring services to LMI students during the pandemic. The line of credit was used to convert the tutoring center to a remote learning center that is COVID-19 compliant, thus allowing the nonprofit to obtain reimbursement through government funding under the CARES Act.
- A \$96,000 loan made through the PPP to a nonprofit drug and alcohol recovery center for LMI individuals.
- Approximately 63 percent of the community development PPP loans in this assessment area were originated to nonprofits. This is particularly responsive given the needs of nonprofits and the unique challenges faced by nonprofits during the pandemic.

INVESTMENT TEST

Regions Bank's investment performance in the Nashville assessment area is excellent. The bank made an excellent level of investments and grants and made significant use of complex investments to support community development initiatives. Qualified investments and contributions demonstrate excellent responsiveness to a wide range of identified assessment area needs. Combined investment and contribution activity inside the assessment area totaled \$160.7 million.

The bank made investments (excluding contributions) totaling \$158.2 million in the Nashville assessment area, including \$130.5 million in new investments during the review period. The bank was responsive to the need across the region for affordable housing, utilizing several different types of investment vehicles during the review period. The bank invested in two LIHTC projects totaling \$19.0 million that provided approximately 300 new affordable units. The bank also invested approximately \$80.7 million in mortgage-backed securities that primarily financed affordable multifamily housing and invested \$26 million in a national fund that aims to preserve affordable housing and funded two projects in the Nashville assessment area. Additionally, the bank renewed investments of \$1.7 million to a CDFI focused on housing and \$150,000 to an affordable housing nonprofit organization. In addition to the housing-related investments, the bank invested \$2.7 million in an SBIC and renewed a deposit in a minority depository institution. Lastly, the bank held investments totaling \$27.7 from

prior examination periods, including \$24.4 million invested in LIHTC projects, as well as an investment in an SBIC and several mortgage-backed securities.

Regions Bank made contributions totaling \$2.5 million during the review period. Specifically, the bank provided \$1.5 million for community services targeting low- and moderate-income individuals; \$617,000 to promote economic development; \$313,000 for affordable housing; and \$78,500 to help revitalize low- and moderate-income neighborhoods as well as designated disaster areas. The bank made \$614,000 in contributions responsive to the COVID-19 pandemic, providing support for emergency and recovery assistance to LMI individuals, nonprofits, and small businesses.

Examples of notable contributions include:

- The bank provided grants totaling nearly \$700,000 to HBCUs based in Nashville to support scholarships for LMI students;
- A \$100,000 donation to a nonprofit organization that primarily serves the immigrant community to provide assistance to small businesses they serve during the pandemic. The donation was geared towards support of microenterprises in the catering industry, which were particularly impacted by the shutdown due to COVID-19;
- Donations totaling \$75,000 to tornado relief funds that were set up to support the immediate and long-term recovery efforts after a tornado swept through Middle Tennessee in March 2020;
- A \$50,000 donation to support the opening of a grocery store located in an identified food desert, which will provide free groceries to residents in nearby subsidized housing developments;
- A \$20,000 donation to support a women's business center, which supports the growth and sustainability of women-owned businesses; and
- Grants totaling \$25,000 to a housing-oriented CDFI and grants totaling \$60,000 to two nonprofit organizations that focus primarily on affordable rental housing, including for the lowest-income individuals.

The bank also made \$3.4 million in donations to statewide organizations that benefited all assessment areas in Tennessee, which positively impacted the bank's performance in Nashville.

SERVICE TEST

Regions Bank's service test performance in the Nashville assessment area is good.

Retail Services

Retail banking services are adequate in the Nashville full-scope assessment area.

The distribution of 64 branch offices and 67 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The percentage of branches in low-income tracts was slightly below the percentage of households and below the percentage of businesses in the same geography: 7.0 percent of households and 7.9 percent of businesses were located in low-

income census tracts compared to 6.3 percent of the bank’s branches. The proportion of the bank’s branches in moderate-income tracts was slightly above the percentage of households and above the percentage of businesses in the same geography: 25.0 percent of total branches were in moderate-income-tracts compared to 24.3 percent of households and 20.9 percent of businesses. Hickman County was removed from the MSA in 2019; however, it did not affect the distribution of branch offices. Overall, the bank’s retail delivery systems are reasonably accessible to the bank’s geographies and individuals of different income levels in its assessment area.

During the review period, Regions Bank closed one branch and one full-service ATM in a low-income tract. The bank also opened one full-service ATM in a low-income tract. Additionally, one branch and two full-service ATMs were closed in moderate-income tracts, while one branch and one full-service ATM were opened in moderate-income tracts. As a result, the bank’s record of opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

Community Development Services

Regions Bank provides a relatively high level of community development services in the Nashville assessment area. During the review period, Regions Bank employees engaged in 297 qualified service activities totaling 2,831 hours. The bank’s service activities benefited organizations that provide affordable housing, community services, and economic development activities for low- and moderate-income individuals and geographies and small businesses. Of the total qualified service activities, 104 hours supported adult and youth financial education and homebuyer education through partnerships with numerous schools and organizations. Bank employees also provided 1,364 hours serving on several boards and committees of qualified nonprofit organizations.

Highlighted below are examples of community development activities undertaken during the review period:

- Bank employees provided over 103 hours with an organization dedicated to developing and managing affordable housing for Nashville’s homeless, low-income and workforce population. Specifically, some bank employees provided technical assistance to help create a hybrid financial tool for affordable housing development loans as well as assisted the organization with establishing an affordable housing fund to preserve LIHTC developments.
- A Regions associate served 120 hours as a board member for an organization that focuses on helping veterans and their families with services that include employment assistance and housing.
- Regions supported United Way chapters in their work to provide financial stability and poverty-reduction opportunities to LMI clients. Bank staff assisted with Volunteer Income Tax Assistance (VITA), Bank On Music City, and the Nashville Alliance for Financial Independence through partnerships with United Way-supported organizations.
- A bank employee provided technical assistance and financial expertise for an organization that provides affordable housing, financial education, and economic opportunities to primarily LMI individuals and families.

Overall, the bank demonstrated a good level of engagement in community services in the Nashville assessment area.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE TENNESSEE METROPOLITAN ASSESSMENT AREAS

- *Clarksville Assessment Area (Montgomery and Stewart (ADDED IN 2019) Counties)*
 - As of December 31, 2020, Regions Bank operated five branches in the assessment area, representing 3.2 percent of its branches in Tennessee.
 - As of June 30, 2020, the bank had \$466.5 million in deposits in this assessment area, representing a market share of 14.0 percent and 2.9 percent of Regions Bank's total deposits in Tennessee.
- *Cleveland Assessment Area (Bradley County)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 2.6 percent of its branches in Tennessee.
 - As of June 30, 2020, the bank had \$273.6 million in deposits in this assessment area, representing a market share of 14.3 percent and 1.7 percent of Regions Bank's total deposits in Tennessee.
- *Jackson Assessment Area (Chester, Crockett, Gibson (ADDED IN 2019) and Madison counties)*
 - As of December 31, 2020, Regions Bank operated 10 branches in the assessment area, representing 6.4 percent of its branches in Tennessee.
 - As of June 30, 2020, the bank had \$638.4 million in deposits in this assessment area, representing a market share of 17.3 percent and 3.9 percent of Regions Bank's total deposits in Tennessee.
- *Johnson City Assessment Area (Carter and Washington counties)*
 - As of December 31, 2020, Regions Bank operated five branches in the assessment area, representing 3.2 percent of its branches in Tennessee.
 - As of June 30, 2020, the bank had \$209.3 million in deposits in this assessment area, representing a market share of 6.0 percent and 1.3 percent of Regions Bank's total deposits in Tennessee.
- *Kingsport Assessment Area (Sullivan County)*
 - As of December 31, 2017, Regions Bank operated five branches in the assessment area, representing 3.0 percent of its branches in Tennessee.
 - As of June 30, 2017, the bank had \$ 637.9 million in deposits in this assessment area, representing a market share of 27.8 percent and 4.7 percent of Regions Bank's total deposits in Tennessee.
- *Knoxville Assessment Area (Anderson, Blount, Knox, Loudon, and Roane counties)*
 - As of December 31, 2020, Regions Bank operated 29 branches in the assessment area, representing 18.6 percent of its branches in Tennessee.
 - As of June 30, 2020, the bank had \$2.5 billion in deposits in this assessment area, representing a market share of 13.2 percent and 15.6 percent of Regions Bank's total deposits in Tennessee.

- *Morristown Assessment Area (Grainger (ADDED IN 2019), Hamblen and Jefferson counties)*
 - As of December 31, 2020, Regions Bank operated two branches in the assessment area, representing 1.3 percent of its branches in Tennessee.
 - As of June 30, 2020, the bank had \$214.2 million in deposits in this assessment area, representing a market share of 10.9 percent and 1.3 percent of Regions Bank’s total deposits in Tennessee.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Clarksville	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Cleveland	Consistent	Not Consistent (Below)	Not Consistent (Below)
Jackson	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Johnson City	Consistent	Consistent	Not Consistent (Below)
Kingsport	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Knoxville	Not Consistent (Below)	Not Consistent (Below)	Consistent
Morristown	Consistent	Not Consistent (Below)	Not Consistent (Below)

For the lending test, Regions Bank received a rating of high satisfactory for the State of Tennessee. Performance in three of the seven metropolitan limited-scope assessment areas was consistent with the statewide lending test performance, while performance in the remaining four metropolitan limited-scope assessment areas was below the statewide performance. For the geographic distribution of loans, lending levels were good in Knoxville and adequate in the remaining six metropolitan limited-scope assessment areas. Performance was good for the borrower distribution of loans in five metropolitan limited-scope assessment areas and adequate in Johnson City and Morristown. Community development lending performance in limited-scope metropolitan assessment areas was as follows: the bank was a leader in Cleveland (\$10.0 million), Johnson City (\$9.7 million), and Morristown

(\$34.6 million); made an adequate level in Clarksville (\$734,000), Jackson (\$6.5 million), and Knoxville (\$32.4 million); and made a low level in Kingsport (\$272,000).

For the investment test, Regions Bank received a rating of outstanding for the State of Tennessee. The bank had an excellent level of investments in the Johnson City metropolitan limited-scope assessment area, which was consistent with the bank's statewide investment test performance. In the remaining limited scope assessment areas, the bank's investment performance was weaker than the statewide investment test performance. The bank had a significant level of investments in Cleveland and Knoxville; an adequate level of investments in Jackson; and a poor level of investments in Clarksville, Kingsport, and Morristown.

For the service test, Regions Bank received a rating of high satisfactory for the State of Tennessee. Performance in the Knoxville metropolitan assessment area was consistent with the bank's state performance while performance in the remaining six assessment areas was weaker than the bank's state performance. The service test performance in Cleveland, Jackson, Kingsport, and Morristown metropolitan assessment areas was considered adequate. However, the bank had poor service test performance in Clarksville and Johnson City. The bank provided a limited level of community development services in Clarksville, Johnson City, Kingsport, and Morristown; an adequate level of community development services in Cleveland and Jackson; a relatively high level in Knoxville. Retail delivery services performance was as follows: good in Kingsport and Morristown; adequate in Clarksville, Cleveland, Jackson, Johnson City, and Knoxville.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating.

NONMETROPOLITAN STATEWIDE AREAS LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE TENNESSEE NON-METROPOLITAN ASSESSMENT AREAS

- *Eastern Tennessee Assessment Area (Cumberland, McMinn, Meigs, Monroe and Rhea counties)*
 - As of December 31, 2020, Regions Bank operated seven branches in the assessment area, representing 4.5 percent of its branches in Tennessee.
 - As of June 30, 2020, the bank had \$494.3 million in deposits in this assessment area, representing a market share of 13.5 percent and 3.0 percent of Regions Bank's total deposits in Tennessee.
- *Middle Tennessee Assessment Area (Bedford, Coffee, Dekalb, Franklin, Lewis, Lincoln, Pickett, Putnam, and Warren counties)*
 - As of December 31, 2020, Regions Bank operated 11 branches in the assessment area, representing 7.1 percent of its branches in Tennessee.
 - As of June 30, 2020, the bank had \$871.7 million in deposits in this assessment area, representing a market share of 11.6 percent and 5.3 percent of Regions Bank's total deposits in Tennessee.

- *Western Tennessee Assessment Area (Benton, Carroll, Dyer, Gibson (REMOVED IN 2019), Hardeman, Haywood, Henderson, Henry, Houston, Humphreys, Lake, Lauderdale, McNairy, Obion, Stewart (REMOVED IN 2019), and Weakley counties)*
 - As of December 31, 2020, Regions Bank operated 14 branches in the assessment area, representing 9.0 percent of its branches in Tennessee.
 - As of June 30, 2020, the bank had \$561.8 million in deposits in this assessment area, representing a market share of 8.2 percent and 3.4 percent of Regions Bank’s total deposits in Tennessee.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Eastern Tennessee	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Middle Tennessee	Consistent	Not Consistent (Below)	Not Consistent (Below)
Western Tennessee	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)

For the lending test, Regions Bank received a rating of high satisfactory for the State of Tennessee. Performance in Middle Tennessee was consistent with the statewide lending test performance, while the performance in Eastern Tennessee and Western Tennessee was below the statewide lending test performance. For the geographic distribution of loans, lending levels were good in Middle Tennessee, and lending levels were adequate in Eastern Tennessee and Western Tennessee. Performance was good for the borrower distribution of loans in all three areas. Community development lending performance in limited-scope nonmetropolitan assessment areas was as follows: the bank was a leader in Middle Tennessee (\$13.9 million) and made an adequate level in Western Tennessee (\$3.3 million) and Eastern Tennessee (\$2.5 million).

For the investment test, Regions Bank received a rating of outstanding for the State of Tennessee. The performance in all three nonmetropolitan limited scope assessment areas was below the bank’s statewide investment test performance. The bank had a significant level of investments in the Western Tennessee assessment area, and the bank had an adequate level of investments in the Eastern Tennessee and Middle Tennessee assessment areas.

For the service test, Regions Bank received a rating of high satisfactory for the State of Tennessee. Service test performance in the three nonmetropolitan assessment areas was weaker than the bank's state performance. The service test performance in Eastern Tennessee nonmetropolitan assessment area was considered adequate, while performance in the Middle Tennessee and Western Tennessee assessment areas was poor. The bank provided an adequate level of community development services in Eastern Tennessee, a limited level in Western Tennessee, and few, if any, in Middle Tennessee. Retail delivery service performance was as follows: adequate in Middle Tennessee and Western Tennessee; and good in Eastern Tennessee.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

Texas

CRA RATING FOR TEXAS: SATISFACTORY

The Lending Test is rated: High Satisfactory

The Investment Test is rated: Outstanding

The Service Test is rated: High Satisfactory

Major factors supporting the rating include the following:

- The geographic distribution of loans reflects adequate penetration throughout the assessment areas, and the distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different revenue sizes.
- The bank is a leader in making community development loans in its Texas assessment areas.
- The bank provides an excellent level of qualified community development investments and grants that demonstrate responsiveness to community development needs of the Texas assessment areas.
- Retail banking services are good in the bank's Texas assessment areas.
- The bank provides a relatively high level of community development services throughout the Texas assessment areas.

SCOPE OF EXAMINATION

A full-scope review was conducted for the following assessment area in Texas:

- Houston

Limited-scope reviews were conducted for the remaining seven assessment areas:

- Austin
- Cass
- Dallas
- Ft. Worth
- Longview
- Nacogdoches-Angelina-Anderson
- Tyler

The time period, products, and affiliates evaluated for these assessment areas are consistent with the scope discussed in the institution section of this report.

DESCRIPTION OF INSTITUTION’S OPERATIONS IN TEXAS

As of June 30, 2020, Regions Bank had \$5.3 billion in deposits in Texas accounting for 4.4 percent of the bank's total deposits. Regions Bank operated 97 branch offices in Texas as of December 31, 2020, representing 7.1 percent of the bank’s total branches. HMDA-reportable lending in Texas accounted for 3.1 percent of total institutional HMDA-reportable lending by number of loans and 6.2 percent by dollar volume. CRA small business lending in Texas accounted for 5.1 percent of the bank’s total CRA small business lending by number of loans and 5.2 percent by dollar volume. Overall, the bank’s HMDA-reportable and CRA lending activity in the state was less than the percentage of total institutional deposits.

The following table shows lending activity from January 1, 2018, through December 31, 2020.

Statewide Summary of Lending Activity
Assessment Areas Located in
Texas

Loan Type	#	%	\$ (000s)	%
HMDA Home Purchase	1,614	18.5%	\$673,396	33.7%

Originations and Purchases

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN TEXAS

Lending Test

The lending test rating in the state of Texas is high satisfactory. Overall, performance in Texas with regard to the geographic distribution of loans reflects adequate penetration throughout the assessment areas. The distribution of loans by borrower income reflects good penetration among customers of different income levels and businesses of different sizes. Additionally, the bank is a leader in making community development loans in Texas.

During the review period, Regions Bank reported 4,197 HMDA-reportable loans and 4,507 small business loans in Texas. The rating for Texas is based on performance in the Houston full-scope assessment area. Approximately 40.9 percent of the bank’s HMDA-reportable and small business lending by number of loans in Texas occurred within this assessment area.

Details of the bank's HMDA-reportable and small business lending and information regarding lending by peers can be found in Appendices F and G.

Geographic and Borrower Distribution

The geographic distribution of Regions Bank's HMDA-reportable and small business loans is adequate, and the distribution of loans by borrower income and revenue size of businesses is good. As noted above, the rating for the state of Texas is derived from the Houston full-scope assessment area. A detailed discussion of the borrower and geographic distribution of lending for this assessment area is included in the next section of this report.

Community Development Lending

Regions Bank is a leader in making community development loans in the state of Texas. During the review period, the bank originated or renewed 261 qualified community development loans totaling \$560.9 million benefiting its Texas assessment areas, including 86 loans totaling \$73.9 million directly benefiting the Houston full-scope assessment area. The bank was a leader in making community development loans in Houston. Moreover, the bank was a leader in making community development loans in five of the seven limited-scope assessment areas, including in Austin and Dallas where the bank has significant presence and/or market share.

The total community development lending includes one loan for \$1.0 million with a P/M/F of serving a broader statewide area that includes all assessment areas in the state. The loan was originated to a statewide CDFI specializing in small business lending.

The bank was considered responsive to the credit and community development needs within the state of Texas. As a result, and in addition to the total community development lending previously noted, the bank received consideration for 30 community development loans totaling \$83.1 million that were outside any of the bank's assessment areas in the state. The most impactful of these activities included 16 loans totaling \$63.2 million directed to affordable housing efforts using LIHTCs. The projects were designed to create 793 units of affordable housing to LMI individuals and/or families across ten different cities in Southeastern Texas. More information on community development loans can be found in the full-scope assessment area section of this report.

Investment Test

The investment test rating for Texas is outstanding.

Regions Bank made an excellent level of qualified investments and contributions totaling \$436.7 million in Texas. The bank had qualified investments of \$435.0 million in the Texas assessment areas, with approximately 80.6 percent of investments acquired during the current review period. In addition, the bank made qualified contributions in the assessment areas totaling \$1.7 million. Further, the bank made investments of \$1.0 million and \$26,665 in contributions that benefit a broader statewide area that includes the Texas assessment areas. Notable statewide investment and contributions include a \$1.0 million stock purchase in a statewide CDFI

providing small business financing and \$26,665 in donations to two other CDFIs that provide small business lending and assistance across the state of Texas.

Houston was the assessment area in the state reviewed using full-scope procedures. Approximately 26.2 percent of combined investment and contribution activity was in this assessment area, compared to 32.7 percent of deposits in the market as of June 30, 2021. Performance in the assessment area was excellent. The bank was considered responsive to community credit needs in the state. Therefore, positive consideration was given for \$71.9 million in investments and \$26,684 in contributions that benefit a broader statewide area, without a purpose, mandate, or function of serving the Texas assessment areas. These investments support affordable housing, including investments in LIHTC projects and mortgage-backed securities.

Additional details regarding investments and contributions can be found in the full-scope assessment area section.

Service Test

The service test rating for Texas is high satisfactory.

Retail Services

Overall, the bank's retail service performance is considered good in Texas. However, the Houston full-scope assessment area is the primary driver of the statewide rating, and as a result, delivery systems, including ATMs and branch office locations, may be considered inaccessible to portions of the bank's geographies and individuals of different income levels. This is primarily due to the limited number of branches in or near low- and moderate-income geographies in the Houston full-scope assessment area. Overall, banking services and hours of operations do not vary in a way that inconveniences the bank's assessment areas, including low- and moderate-income geographies and/or low- and moderate-income individuals. The record of opening and closing of branch offices improved the accessibility of the bank's delivery systems, particularly for low- and moderate-income geographies and/or low- and moderate-income individuals. During the review period, the bank opened 36 branch offices. Of the 36 branch offices opened, 33 were in the Houston assessment area. The bank opened three branch offices in low-income tracts, eight in moderate-income tracts, four in middle-income tracts and, 21 in upper-income tracts in Texas. The bank closed 11 branch offices throughout the state; of those closed, two were in low-income tracts, one in a moderate-income tract, two in middle-income tracts, and six in upper-income tracts.

Community Development Services

Regions Bank provides a relatively high level of community development services that benefit low- and moderate-income residents and small businesses in Texas. During the review period, employees engaged in 429 qualified service activities totaling 4,651 hours in Texas assessment areas. A significant portion of community development services were provided in the Houston full-scope assessment area, where performance was good. Employees engaged in 2,920 service hours in limited-scope assessment areas. Finally, bank employees engaged in 65 service hours that benefited a broader statewide or regional area, including the bank's assessment areas.

Additional detail on the bank's retail and community development services can be found in the full-scope assessment area section of this report.

**METROPOLITAN AREA
FULL-SCOPE REVIEW**

**DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE HOUSTON, TEXAS ASSESSMENT
AREA**

Overview

The Houston assessment area contains five of the nine counties in the Houston-The Woodlands-Sugar Land MSA –Brazoria, Fort Bend, Galveston, Harris, and Montgomery counties. Regions Bank operates 52 branches in the assessment area as of December 31, 2020, which account for 32.1 percent of the deposits statewide and 31.6 percent of the bank’s total statewide HMDA-reportable and CRA small business loans (by dollar).

The Houston assessment area is a highly competitive market dominated by national and regional banks. According to the FDIC Summary of Deposits Report dated June 30, 2020, Regions Bank ranked 18th out of 89 financial institutions operating in the assessment area with 0.6 percent deposit market share and \$1.7 billion in deposits.⁹⁵⁸ The top financial institutions in the assessment area by deposit market share were JPMorgan Chase Bank with 48.0 percent, followed by Wells Fargo Bank at 8.8 percent, and Bank of America at 7.9 percent.⁹⁵⁹

Regions Bank’s loan production accounted for less than 1.0 percent of the total CRA-reportable and HMDA-reportable lending activity in the assessment area from 2018 through 2020. During this period, HMDA-reportable lending activity in the assessment area was dominated by Wells Fargo Bank, JPMorgan Chase Bank, and Quicken Loans, LLC. Additionally, CRA-reportable lending activity in the assessment area was dominated by JPMorgan Chase Bank, American Express, and Bank of America.

Population and Income Characteristics

The Houston assessment area has experienced robust growth since the last decennial census. According to U.S. census data, the population of the assessment area was 6.9 million in 2020, which is a 20.2 percent increase from the 2010 census.⁹⁶⁰ While all the counties in the assessment area posted double-digit population increases, Fort Bend and Montgomery counties experienced the strongest with 40.6 percent and 36.1 percent population gains, respectively.⁹⁶¹ Harris County is the most populous county in the assessment area with 4.7 million people.⁹⁶² Its county seat is Houston, which is the 4th most populous city in the country with 2.3 million residents.⁹⁶³

⁹⁵⁸ “Offices and Deposits of All FDIC-Insured Institutions Deposit Market Share Report.” *Federal Deposit Insurance Corporation*, 30 June 2020, <https://www7.fdic.gov/sod/sodMarketBank.asp?barItem=2>. Accessed 23 Feb. 2022.

⁹⁵⁹ *Ibid.*

⁹⁶⁰ “QuickFacts.” *United States Census Bureau*, <https://www.census.gov/quickfacts/fact/table/montgomerycountytexas,harriscountytexas,fortbendcountytexas,galvestoncountytexas,azoriacountytexas,US/PST045221>. Accessed 15 Feb. 2022.

⁹⁶¹ *Ibid.*

⁹⁶² *Ibid.*

⁹⁶³ “About Houston Facts and Figures.” *City of Houston Texas*, <https://www.houstontx.gov/about/houston/houstonfacts.html>. Accessed 15 Feb. 2022.

According to 2020 FFIEC census data, the assessment area is made up of 1,039 census tracts; 158 tracts (15.2 percent) are low-income, 302 tracts (29.1 percent) are moderate-income, 258 tracts (24.8 percent) are middle-income, 312 tracts (30.0 percent) are upper-income and 9 tracts (0.9 percent) have unknown income levels.⁹⁶⁴

For purposes of classifying borrower income, this evaluation uses the FFIEC estimated median family income. The following table provides a breakdown of the estimated annual family income for each income category (low, moderate, middle, and upper). As shown, the median family income for the Houston MSA increased from \$75,600 in 2018 to \$80,000 in 2020. However, there is considerable variation in the median family income for the counties located throughout the assessment area. Harris County had the lowest median family income at \$62,210 and Fort Bend County had the highest median family income at \$99,214.⁹⁶⁵ Additionally, 40.5 percent of families in the assessment area were considered low- to moderate-income.⁹⁶⁶

Borrower Income Levels
Houston-The Woodlands-Sugar Land, TX MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2018	\$75,600	0 - \$37,799	\$37,800 - \$60,479	\$60,480 - \$90,719	\$90,720 - & above
2019	\$77,100	0 - \$38,549	\$38,550 - \$61,679	\$61,680 - \$92,519	\$92,520 - & above
2020	\$80,000	0 - \$39,999	\$40,000 - \$63,999	\$64,000 - \$95,999	\$96,000 - & above

Concerning poverty, 12.9 percent of families in the assessment area live below poverty according to 2020 FFIEC census data. Of the five counties in the assessment area, Fort Bend had the lowest percentage of families living in poverty at 5.9 percent, while Harris County had the highest percentage of families living in poverty with 13.0 percent.⁹⁶⁷ Between 2015 and 2019, the statewide poverty rate was 11.3 percent, and the national poverty rate was 9.5 percent.⁹⁶⁸ A significant percentage of families in low- and moderate-income areas live below the poverty level. Specifically, 35.9 percent of families in low-income tracts and 19.5 percent of families in moderate-income tracts live below the poverty level.⁹⁶⁹ The high poverty rates and the concentration of families living below the poverty level in low- and moderate-income tracts may create challenges for lending in those tracts.

Economic Conditions

The Houston metropolitan area is primarily recognized for having a large presence of energy-related companies, including refineries and petrochemical plants.⁹⁷⁰ With 4,600 energy-related firms located in the area, Houston is

known as the Energy Capital of the World.⁹⁷¹ Even though there is a significant number of energy-related firms in Houston, the area is also home to a number of growing industries including aerospace and aviation, advanced manufacturing, life sciences and biotechnology, digital technology, and transportation and logistics.

The assessment area experienced economic growth during 2018 and 2019. In October 2018, the U.S. Department of Labor reported that the Houston-The Woodlands-Sugar Land MSA had a total of 3,158,800 nonfarm employment, which is an increase of 117,800 or 3.9 percent from one year earlier.⁹⁷² Of the total job growth, the professional and business services sector and the construction sector added the most jobs at 30,600 and 25,600, respectively.⁹⁷³ In 2018, the Houston-The Woodlands-Sugar Land MSA was one of the United States 12 largest MSAs; during this year, the Houston-The Woodlands-Sugar Land MSA had added the largest number of jobs out of all 12 of the nation's largest MSAs.⁹⁷⁴

During 2019, the Houston MSA experienced further job growth. The U.S. Department of Labor reported that the MSA had a total of 3,169,300 jobs in July 2019, which is an increase of 93,600 (3.0 percent) from one year earlier.⁹⁷⁵ From July 2018 to July 2019, the professional and business services sector was the leader in job growth by adding 24,500 jobs. The manufacturing sector was the second leader in job growth by adding 11,000 jobs.⁹⁷⁶ In July 2019, the Houston-The Woodlands-Sugar Land MSA was one of the 12 largest MSAs in the United States, and it ranked 3rd out of the 12 MSAs for adding the largest number of jobs over the year.⁹⁷⁷

Despite the economic growth experienced in the Houston MSA from 2018 through 2019, this activity declined in 2020 due to the negative impact that the COVID-19 global pandemic had on the economy. In March and April of 2020, the pandemic caused the Houston area to lockdown for public health safety purposes. During this period, Houston lost 367,000 jobs; the number of jobs lost during March 2020 and April 2020 surpassed the 212,000 jobs lost during Houston's oil bust from 1982-1987.⁹⁷⁸ University of Houston's Institute for Regional Forecasting indicates that 70 percent of the lockdown's job losses in March 2020 and April 2020 came from the health care, retail, food service, finance, private education, arts and entertainment, accommodation, air transportation, and other services sectors.⁹⁷⁹ Due to job losses, unemployment claims surged from slightly above 4,000 claims for the first week of March to 76,000 for the first week of April.⁹⁸⁰ When Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act in late-March of 2020, the act's Paycheck Protection Program (PPP)

provided \$9.4 billion in financial assistance to businesses in the Houston area.⁹⁸¹ As Houston’s economy reopened in May 2020, Houston recouped 78,200 jobs during the month as well as 48,500 job in June.⁹⁸² By October of 2020, the Houston area had recouped 176,600 jobs, which accounted for 50.2 percent of the total jobs lost during the start of the pandemic.⁹⁸³

Houston has various industries that offer employment opportunities in the area. Houston’s diverse industry sectors include aerospace and aviation, advanced manufacturing, energy, life sciences and biotechnology, digital technology, and transportation and logistics.⁹⁸⁴ Additionally, Houston has more than 25 Fortune 500 Companies who are headquartered in the area; overall, Houston ranks 3rd among metro areas in the United States with the most Fortune 500 headquarters.⁹⁸⁵ The biggest employers in Houston are H-E-B, Houston Methodist, Memorial Hermann Health System, UT MD Anderson Cancer Center, and Walmart.⁹⁸⁶ These employers have more than 20,000 employees.⁹⁸⁷ The second largest employers in the area are ExxonMobil, HCA Houston Healthcare, Kroger, Landry’s, Schlumberger, Shell Oil Co., Texas Children’s Hospital, United Airlines, UT Health Science Center, and Wood Group. These employers have 10,000 to 19,999 employees.⁹⁸⁸

Small businesses play an important role in Houston’s economy. According to 2020 Dun & Bradstreet data, there were 341,944 businesses within the Houston assessment area, 91.6 percent of which had total annual revenues less than or equal to \$1 million and were considered to be small businesses.⁹⁸⁹ Additionally, 18.8 percent of small businesses in the assessment area were in moderate-income tracts, while there were fewer in low-income tract at 9.6 percent.⁹⁹⁰ According to CRA lending volume for all reporters in the assessment area, lending to small businesses posted growth from 2018 to 2019. During that time, there was a 22.7 percent increase in lending to small businesses. From 2019 to 2020, there was a decline in the percentage of lending to small businesses. During this period, lending volume decreased 8.9 percent.

The assessment area had a period of falling and rising unemployment rates during the review period. As shown in the chart below, the unemployment rate decreased between 2018 and 2019 for the Houston MSA as well as the counties comprising the assessment area. In 2018, the unemployment rate for the Houston MSA was 4.4 percent. For 2019, the unemployment rate for the Houston MSA decreased to 3.8 percent. In 2020, unemployment rates in the assessment area, Houston MSA, State of Texas, and nationwide collectively increased because of the negative impact the COVID-19 pandemic had on the U.S. economy.⁹⁹¹ For 2020, the unemployment rate in the

MSA and assessment area was 8.6 percent, which is higher than the unemployment rate at the state-level of 7.6 percent.

According to 2020 FFIEC census data, there were 2,329,992 housing units located in the assessment area, 54.4 percent of which were owner-occupied, 36.0 percent were rental units, and 9.6 percent were vacant. In low-income census tracts, only 23.3 percent of housing units were owner-occupied, while 45.5 percent were owner-occupied in moderate-income tracts. The median age of the housing stock across the assessment area was 35 years, while the median age was 47 years in low-income census tracts and 44 years in moderate-income tracts.⁹⁹²

The housing market in Houston has seen an increase in prices from January 2018 to January 2020. Specifically, in January 2018, the median sales price for a single-family home was \$218,950.⁹⁹³ By January 2019, the median sales price for a single-family home grew 2.3 percent to \$224,000.⁹⁹⁴ In January 2020, the median sales price for a single-family home increased 4.9 percent to \$235,000.⁹⁹⁵ Overall, the median sales price for single-family homes in Houston grew 7.3 percent during the review period.

Homeownership for low- and moderate-income families in the Houston area is becoming less affordable. Using the assumption that a borrower can obtain a loan for approximately three times the borrower’s annual income and

using 2020 FFIEC median family income figures for the assessment area, affordable homes would be priced at \$207,594 or below.⁹⁹⁶ As stated previously, the median home price in the region was \$235,00 in January 2020.

Houston has experienced a decline in the median monthly rental costs for apartments. In January 2018, the median rental cost for a two-bedroom apartment was \$1,479.⁹⁹⁷ By January 2019, the median monthly rental cost for a two-bedroom apartment decreased to \$1,410.⁹⁹⁸ There was a further decline in monthly rental costs in January 2020 when the median monthly rental cost for a two-bedroom apartment was \$1,308.⁹⁹⁹ Based on this information, the median monthly rent for a two-bedroom apartment decreased 11.6 percent from January 2018 to January 2020.

Demographic Characteristics by Census Tract

The following table presents key demographic and business information used to help develop a performance context for the assessment area. The data reflects the 2020 FFIEC census data and the 2020 Dun & Bradstreet data used to analyze the bank's CRA performance. Certain components of the data in the table are discussed in this evaluation as they apply to specific parts of the analysis.

⁹⁹⁶ According to the 2020 FFIEC census data, the median family income for the assessment area was \$69,198.

2020 FFIEC Census Data and 2020 D&B Information

Credit and Community Development Needs

To better understand the community development and economic landscapes, community development professionals were contacted. These individuals discussed the various needs and opportunities across the region as well as how financial institutions can be responsive to local community development needs through lending, investment, and/or service activities.

Two community contacts who work in an organization engaged in small business development were interviewed. These individuals indicated that the COVID-19 pandemic had a severe impact on small and minority-owned businesses. It was mentioned that stable capital, funding for small businesses, and resources were desperately needed. The contacts also talked about the performance of local financial institutions. It was mentioned that some banks provide technical assistance, funds, education grants, and educational programs. However, the contacts mentioned that there is an opportunity for local financial institutions to provide funds and/or grants for different affordable housing projects in the area.

Another community contact stated that the population alone in the city of Houston is growing on average of 500 to 600 people each month, with a significant increase in the immigrant population. Additionally, the demand for affordable housing has been a struggle to keep up with, particularly in the wake of the Hurricane Harvey and COVID-19 pandemic, which has caused both increased costs in homeownership and rental units. The contact stated that low- to-moderate income individuals face several barriers to homeownership and to meet basic financial needs, including rental assistance, sufficient access to down payment assistance programs, and technical assistance to rectify inaccuracies on their credit reports as those can have a domino effect on employment, rental, or homeownership opportunities.

The contact stated that the top three needs in the area are access to banking services, access to credit, and access to loan products to both acquire and maintain homes. The contact explained that there is a significant amount of unbanked people in the Houston area, partly due to obstacles such as lack of transportation to banks or previous banking issues. In addition, many homeless individuals who receive benefits, do not have the resources needed to access their benefits. The contact mentioned that the unbanked are utilizing cash service stations such as liquor stores and filling stations for their banking needs, further reducing their income due to fees to access funds. Additionally, the contact discussed how predatory lending, such as high interest payday lending and title loans, has been a concern as there is a lack of financial literacy, especially amongst Limited English Proficient (LEP) persons, to understand the actual costs of this type of lending.

In addition, the need for financial institutions to offer special products that are more tailored to affordable housing and flood relief are needed. There is a need for signature loans, which can serve to provide new homeowners with credit to make repairs, help low- and moderate-income people “get off their feet,” and to provide immediate relief to residents who suffered damages caused by natural disasters. The contact did mention that there were three banks that offered signature loans years ago. However, only one bank offers these loans now. The contact mentioned that there is a need for loans to help with home repairs; she stated that loan amounts from \$10,000 to \$15,000 could help low- and moderate-income people make routine repairs to their homes. Also, the contact was concerned with appraisal valuation issues specifically when it comes newly

constructed homes in low- to moderate-income areas which were making equity less accessible to LMI individuals. Lastly, the contact stated that if there was a program to increase closing costs credits up to \$15,000, then the program would help get more individuals in homes.

**CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE HOUSTON, TEXAS
ASSESSMENT AREA**

LENDING TEST

Regions Bank's lending performance in the Houston assessment area is good. The geographic distribution of loans reflects adequate penetration throughout the assessment area, and the distribution of loans reflects good penetration among borrowers of different income levels and businesses of different revenue sizes. In addition, the bank is a leader in making community development loans in the Houston assessment area.

The analysis included 1,910 CRA small business loans and 1,419 HMDA-reportable loans reported by the bank in the Houston assessment area during the review period. Therefore, CRA small business lending received greater weight in determining the bank's lending test rating in the assessment area. Within HMDA-reportable lending, greater weight was assigned to home refinance loans over the other HMDA products given their relative share of all HMDA lending in this assessment area.

The Houston assessment area accounted for 30.9 percent of Regions Bank's total HMDA-reportable lending by dollar volume in Texas and 34.3 percent of its total statewide CRA small business lending by dollar volume during the review period. In comparison, 32.1 percent of Regions Bank's Texas deposits are in the Houston assessment area.

For the lending test analysis, lending performance in low-, moderate-, middle-, and upper-income census tracts and to low-, moderate-, middle-, and upper-income borrowers was considered for each product; however, comments for activity in middle- and upper-income tracts and to middle- and upper-income borrowers are only included when they were material to the outcome of the analyses. Details of the bank's mortgage and small business lending and information regarding lending by peers can be found in Appendix F.

Geographic Distribution of Loans

For this analysis the geographic distribution of small business and HMDA-reportable lending, including both originations and purchases, was compared with available demographic information. Performance context information and aggregate lending data were also taken into consideration. For instance, unemployment rates, poverty rates, the level of owner-occupied units, and the volume of small businesses in low- and moderate-income census tracts were issues considered when assessing the bank's lending performance. Considering all of these factors, Regions Bank's geographic distribution of loans reflects adequate penetration throughout the assessment area.

Home Purchase Loans

Of the 1,419 HMDA-reportable loans analyzed, 599 loans (42.2 percent) were home purchase loans. Of the total home purchase loans made, 24 loans (4.0 percent) were located in low-income tracts, and 76 loans (12.7 percent) were located in moderate-income tracts.

Home purchase lending in low-income tracts is good. From 2018 through 2020, Regions Bank's home purchase lending in low-income tracts (4.0 percent) was similar to the percentage of owner-occupied units (5.4 percent). In 2018, the bank's home purchase lending in low-income tracts (3.2 percent) was slightly above the aggregate lending performance (2.8 percent) in these tracts. In 2019, Regions Bank's home purchase lending in low-income tracts (5.0 percent) was significantly above the aggregate lending performance (2.8 percent) in these tracts. In 2020, the bank's home purchase lending in low-income tracts (4.1 percent) was above the aggregate lending performance (2.8 percent) in these tracts.

Home purchase lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home purchase lending in moderate-income tracts (12.7 percent) was below the percentage of owner-occupied units (21.0 percent) in these tracts. In 2018, the bank's home purchase lending in moderate-income tracts (12.8 percent) was similar to the aggregate lending performance (13.0 percent) in these tracts. In 2019, Regions Bank's home purchase lending in moderate-income tracts (12.5 percent) was similar to the aggregate lending performance (13.2 percent) in these tracts. In 2020, the bank's home purchase lending in moderate-income tracts (12.7 percent) was similar to the aggregate lending performance (12.7 percent) in these tracts.

Home Refinance Loans

Regions Bank made 604 home refinance loans from 2018 through 2020, which represents 42.6 percent of the HMDA-reportable loans analyzed. Of the total home refinance loans made, 10 loans (1.7 percent) were located in low-income tracts, and 80 loans (13.2 percent) were located in moderate-income tracts.

Home refinance lending in low-income tracts is poor. From 2018 through 2020, Regions Bank's home refinance lending in low-income tracts (1.7 percent) was below the percentage of owner-occupied units (5.4 percent) in these tracts. In 2018, the bank's home refinance lending in low-income tracts (2.2 percent) was slightly below the aggregate lending performance (2.9 percent) in these tracts. In 2019, Regions Bank's home refinance lending in low-income tracts (0.8 percent) was significantly below the aggregate lending performance (2.7 percent) in these tracts. In 2020, the bank's home refinance lending in low-income tracts (1.7 percent) was slightly below the aggregate lending performance (2.0 percent) in these tracts.

Home refinance lending in moderate-income tracts is adequate. From 2018 through 2020, Regions Bank's home refinance lending in moderate-income tracts (13.2 percent) was below the percentage of owner-occupied units (21.0 percent) in these tracts. In 2018, the bank's home refinance lending in moderate-income tracts (12.6 percent) was slightly below the aggregate lending performance (15.6 percent) in these tracts. In 2019, Regions Bank's home refinance lending in moderate-income tracts (18.9 percent) was significantly above the aggregate lending performance (12.2 percent) in these tracts. In 2020, the bank's home refinance lending in moderate-income tracts (11.5 percent) was above the aggregate lending performance (8.8 percent) in these tracts.

Home Improvement Loans

Regions Bank made 216 home improvement loans from 2018 through 2020, which represents 15.2 percent of the HMDA-reportable loans analyzed. Of the total home improvement loans made, 13 loans (6.0 percent) were located in low-income tracts, and 25 loans (11.6 percent) were located in moderate-income tracts.

Home improvement lending in low-income tracts is excellent. From 2018 through 2020, Regions Bank's home improvement lending in low-income tracts (6.0 percent) was above the percentage of owner-occupied units (5.4 percent) in these tracts. In 2018, the bank's home improvement lending in low-income tracts (6.1 percent) was significantly above the aggregate lending performance (3.0 percent) in these tracts. In 2019, Regions Bank's home improvement lending in low-income tracts (7.9 percent) was significantly above the aggregate lending performance (3.1 percent) in these tracts. In 2020, the bank's home improvement lending in low-income tracts (4.4 percent) and was significantly above the aggregate lending performance (2.1 percent) in these tracts.

Home improvement lending in moderate-income tracts is poor. From 2018 through 2020, Regions Bank's home improvement lending in moderate-income tracts (11.6 percent) was below the percentage of owner-occupied units (21.0 percent) in these tracts. In 2018, the bank's home improvement lending in moderate-income tracts (8.2 percent) was below the aggregate lending performance (12.6 percent) in these tracts. In 2019, Regions Bank's home improvement lending in moderate-income tracts (19.7 percent) was above the aggregate lending performance (13.3 percent) in these tracts. In 2020, the bank's home improvement lending in moderate-income tracts (6.6 percent) was below the aggregate lending performance (11.6 percent) in these tracts.

Small Business Loans

Regions Bank made 1,910 small business loans in the assessment area from 2018 through 2020. Of the total number of small business loans made, 245 loans (12.8 percent) were located in low-income tracts, and 293 loans (15.3 percent) were located in moderate-income tracts.

Small business lending in low-income tracts is good. From 2018 through 2020, Regions Bank's small business lending in low-income tracts (12.8 percent) was above the percentage of businesses (9.9 percent) in these tracts. In 2018, the bank's small business lending in low-income tracts (12.6 percent) was above the aggregate lending performance (10.0 percent) in these tracts. In 2019, Regions Bank's small business lending in low-income tracts (15.4 percent) was significantly above the aggregate lending performance (9.8 percent) in these tracts. In 2020, the bank's small business lending in low-income tracts (11.4 percent) was slightly above the aggregate lending performance (9.8 percent) in these tracts.

Small business lending in moderate-income tracts is poor. From 2018 through 2020, Regions Bank's small business lending in moderate-income tracts (15.3 percent) was similar to the percentage of businesses (19.0 percent) in these tracts. In 2018, the bank's small business lending in moderate-income tracts (14.4 percent) was slightly below the aggregate lending performance (17.8 percent) in these tracts. In 2019, Regions Bank's small business lending in moderate-income tracts (16.2 percent) was similar to the aggregate lending performance (17.5 percent) in these tracts. In 2020, the bank's small business lending in moderate-income tracts (15.4 percent) was slightly below the aggregate lending performance (17.9 percent) in these tracts.

Lending to Borrowers of Different Incomes and Businesses of Different Sizes

The distribution of loans based on borrower's income or gross annual revenues is good. For this analysis, the distribution of small business lending across business revenue sizes and HMDA-reportable lending across borrower income levels was compared to available demographic information. Performance context issues were also considered as well as the performance of other banks.

Home Purchase Loans

Home purchase lending to low-income borrowers is poor. From 2018 through 2020, Regions Bank's home purchase lending to low-income borrowers (1.8 percent) was below the percentage of low-income families (24.4 percent). In 2018, the bank's home purchase lending to low-income borrowers (2.7 percent) was similar to the aggregate lending performance (2.9 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to low-income borrowers (2.5 percent) was slightly below the aggregate lending performance (2.9 percent) to these borrowers. In 2020, the bank's home purchase lending to low-income borrowers (0.5 percent) was significantly below the aggregate lending performance (3.1 percent) to these borrowers.

Home purchase lending to moderate-income borrowers is poor. From 2018 through 2020, Regions Bank's home purchase lending to moderate-income borrowers (9.7 percent) was below the percentage of moderate-income families (16.0 percent). In 2018, the bank's home purchase lending to moderate-income borrowers (6.8 percent) was significantly below the aggregate lending performance (15.1 percent) to these borrowers. In 2019, Regions Bank's home purchase lending to moderate-income borrowers (8.8 percent) was below the aggregate lending performance (16.3 percent) to these borrowers. In 2020, the bank's home purchase lending to moderate-income borrowers (13.2 percent) was below the aggregate lending performance (18.6 percent) to these borrowers.

Home Refinance Loans

Home refinance lending to low-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to low-income borrowers (4.5 percent) was below the percentage of low-income families (24.4 percent). In 2018, the bank's home refinance lending to low-income borrowers (9.6 percent) was above the aggregate lending performance (7.0 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to low-income borrowers (8.2 percent) was significantly above the aggregate lending performance (4.3 percent) to these borrowers. In 2020, the bank's home refinance lending to low-income borrowers (1.2 percent) was below the aggregate lending performance (1.7 percent) to these borrowers.

Home refinance lending to moderate-income borrowers is good. From 2018 through 2020, Regions Bank's home refinance lending to moderate-income borrowers (12.4 percent) was similar to the percentage of moderate-income families (16.0 percent). In 2018, the bank's home refinance lending to moderate-income borrowers (13.3 percent) was similar to the aggregate lending performance (14.6 percent) to these borrowers. In 2019, Regions Bank's home refinance lending to moderate-income borrowers (16.4 percent) was significantly above the aggregate lending performance (10.1 percent) to these borrowers. In 2020, the bank's home refinance lending to moderate-income borrowers (10.7 percent) was above the aggregate lending performance (7.7 percent) to these borrowers.

Home Improvement Loans

Home improvement lending to low-income borrowers is adequate. From 2018 through 2020, Regions Bank's home improvement lending to low-income borrowers (5.6 percent) was below the percentage of low-income families (24.4 percent). In 2018, the bank's home improvement lending to low-income borrowers (2.0 percent) was significantly below the aggregate lending performance (5.0 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to low-income borrowers (10.5 percent) was significantly above the aggregate lending performance (5.2 percent) to these borrowers. In 2020, the bank's home improvement lending to low-income borrowers (3.3 percent) was slightly below the aggregate lending performance (3.9 percent) to these borrowers.

Home improvement lending to moderate-income borrowers is good. From 2018 through 2020, Regions Bank's home improvement lending to moderate-income borrowers (13.9 percent) was similar to the percentage of moderate-income families (16.0 percent). In 2018, the bank's home improvement lending to moderate-income borrowers (16.3 percent) was above the aggregate lending performance (12.0 percent) to these borrowers. In 2019, Regions Bank's home improvement lending to moderate-income borrowers (13.2 percent) was slightly above the aggregate lending performance (11.7 percent) to these borrowers. In 2020, the bank's home improvement lending to moderate-income borrowers (13.2 percent) was above the aggregate lending performance (10.0 percent) to these borrowers.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good. From 2018 through 2020, 59.5 percent of the bank's small business loans were originated to businesses with revenues of \$1 million or less. By comparison, 91.6 percent of total businesses in the assessment area are classified as small businesses. In 2018, the bank's small business lending to small businesses (64.1 percent) was significantly above the aggregate lending performance (40.5 percent) to these businesses. In 2019, the bank's small business lending to small businesses (65.4 percent) was above the aggregate lending performance (45.0 percent) to these businesses. In 2020, the bank's small business lending to small businesses (52.8 percent) was above the aggregate lending performance (37.8 percent) to these businesses. Lastly, 95.3 percent of small business loans were originated in amounts of \$250,000 or less, indicating a willingness to lend in the smaller amounts that are typically requested by small businesses.

Community Development Lending

Regions Bank is a leader in making community development loans in the Houston assessment area relative to its capacity and opportunity in the market. During the review period, the bank originated or renewed 5 community development loans totaling \$57.4 million and 81 community development PPP loans totaling \$16.5 million. Specifically, the bank originated or renewed \$54.4 million in affordable housing initiatives; \$13.1 million towards revitalization and stabilization efforts both through the PPP and outside of the PPP; \$3.4 million to support economic development; and \$3.0 million towards community services benefiting LMI individuals and families.

Some of the qualified loans were impactful and responsive to assessment area needs, particularly in the area of affordable housing. Some of the most impactful loans directly benefiting the assessment area include:

- Three loans totaling \$48.9 million for acquisition of an apartment complex using LIHTCs. The loans were originated for different phases of the project and specifically earmarked 51 percent of the units to LMI families. In doing so, 194 units of affordable housing were created.
- A \$5.5 million loan for new construction of apartments using LIHTCs. The project was designed to create 86 new units of affordable housing for low-income individuals and/or families throughout the assessment area.

INVESTMENT TEST

Regions Bank's investment performance in the Houston assessment area is excellent. The bank made an excellent level of investments and contributions totaling \$114.6 million in the assessment area. The bank's investments (excluding contributions) totaled \$113.6 million, of which \$82.0 million (72.2 percent) were new investments acquired during the review period. All of the bank's investments during the review period provided financing for affordable housing. The bank invested \$65.5 million in mortgage-backed securities secured by loans for multifamily rental housing. Additionally, the bank invested \$16.5 million in two LIHTC projects that provided 141 units of affordable housing. The bank also held investments from prior review periods, including investments in two LIHTC projects in 2018 that provided about 400 units of affordable housing. These two investments had a total book value of \$26.4 million at the end of the evaluation period. The remaining prior period investments were all mortgage-backed securities.

Regions Bank made \$962,400 in contributions that demonstrated excellent responsiveness to credit and community development needs in the Houston assessment area. Specifically, the bank provided grants totaling \$382,500 to promote economic development, \$280,000 to organizations that provide community services targeted to low- and moderate-income individuals, \$250,000 to support the revitalization and stabilization of LMI communities, and \$50,000 for affordable housing. Overall, approximately \$240,000 in donations were responsive to the COVID-19 pandemic, providing support for organizations providing emergency and recovery assistance to LMI individuals, small businesses, and nonprofits. Examples of notable donations include:

- A \$250,000 contribution to support Houston's Complete Communities initiative to revitalize and stabilize LMI neighborhoods. Regions' funding supported the development of two Financial Empowerment Centers that are located in lower-income neighborhoods. These centers will provide free financial coaching to area residents;
- A \$50,000 contribution to a CDFI to support the organization's COVID-relief program for small businesses;
- Three contributions totaling \$30,000 to support an entrepreneurship education program;
- Contributions totaling \$124,000 to a nonprofit organization that provided resources to small businesses during the COVID-19 pandemic and works to increase the economic health of communities in need of revitalization and redevelopment; and

- Donations totaling \$15,500 to a nonprofit that develops affordable housing and offers related programming. Regions' funding helped support homebuyer education and general operational support for the organization.

Performance in the Houston assessment area was further enhanced by statewide investments that benefited all assessment areas in the state, including Houston. The bank had \$1.0 million in statewide investments and \$26,700 in statewide contributions that were discussed earlier in the report.

SERVICE TEST

Regions Bank's service test performance in the Houston full-scope assessment area is good.

Retail Services

Retail banking services are good in the Houston full-scope assessment area.

The distribution of 52 branch offices and 62 full-service ATMs as of December 31, 2020, was compared to the distribution of households and businesses among the tract categories within the assessment area. The bank has four branches in low-income tracts representing 7.7 percent of total branches, compared to 11.7 percent of households and 9.9 percent of businesses located in the same geography. The proportion of the bank's branches in moderate-income tracts was less than the percentage of households and greater than the percentage of businesses in the same geography: 21.2 percent of total branches were in moderate-income tracts compared to 24.6 percent of households and 19.0 percent of businesses. Overall, the bank's branch distribution relative to available demographic information may limit accessibility to portions of the bank's geographies and individuals of different income levels in the assessment area and may therefore be considered inaccessible.

During the review period, Regions Bank opened two branches and two full-service ATMs in low-income tracts. Additionally, eight branches and seven full-service ATMs were opened in moderate-income tracts. Regarding closures, the bank closed one branch and one full-service ATM in a moderate-income tract. Overall, the bank's record of opening and closing of branches has improved the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals in the assessment area. Lastly, banking services and hours of operation do not vary in a way that inconveniences its assessment area, particularly low- and moderate-income geographies and/or low- and moderate-income individuals.

2020 FFIEC Census Data, 2020 D&B Info, and 2015 ACS Data
 Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
 DTP - Drive thru only is a subset of total branches
 SA = Stand Alone ATM is a subset of total ATMs

Community Development Services

Regions Bank provides a relatively high level of community development services in the Houston assessment area. During the review period, Regions Bank employees engaged in 133 qualified service activities totaling 1,731 hours. Regions Bank’s community development service activities benefited organizations that provide affordable housing, community services, economic development, and revitalization and stabilization to low- and moderate-income individuals, geographies, and small businesses in the Houston assessment area. Of the bank’s total service hours, 532 hours supported homebuyer education and financial education for adults and youth. Additionally, bank employees provided 1,046 hours serving on boards and committees of qualified nonprofit organizations.

Highlighted below are examples of community development activities undertaken during the review period:

- Bank employees provided financial education to clients of a large community development organization in the Houston assessment area. The organization provides career counseling, job placement and training, Volunteer Income Tax Assistance services, education centers, and health clinics to LMI individuals and LMI neighborhoods.
- A bank employee provided 140 hours serving on the advisory board for an initiative created by the mayor’s office to revitalize and stabilize Houston’s LMI neighborhoods. The goal of the initiative is to provide equity for all residents and business owners regarding access to quality services and amenities.
- Several Regions employees provided over 78 hours to a nonprofit organization that provides social services for LMI families, including Early Head Start programs, childcare, after-school care, free meals and activities for seniors as well as financial education classes. Bank employees served on the board of directors and provided financial education classes to participants of the programs.

Given the bank’s size and scope in the assessment area, the bank demonstrated good responsiveness to community development needs in the Houston assessment area.

METROPOLITAN AREAS
LIMITED-SCOPE REVIEW

The following assessment areas were reviewed using limited-scope examination procedures.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE TEXAS METROPOLITAN
ASSESSMENT AREAS

- *Austin Assessment Area (Travis and Williamson counties)*
 - As of December 31, 2020, Regions Bank operated 10 branches in the assessment area, representing 10.3 percent of its branches in Texas.
 - As of June 30, 2020, the bank had \$607.1 million in deposits in this assessment area, representing a market share of 1.3 percent and 11.5 percent of Regions Bank's total deposits in Texas.
- *Dallas Assessment Area (Collin, Dallas, Denton, and Rockwell counties)*
 - As of December 31, 2020, Regions Bank operated 12 branches in the assessment area, representing 12.4 percent of its branches in Texas.
 - As of June 30, 2020, the bank had \$1.6 billion in deposits in this assessment area, representing a market share of 0.3 percent and 30.6 percent of Regions Bank's total deposits in Texas.
- *Ft. Worth Assessment Area (Tarrant County)*
 - As of December 31, 2020, Regions Bank operated six branches in the assessment area, representing 6.2 percent of its branches in Texas.
 - As of June 30, 2020, the bank had \$322.9 million in deposits in this assessment area, representing a market share of 0.6 percent and 6.1 percent of Regions Bank's total deposits in Texas.
- *Longview Assessment Area (Gregg County)*
 - As of December 31, 2020, Regions Bank operated four branches in the assessment area, representing 4.1 percent of its branches in Texas.
 - As of June 30, 2020, the bank had \$171.9 million in deposits in this assessment area, representing a market share of 4.3 percent and 3.3 percent of Regions Bank's total deposits in Texas.
- *Tyler Assessment Area (Smith County)*
 - As of December 31, 2020, Regions Bank operated five branches in the assessment area, representing 5.2 percent of its branches in Texas.
 - As of June 30, 2020, the bank had \$ 343.0 million in deposits in this assessment area, representing a market share of 4.7 percent and 6.5 percent of Regions Bank's total deposits in Texas.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Metropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Austin	Consistent	Consistent	Consistent
Dallas	Consistent	Consistent	Consistent
Ft. Worth	Consistent	Consistent	Not Consistent (Above)
Longview	Consistent	Not Consistent (Below)	Consistent
Tyler	Consistent	Consistent	Consistent

For the lending test, Regions Bank received a rating of high satisfactory for the State of Texas. Performance in all five metropolitan limited-scope assessment areas was consistent with the statewide lending test performance. For the geographic distribution of loans, lending levels were good in Dallas and Tyler, while adequate in the remaining three metropolitan limited-scope assessment areas. Performance was good for the borrower distribution of loans in Longview and Tyler, while adequate in the remaining three metropolitan limited-scope assessment areas. The bank was a leader in making community development loans in all limited-scope metropolitan assessment areas, including Austin (\$189.7 million), Dallas (\$154.1 million), Ft. Worth (\$106.8 million), Longview (\$5.7 million), and Tyler (\$22.9 million).

For the investment test, Regions Bank received a rating of outstanding for the State of Texas. The bank had an excellent level of investments in the Austin, Dallas, Ft. Worth, and Tyler metropolitan limited-scope assessment areas, and performance in those assessment areas was consistent with the bank’s statewide investment test performance. The bank’s level of investments was poor in the Longview metropolitan limited scope assessment area, which was weaker than the bank’s statewide investment test performance.

For the service test, Regions Bank received a rating of high satisfactory for the State of Texas. Performance in four of the five the limited-scope metropolitan assessment areas was consistent with the bank’s state performance while performance in Ft. Worth was stronger than the bank’s state performance due to an excellent level of community development services.

The performance in the metropolitan limited-scope assessment areas did not affect the overall state rating.

**NONMETROPOLITAN STATEWIDE AREAS
LIMITED-SCOPE REVIEW**

The following assessment areas were reviewed using limited-scope examination procedures

**DESCRIPTION OF INSTITUTION’S OPERATIONS IN THE TEXAS NON-METROPOLITAN
ASSESSMENT AREAS**

- *Cass Assessment Area (Cass County)*
 - As of December 31, 2020, Regions Bank operated one branch in the assessment area, representing 1.0 percent of its branches in Texas.
 - As of June 30, 2020, the bank had \$38.5 million in deposits in this assessment area, representing a market share of 11.0 percent and 0.7 percent of Regions Bank’s total deposits in Texas.
- *Nacogdoches-Angelina-Anderson Assessment Area (Anderson, Angelina, and Nacogdoches counties)*
 - As of December 31, 2020, Regions Bank operated seven branches in the assessment area, representing 7.2 percent of its branches in Texas.
 - As of June 30, 2020, the bank had \$489.3 million in deposits in this assessment area, representing a market share of 13.8 percent and 9.3 percent of Regions Bank’s total deposits in Texas.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS

Through the use of available facts and data, including performance and demographic information, each assessment area’s performance was evaluated and compared with the bank’s performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendices G and H for information regarding these areas.

Performance in the Limited-Scope Review Nonmetropolitan Assessment Areas			
Assessment Area	Lending Test	Investment Test	Service Test
Cass	Not Consistent (Below)	Not Consistent (Below)	Not Consistent (Below)
Nacogdoches-Angelina-Anderson	Not Consistent (Below)	Not Consistent (Below)	Consistent

For the lending test, Regions Bank received a rating of high satisfactory for the State of Texas. Performance in both nonmetropolitan limited-scope assessment areas was below the statewide lending test performance. For the geographic distribution of loans, lending levels were adequate in Nacogdoches-Angelina-Anderson and very poor in Cass. Performance was good for the borrower distribution of loans in both nonmetropolitan limited-scope assessment areas. Community development lending performance in limited-scope nonmetropolitan assessment

areas was as follows: the bank made an adequate level in Nacogdoches-Angelina-Anderson (\$6.8 million) and made few, if any, in Cass (\$18,000).

For the investment test, Regions Bank received a rating of outstanding for the State of Texas. The bank's investment performance was weaker than statewide investment test performance in both limited-scope nonmetropolitan assessment areas. The bank had a poor level of investments in the Nacogdoches-Angelina-Anderson assessment area and made few, if any, investments in the Cass assessment area.

For the service test, Regions Bank received a rating of high satisfactory for the State of Texas. Performance in the Nacogdoches-Angelina-Anderson assessment area was consistent with the bank's state performance. The Cass assessment area, however, had poor service test performance, primarily due to very poor community development service performance.

The performance in the nonmetropolitan limited-scope assessment areas did not affect the overall state rating.

HMDA	Home Mortgage Disclosure Act (Regulation C)
HUD	Department of Housing and Urban Development
LMI	Low- and Moderate-Income
LTD	Loan-to-Deposit
LTV	Loan-to-Value Ratio
MD	Metropolitan Division
MSA	Metropolitan Statistical Area
OMB	Office of Management and Budget
REIS	Regional Economic Information System
SBA	Small Business Administration
USDA	United States Department of Agriculture

APPENDIX D – GLOSSARY

Aggregate lending: The number of loans originated and purchased by all reporting lenders in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Census tract: A small subdivision of metropolitan and other densely populated counties. Census tract boundaries do not cross county lines; however, they may cross the boundaries of MSAs. Census tracts usually have between 2,500 and 8,000 persons, and their physical size varies widely depending upon population density. Census tracts are designed to be homogeneous with respect to population characteristics, economic status, and living conditions to allow for statistical comparisons.

Community development: All Agencies have adopted the following language. Affordable housing (including multifamily rental housing) for low- or moderate-income individuals; community services targeted to low- or moderate-income individuals; activities that promote economic development by financing businesses or farms that meet the size eligibility standards of the Small Business Administration's Development Company or Small Business Investment Company programs (13 CFR 121.301) or have gross annual revenues of \$1 million or less; or, activities that revitalize or stabilize low- or moderate-income geographies.

Effective September 1, 2005, the Board of Governors of the Federal Reserve System (Board), Office of the Comptroller of the Currency (OCC), and the Federal Deposit Insurance Corporation (FDIC) have adopted the following additional language as part of the revitalize or stabilize definition of community development. Activities that revitalize or stabilize-

- I. Low- or moderate-income geographies;
- II. Designated disaster areas; or
- III. Distressed or underserved nonmetropolitan middle-income geographies designated by the Board, FDIC, and OCC, based on-
 - a. Rates of poverty, unemployment, and population loss; or
 - b. Population size, density, and dispersion. Activities that revitalize and stabilize geographies designated based on population size, density, and dispersion if they help to meet essential community needs, including needs of low- and moderate-income individuals.

Consumer loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, home equity loans, other secured consumer loans, and other unsecured consumer loans.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include nonrelatives living with the family. Families are classified by type as either a married-couple family or other family, which is further classified into 'male

APPENDIX D – GLOSSARY (Continued)

householder’ (a family with a male householder and no wife present) or ‘female householder’ (a family with a female householder and no husband present).

Full-scope review: Performance under the Lending, Investment, and Service Tests is analyzed considering performance context, quantitative factors (for example, geographic distribution, borrower distribution, and total number and dollar amount of investments), and qualitative factors (for example, innovativeness, complexity, and responsiveness).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that do business or have banking offices in a MSA to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applications, the amount of loan requested, and the disposition of the application (for example, approved, denied, and withdrawn).

Home mortgage loans: Includes home purchase and home improvement loans as defined in the HMDA regulation. This definition also includes multifamily (five or more families) dwelling loans, loans for the purchase of manufactured homes and refinancings of home improvement and home purchase loans.

Household: Includes all persons occupying a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Limited-scope review: Performance under the Lending, Investment, and Service Tests is analyzed using only quantitative factors (for example, geographic distribution, borrower distribution, total number and dollar amount of investments, and branch distribution).

Low-income: Individual income that is less than 50 percent of the area median income, or a median family income that is less than 50 percent, in the case of a geography.

Market share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Metropolitan area (MA): A MSA or a metropolitan division (MD) as defined by the Office of Management and Budget. An MSA is a core area containing at least one urbanized area of 50,000 or more inhabitants, together with adjacent communities having a high degree of economic and social integration with that core. An MD is a division of an MSA based on specific criteria including commuting patterns. Only an MSA that has a population of at least 2.5 million may be divided into MDs.

APPENDIX D – GLOSSARY (Continued)

Middle-income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent, in the case of a geography.

Moderate-income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent, in the case of a geography.

Multifamily: Refers to a residential structure that contains five or more units.

Other products: Includes any unreported optional category of loans for which the institution collects and maintains data for consideration during a CRA examination. Examples of such activity include consumer loans and other loan data an institution may provide concerning its lending performance.

Owner-occupied units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified investment: A qualified investment is defined as any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rated area: A rated area is a state or multistate MA. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multistate MA, the institution will receive a rating for the multistate MA.

Small loan(s) to business(es): A loan included in 'loans to small businesses' as defined in the Call Report and the Thrift Financial Reporting (TFR) instructions. These loans have original amounts of \$1 million or less and typically are either secured by nonfarm or nonresidential real estate or are classified as commercial and industrial loans. However, thrift institutions may also exercise the option to report loans secured by nonfarm residential real estate as "small business loans" if the loans are reported on the TFR as nonmortgage, commercial loans.

Small loan(s) to farm(s): A loan included in 'loans to small farms' as defined in the instructions for preparation of the Call Report. These loans have original amounts of \$500,000 or less and are either secured by farmland, or are classified as loans to finance agricultural production and other loans to farmers.

Upper-income: Individual income that is at least 120 percent of the area median income, or a median family income at least 120 percent, in the case of a geography.

APPENDIX E – GENERAL INFORMATION

Rounding Convention

Because the percentages presented in tables were rounded to the nearest tenth in most cases, some columns may not total exactly 100 percent.

General Information

The CRA requires each federal financial supervisory agency to use its authority when examining financial institutions subject to its supervision to assess the institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation of the institution. Upon conclusion of such examination, the agency must prepare a written evaluation of the institution's record of meeting the credit needs of its community.

This document is an evaluation of the CRA performance of **Regions Bank** prepared by the **Federal Reserve Bank of Atlanta**, the institution's supervisory agency, as of **April 25, 2022**. The agency rates the CRA performance of an institution consistent with the provisions set forth in Appendix A to 12 CFR Part 228.
